DALLAS (MARCH 1) PR NEWSWIRE - Hallwood Energy Partners, L.P. (AMEX: HEP) and Energy Development Partners Ltd. (AMEX: EDP), announced that two EDP unitholders have filed a lawsuit in Delaware state court against Hallwood Energy Partners, Energy Development Partners and certain of their affiliates seeking to enjoin consummation of the previously announced merger of Energy Development Partners into Hallwood Energy Partners and seeking damages in an unspecified amount. The plaintiffs also seek class certification to represent similarly situated EDP unitholders. The suit generally alleges breach of fiduciary duties to the plaintiffs in connection with the structure of Hallwood Energy Partners' acquisition of Quinoco Energy Inc., the general partner of Energy Development Partners, and in connection with the proposed structure of the merger of Energy Development Partners into Hallwood Energy Partners.

Hallwood Energy Partners, Energy Development Partners and the other defendants believe that the suit is without merit and intend to defend vigorously against it.

Hallwood Energy Partners and Energy Development Partners are engaged in the acquisition, development and production of oil and gas.

CONTACT: Cathleen M. Osborn, 800-525-3584; or William L. Guzzetti, 214-528-5588, both of Hallwood Energy Partners, L.P.

#90059p0886 02/28/1990 ~PR Newswire

COSTA MESA, CA (FEB. 28) PR NEWSWIRE - ICN Pharmaceuticals Inc. (NYSE: ICN) today reported a loss of $85.7 million in the fourth quarter of 1989, which included a nonrecurring, non-cash charge of $71 million principally due to a write-off of $56.6 million of goodwill related to the company's investment in its 74-percent owned pharamceutical research and development subsidiary, Viratek Inc. The company reported a loss of $82 million, or

$6.01 a share, for all of 1989, although sales reached a record $185.5 million. Net income in fiscal 1988 was $17.8 million, or $1.03 a share.

In late 1989, Viratek terminated a multicenter HIV trial in Canada with ribavirin as the result of the Canadian government's decision to make AZT available to the study's patient population. In addition, the company recently withdraw a Treatment IND application for ribavirin against HIV with the FDA. The additional write-off related to the expenditures incurred with the Canadian HIV clinical trials ($3.2 million), recognition of permanent impairment of ICN's non-current marketable securities ($3.9 million), certain litigation ($4.6 million), and other costs associated with the company's restructuring certain operations.

The company's pharmaceutical sales and marketing subsidiary, SPI Pharmaceuticals Inc., reported net income of $12.9 million, or $1.04 a share, on record sales of $124 million in fiscal 1989. SPI's results benefited from strong performance of its international operations, particularly its Mexican and Spanish operations, as well as the U.S. line of myasthenia gravis and dermatological products.

ICN Biomedicals Inc., the company's 84-percent owned subsidiary, a major supplier to the world biotechnology research and clinical diagnostic marketplaces, reported net income increased 69 percent to a record $6.1 million in fiscal 1989 on record sales of $61.4 million.

ICN Biomedicals sales benefited from continued demand of its biotechnology research and clinical diagnostic products. Instrument sales registered strong gains from the integration of new software and the introduction of new chromatography applications. Sales also benefited from the inclusion of one month of sales of Flow Laboratories, which ICN Biomedicals acquired on Nov. 8, 1989.

In December of 1985 Viratek received marketing authorization for ribavirin in the United States by the Food and Drug Administration for the aerosolized treatment of infants and young children hospitalized with severe lower respiratory tract infection caused by respiratory syncytial virus (RSV). In 1988 and 1989, Viratek received marketing authorization for ribavirin for RSV in nine other countries, including the United Kingdom, Sweden, Italy, Spain, Belgium and the Netherlands. In addition, it also received marketing authorization in Hong Kong and the Philippines for additional indications, including herpes simplex virus and hepatitis. In all, ribavirin is authorized for marketing in 17 coutnries, including the United States and seven European countries for RSV, and in 32 countries outside the United States for a variety of viral infections, including influenza, herpes simplex virus, hepatitis A, measles and chicken pox.

ICN said it began purchasing Viratek common stock beginning in 1986.

Reflecting a high level of research and development spending, Viratek reported a loss of $17.1 million in fiscal 1989.

During the year, the company continued to repurchase its outstanding public debt. Debt repurchased in 1989 totaled $22.6 million. Over the past three years, the company repurchased a total of $162.3 million of its public debt.

At year end, common shares outstanding totaled 12.2 million, a reduction of 23 percent from fiscal 1988.

DANBURY, CT (MARCH 1) PR NEWSWIRE - "The best means of continuing to build long-term shareholder value is to continue operating the three core businesses of Union Carbide Corporation (NYSE: UK) within the company's existing structure," Robert D. Kennedy, chairman, president and chief executive officer of Union Carbide, said today.

"Since 1986, Union Carbide has designed and carried out a systematic program aimed at improving shareholder value, sharpening the company's strategic focus, strengthening its operating capabilities in its core businesses, maximizing quality and efficiency throughout the organization, and enhancing its overall ability to achieve profitable growth," Kennedy said.

The three core businesses of Union Carbide Corporation are Union Carbide Chemicals and Plastics Company Inc., Union Carbide Industrial Gases Inc., and UCAR Carbon Company, Inc.

Kennedy added, "Over the past year, we have explored a wide range of strategic and restructuring alternatives. Our criteria have been enhancement of both shareholder value and the strengthening of our core businesses. At this time, there is no restructuring alternative that meets both criteria.

"Taking into account all relevant factors -- our operating performance, leadership position in our markets, prize-winning technology, increasingly stronger financial foundation and the commitment of our people -- we believe that Carbide should at this time continue on its present course under its existing structure," Kennedy said. "We have concluded that we will continue to manage the corporation with the development of value to the shareholder over the long term as the paramount objective. That objective will be served best by keeping the core businesses together, and developing their individual values to the maximum within the corporation. There are still many options available to make acquisitions, joint ventures and strategic alliances to extend and reinforce our strengths. The management and board will continue to consider all alternatives in light of relevant market and economic conditions."

Kennedy added, "We believe that all three businesses have good prospects and that each will make a strong contribution to our long-term financial goals of steady 6 to 7 percent capital growth and an average 20 percent return on equity over the course of the business cycle." He said there is always interest among our investors in both our immediate progress and our long-term outlook. "We believe that this strategic commitment will be important to our long-term shareholders," Kennedy said.

"The board's strong endorsement of our strategy and potential, and the confidence it reflects in the people of Carbide and its business strength, is a profound statement and will inspire everyone at Carbide to redouble their efforts to achieve consistent growth and results for our stockholders," Kennedy concludes.

CALGARY, Alberta (FEB. 28) PR NEWSWIRE - Computalog Ltd. today announced that during the fiscal year ended Dec. 31, 1989 a loss of $14,666,000 or 64 cents per share was incurred compared to a profit of $2,203,000 or 10 cents per share in 1988. Revenue for 1989 was $88,477,000, including $23,935,000 from U.S. oprations added in 1989, as compared to $90,309,000 for 1988, which included no U.S. revenue.

Revenue for the fourth quarter of 1989 was $23,376,000, including $6,663,000 from U.S. operations, compared to revenue of $20,886,000 in 1988. The loss for the fourth quarter of 1989 was 18 cents compared to a loss of 2 cents for the same period of 1988. The fourth quarter was impacted by costs of discontinued operations, inventory write-downs and employee severance payments.

Accounting reporting requirements require that all transactions regarding discontinued operations be recorded on the published financial statements as a net amount. Computalog Ltd. disposed of its Geophysical Division in late 1989 and therefore the statement of operations and retained earnings to be contained in the annual statements will not include revenues or expenses from discontinued operations. For comparative purposes, revenues from discontinued operations were included in the above numbers. Net profit numbers are not affected by such accounting treatment.

VANCOUVER, British Columbia (FEB. 28) PR NEWSWIRE - W. (Bill) Kerkhoff, chairman and chief executive officer of Kerkhoff Industries Inc. (AMEX: KIX), announced in Vancouver today that its subsidiary, Cascade Windows Ltd. had purchased 100 percent of the share capital of Wescraft Manufacturing Co. Ltd., Victoria, one of British Columbia's foremost aluminum window manufacturing companies.

Kerkhoff said "We have been looking for opportunities to expand our manufacturing capability in this area for awhile. Wescraft is an excellent company which has, over a period of 34 years, built up a solid reputation on the basis of technically advanced products. It has a skilled production team, experienced management and will fit in well with our own window operations, Cascade Windows and Kerkwood Windows. The combined window manufacturing group will have annual revenues in excess of $30 million."

He said that no changes were envisaged in the management of the company and that while there would be some rationalization of production, no jobs would be lost as a result of the takeover.

"Far from destroying jobs, the enhanced operation will create a secure future with greater opportunities for workers at both plants as the two companies have good growth potential," he said. "Our Manufacturing Division plans to be the major force in the window business in the Pacific North West. This acquisition already establishes Kerkhoff Industries Manufacturing Division as the largest window producer in British Columbia."

SAN DIEGO (FEB. 28) PR NEWSWIRE - Imperial Corporation of America (ICA) (NYSE: ICA), the parent company of Imperial Savings Association (ISA), today filed for protection in federal bankruptcy court. The filing under Chapter 11 of the United States Bankruptcy Code will protect ICA's present assets, consolidate pending disputes and litigation in one court and give the company an opportunity to file a plan of reorganization.

"Today's filing was of the petition only. More extensive materials detailing company's assets, liabilities and other pertinent information will be submitted to the bankruptcy court in the next two weeks," said attorney Patrick Shea, a partner at Lillick & McHose, the law firm retained to handle the bankruptcy for ICA.

With the recent takeover of ISA by the federal government, ICA felt obligated to file Chapter 11 in an effort to protect its other operating subsidiaries.

"This was a very difficult decision," said Lyman Hamilton, chief executive officer of ICA. "However, in an effort to protect our bondholders, shareholders and continue our operating businesses, we believe this was a prudent thing to do. Under Chapter 11, we put ourselves in the best position to present to the bankruptcy court the clearest picture of our current assets and liabilities, in addition to presenting the strongest reorganization plan which has the greatest likelihood of success."

ICA's largest subsidiary and San Diego's third largest financial institution, ISA, was placed into a conservatorship by federal regulators late last week, and is being managed by the Resolution Trust Corp., the federal agency established to serve as conservator for such institutions.

"This bankruptcy will focus on ICA's non-banking, operating subsidiaries,"

said Shea. "More details will be forthcoming in the next two weeks."

SEATTLE (FEB. 28) PR NEWSWIRE - Thai Airways International's new Boeing 747-400 has become the first jetliner to fly nonstop from Seattle to Bangkok, a distance of 7,812 miles (12,572 km), Boeing Commercial Airplane Group said today.

During the 15 hour 5 minute delivery flight, Feb. 23, the Thai 747-400 crossed the Pacific Ocean via King Salmon, Alaska, and followed the northernmost airway over Japan, Taiwan, Vietnam, Laos and Thailand.

The airplane reached a maximum altitude of 39,000 feet (11,887 m). Total fuel used was 335,720 pounds or 49,736 gallons. At takeoff, the 747 weighed 809,380 pounds including a full fuel load of 380,600 pounds or 56,385 gallons. Maximum takeoff weight in Thai's configuration is 850,000 pounds.

Captain Payoon Puakpong, Thai vice president of flight operations, was in command of the flight. On board were 22 crew members and 105 passengers including Air Chief Marshal Weera Kitchathorn, president of the airline, and senior officials from Boeing, the airline and the Thai government.

The Thai Boeing 747-400, named "Chaiprakarn," is the first of three ordered by Thailand's flag carrier. The second 747-400 is scheduled for delivery in March and the third in early 1991. This first Boeing 747-400 aircraft will serve Thai routes between Bangkok and London.

UNIVERSAL CITY, CA (FEB. 28) PR NEWSWIRE - The MCA Music Entertainment Group announced that on Feb. 28, 1990, it had acquired all of the outstanding common shares of the independent record label, GRP Records Inc., for shares of MCA Inc. common stock valued at approximately $40 million.

As outlined by Al Teller, chairman of the MCA Music Entertainment Group, Larry Rosen and Dave Grusin, co-founders and co-presidents of GRP Records, the label, which has been distributed by MCA Distributing since 1987, will

continue to operate out of its New York headquarters. Rosen will assume the new title of president with Dave Grusin as executive vice president. It was emphasized that the company does not intend to make any changes in its management or staff as it is now structured. As Rosen pointed out, "We have been successful with the team we have in place and we fully expect to continue with this team."

Founded in 1983 by Grusin and Rosen as an outgrowth of Grusin- Rosen Productions, GRP has become one of the most successful independent record labels in the world, combining world class artistry with state of the art technology, and innovative marketing and business strategies. Since its inception, the label has gone from approximately $800,000 to over $20 million in annual worldwide gross sales. GRP pioneered on all digital recording philosophy long before the advent of the compact disc. The company became the first non-classical American label to manufacture and market the new CD format and is the first American company to commercially to introduce its product on DAT (Digital Audio Tape). Reaching the adult consumer ranging in age from 24 to 54, GRP has consistently dominated the contemporary jazz charts, has been nominated for over 45 Grammy Awards and was named in 1989 as the No. 1 contemporary jazz label by Billboard Magazine. Winning four Grammy Awards in 1990 alone, GRP's renowned artist roster is led by Grusin, an Academy Award winner and recent three time Grammy Award winning keyboardist, arranger and composer. The roster boasts such stars as Chick Corea, Lee Ritenour, The Rippingtons, David Benoit, Diane Schuur, Tom Scott, Gary Burton, New York Voices, the recently signed Patti Austin and vocalist Carl Anderson. GRP's most recent successes include such No. 1 chart toppers as "Happy Anniversary Charlie Brown," Grusin's "Migration," "The Chick Corea Akoustic Band," David Benoit's "Waiting For Spring," and the surprise hit soundtrack, "The Fabulous Baker Boys."

GRP Records' success has extended beyond the United States and includes their wholly-owned subsidiary GRP Ltd., set up to market and distribute GRP product throughout Europe. GRP Ltd. is headquartered in Zurich, Switzerland. Through distribution and licensing agreements with such major companies as JVC in Japan and EMI in Hong Kong and Southeast Asia, GRP product is available throughout the world.

In commenting on the acquisition of GRP, Al Teller stated: "GRP Records has come to represent musical and technological excellence to the music buying public, in particular to the adult consumer. The success of the company is a tribute to the unique vision of Dave Grusin and Larry Rosen, who have combined their artistic sensitivity and love of music with entrepreneurial business acumen. I am pleased that the MCA Music Entertainment Group will now have the opportunity to work together with GRP to fulfill the label's worldwide goals for the future."

BEIJING (FEB. 28) UPI - Foreign correspondents filed a complaint Wednesday with China's Foreign Ministry over a recent rise in official surveillance of their activities, deploring the monitoring as ''systematic harassment.''

The move came after several foreign reporters in the capital complained that Chinese security agents had followed them or tried to intimidate Chinese citizens who had met with the journalists.

In a letter to the Foreign Ministry's Information Department, the agency responsible for dealing with foreign reporters, the Foreign Correspondents Club of Beijing charged that surveillance ''has noticeably increased in the last two weeks.''

The club represents the 170 foreign reporters assigned to Beijing, including 34 resident American correspondents.

''Many foreign correspondents have been followed by Chinese security agents in the streets of Beijing and some of our Chinese friends have been interrogated because they dare to see us,'' club President James Munson wrote in the letter.

''There is no other place in the world today where foreign correspondents are subject to such intense, systematic harassment as we are in China,'' he said.

''We strongly object to this interference,'' Munson wrote, requesting that ''immediate steps be taken to halt these attempts to intimidate and obstruct our normal and lawful professional and social contacts with Chinese citizens.''

Chinese security agents routinely keep tabs on foreign journalists through surveillance and electronic monitoring of telephones, offices and apartments. Officials sometimes question Chinese who have spoken to foreign reporters.

Surveillance intensified after martial law was declared last year before the crackdown on the pro-democracy movement. It has been tightened again since the lifting of martial law in January.

Chinese sources have indicated the heightened monitoring reflects an official policy, approved recently by the government, to restrict information available to foreigners.

American and European reporters have reported in the past few weeks that they have been tailed frequently by plainclothes agents. Others have noted agents trying to photograph or record their meetings with Chinese acquaintances.

In one incident, three Chinese who visited the home of a European reporter were intercepted and interrogated by security agents as they left. Other Chinese who have met with foreign reporters have been admonished later by their workplaces to halt such contacts.

RIDDLE, Ore. (FEB. 28) UPI - Glenbrook Nickel Co., the nation's only nickel mine, is preparing for a possible temporary shutdown due to sagging nickel prices, officials said Tuesday.

Glenbrook in 1988 bought out the Hanna Co. mine, located in southern Oregon near Riddle, and employs 230 workers at the facility.

Glenbrook, part of a British Columbia company, Cominco Resources International, began the operation using low-grade ore that Hanna had stockpiled. At the time, prices were in the range of $7 to $7.50 a pound. Last month, prices dropped to $3, although they were up to $3.58 this week.

Plant manager Michael Carr said Cominco is considering importing high-grade ore from New Caledonia to be processed in a newly completed smelter at Nickel Mountain near Riddle. New Caledonia, near Australia, is a major source of ore.

The ore would be shipped to the Port of Coos Bay and trucked to the Douglas County plant.

Glenbrook also is watching economic changes in the Soviet Union, a major nickel producer. If the Soviets export heavily, Carr said, it could affect world market prices and have an effect on Glenbrook's production.

#90059u0127 02/28/1990 ~United Press International

LONDON (FEB. 28) UPI - Confusion over a European Executive Commission's requirements for testing cosmetics on animals sent share prices of a natural cosmetics giant plummeting and fueled a campaign against such tests, officials said.

Animal rights groups and ''cruelty-free'' cosmetics companies said Tuesday the commission has unpublished proposals that could require animal testing for cosmetics ingredients previously believed safe.

They said the Brussels-based commission, as part of its program to unify standards throughout Europe by 1992, has proposed new rules requiring the retesting of many products already on the market.

''We have copies of the pre-draft they've put out, and (ingredients such as) honey and lemon could be tested on animals and thousands of ingredients could be subjected to extra tests,'' said Steve McIvor of the British Union for the Abolition of Vivisection, or BUAV.

Concern about the proposals affected Body Shop International, a natural cosmetics company with about 400 stores worldwide that sells its products with the guarantee that none has been tested on animals.

Speculation that the firm could become locked in a battle over possible product testing requirements caused its shares to plunge $1.27 on London's International Stock Exchange, cutting the company's market value by $108.1 million to $689 million.

Reassurances by an unnamed senior Economic Community official that proposed amendments to the EC's 1976 cosmetics directive would not call for an increase in animal testing helped Body Shop shares rise 57 cents to close at $8.60 Tuesday.

An EC source told United Press International no additional animal testing will be required, but laws will focus on tightening existing standards, particularly regarding labeling and the definition of a cosmetic vs. a medicine.

Their pledges failed to placate the BUAV or The Body Shop.

''We've not had any reassurance at all,'' said McIvor, who added that the BUAV has been working with two EC officials who have ''accepted there could be implications for increased testing.''

''This either means that they've scrapped the proposal or they are pretending that everything is going to be all right,'' McIvor said.

McIvor said the EC's ambiguous stance was at odds with the trend among major cosmetics manufacturers, such as Avon, Revlon and Max Factor, which have gradually reduced or eliminated animal testing.

The Body Shop said next week it will present demands to the commission that will include a complete ban of animal testing within the cosmetic industry by 1993, and official recognition to proven testing alternatives.

''We want cosmetic companies which continue to test their raw ingredients on animals to be forced to carry labels saying 'This product has been

tested on animals,''' said Anita Roddick, founder and managing director of The Body Shop.

Roddick, speaking to a group of franchisees from more than 50 countries, said the company collected from its British outlets 75,000 signatures in one day for a petition against animal testing.

''Our share prices dropped because there was fear in the city that we might be forced to close down because of a change in legislation,'' Roddick said.

''Amazingly it appears that some shareholders are unaware of our values. Our shops are buzzing, the public (is) crying out in support for a ban on animal testing and our shares drop,'' she said. ''They must be living on another planet.''

#90059u0136 02/28/1990 ~United Press International

WASHINGTON (FEB. 28) UPI - Although a plea bargain is still a possibility, Attorney General Dick Thornburgh rejected allegations that the Justice Department might allow Exxon Corp. to enter a ''sweetheart plea'' to the criminal charges filed against the oil company over the Alaska oil spill.

At a news conference Tuesday announcing the five-count indictment against Exxon, Thornburgh confirmed that his department negotiated with Exxon last week in an attempt to reach an agreement, but he said no deal was ever struck because the oil company would not approve the government's terms.

Thornburgh said the terms ''we insisted upon were not acceptable'' to Exxon.

''It's all down the tubes,'' added Justice Department spokesman David Runkel of last week's effort to arrange a plea.

Still, the attorney general said Exxon retained the option of trying to work out a plea bargain agreement. ''A plea can be entered by any defendant to any indictment,'' Thornburgh said. ''That could be done at arraignment. That could be done at any time up to the time the case goes to the jury.''

But Thornburgh scoffed at allegations by some environmentalists of ''a secret deal'' under which the Justice Department would announce the criminal charges to satisfy public opinion, but ultimately allow a plea bargain that would go easy on Exxon.

The allegations of ''some secret deal, some sinister arrangement that's been made with Exxon to permit them to enter some kind of sweetheart plea

to these charges, I think (Exxon officials) would find that ludicrous, as I do,'' Thornburgh said.

The attorney ral said his department was fully committed to prosecuting Exxon ''to the maximum extent the law permits'' unless Exxon decided to enter a guilty plea.

''It's up to us to either prove our case in court or to respond to the defendant in the event they want to enter a guilty plea,'' Thornburgh said. ''They can enter a guilty plea tomorrow. It's up to the judge then to sentence them.

''We cannot force them to go to trial,'' he added. ''But in the event they do go to trial, we will seek the maximum penalties set forth under law.''

If convicted on all counts stemming from last March's Exxon Valdez tanker spill in Prince William Sound, the oil giant could be liable for more than $700 million in fines, the Justice Department said in a statement.

Exxon was charged with violations of the Clean Water Act, the Refuse Act, the Migratory Bird Treaty Act, the Ports and Waterways Safety Act and the Dangerous Cargo Act. The charges under the latter two laws are felonies.

Under the failed plea Exxon would have avoided indictment by agreeing to contribute $550 million to an environmental restoration fund and agreeing to pay a criminal fine that officials termed substantial, according to secret documents viewed by United Press International.

Thornburgh denied that the agreement failed because of stiff opposition in Washington and Alaska, and reiterating his statement that the petroleum company did not approve of the Justice Department proposal.

Thornburgh refused to confirm or outline details of the plan.

Alaska officials had angrily charged that the agreement as proposed would have compromised damage claims filed against Exxon by the state and private citizens.

#90059u0187 02/28/1990 ~United Press International

RIO DE JANEIRO, BRAZIL (FEB. 28) UPI - About 84,000 Carnival dancers paraded in varying states of undress, but none was fully naked as celebrants grudgingly obeyed a ban on total nudity.

''I am against all types of moralism,'' Rio de Janeiro Mayor Marcelo Alencar said Tuesday in criticism of the ban. ''I'm suspicious of all moralists because at the bottom of it there's always a hypocrite.''

The directors of the League of Schools of Samba prompted the nudity dispute by voting to prohibit the display of sexual organs, either by samba dancers or statues on floats.

Carnival revelers angrily denounced the league's ban.

''They are fascists because they have ended the democracy that reigned during the Carnival,'' said Maria Aparecida dos Santos, 23, who danced bare-breasted but otherwise covered as she paraded with the Sao Clemente samba school.

Rio's Carnival is an intoxicating, feather-plumed ritual of excess that ends on Ash Wednesday, the beginning of the 40-day Christian penitential season of Lent, which ends on Easter.

At least 37 other women bared their breasts during the parade of the 16 samba schools, which began Sunday night and ended Tuesday in the Sambodrome, an open-air auditorium for 80,000 people built for the festivities.

''I hope the league revises this prohibition next year because it takes away freedom of expression,'' said model and sculptor Enoli Lara, who last year paraded without a stitch.

Coming closest to total nudity was actor Jorge Lafond, 29, who wore only a tiny G-string in a float by the Beija Flor samba school that imitated a volcano, spewing smoke and flashing colored lights.

Twenty-three young men paraded with bare buttocks in a float by the ''Caprichosos de Pilares'' school, which paid homage to the bohemian life.

The prohibition included the representation of sex organs on statues. For example, the Santa Cruz samba school's statue depicted Superman sitting on a toilet with his pants around his ankles, but the Man of Steel's genitals had to be covered with his cape.

Under Carnival rules, a samba school would lose points if any of its dancers paraded totally naked or if it presented representations of sexual organs. The loss of points would have diminished their likelihood of winning the prize money that finances their operation for the next year's parade.

The samba schools tried to compensate for the lack of total nudity by using special effects, such as lasers, allegorical floats as tall as four stories, lights shows directed by computer and statues that emitted sounds.

News commentators said the combined use of ostentatious costumes made of

feathers, precious stones, silk and fine cloth with modern technology had brought the Rio Carnival into a new era.

Yet as a result of the high-tech innovations, two people were electrocuted and a third suffered grave burns when a 30-foot-high float collided with a power cable when they hurried up the parade.

Humorous homages to Brazilian historical figures, its grim economic situation and the first direct presidential elections in 29 years, carried out last December, dominated the themes of the schools of samba during the Carnival.

More than 800 people were treated by doctors for fatigue, heart trouble, high blood pressure and drunkenness during the parade.

#90059u0252 02/28/1990 ~United Press International

WASHINGTON (FEB. 28) UPI - The Food and Drug Administration should require birth control pills to bear warnings that long-term use of oral contraceptives may raise a woman's risk of breast cancer, a consumer group said.

In a petition asking the FDA for stronger warning labels, Public Citizen Health Research group claimed Tuesday the agency has ignored 13 studies published since 1977 - seven since 1987 - that have found an association between use of the Pill and breast cancer in women under age 54, most of whom developed cancer before age 45.

Fourteen studies published in the past decade found no link between oral contraceptives and breast cancer. But Public Citizen said those studies included few women who started using the Pill at a young age and continued for many years.

Last year, an FDA advisory panel voted against changing warning labels on oral contraceptives, saying current scientific evidence is not consistent enough to support fears that women under 45 who take the Pill run a greater risk of getting breast cancer.

''By refusing to act, the FDA is denying women the right to make their choices based on the most recent information available,'' said Dr. Sidney Wolfe, director of the Public Citizen Health Research Group, founded by consumer activist Ralph Nader.

The FDA panel acknowledged some studies show an increased risk in certain women, including those under 45, those who are longtime users or those who began taking the Pill at an early age or before having children. But no uniform risk pattern was found across the studies, and when viewed as a

group the findings appeared contradictory, the panel said.

Only 13 percent of breast cancer cases occur in women under 45. Estimates on the number of U.S. women currently using birth control pills, which came into use about 30 years ago, range from about 7 million to 13 million.

FDA officials had no comment on the group's petition Tuesday.

Wolfe called the current labeling of birth control pills ''inadequate, years out-of-date and misleading.'' He called Parke-Davis of Morris Plains N.J., and Mead Johnson & Co. of Evansville, Ind., ''the worst offenders '' saying their labels state ''overwhelming evidence'' suggests oral contraceptive use is not associated with greater risk of breast cancer, regardless of a woman's age at first use or whether she had a baby before starting.

''In fact, a woman's age and childbearing status when she begins using the Pill, along with the number of years she uses the Pill, are precisely the areas in which questions have been raised,'' he said.

Officials from Parke-Davis and Mead Johnson & Co. could not immediately be reached for comment Tuesday.

Public Citizen cautioned women against suddenly stopping the Pill because of worries about breast cancer, and urged women to discuss any concerns with their doctors.

THE NEW YORK TIMES

Violeta Barrios de Chamarro's remarkable victory in Nicaragua is far from complete. Her Sandinista opponents are still entrenched in power. Her own supporters are deeply divided. Her country's economy is a mess. She'll need generous help, especially from Washington.

Even so, the good news from Nicaragua deserves to be savored while its multiple surprises are fresh. Chamarro's upset is a devastating rebuke to Sandinistas who midjudged popular sentiment and the appeal of the principled challenger. But if President Daniel Ortega guessed wrong about the outcomes, so did his detractors who claimed that the Sandinistas were incapable of conducting a truly free election.

BALTIMORE EVENING SUN

Sunday's election in Nicaragua appears to have produced a stunning upset, bringing to power a faction supported by the U.S. government. The outcome in this country can be greeted with relief and sorrow - relief that our 10-year obsession with the politics of an insignificant country is finally over; sorrow that so much energy and money has been expended to create so much misery with such uncertain results.

In due time, no doubt, Nicaragua will go down in history as Ronald Reagan's war. Although at the outset Reagan conjured up absurd pictures of Nicarguan troops invading Harlingen, Texas, his real purpose, blurted out in an unguarded moment at a press conference, was to make the Sandinista regime ''cry uncle.'' And now, after 10 years of economic blockade and surrogate warfare, the most we can claim is that our side won a close election in a devastated country.

NEW HAVEN (CONN.) REGISTER

Judge Barbara Rothstein once again has upheld this nation's most cherished traditions, more cherished than the flag itself - freedom from the insidious tests of loyalty with which some self-proclaimed patriots would shackle us and the right to dissent, even to the burning of a symbol that most of us hold dear.

Now that those rights have been reaffirmed in court, we hope that the politicians will have the good sense to let this issue rest as it should have been allowed to rest long ago. The national preoccupation with such a superficial issue has been due in large measure not to the antics of the flag burners, but to the grandstanding of politicians who saw it as a wonderful chance to play to the crowd.

A free nation can quite easily survive one or two flag burnings every couple of years. It can less easily survive a generation of politicians whose idea of leadership is to get out in front of every motherhood and apple pie parade that comes along.

THE NEW YORK DAILY NEWS

Malcolm Forbes was probably America's most lyric enthusiast of capitalism. He inherited a pile of money - and made it a much bigger pile. Unashamed of his wealth, he spent it with panache. He knew that it was the product of hard work, so he played every bit as hard as he worked. Most of all, he knew that it was the system of democratic capitalism that made it possible for him to enjoy the fruits of his labor. ...

Forbes lived just long enough to see Eastern Europe and the Soviet Union discover that he had been right all along. His self-chosen epitaph will be: While alive, he lived. Nice. But it might just as well have been: Here lies an unashamed capitalist.

THE MILWAUKEE JOURNAL

No one should be surprised that a federal court has rejected the flag-burning ban Congress enacted last year. The legislation was an open effort to undo an important Supreme Court decision, and the lower courts tend to take their cue from the high tribunal, not Capitol Hill.

Furthermore, both the district court and the high court had constitutional logic on their side. Burning the flag as an act of political protest may be repugnant to most Americans, but it's still a form of political expression and therefore protected by the First Amendment. If freedom of speech means anything, it cannot be confined to people who express themselves in pleasant ways. Those who choose to be irreverent or shocking must by allowed to sound off, too.

Despite its correctness and inevitability, the decision may meet strong resistance. Certain politicians, exploiting public affection for the flag, are likely to seize on the ruling as an excuse to push for a constitutional amendments. They tried last year and probably will try again. To his great discredit, President Bush led the effort in 1989.

Such an amendment would alter the Bill of Rights for the first time ever - a dangerous precedent. Can any informed politician truly believe that the flag of freedom would be honored by an amendment that abridged the charter of freedom? Not likely. But many politicians, alas, do believe that wrapping themselves in the flag is an easy way to win votes.

THE INDIANAPOLIS NEWS

This country's agricultural policies are a gargantuan mess.

The federal government pays farmers not to farm in the Midwest and then spends billions of dollars to irrigate new farmland in the Southwest. It funnels huge subsidies to milk producers and then tells them to kill more than a million dairy cows. It guarantees high sugar prices and freezes out foreign sugar producers. Meanwhile, U.S. trade officials are overseas complaining about trade barriers that keep U.S. farm products out of other countries.

... A return to sanity in agricultural markets, however, would mean cutting back and even eliminating one huge federal program after another. Some of these cutbacks have slowly begun. Overall government farm

subsidies dropped from a peak of $26 billion in 1986 to $11 billion last year. But the subsidies have leveled off at $11 billion per year.

Farmers who have come to depend on subsidies need to be weaned. A reasonable plan might be to gradually reduce farm subsidies over 10 years. By 2000, farmers would be on their own in a free market.

Someday, somehow, this absurd agricultural socialism must end.

SIOUX FALLS (S. DAK.) ARGUS LEADER

It was nice while it lasted. But South Dakota's days in the primary election spotlight may be over. California is on the verge of becoming the most prominent player in the presidential nomination game. ...

South Dakota grabbed a piece of the national campaign spotlight in 1988 by moving its presidential primary from June to February. The state held its presidential primary just two weeks after Iowa's famous caucuses and a week after New Hampshire's first-in-the-nation primary. As a result, presidential candidates could NOT ignore South Dakota. ...

... In 1992, the spotlight that shines on early primary and caucus states may shift to California, the most heavily populated state in the nation. Both chambers of the California legislature have approved proposals to move that state's presidential primary from early June to the first Tuesday in March. ...

... Assembleyman Jim Costa (D-Fresno) is the main sponsor of California's early-primary bill. ... (Aide to Costa) Terry Reardon said California's move toward an early primary could prompt proposals for regional primaries or for a system in which states rotate for the honor of holding the first primary in a campaign.

For South Dakota and most of the rest of the nation, either of those alternatives would be better than a system in which one state dominates.

CHICAGO SUN TIMES

It's a strange notion to argue, as does British Prime Minister Margaret Thatcher's government, that easing economic sanctions against South Africa strengthens the hand of South African President Frederik W. de Klerk to move against apartheid.

If anything, Britian's unilateral and swift easing of sanctions gives aid and comfort to South African supporters of apartheid. By lifting the ban on new investments in South Africa, Britain's message to the South African racists is: You don't have to do much to satisfy us.

ARKANSAS DEMOCRAT, LITTLE ROCK, ARK.

Sure enough, a federal judge has ruled unconstitutional the anti-flag burning law Congress passed last fall. And here's betting that the U.S. Supreme Court ... will uphold the ruling.

After all, U.S. District Judge Barbara Rothstein of Seattle ruled in full accord with the high court's own ruling in a Texas case last year that flag burning is a protected exercise of free speech.

Granted, Rothstein added a rhetorical flourish of her own. She called the flag the symbol of freedom and said it can't endure as such unless the right to burn it is upheld as vigorously as the right to wave it.

That little play on the word freedom - which is far from being the only thing the flag symbolizes - sets up a repellantly flippant parallelism between respect for and destruction of the flag. It should gladden the hearts not just of flag burners but those who defend their behavior as free speech. ...

There are only two certain ways to put respect for the flag law beyond the reach of the Supreme Court. One is by a constitutional amendment. The other is for Congress to enact a law like the current one and invoke Article III of the Constitution to deny the Supreme Court review jurisdiction over it.

But Congress was probably betting when it enacted its flag law that it wouldn't have the issue before it again - that the American people wouldn't rise up with such fury if the court killed the flag law as they did when it refused to protect the flag itself.

The sad thing is that Congress will probably prove to have been right.

SAN DIEGO UNION

Recent evidence that Cambodia's communist-backed government army is once again being supported by thousands of Vietnamese troops will complicate peace talks scheduled to begin today in Jakarta, Indonesia. The talks seek an end to the bitter civil war that has torn Cambodia apart for two decades.

Eastern Bloc diplomats in Phnom Penh have revealed that Cambodian Premier Hun Sen requested Vietnamese military aid only one month after the

official withdrawal of Vietnamese troops to curb the advance of Chinese-backed Khmer Rouge guerrillas toward key towns in the northwest.

The success of the Khmer Rouge in filling the power vacuum left by the departing Vietnamese is bad news for Cambodia's long-suffering population and for Western nations implacably opposed to Pol Pot's genocidal regime. During it's rule from 1975 to 1979, the Khmer Rouge was responsible for the deaths of as many as 3 million Cambodians.

Previous peace talks between the Phnom Penh government and three resistance groups led by Prince Sihanouk, Pol Pot and Son Sann have failed to narrow differences on most key points. If this week's Jakarta conference is to fare any better, two top priorities must be negotiation of a cease-fire and assurances that Vietnamese troops will be repatriated speedily. Only then can there be meaningful talks leading to the free elections and democratic rule that could finally spell and end top Cambodia's misery.

WYOMING EAGLE

Admittedly, rap music isn't our favorite form of music; we even tend to change the channel when it comes on MTV. But we were extremely please to see that an Alabama record store owner was finally cleared of obscenity charges this week for selling a sexually explicit tape by the rap group 2 Live Crew.

The Alexander City Circuit Court jury's verdict overtuned the nation's first obscenity conviction for music and will set a legal precedence that will hopefully guarentee our First Amendment rights.

As the store owner's attorneys were able to successfully point out in his appeal, other examples of entertainment at least as explicit as the rap tape - including the Eddie Murphy movie ''Raw'' - had been tolerated in the small town without any arrests for alleged violation of the obscenity ordinance.

We hope the jury's decision will demonstrate to other communities that music retailers cannot possibly be held responsible for the content of the material they sell.

ANALYSIS BY HELEN THOMAS

WASHINGTON (FEB. 28) UPI - The collapse of communism in Europe is sending shock waves through Central America.

And the same reasons appear to apply for the rejection of Marxist governments in both regions. Top among them is the depressed, and often desperate economies of the countries that are falling by the wayside.

The Soviet imposed system of government control of all goods and services over a period of 40 years brought little prosperity and much sacrifice. The economic utopia that was supposed to emerge from the dictatorship of the people was far from that.

The Communist Party elite in Moscow and the satellites in the Soviet sphere, including Poland, Romania, Czechoslovakia and Bulgaria, thrived and lived high on the hog.

But the masses, who had nothing to lose but their chains as the communist battle cry claimed, were ground under oppressive regimes that produced only the bare necessities and little consumer goods.

In the last year, those governments hit rock bottom, leading Soviet leader Mikhail Gorbachev to initiate reforms that led to the beginning of the end of communism in Eastern Europe.

In Nicaragua, the Marxist government of President Daniel Ortega was subjected to a relentless U.S.-backed military and economic assault for eight years. From the moment he came into office, former President Ronald Reagan threw down the gauntlet against communist expansion in the hemisphere, targeting Nicaragua and El Salvador at a heavy price.

Nicaragua reeled under the two-prong attack of economic sanctions and guerrilla warfare by U.S.-trained and backed rebel Contras. The bloody skirmishes left hundreds dead on both sides.

The United States poured untold millions of dollars into the guerrilla

effort. At one time the CIA went beyond the pale by issuing an assassination manual. The illegal backing of the Contras with funds from the covert sale of arms to Iran also created the Iran-Contra scandal that plagued Reagan in the final years of his presidency.

The election of a democratic regime under Violeta Chamorro in Nicaragua opens a new chapter and is expected to result in an influx of U.S. aid to the new government as well as a quick lifting of the U.S. embargo.

The Nicaraguan election also further isolates Cuba as the only remaining communist government in the Western Hemisphere. President Fidel Castro is finding it increasingly difficult to rely on Soviet leader Mikhail Gorbachev for arms and aid.

Gorbachev, who visited Castro last year, tried to deliver the message that Stalinism was out and that his perestroika and glasnost reforms were the wave of the future. The Cuban leader was not in a mood to accept the admonition at the time. But now the handwriting is on the wall.

With the fall of the Berlin Wall, the peaceful revolutions in Eastern and Central Europe, Castro will be feeling the pressure more and more, and his remaining allies and friends are becoming more remote.

Karl Marx is the big loser and by early in the 21st century, his political philosophy may be history. China and Albania are trying to hold the fort, but it's doubtful that they can withstand the democratic juggernaut sweeping the globe.

All over the world, the people are turning the rascals out. They are able to do so because peaceful revolts are being allowed to prevail. It is a remarkable turn of events when guns are silent and decisions are allowed to be made at the ballot box.

#90059u0447 02/28/1990 ~United Press International

MOSCOW (FEB. 28) UPI - Viktor Afanasiyev, fired as editor of the Communist Party daily newspaper Pravda in October, was relieved Wednesday as chairman of the Union of Journalists, the official news agency Tass said.

Ivan Laptev, editor of the official government newspaper Izvestia and one of the leading liberal newspapermen, was elected to succeed the 68-year-old Afanasiyev as the head of the Union of Journalists, it said.

Tass said Afanasiyev's request to be relieved of his post was granted at a full, or plenary, session of the Union of Journalists.

During his 13-year tenure as Pravda's chief editor, Afanasiyev kept the

Communist Party daily so conservative that its circulation dropped precipitously amid the reformist perestroika or ''restructuring'' campaign by Soviet leader Mikhail Gorbachev.

Afanasiyev was finally fired as Pravda editor at an Oct. 19 session of the ruling Politburo last year, and was replaced by Ivan Frolov.

In one of his final parting shots in the newspaper, Afanasiyev attacked liberal historian Yuri Afanasiyev, saying the only thing they had in common was their last names. The two are not related.

Yuri Afanasiyev had called on the Pravda editor to resign last September.

The editor's loss of the union post marked the continuation of his fall from power, although he remains a member of the Central Committee of the Communist Party.

Under Communist Party rules, only the Party Congress held every five years can elect a new Central Committee. That means powerful figures such as regional party leaders or editors remain in the Central Committee even after they lose their key jobs.

Those officials who lose the positions that entitle them to Central Committee membership but stay on are called ''Dead Souls.''

One reason Gorbachev has advanced the date of the upcoming Party Congress by more than a year is to elect a new Central Committee and clear out the ''dead souls.''

(FEB. 28) UPI - Atlantis's launch on the 34th shuttle mission marks the ninth post-Challenger flight and the second of nine manned U.S. space shots planned for 1990. Here are details about the secret military mission at a glance:

-Space shuttle: Atlantis, NASA's newest shuttle, making its sixth voyage. Launched on its maiden flight Oct. 3, 1985, Atlantis took off on its most recent previous flight Oct. 18 when it carried the Galileo Jupiter probe into space.

-Launch time: 2:50 a.m. EST Wednesday.

-Launch site: pad 39A at the Kennedy Space Center, Fla.

-Crew: Navy Capt. John Creighton, 46, commander; Air Force Col. John Casper, 46, co-pilot; and Marine Lt. Col. David Hilmers, 40, Navy Lt.

Cmdr. Pierre Thuot, 34, and Air Force Col. Richard ''Mike'' Mullane, 44.

-Crew experience: Mullane and Hilmers have two previous flights to their credit, Creighton has one while Casper and Thuot (pronounced THOO'-it) are shuttle rookies. Mullane plans to retire from NASA and the Air Force after the current mission.

-Primary payload: Classified. Aviation Week & Space Technology magazine reported last month Atlantis is carrying a 37,000-pound military photo reconnaissance satellite capable of radioing back digital images of ground targets around the world.

-Payload deployment time: Classified; believed to be scheduled about 6 a.m. Thursday.

-Mission duration: Classified; believed to be about four days, 10 hours.

-Landing site: Edwards Air Force Base, Calif.

#90059u0679 02/28/1990 ~United Press International

WASHINGTON (FEB. 28) UPI - The Commerce Department, in a revised gross national product estimate, Wednesday reported economic growth plodded along at 0.9 percent in the final quarter of 1989 and at 3 percent for the entire year.

The GNP measures the country's total output of goods and services.

In a preliminary report issued in January, the Commerce Department estimated economic growth stood at 0.5 percent for the quarter, and at 2.9 percent for all of 1989.

Third-quarter growth was 3 percent, or $30.4 billion, compared to the $9.5 billion increase in the fourth quarter, the government said. Growth in 1988 was $170.7 billion compared to $119.3 billion last year.

Consumer spending increased by only $2.5 billion in the October, November and December compared to $36.4 billion in the third quarter, reflecting a marked decline in the sales of cars and trucks.

The Commerce Department said the 0.9 percent growth in the fourth quarter was the lowest since 0.8 percent in the third quarter of 1986, and that the annual figure was the lowest since 2.7 percent, also in 1986.

Overall purchases of durable goods, items made to last three or more years slipped by $16.4 billion compared to an $11.5 billion increase the quarter before, while purchases of non-durable goods increased by only

$800 million compared to $11.1 billion in the third quarter.

Service expenditures increased by $18.2 billion for the quarter, compared to $13.9 in the third quarter, according to the report, compiled by the department's Bureau of Economic Analysis.

Cold weather pushed home heating costs up $7.2 billion, similar to the third quarter figure, the Commerce Department said. The home heating costs include fuel oil, electricity and natural gas.

#90059u0696 02/28/1990 ~United Press International

NEW YORK (FEB. 28) UPI - In New York, where rudeness has been elevated to an art form by cabbies and waiters, a group is out campaigning for politeness.

New York Pride, an organization headed by a former City Hall aide, has kicked off a ''civility campaign'' with TV, radio and print ads featuring the slogan, ''C'mon New York, ease up. Let's keep it the world's greatest city.''

With the theme song ''Try a Little Tenderness,'' New York Pride hopes to make kamikaze bicycle messengers, growling cabbies and snooty waiters a thing of the past.

The new foundation announced its campaign Tuesday in a news conference at the Marriott Marquis Hotel.

The chairman of New York Pride is Herbert Rickman, who was an aide of former Mayor Edward Koch. He said people who visit New York do not want to come back because of the rudeness and mean-spiritedness of many people in the city.

''People say, 'Well, that's part of the price of living in New York City.' Well, I was born and raised here and I don't feel I have to put up with this,'' Rickman said.

Besides the civility campaign, the foundation intends to plant 30,000 trees around the city, wants to organize city-wide athletic competitions for youths and hopes to introduce civic responsibility programs in the city's schools, Rickman said.

#90059u0745 02/28/1990 ~United Press International

WASHINGTON (FEB. 28) UPI - The Commerce Department, in a revised gross national product estimate, Wednesday reported economic growth plodded

along at 0.9 percent in the final quarter of 1989 and at 3 percent for the entire year.

Analysts had predicted a lower estimate of the GNP, which measures the country's total output of goods and services.

In a preliminary report issued in January, the Commerce Department estimated U.S. economic growth stood at 0.5 percent for the quarter, and at 2.9 percent for all of 1989.

''The world isn't going to change on this revision,'' said Robert Dederick chief economist for Northern Trust in Chicago. ''The economy was a little bit stronger than we thought and the risk of a recession was a little bit less.''

Cynthia Latta, a senior financial economist for DRI/McGraw-Hill in Lexington, Mass, said, ''I still think we're plodding along.'' But she called 0.9 percent ''a much better quality number than it was before.''

Third-quarter growth was 3 percent, or $30.4 billion, compared to the $9.5 billion increase in the fourth quarter, the government said. Growth in 1988 was $170.7 billion compared to $119.3 billion last year.

Consumer spending increased by only $2.5 billion in the October, November and December compared to $36.4 billion in the third quarter, reflecting a marked decline in the sales of cars and trucks.

The Commerce Department said the 0.9 percent growth in the fourth quarter was the lowest since 0.8 percent in the third quarter of 1986, and that the annual figure was the lowest since 2.7 percent, also in 1986.

Overall purchases of durable goods, items made to last three or more years slipped by $16.4 billion compared to an $11.5 billion increase the quarter before, while purchases of non-durable goods increased by only $800 million compared to $11.1 billion in the third quarter.

Service expenditures increased by $18.2 billion for the quarter, compared to $13.9 in the third quarter, according to the report, compiled by the department's Bureau of Economic Analysis.

Cold weather pushed home heating costs up $7.2 billion, similar to the third quarter figure, the Commerce Department said. The home heating costs include fuel oil, electricity and natural gas.

TAPRAYA, THAILAND (FEB. 28) UPI - Counterattacks by Cambodian resistance

groups have stalled a weeklong offensive by the Vietnamese-backed government that has killed more than 250 soldiers and guerrillas, resistance and government officers said Wednesday.

A Defense Ministry spokesman in Phnom Penh said the week-old government drive has killed 153 resistance troops and wounded 110. More than 60 tons of ammunition have been captured or destroyed. The spokesman also said the offensive captured the town of Svay Chek and 10 other outposts held by the resistance.

However, the U.S.-backed Khmer People's National Liberation Front, driven from the area last week, said it has started to regain lost territory.

A KPNLF officer said the front's forces moved forward about 12 miles Tuesday after retreating Friday from the towns of Svay Chek and Thmor Pouk 195 miles northwest of Phnom Penh.

''We are now only 3 miles from Svay Chek and we will be heading to Thmar Pouk,'' he said.

He said resistance forces killed 103 Phnom Penh troops, wounded 23, captured 28 and seized a quantity of arms including a Soviet-made T-54 tank during clashes Monday and Tuesday. He declined to give any indication of the casualties on his side.

A second resistance group, the Sihanoukian National Army loyal to Prince Norodom Sihanouk, said the government offensive, the first of the current dry season, was timed to allow Prime Minister Hun Sen to ''steal the limelight'' at peace talks in Jakarta set to conclude Wednesday.

The group said its forces have overrun Phnom Penh troop positions in three battlefields since Sunday.

In a statement issued in Bangkok, the group said its forces killed 10 government troops and captured three outposts in Siemreap, 140 miles northwest of Phnom Penh.

The statement said the ANS forces also liberated 300 square miles in Kompong Thom province, 75 miles north of Phnom Penh.

The resistance claimed control of 15 sub-districts and 58 villages, cutting the link between Phnom Penh and Siem Reap, it said.

''Currently, all traffic fron Phnom Penh to Siem Reap must be directed via air or waterways, as the National Road 5 is completely cut off by the ANS forces,'' it said.

It said an important artillery base at Kauk Mon was under heavy attack.

''The fall of Kauk Mon will leave the provincial town of Oddor Meanchey defenseless,'' it said.

The statement charged that Vietnam sent about 10,000 troops to help government soldiers fighting the resistance in Siem Reap and Battambang. It said the soldiers were mercenaries receiving salaries of $150 per month - very high wages by Vietnamese standards.

It said the Cambodian government has set up a recruiting center in Svay Rieng on the Vietnamese border to recruit Vietnamese army veterans for service inside Cambodia.

Mit Muen, an intelligence officer of the Chinese-backed Khmer Rouge, said the Khmer Rouge has captured a number of Vietnamese soldiers in fighting in western Battambang, 150 miles northwest of Phnom Penh.

Muen quoted a Vietnamese captive, identified as Lt. Nguyen Yang Tang as saying that Vietnam has sent more than 2,000 troops back to Cambodia since Feb. 2 to help government troops.

Vietnam has repeatedly denied that any Vietnamese troops have returned to Cambodia since Hanoi announced its troops had withdrawn last September after 10 years of occupation.

WASHINGTON (FEB. 28) UPI - Previously-owned home sales dropped 2.2 percent in in January to a seasonally-adjusted annual rate of 3.48 million because of higher mortgage-interest rates, the National Association of Realtors said Wednesday. The January home resale rate, down from 3.56 million in December, was 4.9 percent lower than the January 1989 rate of 3.66 million units.

The drop in the national resale rate from December to January reflected declines in existing-home sales in the Northeast, West and Midwest, the NAR said. A small resale rate increse was recorded in the South.

NAR President Norman D. Flynn noted that the beginning of the year generally is a slow home sales period, with activity dominated by

upper-income buyers.

The national median price for existing single-family homes was $96,200 in January, up four percent from December and 7.1 percent above the price for January 1989. Price hikes were also recorded in each of the regions.

The South was the only region to record a month-to-month resale rate increase. The 1.4 million units January rate was 0.7 percent higher than December's rate and 2.9 percent higher than a year ago.

NAR Chief Economist John A. Tuccillo said the steady level of activity in the region reflected stability in many of the South's local markets, as well as a revival of some previously-depressed markets. The median existing-home price in the South was $86,300, up 5.2 percent from one year ago.

In the Midwest, the January resale rate of 960,000 units was two percent below December, and up 1.1 percent from January 1989. The region's median price for January, $74,000, was 9.7 percent higher than in January 1989.

The most noticeable effect of January's higher mortgage interest rates was in the West, where the resale rate of 540,000 units dropped 11.5 percent from December, and was 18.2 percent below that for January 1989, as the high-volume California market cooled down, the Tuccillo said.

The median January price in the West was $144,000, up seven percent from January 1989. Although the year-to-year appreciation was significant, it was smaller than previous annual price increases in the region.

Slower activity continued in the Northeast, where the resale rate of 560,000 units was 3.4 percent below that for December. The rate dropped 17.6 percent from January 1989. The median price for the region was $147,000, up 2.3 percent from a year ago, the NAR said.

According to the Federal Home Loan Mortgage Corp., the national average commitment rate for 30-year fixed-rate mortgages rose to 10.05 percent during January from 9.83 percent in December.

NEW YORK (FEB. 28) UPI - Shearson Lehman Hutton Inc. said Wednesday it will lay off 2,000 employees, or about 4 percent of the work force at the securities company, as part of a plan to shore up its ailing balance sheet.

The announcement of the layoffs, which a spokeswoman said would occur throughout the company, came two days after Shearson announced it would receive a $750 million cash infusion from its parent, American Express Co.

which would buy new stock in Shearson.

In a letter to the company's 37,000 employees, Shearson President and Chief Exeuctive Officer Howard L. Clark said Shearson will undertake a ''strategic review'' of its businesses that will result in ''significant one-time charges'' for the first quarter.

''We expect a negative impact on first-quarter results,'' Clark said.

Clark said the capital infusion from American Express would give the firm the financial flexibility to undertake a review of its businesses to be conducted by Shearson's own investment bankers, senior managers and outside advisers.

Clark said in the letter that the result of a review could include Shearson's exit from certain businesses.

The announcement of layoffs and first-quarter charges followed weeks of turmoil at Shearson, during which the company's Chairman Peter A. Cohen resigned under pressure of concern about the firm's financing. He was replaced by Clark, American Express's chief financial officer.

American Express had expressed a desire to reduce its 61 percent stake in the struggling securities firm, but will instead increase its stake with the $750 million cash infusion.

Since last year, Shearson has been trying to complete a recapitalization plan designed to head off a downgrading of its credit rating.

CHICAGO (FEB. 28) UPI - Refco, a Chicago-based commodities trading firm, has been fined $150,000 for failing to supervise employees who cheated public customers, the Chicago Sun-Times reported Wednesday.

Commodity Futures Trading Commission administrative law judge George Painter also took action against five brokers he found guilty of defrauding customers in the case, revoking their registrations and imposing fines.

The case stemmed from a complaint filed in 1988 that accused brokers at the defunct Woodstock-based Paragon Futures of churning - trading customer accounts solely to generate commissions. Refco guaranteed Paragon's trade obligations and cleared the trades, the newspaper said.

Painter ruled that between October 1984 and June 1985 Refco failed to supervise R. Rocco Carnevale and James J. Cleary, two employees in its

professional services division who he found guilty of churning Paragon and Refco accounts.

He also found that Refco failed to act when a customer account fell below minimum levels required for discretionary trading at the Chicago Mercantile Exchange, and allowed Carnevale to execute trades without proper registration.

At the time the complaint was filed, Refco criticized the CFTC for the action, saying the company took quick action to sever ties with Paragon when it discovered the irregularities.

In addition to fining Carnevale and Cleary $15,000 each, Painter fined defendant Jerry Savicz $5,000 for unauthorized trading. He also ordered defendants Douglas Hinshaw and William Harris, who were found guilty of churning, to cease and desist from further violations. The judge permanently revoked the registrations of all five men.

In Washington, the CFTC Tuesday voted unanimously to bar trading rule violators from serving on industry disciplinary committees, arbitration panels and governing boards.

The rule applies to futures exchanges, their clearing corporations and other self-regulatory organizations under the jurisdiction of the CFTC. The action is an outgrowth of the FBI investigation into tradding irregularities at the Chicago Board of Trade and Chicago Mercantile Exchange.

SEOUL, SOUTH KOREA (FEB. 28) UPI - Charles Dallara, Assistant Treasury Secretary for International Affairs, said Wednesday a new foreign exchange rate system South Korea is puting into effect should be accompanied by liberalization of capital movement.

Dallara, who had two days of discussions with Korean government officials in the first round of new U.S.-Korea financial talks, commented on the market average foreign exchange rate system the government is introducing in March.

"We welcome the introduction of this new system. We believe the Finance Ministry, the Bank of Korea and other government officials who have been involved have taken an important step forward," Dallara said.

"But very substantial restrictions remain on capital inflows and capital outflows and other limitations in the banking sector," he said. "What with these capital restrictions to produce a market that is small and thin, it

is hard to say this is truly a market-determined system if many market forces are not allowed to operate."

"In addition, with a market so small, there is always the possibility the government can significantly influence the rate directly or indirectly through operations in the market," Dallara said.

Under the new system, the average of rates used in interbank dealings on the previous day will become the day's basic exchange rate of Korea's won against the U.S. dollar. Won's value against other foreign currencies will be set based on the dollar's strength on world money markets.

In the past the government set won's daily exchange rates using a multi-currency basket containing the currencies of Korea's major trading partners and adding its own considerations.

Dallara also expressed concern about the recent devaluation of the Korean currency against the dollar and said the if the trend continues it could be harmful to the Korean economy.

"Continued depreciation of the won could be counterproductive to the need for structural strengthening, for structural change, in the Korean export industry," he said. "It could also put new pressures on inflation and wage discussions."

Dallara said South Korea had great economic achievements in the past ten years but they place the nation under greater responsibilities. "Today and in the future Korea must bear a greater responsibility for maintaining the open trade, payments and financial system in the world economy which has benefited Korea so much in the past three decades," he said.

"If we are to succeed in the United States and rest of the world in maintaining open markets for Korean goods and services we need your help. We need Korea to continue to open its trading system."

Dallara said Korea's financial sector lags behind the rest of the the economy. If it is not modernized, developed and made more competitive the Korean economy will suffer at some point in the future, he warned.

He said in some aspects of the banking sector discrimination remains against foreign financial institutions operating in Korea, and hoped that all signs of such discrimination will disappear early in the current decade. He stressed that liberalization and development of the capital market will help sustain expansion of Korea's exports.

#90059u0936 02/28/1990 ~United Press International

ST. PAUL, MN (FEB. 28) UPI - Northwest Airlines had a $22.6 million operating loss in the fourth quarter of 1989 but showed strong growth in profits and revenues for the entire year, federal filings showed. Northwest reported operating revenues of $1.64 billion in the fourth quarter.

The St. Paul Pioneer Press Dispatch reported Wednesday that for the year the airline said it had operating profits of about $272 million, up 39 percent from 1988. Operating revenues rose 16 percent to about $6.5 billion, according to preliminary figures the airline submitted recently to the U.S. Transportation Department.

The results are for the airline only, not Northwest's parent company, NWA Inc., which was bought for $3.65 billion last year by a group headed by Al Checchi.

Since the airline is privately held, the figures filed with the Transportation Department are the only public glimpse of the company's financial health.

Northwest and the rest of the airline industry faced soaring fuel costs and heavy discounting in the fourth quarter. A Northwest official said recently that the airline expects the first six months of 1990 to be worse than the year-ago period.

NEW YORK (FEB. 28) UPI - Unicom Group said Wednesday it acquired a controlling interest in Motion Picture Services Cos., a production picture company.

Unicom said the merger agreement was completed Feb. 16 and ads a production unit to Unicom's library of 150 foreign films. Terms of the acquisition were not disclosed.

The company, whose net worth is $38 million, said Motion Picture's President Don Gold, and Vice President Richard Compton will join Unicom. Gold co-produced the popular NBC television series "Miami Vice" for which Compton directed several episodes.

Also joining Unicom is Motion Picture's Vice President Lou Fusaro, who contributed to several motion pictures such as "Romancing the Stone" and "Superman." The three executives will join Unicom's board of directors.

#90059u0968 02/28/1990 ~United Press International

WASHINGTON (FEB. 28) UPI - President Bush telephoned Soviet leader Mikhail Gorbachev Wednesday and the two world leaders talked for about 30 minutes about events in Nicaragua and Eastern Europe, the White House said.

Press secretary Marlin Fitzwater announced the morning call in a brief statement that offered no further details.

The call followed Bush's weekend talks at the presidential retreat of Camp David, Md., with West German Chancellor Helmut Kohl about the possible reunification of Germany, and Sunday's upset election of U.S.-backed Violeta Chamorro as the new president of Nicaragua.

The Soviet Union has opposed Bush's and Kohl's desire to have a reunified Germany as a member of NATO, and the administration has pressed the Soviet Union to halt the flow of weapons to Nicaragua.

#90059u1044 02/28/1990 ~United Press International

WINDHOEK, NAMIBIA (FEB. 28) UPI - SWAPO called on South African President Frederik de Klerk Wednesday to investigate the 1989 slaying of a prominent human rights lawyer following allegations the man spied for Pretoria.

The request was the latest reaction following South African Defense Minister Magnus Malan's surprise revelation in Parliament Monday that Anton Lubowski was a paid military informant.

Relatives and colleagues have rejected Malan's charges against Lubowski, who in 1984 became the first white to publicly announce his membership in the South West Africa People's Organization.

The allegation by Malan came during a parliamentary debate on a secret agency within the South African Defense Forces that has been linked to political assassinations, including the 1989 slayings of Lubowski and another prominent human rights lawyer.

Malan ''opened up a can of worms'' with the accusation, said Theo-Ben Gurirab, Namibia's foreign minister-designate and a leader of SWAPO.

''Gen. Malan should not be allowed to get away scot-free with this allegation against Anton Lubowski and he must be compelled to tell the whole truth and nothing but the truth,'' Gurirab said in a statement.

SWAPO considered it most regrettable that Malan made ''what is obviously a politically motivated charge against a dead man who is not in a position to defend himself,'' Gurirab said.

Malan's statement against Lubowski ''smacks of a cover-up'' because the charge comes from a man who is fighting for his political life, Girorab said.

A number of calls have been made for Malan's resignation following allegations of high-level military complicity in the Civil Cooperation Bureau, which has been linked to political assassinations. A leader of South Africa's opposition Democratic Party Wednesdasy urged de Klerk to suspend Malan.

Gurirab called for de Klerk to investigate the circumstances of Lubowski's assassination.

''SWAPO has been demanding the arrest of the culprits so that we, the Namibian public and the international community at large, would know who killed Anton Lubowski and why,'' he said.

South West Africa Police Col. Jumbo Smit, heading the investigation into Lubowski's assassination, said Tuesday Malan's allegations ''came as a surprise'' to him. South African police officials also said they had no information to prove or disprove whether Lubowski had been an agent.

Smit said the allegations would not affect the case against Irish national Donald Acheson, charged with Lubowski's murder. Newspaper reports have linked Acheson, 52, to reputed members of the Civil Cooperation Bureau.

Police in Namibia also have issued warrants of arrest for three former South African police officers allegedly involved in the CCB.

SWAPO fought a 23-year guerrilla war against South African rule and Lubowski, gunned down outside his home in Windhoek Sept. 12, was a close associate of SWAPO President Sam Nujoma. Namibia celebrates its independence next month.

NEW YORK (FEB. 28) UPI - Latest metal market prices as quoted Wednesday by the American Metal Market, authoritative metals publication:

Aluminum, New York Merchants, 99.7 percent pure ingots 65.00-66.00 c-lb.

Antimony, domestic, refined in alloy, $2.00 lb.

Copper, electrolytic wirebars, delivered U.S. (Warrenton Refining Co.) 126.80 c-lb.

Lead, common, U.S. primary producers 44.00-45.00 c-lb.; U.S. non-primary (secondary) producers 44.00-45.00 c-lb.

Magnesium, 99.8 percent, ingot 163.00 c-lb.

Manganese, 99.9 percent, boxed regular 91.00-95.00 c-lb.

Mercury, $285.00-$300.00 76-lb. flask.

Nickel, briquettes delivered to customers, merchant, N.Y., $2.99-$3.25 per pound.

Palladium, N.Y. Am. Met. Mkt. dealer $133.00 per troy ounce.

Platinum, soft, 99.5 fine, producer - $516.00-$517.00; dealer-approx., $525.00-$530.00 per troy ounce.

Steel, No. 1 heavy melt scrap - Pittsburgh $100.00-$102.00 per gross ton

(consumer buying price); Am. Met. Mkt. composite scrap price $103.17 per ton.

Tin, N.Y. Am. Met. Mkt. ex-dock - 297.50 c lb.

Titanium, aircraft quality, 8 1/8 inch round rotating billet, f.o.b. shipping point $8.87-12.96 lbs., domestic sponge 99.3 percent, domestic and imported duty-paid $5.35-5.50 lb.

Tungsten powder (H-Red), 99.9 percent minimum pure $10.00 per lb.

Zinc, prime western, U.S. 65.00-68.00 c-lb.

#90059u1075 02/28/1990 ~United Press International

MOSCOW (FEB. 28) UPI - The Soviet Parliament Wednesday gave farmers the right to leave collective farms and set up private homesteads for the first time since Josef Stalin's brutal collectivization of agriculture 60 years ago.

The land law, passed by the Supreme Soviet in a 349-7 vote, seeks to give farmers more incentive and jolt Soviet agriculture into becoming productive instead of remaining the Achilles heel of the economy, requiring massive grain imports and huge capital investments.

The law does not abolish the country's 50,000 collective and state farms but allows peasants to set up their own farms.

In the rapid overhaul of the basic Soviet economic and political system, Parliament approved the measure a day after it established a presidency and gave Mikhail Gorbachev broad new executive powers to push through his ''perestroika'' reform program.

Gorbachev, who grew up in a southern Russian village and won the prestigious Hero of Labor medal as a teenager for his work on a combine, had pressed for quick passage of the land law.

The landmark law strikes at one of the basic principles of the Soviet socialist system: all means of production such as land and capital are nationalized or, in Marxist jargon, collectively owned.

''Peasants will be able to choose between being a collective farm member or an individual farm owner,'' the official Tass news agency said.

The nation's peasants, accounting for at least one-third of the 290 million people in the Soviet Union, now can become private farmers for the first time since 1929 when the despot Stalin began outlawing all private

farms and herding their owners onto collective and state farms.

Many peasants fought back during the four-year collectivization drive but secret police and regular army troops slaughtered thousands. Others resisters were sent to Siberia or died of starvation when they could get no grain. As many as 10 million peasants are believed to have died.

A net exporter of grain before the 1917 Bolshevik Revolution, the Soviet Union now must import about 40 million tons of grain and corn a year, most of which is used as cattle feed.

The new law, which goes into effect March 15, allows peasants to lease land from local government bodies and to pass it on to their descendants but it forbids them to sell it, mortgage it or give it away as a gift.

Though such transactions still are anathema in a country where profit from private property remains stigmatized, the new law chips away at the strictures and incites Gorbachev's critics who accuse him of abandoning socialism through the back door.

The law stipulates ''that land plots can receive the status of inheritable property ... but the land cannot be sold, granted or mortgaged,'' Tass said.

''The basic principles of legislation on land in the Soviet Union and its (15) republics were passed by the Soviet Parliament today,'' Tass said. ''The law will be used by each republic in accordance with local regulations.''

In the massive media debate that preceded the vote, conservative Politburo member Yegor Ligachev and other advocates of the present agricultural system argued farmers do not want to take the land into their own hands but prefer to work as laborers on the state farms or to share in the profits on the collective ones.

But an opinion poll published Wednesday in the Izvestia government newspaper cited ''a fairly wide range of readiness to take land for private cultivation,'' with 40 percent of ''country dwellers'' favoring the change.

Between one-fifth and a quarter of all people surveyed, including peasants and city residents, are afraid to stake their futures on private property.

''They are uncertain that the government will keep its word, and they fear that the collective farms will resist the doling out of land and that regional and local authorities will interfere,'' Izvestia said.

Many conservatives say the collective farms, despite their 60-year trial period, had not yet shown their full potential, and Tass was quick to

point out that the new law in no way intends to dismantle them.

''The current opinion in society is that the new law will not lead to the disbandonment of collective and state farms, at least in most of the republics,'' Tass said. ''Collective forms of labor are strong in the country, and there are many profitable collective farms.''

In the Baltics, however, farmers have already started leasing and buying the land. The three republics of Estonia, Latvia and Lithuania are pursuing plans to leave the Soviet Union.

#90059u1090 02/28/1990 ~United Press International

NEW YORK (FEB. 28) UPI - Some 24,000 gallons of heavy oil that leaked Wednesday from a barge at an Exxon dock forced the closure of the Kill Van Kull waterway - one of the two chief entrances to New Jersey's main port area.

The Coast Guard dispatched a national pollution strike team from Mobile, Ala., to Exxon's Bayonne, N.J., loading facility within hours after the accident, the second in the area in two months, authorities said.

Petty Officer Howard Holmes said two local contractors were hired for the clean-up job and were on the scene with six oil-skimming vessels and a boom that was placed around Port Bayonne to prevent pollution of the opposite Staten Island shore.

Holmes said the Eklof Corp., owner of the barge that was being loaded at the Exxon dock, had acknowledged responsibility for the spill and would pay for its cleanup. Eklof identified the oil as No. 6 industrial fuel oil a heavy oil that evaporates slower than lighter home heating oils.

The Coast Guard was alerted to the leak about 4 a.m. by a telephone call from the Exxon facility. A pollution response team sent to the scene by the captain of the Port of New York found a 12-inch-by-6-inch hole in the Eklof barge.

Kill Van Kull, a narrow natural channel connecting New York's Upper Bay to Newark Bay, is one of the two chief entrances to the New Jersey Terminal area,which includes Port Elizabeth and Port Newark. The other entrance is the Arthur Kill waterway.

The Coast Guard closed the Kill Van Kull to all marine traffic from the Bayonne Bridge to Constable Hook Reach.

A spill of 567,000 gallons of home heating oil from Exxon pipelines connecting Bayonne and Linden, N.J., closed nearby Arthur Kill briefly

Jan. 2 and polluted more than 5 miles of shoreline, including several waterfowl rookeries. That spill took more than a month to clean up.

Both New Jersey and the city of Elizabeth have filed damage suits against Exxon. The city's suit charged that the company took care of ''obvious cleanup'' but did little to clean piers, boats and wharves in the area.

The January spill killed more than 400 water birds, according to the Environmental Protection Agency, and poses a threat to thousands of herons when they return to Arthur Kill for nesting next month.

Mira Barer, deputy commissioner of the city Department of Environmental Protection, said No. 6 oil may be less volatile than lighter oils but it was easier to boom and dike. How far the oil could spread in the Kill Van Kull depends on the winds, which were reported at 14 mph, she added.

WASHINGTON (FEB. 28) UPI - President Bush declared a major disaster in Tennessee Wednesday, clearing the way for federal assistance to help victims struck by severe flooding and storms that hit the state in mid-February.

The White House said in a brief statement that the relief will be coordinated by the Federal Emergency Management Agency and may include temporary housing, grants and low-interest loans to stricken individuals and businesses.

The president's declaration makes the federal assistance available in Hamilton and Polk counties, and will supplement state and local recovery efforts.

#90059u1192 02/28/1990 ~United Press International

WASHINGTON (FEB. 28) UPI - The Supreme Court Wednesday upheld the constitutionality of Pennsylvania's death penalty statute rejecting a claim that it provides for a mandatory death sentence.

At issue in the case was whether the statute mandated the death sentence. The law states: ''The verdict must be a sentence of death if the jury unanimously finds at least one aggravating circumstance ... and no mitigating circumstance.''

The law provides for 11 statutory aggravating circumstances. In the case involving Scott Wayne Blystone, the aggravating circumstance was that he committed the murder in the course of another felony - robbery.

''We think that the Pennsylvania death penalty statute satisfies the requirement that a capital-sentencing jury be allowed to consider and give effect to all relevant mitigating evidence,'' Chief Justice William Rehnquist wrote.

''Death is not automatically imposed upon conviction for certain types of murder,'' he added. ''It is imposed only after a determination that the aggravating circumstances outweigh the mitigating circumstances present in the particular crime committed by the particular defendant, or that there are no such mitigating circumstances. This is sufficient.''

In previous decisions, the Supreme Court has held that juries considering imposing the death penalty must be allowed to consider mitigating evidence - evidence that while not clearing a person may lessen the penalty.

Justice William Brennan, joined by Justices Thurgood Marshall, Harry Blackmun and John Paul Stevens, dissented. Brennan said the statute contained a mandatory death penalty provision.

''Such a statute deprives the defendant the type of an individualized sentencing hearing required by the Eighth Amendment,'' he said.

Pennsylvania Attorney General Ernie Preate Jr. had warned that if the court agreed with Blystone it could overturn the sentences on all 110 death row inmates in the state.

Blystone was convicted of the Sept. 9, 1983, murder of Dalton Charles

Smithburger Jr. in Fayette County. Blystone and three companions picked up Smithburger while he was hitchhiking. Blystone robbed him of $13, then ordered him to lie face down. Saying, ''goodbye,'' he fired six shots into the back of his head, officials said.

A number of states joined in a supporting brief written by the attorney general of California. They are Arizona, Connecticut, Idaho, Illinois, Indiana, Montana, New Hampshire, Nevada, North Carolina, South Carolina, Tennessee, Utah and Wyoming.

In addition, Maryland, New Jersey, Ohio, Oregon, Texas and Washington have similar laws in that they require a death verdict where there are aggravating circumstances and no mitigating circumstances, Preate said.

#90059u1238 02/28/1990 ~United Press International
WASHINGTON (FEB. 28) UPI - The Justice Department said Wednesday it opposes the creation of new laws aimed at so-called animal research terrorism although witnesses at a House hearing contended it is a growing nationwide problem.

White House science adviser Allan Bromley objected to the Justice Department position. Bromley said new federal laws ''would constitute a powerful statement that this country will not tolerate illegal and violent acts by opponents of animal research.''

A spokesman for the National Institutes of Health said there have been at least 71 incidents in the past eight years, including break-ins, thefts of research animals, bomb threats, arson and other types of violence.

Witnesses blamed radical factions within the animal-rights community for the incidents. Richard Hamilton, police director for Texas Tech University

described continued threats against one researcher following a break-in on July 4.

''This institutional harassment, which all evidence suggests has come primarily from out of state, is abetted by this jurisdictional no man's land,'' Hamilton said.

Members of the Animal Liberation Front caused $500,000 in damage in fires and theft of 1,200 animals from the University of Arizona in April. A member justified the acts as a way ''to rescue animals, to prevent their torture.''

Deputy Assistant Attorney General Paul Maloney said proposed bills aimed at attacks on research facilities ''would add nothing to the prosecution of these types of offenses.'' The legislation would duplicate existing laws against theft and destruction, he said, or involve the federal government in prosecuting misdemeanors that are the realm of local prosecutors.

Some members of Congress at the House Agriculture subcommittee hearing urged federal action. Rep. Charles Rose, D-N.C., however, said proponents were overstating the threat to livestock production.

''The farmers and ranchers have been bamboozled by the biomedical community. ... We don't have a dog in this fight,'' Rose said. ''We are going to get city congressmen angry at us and we don't need that.''

Proponents said it is important to prevent illegal disruption of scientific research. They listed a wide range of benefits from animal research and said there are many safeguards to protect the welfare of laboratory animals.

#90059u1249 02/28/1990 ~United Press International

WASHINGTON (FEB. 28) UPI - The Supreme Court Wednesday gave law enforcement officials wide authority to ignore constitutional guarantees when operating outside the United States in a ruling that could affect the trial of deposed Panamanian strongman Manuel Noriega.

The court, in a 6-3 decision by Chief Justice William Rehnquist, said the Fourth Amendment guarantee against unreasonable searches and seizures does not apply to property owned by a non-resident alien located in a foreign country.

In making the ruling in a case involving a Mexican involved in the death of U.S. narcotics agent Enrique Camarena, the court further noted that to rule otherwise would affect the ability of the armed forces to conduct

operations overseas.

''Situations threatening to important American interests may arise halfway around the globe, situations which in the view of the political branches of our government require an American response with armed force," Rehnquist said.

''If there are to be restrictions on searches and seizures which occur incident to such American action, they must be imposed by the political branches through diplomatic understanding, treaty or legislation.''

However, Justice William Brennan, joined by Justice Thurgood Marshall, ridiculed the reasoning behind the ruling.

''Today the court holds that although foreign nationals must abide by our laws even when in their own countries, our govenment need not abide by the Fourth Amendment when it investigates them for violations of our laws,'' he wrote.

On Jan. 4, 1990, Noriega pleaded innocent in a Miami federal court to drug-trafficking, conspiracy and racketeering charges. He was jailed without bail.

His surrender followed the U.S. invasion of Panama last December, during which U.S. forces seized crates of documents and other evidence for possible use against Noriega at trial.

Attorney General Richard Thornburgh, reacting to the ruling, said, ''Today's court decision recognizes the right and need for law enforcement officials to have lawful, practical means for dealing with international drug trafficking operations.

''This decision will clarify and assist our international and cooperative law enforcement efforts particularly in overseas drug cases. Drug traffickers and terrorists will take no cheer from the court's opinion.''

In other action, the court:

-Ruled 7-2 that police can conduct a ''protective sweep'' of the scene of an arrest without first obtaining a search warrant.

-Upheld, on a 5-4 vote, Pennsylvania's death penalty statute in a case involving convicted murderer Scott Wayne Blystone.

Wednesday's ruling involving the Fourth Amendment stems from a case brought by the federal government seeking review of a ruling by the 9th U.S. Circuit Court of Appeals.

The case involves Rene Verdugo Urquidez, who was sentenced to 240 years in prison in October 1988 for participating in the 1985 kidnap, torture and murder of Camarena and his pilot in Mexico.

Federal officials had also brought drug charges against Urquidez in a separate action. The officials had searched the Mexican citizen's homes in Mexicali and San Felipe with the help of Mexican authorities and seized a variety of documents.

However, federal courts ruled the documents were seized illegally and ordered them supressed at trial. The district court said it is ''unlikely that the Fourth Amendment was not intended to protect an alien, already in the custody of the United States and charged in a criminal complaint, from searches of his foreign residences conducted by U.S. agents for the express purpose of obtaining evidence relevant to the pending prosecution.''

The appeals court concurred.

In the other trial of Urquidez, 36, a Mexicali real estate developer, he was found to have been present at the February 1985 killings of Camarena and Alfredo Zavala Avelar, whose bodies were found in shallow graves on a remote Mexican ranch 60 miles from Guadalajara.

The only physical evidence tying Verdugo to the house where the killings occurred was one of his hairs. His voice was not heard on audiotapes of the interrogation and torture sessions. Verdugo admitted dealing marijuana and said he was at the house - which belonged to drug lord Rafael Caro Quintero - solely on drug business and knew nothing of the killings.

#90059u1250 02/28/1990 ~United Press International
WASHINGTON (FEB. 28) UPI - Connecticut led the nation in per capita income in 1987 at $16,094 followed by New Jersey and the District of Columbia, while Mississippi finished last at $8,088, the Census Bureau said Wednesday.

Per capita income was $15,028 in New Jersey and $14,778 in the nation's capital, the report said.

The 1987 figures represent the Census Bureau's latest estimates.

Among the nation's 3,139 counties and independent cities, the Washington suburb of Falls Church, Va., ranked No. 1 with a per capita income of $23,169, followed by nearby Alexandria, Va., at $22,200 and neighboring

Arlington County, Va., at $22,181.

Marin County, Calif., ranked No. 4 at $21,611 followed by Montgomery County, Md., another Washington suburb, at $21,576.

Owsley County, Ky., meanwhile, was at the bottom of the counties list at $4,747, the Census Bureau said.

Here is a ranking of the states and 1987 per capita income:

1. Connecticut, $16,094 2. New Jersey, $15,028 3. District of Columbia, $14,778 4. Maryland $14,697 5. Massachusetts, $14,389 6. Virginia, $13,658 7. New Hampshire, $13,529 8. Alaska, $13,263 9. California, $13,197 10. New York, $13,167 11. Delaware, $12,785 12. Nevada, $12,603 13. Florida, $12,456 14. Illinois, $12,437 15. Rhode Island, $12,351 16. Hawaii, $12,290 17. Minnesota, $12,281 18. Colorado, $12,271 19. Washington state, $12,184 20. Michigan, $11,973 21. Pennsylvania, $11,544 22. Arizona, $11,521 23. Kansas, $11,520 24. Wisconsin, $11,417 25. Georgia, $11,406 26. Ohio, $11,323 27. Vermont, $11,234 28. Missouri, $11,203 29. Iowa, $11,198 30. Nebraska, $11,139 31. Indiana, $11,078 32. Oregon, $11,045 33. North Carolina, $10,856 34. Texas, $10,645 35. Maine, $10,478 36. Tennessee, $10,448 37. South Carolina, $9,967 38. Oklahoma, $9,927 39. Wyoming, $9,826 40. North Dakota, $9,641 41. Alabama, $9,615 42. New Mexico, $9,434 43. Kentucky, $9,380 44. Montana, $9,322 45. Utah, $9,288 46. Idaho, $9,159 47. Arkansas, $9,061 48. West Virginia, $8,980 49. Louisiana, $8,961 50. South Dakota, $8,910 51. Mississippi, $8,088

-30- 2274

#90059u1270 02/28/1990 ~United Press International

WASHINGTON (FEB. 28) UPI - Backstairs at the White House:

President Bush's daughter, Dorothy, whose marriage hit the rocks, is expected to move to Washington.

The 30-year-old mother of two children is reported by friends to be moving out of her Maine home.

''Doro,'' as she is called, is the apple of her father's eye. It's doubtful she will move into the White House, but she has been given her first ceremonial assignment on behalf of her father.

Her dad named her to the U.S. delegation, headed by former Defense Secretary Caspar Weinberger, to attend ''Throne Day'' ceremonies in Morocco.

The non-paying assignment is out of the realm of nepotism. Presidents in recent times have put their children and relatives on such delegations

since former President Jimmy Carter sent his mother, Miss Lillian, on such ceremonial missions.

Former President Ronald Reagan often selected his daughter Maureen as his emissary.

The presence of a member of the first family on such delegations apparently is flattering to the host country, which considers it a special homage.

Reporters could not help but observe the extra tight security surrounding the president during his one-day trip to Cartagena, Colombia, to attend the Andean drug summit.

Colombia called up 5,000 troops to secure the peninsula and compound where Bush and the leaders of three other Latin American countries conferred on stopping narcotics trafficking.

The Secret Service also had extra agents to protect the president.

But the day after Colombia, Bush flew to Kennebunkport, Maine, where his Secret Service detail got stuck in a snowbank.

''They must have sent the first team to Colombia,'' a reporter quipped.

Speaking of security, the White House press corps was told not to stray from the secure filing center area at an airport in Barranquilla while waiting for the drug meetings to break up.

But some of them could not resist going through the airport terminal where aromatic Colombian coffee was being ground and sold.

The White House ordered that none of the Colombian coffee could be carried on Air Force One. Reporters flying on the president's plane passed their purchased coffee on to their colleagues riding the press plane to bring it back to Washington.

Reporters are under no illusions that they are loved in any administration.

In the Nixon era, they were called ''the enemy.'' Secret Service agents, often annoyed with the press getting in their way, call reporters the ''newsies.''

In jest, John F. Kennedy referred to the reporters and photographers

pouring into his office as ''the thundering herd.''

What some presidents have called them is unprintable.

But it isn't often that they are called ''animals,'' which is the way a frustrated member of the first lady's press staff recently referred to the pack of reporters who cover social events at the White House.

President Bush, wrapping up a day's work in the Oval Office, poked his head into the press room on his way to the presidential residence and told the cameramen waiting for him to officially leave, ''You're on overtime.''

Reporters and photographers do not leave the White House while the president is in his office.

However, too often when they think he is securely in place in the family quarters in the evening, the president gets a yen to step out for some Chinese food and the media that travels with him when he leaves the White House is summoned to go along for the ride.

When the NBC-TV crew, headed by anchorman Tom Brokaw, came to the White House one day to film ''A day in the life of President Bush,'' they had the run of the place. Reporters also noted that the president's daily schedule was expanded to lengthen his work day.

As a memento of the special event, the NBC crew all wore badges reading ''A Day in the Life of President Bush.''

#90059u1294 02/28/1990 ~United Press International

LONDON (FEB. 28) UPI - Stock prices closed marginally higher in nervous trading Wednesday on the London International stock exchange following news that Britain's trade gap rose to $3.19 billion in January.

The blue-chip Financial Times 100-stock index, which gained 5.5 points Tuesday, closed up 0.6 point at 2,253.7. The narrower top 30 industrial average added 0.1 point to 1,781.4.

Volume amounted to around 363 million shares, little chnaged from the 364 million shares traded Tuesday.

On the economic front, the Central Statistical Office reported a surge in imports boosted Britain's trade gap to $3.19 billion in January for the third worst monthly figure on record.

The January deficit, on a seasonally adjusted basis, compared with a revised deficit of $1.47 billion in December. Market forecasters were expecting the trade report to show a deficit of around $1.96 billion.

The government agency also reported Britain's current account was in deficit by $3.02 billion, compared with a revised deficit of $1.31 billion in December. Forecasters expected the current account to show a deficit of around $2.09 billion.

The higher-than-expected trade deficit figures dampened the stock market and dashed hopes that Britain's high interest rates would drop in the near future, analysts said.

"This is larger than the markets expected, but once you cut through the figures it's not as bad as it looks," said Bluford Putnam, chief economist at Merchant Bank Kleinwort Benson Ltd.

Among the most widely traded stocks, Commercial Union Assurance Co. PLC, a general insurance company, eased 15 cents to $7.48 after reporting its pretax profit for 1989 fell 25 percent.

Other insurance stocks eased as speculation grew that many of the companies would suffer from heavy claims resulting from storm damage across parts of Britain and the European continent in the second major weather calamity this year.

General Accident plunged 67 cents to $17.00, Guardian Royal Insurance lost 17 cents to $3.60 and Sun Alliance fell 27 cents to $4.55.

Among the day's other actives issues, high expectations for Guinness results next month helped boost shares 19 cents to $10.57.

Wellcome brightened the pharmaceutical sector, as shares gained 12 cents to to $10.95 with prospects for its AIDS drug, Retrovir.

Cadbury Schweppes PLC, the beverage and sweets maker, slipped five cents to $5.02 despite reporting a 16 percent rise in its pretax profits for 1989.

#90059u1311 02/28/1990 ~United Press International

WASHINGTON (FEB. 28) UPI - Angolan Minister of Justice Fernando Franca Van-Dunem said Wednesday the United States continues to supply covert military assistance to UNITA rebels despite calls for a cease-fire in the long southern Africa war.

Roberto Monterro, a member of the Angolan army's general staff, also told

a news conference that the U.S. aid includes ''five to eight'' military advisers inside Angola overseeing shipments of military equipment and fuel to Jonas Savimbi's UNITA forces.

Monterro said two freighters from the United States are now in port near Cabinda, Zaire with more military supplies and fuel. The supplies are shipped by air from Zaire, he said.

The State Department refuses to discuss the question of covert military aid to the Angolan rebels, but Secretary of State James Baker, in testimony Wednesday before the Senate Budget Committee, described Angola as a situation where ''the United States is in competition with the Soviet Union.''

Baker said the Soviet Union ''either helped or did not dissuade'' Angolan government forces to launch a recent offensive against UNITA in the town of Mavinga.

Van-Dunem, who met with members of Congress and low-level officials of the State Department, said, ''The U.S. military assistance role continues, despite the U.S. role as mediator.''

He said he did not know the current volume of U.S. assistance, but he cited the capture of American weapons, including TOW missiles and U.S.-made anti-personnel Claymore mines in Mavinga.

Van-Dunem said, ''We have intelligence information, but not the actual evidence, that there are some U.S. military advisers overseeing the shipments.'' He said the intelligence indicated there were five to eight U.S. advisers inside Angola.

In a Feb. 8 statement, the Angolan government identified the Americans as ''highly specialized CIA advisers'' who have been overseeing the delivery of arms and advising on sabotage projects against the Angolan government.

As a result of UNITA sabotage, the 1.5 million residents of the capital city of Maputo were without water and electricity for five days last week.

Van-Denem said Cuban troop withdrawal from Angola is continuing on schedule despite the new flurry of fighting. He said about 30,000 Cuban troops have already been withdrawn, and another 20,000 remain. The remainder, he said, are stationed north of the 13th parallel, where they will not be seen as a threat by South Africa.

The Angolan government has proposed a cease-fire in the war and offered to make it possible for members of UNITA to have ''meaningful participation'' in the political life of the country. The proposal calls for ''free and open elections,'' but Van-Dunem said the ruling MPLA-Workers party would

remain the only legal political party.

''Because of the special circumstances of Africa,'' he said, ''including tribal layalties, multi-party elections will not work.'' He said members of other political groups could contest for political influence inside the MPLA-Workers party, and added that independent candidates could run for election.

#90059u1336 02/28/1990 ~United Press International

PORT CANAVERAL, FL (FEB. 28) UPI - Authorities seized 12,700 pounds of hashish on an ocean-going tugboat off the Florida Coast in one of the biggest hashish hauls in the nation's history, the Coast Guard reported Wednesday.

''This was a good clean bust. Everybody worked together,'' said Coast Guard Chief Petty Officer Wade Akin.

The hashish, from Lebanon, was found aboard a 120-foot tug flying a Honduran flag in the Atlantic Ocean, Coast Guard officials said.

Its crew was arrested.

''This is the sixth-biggest hashish bust in the nation. We're talking about 12,700 pounds, and it's all in bricks, pressed brick form,'' said Akin.

The seizure was made by the Coast Guard, the Drug Enforcement Administration, the U.S. Customs Service and the Department of Defense, Akin said.

#90059u1381 02/28/1990 ~United Press International

JOHANNESBURG, SOUTH AFRICA (FEB. 28) UPI - The discovery of three bodies in the Indian Ocean province of Natal late Tuesday brought the death toll from fighting between blacks to more than 10 in three days since black nationalist Nelson Mandela pleaded for peace.

Police reported Wednesday the bodies of three men were found in different areas of the Malakazi squatter settlement, where mobs have set dozens of shacks on fire since Sunday. Fighting erupted between supporters of Mandela's African National Congress and the rival Inkatha movement several hours after Mandela's call for peace.

President Frederik de Klerk has said the internecine strife in Natal is one of the factors against his complete lifting of South Africa's

44-month-old state of emergency. Since 1987, when the rivalries between the ANC and Inkatha burst into violence, as many as 3,000 people have been killed.

Police reported the three men whose bodies were found late Tuesday apparently had been stabbed and then set on fire. Earlier Tuesday, a man had been stabbed to death before he was ''necklaced'' - the process of placing a gas-soaked tire around a person's neck and setting it on fire.

According to a police report Wednesday on the violence in Natal, two people were killed and one injured when police called in to end clashes between the two sides opened fire at stone-throwers in Malakazi, located south of the coastal city of Durban.

Mandela, in his speech to thousands of supporters in Durban Sunday, urged an end to the bitter fighting and called for his backers to ''close down the death factories.''

Nationwide, police reported at least 34 people were arrested in unrest-related incidents during the past 24 hours.

Minister of Law and Order Adriaan Vlok has expressed concern over attacks against police and attempts to intimidate them in the Natal province. Since the beginning of the year, seven policemen have been slain in 108 attacks against police, with four policemen killed over the weekend, Vlok said.

Elsewhere in South Africa Wednesday, university students held rallies to protest admission criteria as well as student exclusion and expulsion policies they consider discriminatory.

In Cape Town, more than 1,000 students marched on the campus of the University of Cape Town as part of the two-day protest begun Tuesday. The students marched to the Bremner administration building, carrying ANC flags and singing.

Among their demands presented to administration officials were the ''abolition of the elitist, middle-class oriented admissions criteria,'' immediate admission of excluded students, scrapping of the exclusions policy, and increased availability of accommodations for black students.

Black students maintain university policies, such as expulsion if a student fails a certain number of courses, are discriminatory because the level set is based on standards that are too high.

Under the university level, the government maintains separate white and black school systems, and black students and educators say their systems are of poorer quality.

The two-day nationwide protest campaign grew out of a demonstration staged earlier this month by the Black Students Society in Cape Town when about 100 students staged a sit-in at a university administration building.

#90059u1384 02/28/1990 ~United Press International

BONN, WEST GERMANY (FEB. 28) UPI - Chancellor Helmut Kohl said Wednesday it is not the Bonn government but the flight of thousands of East German refugees to West Germany that is speeding up German unification.

A government spokesman said Kohl, in a report to the Cabinet on his weekend meeting with President Bush in the United States, denied West Germany is responsible for the speed in which the Germanys are moving toward unification.

The momentum, often compared to that of a runaway train, has been criticized in both East and West.

Kohl said Bonn has not exerted pressure nor is working on a deadline to end the 45-year long division of Germany, deputy government spokesman Dieter Vogel told a news conference.

The West German chancellor said that was shown by his original plan for unification that had called for a lengthy procedure involving the concluding of East-West German agreements and formation of federal structures.

''Pressure is being exerted by the unchanged high number of emigrants,'' Vogel quoted Kohl as saying.

From Tuesday morning to 4 a.m. Wednesday, 2,800 East Germans arrived in West Germany to stay, Vogel said.

So far this year 114,635 have come. Some were unilling to wait for unification, others were impatient with the slow pace of economic and social reform in East Germany, some fearful of the upheaval unity will bring there.

Many wanted a share now in West German prosperity and were attracted by the subsidies and welfare payments the East German emigrants get.

This year's East German refugee total was expected to soar well over last year's total of 344,000.

The flood has strained the financial and physical resources of authorities in communities where the refugees are sent. They have been given emergency

quarters in army barracks, gymnasiums, on ships in harbors, in villages and even in converted brothels.

The cabinet voted Wednesday to approve a $295 million appropriation for state and city authorities to build new emergency quarters.

West German Interior Minister Wolfgang Schaeuble said in a statement on the appropriation that the flood is causing ''great problems'' and ''growing difficulty'' for communities. He said he understands the concern many West Germans have about the surge of refugees.

A public opinion poll published Wednesday showed the refugees, who were hailed by the vast majority of West Germans as freedom fighters when they fled through Hungary and Czechoslovakia before the Communists opened the Wall, now were wearing out their welcome.

A poll taken by the Forsa Institute for the West German magazine Stern disclosed 68 percent of West Germans want the emigration stopped. Fifty-five percent said the refugees will deprive West Germans of jobs and housing.

Some West German welfare officials said in contrast to the young families of industrious ''pioneer'' types who fled in October and November, many refugees now were dropouts, misfits, opportunists, alcoholics, drug addicts and criminals.

#90059u1385 02/28/1990 ~United Press International

EVERMAN, TX (FEB. 28) UPI - A 5-year-old boy who was coaxed into drinking as much as 10 ounces of liquor at a party and suffered brain damage died Wednesday, police said.

Raymond Griffin was taken off life-support systems at Cook Fort Worth Children's Hospital about 10 p.m. Tuesday, and died about 8:40 a.m., police said.

The boy was given alcohol - beer, bourbon and brandy - at a party Friday night. Police said they speculate Anthony Jimerson, 21, used the liquor to try to quiet him so he could be alone with the child's mother.

''He handed him the bottle and told him to drink like a man,'' Everman police detective David Brown said.

The boy suffered irreversible brain damage and later went into a coma, authorities said.

Jimerson had been charged Monday with causing injury to a child, and was

being held at Everman City Jail in lieu of $100,000 bail. Police Chief Roger Larm said Wednesday the charge would be upgraded to felony murder with injury to a child, a first-degree felony.

Police said the Fort Worth man coaxed the boy into drinking from a concoction of whiskey and brandy, then gave him a bottle of bourbon. Investigators said the boy may have ingested as much as 10 ounces of alcohol.

''The little boy took the bottle and turned it up. He drank almost half a pint of pure bourbon; I can't do that,'' Brown said.

Police said Jimerson joined Raymond and his mother, Patricia Griffin, 31, at an apartment party about 7 p.m. Friday.

Raymond was one of about five children, including Raymond's 2-year-old brother, who had been brought to the party by their parents.

Witnesses told police Jimerson began giving the boy sips of his beer early in the evening. About 11 p.m., while Patricia Griffin was out getting ice, Jimerson had Raymond drink from a glass containing whiskey mixed with brandy, police said.

Then he opened a pint bottle of bourbon and gave it to the child, police said.

The boy's mother, who was at the child's bedside and could not be reached for comment, told police she did not learn until Saturday afternoon that Raymond had been given alcohol.

But some witnesses told police that Griffin had argued with Jimerson at the party for giving the child beer.

Griffin began noticing that the child was shaking and vomiting about 3 a.m. Saturday, but mistook the illness for flu symptoms and did not call for an ambulance until about 2:30 p.m., police said.

Doctors at Huguley Memorial Hospital in Fort Worth determined the boy had been suffering brain seizures for the previous 12 to 16 hours.

Because of the seriousness of his condition, the boy was taken at about 8 p.m. to Cook's, where doctors induced a coma to stop the seizures, police said.

#90059u1392 02/28/1990 ~United Press International

WASHINGTON (FEB. 28) UPI - The Supreme Court gave police broader authority

Wednesday to conduct warrantless searches of homes when they believe their safety is threatened.

The court's 7-2 decision extends the search known as the ''Terry stop'' - the auhtority to frisk a suspect for concealed weapons if the officer feels endangered - to include private homes.

The ruling stems from a case in which a Maryland appeals court overturned the robbery conviction of a Prince George's County man. The state court found police had violated his Fourth Amendment right against unreasonable searches when they seized evidence from his home, which they had entered based on an arrest warrant.

Justice Byron White, writing for the majority, said the appeals court held police to too strict a Fourth Amendment standard.

''Such a protective sweep, aimed at protecting the arresting officers, is nevertheless not a full search of the premises, but may extend only to a cursory inspection of those spaces where a person may be found,'' White wrote.

Justice William Brennan, joined by Justice Thurgood Marshall, dissented.

''While perhaps not a full-blown or top-to-bottom search, a protective sweep is much closer to it than to a limited pat down for weapons or a 'frisk' of an automobile,'' Brennan wrote.

''In light of the special sanctity of a private residence and the highly intrusive nature of a protective sweep, I firmly believe that police officers must have probable cause'' to believe they are endangered before they can sweep search a home, Brennan wrote.

Chief Justice William Rehnquist and Justices Harry Blackmun, John Paul Stevens, Sandra Day O'Connor, Antonin Scalia and Anthony Kennedy joined White in the majority.

The case focused on whether police can seize evidence from a home while they are making warrantless, cursory checks of the home to see if accomplices or others are present.

The Maryland Court of Appeals, in a 4-3 decision, reversed the 1986 conviction of Jerome Edward Buie, who was found guilty of robbing a suburban Washington, D.C., pizzeria at gunpoint with an accomplice.

After obtaining an arrest warrant but not a search warrant, police found Buie hiding in his basement and arrested him.

An officer then searched the basement for other possible suspects, but

found none. He did seize a red running suit that fit a witness's description of clothing worn by one suspect.

The appeals court ruled the officer's action violated Buie's Fourth Amendment rights on search and seizure and reversed his conviction.

#90059u1399 02/28/1990 ~United Press International

WASHINGTON (FEB. 28) UPI - Secretary of State James Baker said Wednesday he is less concerned that a unified Germany will force the removal of U.S. troops from its soil than that a budget-cutting Congress will demand bringing them home.

''I will give you as good a guarantee that the Germans won't do it as you can give me that the Congress won't do it,'' Baker told Sen. Wyche Fowler, D-Ga.

There is concern in the Soviet Union, as well as in Poland and other Eastern European nations, that an aggressive, powerful and united Germany will look to lands lost on the Polish side of the border formed by the Oder and Neisse rivers and again threaten Europe as it did in two world wars.

Baker told the Senate Budget Committee that stability in Europe is reinforced by the recent agreement with Moscow that allows both the Soviet Union and the United States to station no more than 195,000 troops on the central battleground zone of Central Europe, while also allowing another 30,000 American soldiers elsewhere in the region.

''We will stay as long as we are wanted,'' Baker said. ''I worry quite frankly not that the Germans will ask us to leave, but there will be some folks up here will ask us to leave, and they will ask us to go down below the levels that we think ought to be maintained.''

The Pentagon budget largely goes to European defense, and offers a prime target for budget cutters.

Fowler and Sen Timothy Wirth, D-Colo., hammered on the point that a unified Germany could send all of the U.S. troops packing, except the 30,000 stationed elsewhere, while Soviet troops, at the insistence of Moscow's former satellites, have withdrawn. Baker dismissed the concerns as hypothetical.

''You're asking me if I'm confident that the Germans will want us there forever. Nobody can ever make a statement like that, I don't think,''

Baker said.

''But the fact of the matter is, not only do the Germans want us there, but all the other Western European allies of the United States want us there, and, quite frankly, a number of countries in Eastern Europe want us there. And I am not totally certain that the Soviets don't want us there.

''Who is the enemy? The president has answered the question. We get the question all the time: Who is the enemy?'' Baker said. ''The enemy is unpredictability and instability. And there is a genuine feeling on the part of most Europeans that the presence of U.S. forces promotes stability and promotes predictability.

Chancellor Helmut Kohl was less than explicit on the question of lost territories in a news conference with President Bush on Sunday, but Baker cautioned against any doubts.

Baker said a united Germany will remain in NATO and any change in the political map of Europe must be by a peaceful process.

Kohl, who is leading the drive for German reunification, has some political limits on what he can say, Baker said.

''He is not the chancellor of a united Germany, and therefore he really does not have the legal authority to agree to or speak with reference to what should be the unified Germany,'' Baker said.

''The United States and others involved in this process are quite conscious of history, and our strong position is that the current borders are and should be involable and should be changed by only peaceful means '' he said.

#90059u1401 02/28/1990 ~United Press International

(FEB. 28) - The abortion debate moved in high-profile fashion Wednesday to state capitols in Minnesota and Maryland, where advocates from both sides argued over bills designed to ban almost all abortions by making them illegal for birth control reasons.

In St. Paul, Minn., an estimated 1,500 abortion rights proponents demonstrated against the proposal, which could come to a committee vote this week.

Supporters of the plan boast it would prohibit 90 percent of abortions performed in Minnesota, while opponents agree it is one of the most restrictive proposals written since the Supreme Court last July gave states more power to limit the practice.

''The bill ... is extreme, irresponsible, dangerous and demeaning to women '' said Kate Michelman, head of the National Abortion Rights Action League. ''It poses as great a threat as any bill in any statehouse in America this year.,

''Without a doubt, this bill is designed to outlaw nearly every abortion in Minnesota,'' added Michelman, whose group bought newspaper advertisements for the past two days protesting the plan.

But Rep. Steve Wenzel, the Democrat sponsor of the plan, said his bill ''seeks to restore the right to life for unborn children.''

''It will make it unlawful to attempt to perform an abortion or to conduct an abortion for birth control,'' he said.

The bill would allow abortions only in cases of rape, incest, or when the life of the mother is threatened or she would suffer severe and long-lasting health damage from the pregnancy. It also would allow abortions when the fetus was found to have a profound and uncorrectable physical or mental disability.

While abortion rights advocates dominated the day in Minnesota, both sides made pitches in Maryland, where hearings opened on a similar measure to prohibit abortions for birth control reasons.

But also brought up in Maryland was a plan from abortion rights advocates who are trying to guarantee the protections given abortion under the Supreme Court's 1973 Roe vs. Wade decision. That ruling, which many people believe may be overturned by the Supreme Court, said a woman had a right to an abortion in the first three months of pregnancy.

Under the plan from abortion rights forces, the guidelines set out by the Roe decision would be written into Maryland law.

However, it is likely that if either bill is approved, a petition drive could force the sensitive issue to be placed before the voters in the November election.

Another piece of anti-abortion legislation pending in Maryland would require parental notification of abortions performed on minors, except in cases where the minor was the subject of parental abuse or where she were adjudged ''mature'' by a court.

Two other two bills would require the reporting of every abortion in the state, along with any complications that arise, and set up a system to accredit health care practitioners permitted to perform abortions.

Despite the considerable attention given the subject Wednesday, House Majority leader John Arnick, a Democrat, said he expected little new information. ''Everyone's already decided where they stand,'' Arnick said.

#90059u1409 02/28/1990 ~United Press International

WASHINGTON (FEB. 28) UPI - The Supreme Court was challenged Wednesday to decide whether officials who mishandled wire tap evidence in Connecticut's 1983 Wells Fargo heist made a simple ''legal error'' or committed ''willful sloppiness.''

The justices heard arguments in the case that pits the government against members of the alleged Puerto Rican terrorist group, Los Macheteros, or machete wielders.

The government called on the justices to decide what standard to use to determine when a delay in sealing wiretaps should lead to suppression of the evidence.

But Richard Reeve, representing the defendants, told the court, ''The government is asking us to rewrite this statute, all so we can protect the negligent, sometimes willful, sloppiness'' of government officers.

Los Macheteros won suppression of some government wiretaps that implicated the group in the 1983 Wells Fargo robbery in West Hartford, Conn. Those wiretaps were conducted as part of the investigation into a 1983 rocket attack on an FBI office in Puerto Rico.

A grand jury issued indictments against a number of Puerto Ricans, who were arrested in 1985, most notably Filiberto Ojeda Rios.

The 2nd U.S. Circuit Court of Appeals ordered 378 wiretaps suppressed in the case, noting they were not sealed by the court immediately after the surveillance ended. The government appealed to the high court, which likely will decide the case by summer.

Such seals are required to prevent evidence tampering.

Deputy Solicitor General William Bryson, arguing for the government, urged the court to clarify the timing issue concerning such seals. He said the person in charge of having them sealed in the Ojeda case misinterpreted a provision of the law.

''This was an understandable legal error,'' Bryson said. ''There should not be an exclusion in this case because (the mistake) was explained to the satisfaction of the district court.''

Ojeda, 56, an alleged terrorist and the key defendant in the $7.2 million Wells Fargo robbery, has returned to his native Puerto Rico while awaiting trial.

The self-proclaimed founder of a clandestine Puerto Rican independence group called Los Macheteros, Ojeda was acquitted Aug. 26 in Puerto Rico on eight charges related to the shooting of an FBI agent during his arrest in August 1985 along with several other suspects in the Wells Fargo robbery.

Ojeda, who the FBI has claimed is a Cuban intelligence agent, and most of the other defendants were accused of conspiracy in the planning of the Sept. 12, 1983, robbery.

Federal prosecutors claim the heist was staged to finance a violent campaign for Puerto Rican independence through the Los Macheteros, which the FBI claims is linked to several acts of violence against the United States.

Besides the Wells Fargo heist, the Macheteros also claimed responsibility for a December 1979 attack near San Juan on a bus transporting U.S. Marines that left two Marines dead and 10 wounded, and the January 1981 bombing at the Muniz air base that destroyed nine planes of the Puerto Rican Air National Guard.

89-61 United States vs. Filiberto Ojeda Rios, et al.

#90059u1425 02/28/1990 ~United Press International

PRAGUE, CZECHOSLOVAKIA (FEB. 28) UPI - President Vaclav Havel, fresh from a two-day visit to Moscow, Wednesday urged the creation of a so-called ''Helsinki Zone'' stretching across the northern hemisphire to replace the existing East-West bloc structures.

Havel, a dissident playwright before becoming Czechoslovakia's president, also announced that he had re-invited Presidents Bush and Mikhail Gorbachev to hold a summit meeting in Prague.

Fine-tuning his proposals for a Europe free of the traditional East-West bloc structure, Havel called for a summit of the heads of all European states this year to prepare a new round of talks to be held in late 1990 or early 1991.

''It should become the equivalent of the universal peace treaty that never was achieved at the end of World War II,'' Havel said.

Havel said such an accord would confirm existing European frontiers, and the reunification of Germany would be defined and ratified by this process.

Then ''the existing pacts should merge,'' Havel said. ''These two pacts should flow into a unified European structure of a Helsinki Zone in the Northern Hemisphere, including the United States and Canada. The Soviet Union closes the circle.''

While in Washington on a recent visit, Havel unveiled a proposal calling for a prompt meeting of the nations participating in the Helsinki Process on political boundaries and human rights in Europe.

The ''Helsinki II'' conference is originally scheduled in 1992, but Havel said if such a session were called earlier it could be used to end formally World War II, help assure a democratic Germany and a new Europe.

Havel said the new structure could accept a unified Germany.

''Both alternatives are equally strange, of German neutrality or German membership of NATO. But there should be no problem defining the position of Germany and creating a system to protect Europe.''

Havel ended a two-day visit Tuesday in which he and Gorbachev met and signed a bilateral accord for the total withdrawal of Soviet troops sent in by Leonid Brezhnev to crush the 1968 ''Prague Spring'' reform movement.

The first train with Soviet soldiers coming home under the pullout pact crossed the two Warsaw Pact neighbors' border from the Czechoslovak town of Cierna-Nad-Tisa shortly before Havel left Moscow.

The troop withdrawal is part of Gorbachev's policy of ending costly foreign occupations to concentrate on domestic problems.

Speaking about his talks with Gorbachev, Havel said ''Whoever can read between the lines understands that with this declaration, the Brezhnev doctrine has been totally abolished.''

Havel said his visit with Gorbachev was ''a conversation between two people concerned with the future not only of this continent but of the whole planet.''

''He is a careful, shy gentle man, and willing to accept other people's ideas. ''Well, to be brief, I like him,'' he said.

Havel said he had again invited Bush and Gorbachev to hold a future summit meeting in Czechoslovakia.

''The proposal met with great interest by both of them,'' Havel said, adding ''We could find them a nice little castle.''

#90059u1432 02/28/1990 ~United Press International

ATHENS, GREECE (FEB. 28) UPI - Iranian security forces have arrested nearly 5,000 alleged drug addicts as well as more than 500 alleged traffickers in a sweep of two southeastern provinces, Tehran radio said Wednesday.

Guards from the Islamic Revolutionary Komitehs, or special security forces launched the operation about four days ago to stamp out drug trafficking in Sistan and Baluchistan province, close to the Pakistan border, a radio report monitored in Athens said.

The guards arrested 4,863 people for alleged addiction to narcotic drugs, and 530 others on charges of trafficking, the radio said.

Under a strict law passed in January 1989, addiction to narcotic drugs is a criminal offense in Iran, and alleged addicts are sent to special labor camps in remote areas until cured.

The latest arrests brought to at least 46,000 the total number of alleged addicts rounded up since the law went into effect last September, but some 10,000 were released after they were cured, reports from Iran said.

The 530 arrested for trafficking face possible death penalties, if found guilty in Islamic courts.

In its latest sweep through Sistan and Baluchistan, guards seized nearly 2.4 tons of narcotics, mainly opium, the radio said. The new law makes it a capital offense to be in possession of 11 pounds or more of opium, or as little as 1 ounce of heroin.

Iran has officially announced the execution of at least 1,324 people for drug trafficking since it launched its latest anti-drug campaign in January 1989.

Since they launched the campaign against drug trafficking last year, the guards claim to have seized some 30 tons of narcotics, including opium, heroin and hashish, from traffickers.

Earlier reports in the Tehran newspaper Kayhan said as of early January, Iran's security forces began taking new measures in the border areas to check the flow of narcotics into the country from Afghanistan and Pakistan.

These included digging canals to obstruct the flow of convoys of vehicles across the borders and setting up electronic and other devices to warn the guards when an illegal crossing was attempted.

Another phase of the plan calls for the uprooting of border villages and moving them further inland to deprive traffickers of shelters. Kayhan did not say how many border villages would be relocated.

Earlier measures along Iran's eastern border included setting up outposts at regular intervals, laying down minefields across suspected drug routes and miles of barbed wire fencing along the borders.

Kayhan said when the new installations are in place, special battalions of border guards would be deployed in the area.

Iranian officials claim the bulk of illegal drugs distributed in the country originates across the eastern borders with Pakistan and Afghanistan.

In Pakistan, much of the illicit drug trade passes through the Afghan refugee camps, but police corruption and the growing power of the drug barons makes it difficult for the authorities to control the trade.

Pakistani authorities acknowledge the drug problem has become difficult to control and have agreed to assist Iran in tracking down traffickers.

U.N. officials include Iran, Afghanistan and Pakistan in a so-called ''Golden Crescent'' where opium, heroin and hashish are produced in large quantities.

#90059u1433 02/28/1990 ~United Press International
WASHINGTON (FEB. 28) UPI - A South African tribal chief met with President Bush at the White House Wednesday and backed Nelson Mandela's call for an end to the fighting between their respective black followers.

''We as blacks must get our act together,'' Gatsha Mangosuthu Buthelezi said following talks with Bush about how the United States could help achieve a negotiated end to South Africa's racial policy of apartheid.

''I fear that the biggest obstactle to negotiations taking off are these cleavages within the black community,'' said Buthelezi, leader of Inkatha, a conservative Zulu group.

For three years, members of the United Democratic Front, which backs Mandela, the black nationalist leader, have been fighting with Inkatha supporters. So far, the ''Zulu wars'' have claimed as many as 3,000 lives.

Mandela, freed on Feb. 11 after 27 years in prison, pleaded for an end to the violence Sunday. Since then, at least 10 more have been killed and dozens of others arrested.

South African President Frederik de Klerk has said the fighting is one of the factors against his complete lifting of South Africa's 44-month-old state of emergency.

''I can't be a prophet and say it (the violence) will end,'' Buthelezi said. ''But clearly if it does not, we cannot have negotiations.''

Buthelezi wants an end to apartheid, but members of the newly legalized African National Congress oppose him for his opposition to sanctions, strikes and armed struggle against South Africa's white government.

Buthelezi was the first South African figure to meet with Bush since de Klerk freed Mandela. The president has invited de Klerk and Mandela to the White House but dates have not yet been set.

A White House spokesman said Bush and the tribal chief discussed ways that the United States could help expedite the reform process, but that it remains uncertain when U.S. sanctions against South Africa would be lifted.

Buthelezi said while he did not press Bush about the sanctions, ''I made the point that it is all well and good to talk about freedom. But clearly freedom is meaningless unless it affects the quality of life of ordinary people.''

Buthelezi, responding to questions, said, ''I have criticized Mandela,'' but added that the black leader ''has handled himself extremely well'' since his release from prison.

#90059u1441 02/28/1990 ~United Press International

WASHINGTON (FEB. 28) UPI - The 1990 census will be the most comprehensive in U.S. history and will result in congressional seat losses for the Northeast and Midwest and gains for the South and West, census officials said Wednesday.

The nation's official population count, which the government has taken the first year of every decade since 1790, is expected to include some 250 million people in 106 million housing units, said Peter Bounpane, assistant director of the Census Bureau.

The 1990 census will include U.S. military and civilian personnel overseas for the first time since 1970 and homeless citizens for the first time ever, Bounpane said.

''We have basically gotten tremendous cooperation from homeless organizations,'' Bounpane said. ''These people deserve to be counted. They

are citizens and residents who are welcome to contribute to the count.''

William O'Hare, director of Policy Studies at the Population Reference Bureau, said the reapportionment of congressional districts as a result of census figures will see representation gains in the nation's Sun Belt.

''The Midwest and Northeast are going to lose seats and the South and West are going to gain seats in Congress,'' O'Hare said, adding that California Texas and Florida will be the big winners.

''Florida, Texas and California will have 22 percent of the seats in Congress after this count,'' O'Hare said.

Among those states projected to lose seats are New York, Pennsylvania, Ohio, Michigan, Illinois and Massachusetts, with New York losing as many three districts, O'Hare said.

Census Bureau efforts to avoid a significant undercount of minorities are extensive, Bounpane said.

The bureau has designed outreach and promotion programs in minority communities and is recruiting census workers who live in public housing projects and are familiar with poor inner city neighborhoods where accurate census counts have been difficult in the past.

''We have a nationwide staff of 300 community service people who have been out there talking to community-based organizations for over a year now, because for many people the (television) advertising is not sufficient,'' Bounpane said. ''You have to talk to them one on one if you're going to convince them of the importance of being in the census.''

The government also will provide telephone assistance to citizens who speak Asian languages or Spanish.

#90059u1459 02/28/1990 ~United Press International

(FEB. 28) UPI - TODAY'S PEOPLE:

GRAMMY WHAMMY: Bill Cosby issues the first in a series of jazz recordings this month for which he is composer and producer and plays percussion. He won't be surprised if the project is ignored by the folks at the Grammy Awards and could not care less. ''They're celebrating what they don't know '' says Cosby, a passionate advocate for jazz. ''When you look at the way they set up the categories, you know from Jump Street that they don't know anything about what they are doing and they certainly don't know anything about what other people are doing.''

NEWMAN FOR THE DEFENSE: Paul Newman's legal rematch begins with jury selection next Wednesday in Bridgeport, Conn. Newman is being sued by Westport deli owner Julius Gold, who wants a share of Newman's food business because he claims he helped developed it. The first trial, which featured testimony from Newman himself, ended in a mistrial in 1988 after jurors were inadvertently given documents that had been ruled inadmissable. Newman denies that Gold helped develop his salad dressing or that he was promised a cut of the Newman's Own company profits.

LOWE AT LARGE: Now that his sex videotape scandal has died down, Rob Lowe is becoming more visible. He was scheduled to be a guest disc jockey Thursday on WHTZ in New York and he will no doubt be the target of some jokes when he hosts ''Saturday Night Live'' on March 17. His ironic new movie, ''Bad Influences,'' in which he plays a man who videotapes a couple having sex, opens March 9.

SECOND CHOICE ELVIS: Michael St. Gerard was a last-minute replacement to star in the TV series ''Elvis: The Early Years'' after the first choice washed out. Five days before filming was to begin, the show's producers, Priscilla Presley and Jerry Schilling, checked the progress of the first choice actor - whose identity they won't reveal - and were displeased. ''We really knew then it wasn't going to work,'' Schilling told Us magazine. ''We were getting desperate.'' They called in St. Gerard, who had auditioned for the part earlier and had played Elvis in Dennis Quaid's ''Great Balls of Fire.'' Priscilla says she sees some similarities between St. Gerard and her one-time husband. ''Elvis was charming. He had charisma '' she said. ''And I really feel Michael has these qualities naturally, not just trying to be Elvis.''

MCGOVERN ON THE RUN?: You might have the chance to break out those ''McGovern for President'' buttons in a couple of years. George McGovern, 67, the liberal Democrat who lost to Richard Nixon in the 1972 election, says he may take another shot at the presidency in 1992 unless a younger, more determined candidate joins the Democratic race. McGovern's favorite candidates are New York Gov. Mario Cuomo and Sen. Bill Bradley, D-N.J. Until the campaign starts, McGovern is keeping busy by writing a book about how the United States should react to the end of the Cold War, lecturing at colleges and running the inn he bought in Stratford, Conn.

TRUMP NOISE: Here's something about Donald Trump that's not related to his marital troubles. Trump, who once was part of a campaign to quiet the jet traffic in Palm Beach, Fla., still will be able to fly his noisy private jet to the resort, despite new noise curbs. The Palm Beach County noise-control plan will gradually phase out older, louder commercial jets but not private ones like Trump's 727. Trump's plane is so noisy that the county already restricts when it can take off and land but officials say the exemption for private planes was not made in deference to Trump. The billionaire New York developer once proposed moving Palm Beach

International Airport so noisy jets couldn't ascend over his mansion and was part of a neighborhood group that initiated a lawsuit aimed at limiting jet noise.

#90059u1466 02/28/1990 ~United Press International

DETROIT (FEB. 28) UPI - Toyota Motor Sales U.S.A. said Wednesday it is recalling about 120,000 Camry and Corolla cars equipped with cruise control to replace a defective computer in the system.

The recall covers the 1983 and 1984 Camry and the 1984 Corolla models.

Toyota spokesman Edd Snyder said a soldered connection in the system could crack from the constant heating and cooling cycles, resulting in increased engine speed while the car is either stationary or moving.

However, Snyder said that applying the brakes will return the engine to idle speed and that the condition does not occur if the main cruise control switch is in the ''off'' position.

Toyota is aware of two owner complaints, both in Canada and both involving cars that were over six years old with more than 100,000 miles on them.

But the automaker, which will make all repairs at authorized dealers free of charge, is not aware of any accidents or injuries related to the condition.

-30- 1172

#90059u1490 02/28/1990 ~United Press International

ORLANDO, FL (FEB. 28) UPI - A passenger aboard a United Airlines jet spotted smoke in the cabin Wednesday while the DC-8 was at the terminal and pulled open an emergency exit in a panic, prompting more than two dozen people to evacuate the plane, officials said.

There was no fire on the aircraft, but about 30 of the 167 passengers aboard Flight 123 slid down the chute onto the tarmac at Orlando International Airport, United spokeswoman Sara Dornacker said.

The rest of the passengers walked off the plane through the jetway in an evacuation by flight attendants, Dornacker said.

The passenger who yanked open the exit door had seen smoke from an overheating air conditioning unit, something Dornacker described as ''not that uncommon.''

One passenger complained of a back injury in the mishap and was taken to

the hospital, Dornacker said.

Carolyn Fennell, spokeswoman for the Greater Orlando Aviation Authority, said the passenger who panicked had forced open the left rear exit and deployed the chute. The passenger was not identified.

There were 167 passengers and a crew of seven on the plane, which was bound for Chicago's O'Hare International Airport, then on to San Francisco.

The incident happened at 7:15 a.m., one minute before the plane's scheduled departure, Dornacker said.

''When you have an air conditioning pack overheat, it is likely that you might get some evidence of smoke in the cabin, either the smell or appearance of smoke,'' Dornacker said.

She said under normal circumstances, the captain would decide whether to have maintenance workers check the air conditioning system.

''The crew would not normally initiate an evacuation under those circumstances,'' she said.

The flight was canceled to allow maintenance workers to replace the chute, she said.

Passengers were being booked onto flights by other airlines, she said.

#90059u1508 02/28/1990 ~United Press International

WASHINGTON (FEB. 28) UPI - The search for a cure for the common cold nosed ahead Wednesday with the development of a potential drug that can block nearly half of all cold viruses in the test tube.

Reporting in the journal Nature, a research team led by Boehringer Ingelheim Pharmaceuticals of Ridgefield, Conn., said it has designed a molecule that in the test tube has the power to prevent cold viruses from infecting human cells.

The molecule is a decoy version of the natural pathway, called the intracellular adhesion molecule-1 (ICAM-1), that about 45 percent of cold viruses use to invade human nasal cells. Scientists' eventual goal is to use the molecule to make a nose spray to prevent colds.

By mimicking natural ICAM-1, the laboratory-made molecule fooled cold viruses into binding to its surface rather than infecting healthy cells in the test tube, researchers said. The molecule's virus-blocking efficacy was about 90 percent - enough to make a substantial difference in cold

symptoms if the action had occurred in a human nose, researchers said.

''These results are very encouraging, but the leap from the test tube to the nose is a very big one,'' said Steven Marlin, head of the research team.

It will take probably five years before the molecule, called soluable ICAM-1, is tested in humans, he said.

''Even if it is 100 percent effective, it's not going to be a cure in the sense that it works against every common cold. At best, it would be effective against 45 percent of colds,'' added Marlin, noting about 55 percent of cold viruses use other routes to infect cells.

In March 1989, Marlin and another group from the Harvard-affiliated Center for Blood Research identified the ICAM-1 receptor as a major infective pathway of many cold viruses. The two teams are now working together on drug development.

''This approach shows us a way of controlling cold viruses,'' Marlin said. ''We are a lot farther along than we were a year ago, but we still have a very long way to go.''

The common cold is the most widespread illness in the United States. The average American child gets about six colds a year, while adults get two or three colds annually.

There are about 200 varieties of cold viruses, explaining why it has been so difficult to develop one way to prevent or treat colds. Right now, there is no cure for colds. Doctors recommend rest, drinking fluids and decongestants for stuffy sinuses.

If further tests support the early promise, Marlin envisions soluable ICAM-1 being delivered by nose spray or nose drops to people at risk of catching colds. Scientists hope the drug will be able to prevent colds or at least cut them short.

In an accompanying editorial, Charles Bangham and Andrew McMichael of England's John Radcliffe Hospital said solualbe ICAM-1 appears to ''offer a noval method of preventing infection of cells by the common cold virus.''

But the British researchers said major hurdles remain before such a drug can become standard treatment in humans.

Animal studies are needed to show that adequate levels of ICAM-1 can be maintained in the nose and that the drug works as well in the body as in the test tube, they said. Marlin said that may pose a problem because chimpanzees are the only animals that can be infected with the cold

viruses affecting humans, and even then, the chimps do not come down with colds.

Another obstacle is the possibility that spraying ICAM-1 molecules up the nose may trigger allergic reactions that cause more discomfort than the cold itself, Bangham and McMichael said.

Marlin said he doubts that will be a major problem because the decoy molecules consist of a protein closely resembling the body's natural ICAM-1 receptors. A similar drug, soluable CD-4, being tested as a decoy molecule against the AIDS virus has not produced the severe immune reactions some had feared, he noted.

The British researchers said more research is needed to determine if the cold viruses blocked by the decoy molecules can enter cells by alternate routes to ICAM-1. If so, the value of the drug may be limited. Researchers also must figure out how to produce large amounts of soluable ICAM-I at a reasonable cost, Marlin said.

BOGOTA, COLOMBIA (FEB. 28) UPI - Authorities have arrested a suspected member of the Cali cocaine cartel who is wanted in Washington state on drug trafficking charges, bringing to 14 the number of Colombians awaiting extradition to the United States, a Justice Ministry source said Wednesday.

Jorge Ortiz Ibanez was captured Tuesday in Ibague, 81 miles west of Bogota and placed in a high security jail in the capital, the source said. He is wanted on trafficking charges in Washington state but is not on the U.S. Justice department's list of the 12 most wanted Colombian drug-runners.

Fourteen Colombian have been transferred to the United States on drug charges since the government re-established extradition in August as part of its effort in the war against the cocaine cartels.

Police said Ortiz Ibanez is a member of the Cali cartel, reportedly led by fugitive former banker Gilberto Rodriguez Orejuela. The Cali syndicate is reportedly at war with its larger rival, the powerful Medellin cartel.

The Ortiz capture followed the arrest Monday of Medellin drug figure Manuel Garces Gonzales, 63, who is also wanted on trafficking charges in the United States.

Despite the recent string of arrests, no Colombian has been extradited in more than a month. The last suspect extradited, Joseph Amsili Cohen, wanted on drug charges in Massachusetts, Florida and Ohio, was turned over to American drug enforcement officials and flown to the United States on

Jan. 22.

Police announced Tuesday they had arrested two people and located cash, precious metals and weapons belonging to slain drug kingpin Jose Rodriguez Gacha in a raid on a house in southeast Bogota.

The raid Mondy netted 18 gold ingots, 93 gold coins, 100 silver plates, $222,000 in cash, 100,000 Australian dollars, a gold plated Colt revolver and various precious jewels.

Rodriguez Gacha, whose fortune was estimated at up to $4 billion, was slain last December when he tried to shoot his way out of a police ambush.

#90059u1530 02/28/1990 ~United Press International

MEMPHIS, TN (FEB. 28) UPI - A federal prosecutor lashed out at Rep. Harold Ford, D-Tenn., in opening statements of his trial Wednesday, accusing him of taking $1.5 million in bribes disguised as loans from a candidate for governor.

But the lawyer for Ford, the only black congressman in Tennessee history, told the jury Republican prosecutors are bent on destroying the flamboyant eight-term Democrat whose political machine controls the votes of Memphis.

''This case is an attack on his personal life,'' defense lawyer William McDaniels said in his opening statements. ''This is an attack on his political life. This is not a criminal case. The government's case and the scope and enormity of it do not make sense.''

Ford, 44, is accused of 19 counts of bank fraud, mail fraud and conspiracy to defraud the government and faces 95 years in prison if convicted of all charges.

The government contends Ford took $1.5 million in fraudulent loans from banks controlled by brothers Jake and C.H. Butcher Jr. in return for delivering the votes of Memphis to Jake Butcher in his 1978 run for governor. Butcher swept 60 percent of the vote in Memphis, but lost the election to Republican Lamar Alexander.

''They were able to bribe the congressman with these loans,'' Assistant U.S. Attorney Gary Humble told the jury. ''Why did they bribe him? They wanted what the congressman had to offer - the trust placed in him by his constituents. The congressmen gave them what he had - the power among his people.''

Ford has proclaimed his innocence since his indictment in 1987 and accuses the government of racial and political motivation. He maintains the loans

were for legitimate business interests, including his family's funeral home.

A jury of eight blacks and four whites was seated Tuesday to hear the trial of Ford and three Butcher associates - lawyers Karl Schledwitz and Douglas Beaty and David Crabtree - who are charged with funneling the loans through bogus channels.

The courtroom was packed Wednesday with Ford supporters. His elderly mother, who is recovering from a stroke, sat in a wheelchair behind the defense table.

The Butchers controlled a billion-dollar network of 20 banks in Tennessee and Kentucky until its collapse beginning in 1982. Both men are serving 20-year federal prison sentences for fraud in the bank failures.

In his opening statements, Humble said Ford took loans in 18 payments between 1976 and 1983 and paid back only $25,000 after federal regulators swept in to close the Butcher banks.

Humble noted that Ford declared himself a pauper in two civil suits against him in 1972, but ''by 1982, the evidence will show he had two houses - one in Memphis worth $200,000 and one in Washington, D.C., worth $200,000. He drove a Mercedes and he got all those things from the Butchers.

''When Harold Ford was elected to Congress he gained a lot of political power. The Butchers wanted him to use that power to further their business and political interests so they loaned him money. But the evidence will show that these were not loans.''

But McDaniels said, ''The loans that Harold Ford took out he intended to repay.

''It is not a crime to have a loan. There was no sale of political influence. It is not a crime to be a pauper in 1972 and 10 years later to have a house or two houses if you live in two places. It is not a crime to turn to friends or political allies to ask for help as he did with the Butchers.''

Lawyers needed 10 days in court to select the 44-member jury pool from which the final panel of 12 was chosen.

Three jurors have ties to Ford. A black elementary school principal worked in Ford's campaigns in the 1970s, a clerical worker contributed to Ford's legal defense fund, and a housewife had the funeral of one of her family members conducted by Ford's funeral home.

#90059u1555 02/28/1990 ~United Press International
JERUSALEM (FEB. 28) UPI - A British tourist was stabbed Wednesday in the West Bank during a general strike called to protest the army's two-year closure of Palestinian universities.

The tourist was stabbed in the back in the center of the West Bank city of Hebron, the army spokesman said. The 58-year-old man, who was not identified, was taken to a Jerusalem hospital where he was in fair condition, the spokesman.

The tourist told army investigators a Palestinian about 16 years old stabbed him, the spokesman said. A Jewish settler found the victim with a knife in his back lying in a playground near a main street, the radio said.

After the stabbing, the army put the city under curfew and carried out searches for suspects, Palestinian sources said. Authorities were not immediately certain whether the attack was criminal or political, Israel Radio reported.

The tourist is the believed to be the first attacked in the West Bank since the start of the 26-month-old uprising. Several visitors have been hurt by stones in Jerusalem.

Hebron has been a militant center of Palestinian political activity and a frequent scene of violent disturbances. Most tourists to the area do not visit Hebron because of the uprising.

Throughout the occupied territories, stores were closed and most workers stayed home in observance of a general strike called to protest the continuing closure of six universities in the West Bank and one in the Gaza Strip.

#90059u1580 02/28/1990 ~United Press International

NEW YORK (FEB. 28) UPI - An investigation into Covenant House finances has found its founder, the Rev. Bruce Ritter, clear of any wrongdoing, the Manhattan district attorney's office reported Wednesday.

The news, which followed by hours Ritter's permanent resignation as head of the nation's largest shelter for runaways, left the priest still under a cloud of sexual allegations and the organization torn by disputes.

Shortly after Ritter quit Tuesday night, Covenant House's acting head, Frank Macchiarola, also resigned following a disagreement over policy.

Ritter stepped aside temporarily Feb. 6 following charges of sexual misconduct with youths at the shelter. Ritter has denied the charges.

Ritter's Franciscan order was conducting an investigation into the allegations, which were first reported in the New York Post.

District Attorney Robert Morgenthau said Wednesday no criminal charges would be brought against Ritter.

''Although some questionable financial transactions were discovered ... there is insufficient evidence to warrant criminal chrages,'' Morgenthau said in a statement.

He said while violations of the law may have occurred when Covenant House supplied false identification to a youth who subsequently charged he had sexual relations with Ritter, ''no charges would be brought with respect to this conduct.''

The prosecutor repeated an earlier statement that his office had ''no statutory authority'' to investigate allegations of sexual misconduct by Ritter.

State Attorney General Robert Abrams also was looking into Covenant House finances, and a spokesman said Wednesday an audit of the books ''was now under review.''

Ritter's resignation came Tuesday night during a meeting of the organization's board of directors.

He said he came to the decision to resign after ''a great deal of thought and prayer.''

''The controversy surrounding me for the past three months has made it impossible for me to lead Covenant House effectively,'' Ritter said.

Macchiarola, a former chief of New York City's school system, resigned as the shelter's acting head after only 20 days in office.

The board immediately appointed its executive vice president and chief operating officer, James Harnett, to replace Macchiarola as acting president of an organization that has an $87 million budget and operates 17 shelters in the United States, Canada and Latin America.

Macchiarola said in a statement that he originally accepted the position of acting president because he believed ''that recent controversies surrounding Covenant House made it imperative that a thorough review of policies be conducted to be followed by appropriate changes.''

He said he had advocated a ''program of discovery and remedial action,'' but was stepping down because of disagreement over policy questions with the board.

''Since the board does not agree with my vision and we are in disagreement over substantial questions of policy, I cannot carry out my role as acting president,'' Macchiarola said.

Board member Mark Strook said the board disagreed with Macchiarola's management approach.

''We appointed James Harnett because we preferred his approach,'' Strook said.

(FEB. 28) UPI - Marion Barry is pleading innocent to all eight perjury and cocaine charges against him. The Washington, D-C, mayor did NOT speak during today's 10-minute hearing before U-S District Judge Thomas Penfield. Barry's attorney, Kenneth Mundy, told Penfield that Barry ''enters pleas of NOT guilty to each and every count.'' Penfiled released Barry on his own recognizance and set a trial date for June 4th. Mundy says he will ask for a jury trial. Mundy also told reporters that Barry will NOT plea bargain and will NOT resign.

The Commerce Department revised figures on the Gross National Product, reporting economic growth at nine-tenths of one percent in the final quarter of 1989. The new estimate of G-N-P for the year was three percent. An earlier estimate pegged economic growth at one-half of one percent for the quarter and two-point-nine percent for the year. Analysts expected a lower estimate of the G-N-P, which measures the country's total output of goods and services.

The shuttle Atlantis is in orbit this morning, after a spectacular nighttime lift-off from Cape Canaveral, Florida, that was six days behind schedule. Today's launch was two hours late becuase of rain and low clouds

but Atlantis knifed through a thin cloud deck and arched northeast over the Atlantic Ocean carrying a secret military payload believed to be a spy satellite.

#90059u1622 02/28/1990 ~United Press International

MONTEVIDEO, URUGUAY (FEB. 28) UPI - Uruguayan President-elect Luis Alberto Lacalle will face tough economic and political challenges when he takes office Thursday.

With union leaders demanding salary hikes and leftist parties gaining ground, Lacalle, 48, has named four leaders of the Colorado Party, a moderate rival party, to his Cabinet to form ''a government of national conciliation.''

The lawyer and lifelong politician said the pact with the Colorado Party of outgoing President Luis Maria Sanguinetti will allow him to pass a series of laws he considers ''fundamental'' to his future tenure, including major changes in economic policies.

''This will be a hard and difficult year for Uruguayans,'' Lacalle told United Press International in a recent interview after announcing measures to reduce a fiscal deficit that last year consumed nearly 8 percent of the

gross domestic product.

He said he planned to trim yearly inflation that jumped to 89 percent in 1989, the highest in a decade, and ''privatize public companies,'' which he considers money-losing and inefficient.

Lacalle's economic team also plans to raise consumer taxes and hike social security contributions demanded of workers and businessmen.

As economy minister, Enrique Braga has vowed to reduce the fiscal deficit to 2.5 percent of the gross domestic product and cut inflation to 40 percent for Lacalle's first year in office, but analysts charge the measures will hit hardest among the country's poorest sector.

''There aren't any alternatives: We make this change or we will have an extremely high inflation rate,'' Braga warned.

Lacalle's opposition on the left, including the Marxist coalition and the Social Democrats that together control a third of the congressional seats, have said they will practice ''responsible opposition'' during the coming term.

The future president appealed to workers' representatives to maintain a labor ''truce'' during his first 100 days in office, but union leaders have already rejected the idea.

Workers are demanding higher salaries to make up for losses they say they have suffered in terms of real wage earnings during recent years of rising inflation.

Lacalle said in the interview that the country's negotiations with creditor banks to renegotiate the external debt is ''on a good track.''

He said that Uruguay found itself in ''unsurpassable conditions'' with respect to qualifying for a U.S. debt reduction scheme known as the Brady plan. Uruguay is up to date on interest payments on their debt of some $6.5 billion.

''The proceedings are slow, but we are optimistic about getting positive results for our country,'' Lacalle said.

-30- 2896

#90059u1629 02/28/1990 ~United Press International

WASHINGTON (FEB. 28) UPI - Members of Congress, emboldened by Nicaragua's election of opposition candidate Violeta Chamorro, condemned human rights abuses in Cuba Wednesday and challenged military leader Fidel Castro to hold free elections.

The lawmakers, most of whom represent Florida, established a congressional caucus to focus international attention on human rights abuses in Cuba and to encourage a unilateral embargo against the island some 90 miles off the U.S. coast.

''The winds of freedom will not stop at the shores of Cuba,'' said Sen. Connie Mack, R-Fla., architect of the Senate Cuba Freedom Caucus. ''What they say in Miami is 'Castro is next.'''

''Fidel has lost his last friend in the hemisphere,'' said Sen. Bob Graham D-Fla., in reference to Nicaraguan President Daniel Ortega, who was defeated in Sunday elections by Chamorro.

Graham and others said renewed pressure on Castro would help spawn internal revolution and force Castro to hold a plebiscite on his government.

''I hope that one of the results of this caucus will be to issue a challenge to Fidel Castro,'' Graham said. ''If he is so strong and if he is so confident of his people's support for his regime, let the people of Cuba vote.''

But recent signs suggest that Castro is digging in against opposition groups that have blossomed over the past few years in Cuba. International human rights groups report an increase in the number of jailed Cuban dissidents, and Castro has barred such groups as Amnesty International from investigating abuses in the country.

Castro is said to be furious over the United States' intent to expand its Radio Marti to include the broadcast of television stations.

Last year, Congress approved funding for the transmission off the Florida coast of TV broadcasts. Castro said the move represents a blatant disregard of Cuba's sovereignty and vowed to jam broadcast of the stations.

Despite Castro's apparent attempts to stifle dissent, members of Congress believe they have their best opportunity in years to affect democratic change in Cuba, the last communist stronghold in the hemisphere.

''I am convinced that the freedom tide is going to sweep over Cuba and drown Castro,'' said Sen. Phil Gramm, R-Texas, a member of the Senate caucus. ''In light of what is happening in the world today, if we do our job, Castro should not be in power 12 months from now.''

Rep. Ileana Ros-Lehtinen, R-Fla., who represents Miami, agreed. ''It is today that there is hope and great expectation,'' she said. ''It is the time for Castro's totalitarian tyranny to be the next domino to fall.''

Still, Castro continues to receive significant support from the Soviet Union, which lawmakers took pains not to criticize. And while the United States has embargoed the exports of goods to Cuba, Mexico has become its major trading partner.

#90059u1637 02/28/1990 ~United Press International

STOCKHOLM, Sweden (FEB. 28) UPI - Sweden's navy Wednesday dropped depth charges near its most important naval base after indications that a foreign submarine had intruded into its coastal territorial waters, a defense spokesman said.

It was the third time in five days that the navy dropped depth charges in a reef-filled area close to the sensitive naval base in Stockholm's southern archipelago.

The navy spokesman said charges were dropped after accoustic devices indicated a submarine was near the Musko Naval Base, 20 miles south of Stockholm.

There was no immediate indication the charges had hit anything, the spokesman added.

A sea-bed mine was detonated Tuesday when a magnetic sensor reacted to what the navy said it believed was an intruding submarine. A series of sea-bed mines exploded Saturday after similar indications.

The hunt is the first of the 1990s after a decade marred by futile attempts to deter alleged foreign submarine activity along Sweden's 1,670-mile coastline.

The largest submarine hunt ever in neutral Sweden took place in 1982 outside Musko Naval Base. Following that incident, the Swedish government accused the Soviet Union of having sent at least six submarines into the area.

Reports of unidentified submarines have flooded the Swedish navy since a Soviet whisky-class submarine ran aground on a Swedish coastal reef near the southern Swedish naval center in Karlskrona in 1981.

#90059u1644 02/28/1990 ~United Press International

WASHINGTON (FEB. 28) UPI - The Senate Labor and Human Resources Committee approved a bill Wednesday to compensate Westerners who developed cancer from exposure to nuclear weapons fallout or from work in uranium mines.

The bill's chief sponsor, Sen. Orrin Hatch, R-Utah, hailed the committee's action as a ''big step'' but said the measure still faces opposition by the Bush administration and could run into trouble in the Senate Judiciary Committee.

''We're still a long way from passing it through the Senate,'' Hatch said following the voice-vote approval.

The Justice Department has sent a letter opposing the bill to members of the Judiciary Committee, which could claim joint jurisdiction over the measure and is considered less sympathetic to the legislation.

Action by the Senate Labor Committee came three weeks after a House Judiciary subcommittee voted unanimously to approve a comparable bill sponsored by Rep. Wayne Owens, D-Utah.

The legislation would establish a $100 million trust fund to pay claims of up to $100,000 each to the uranimum miners or their heirs and up to $50,000 each to the fallout victims or their estates, otherwise known as the downwinders.

The measure is aimed at compensating an estimated 700 to 900 people from Nevada, Utah and the northwestern corner of Arizona who developed cancer from exposure to radioactive fallout from about 100 above-ground nuclear explosions conducted at the Nevada Test Site in the 1950s and early 1960s.

Also covered by the measure are some 300 cancer victims exposed to ionizing radiation while working in the underground uranium mines of Utah, Arizona, Colorado and New Mexico, extracting ore for federal nuclear developments from 1947 until 1971.

About 20 percent of the uranium miners from that era were Navajo, but it is not known exactly how many of those who developed cancer are American Indians, an aide to Hatch said.

Some 1,200 downwinders, including children of the fallout victims themselves, filed suit several years ago claiming they were exposed to cancer-causing radiation as a result of negligence on the part of the federal government.

A federal judge in Utah ruled in favor of the plaintiffs in 10 of the 24 test cases. But the 10th U.S. Circuit Court of Appeals reversed the decision, finding the government was immune to such damage suits and that compensation was a matter for Congress to decide.

Under the Hatch bill, a special master of the U.S. Claims Court would hear claims and render judgments for money damages to be paid from the trust

fund. Owens' bill differs by leaving it to the Justice Department to administer the damage claims.

Hatch has been seeking passage of such legislation since 1979, without success.

-30- 2966

#90059u1659 02/28/1990 ~United Press International

NEW YORK (FEB. 28) UPI - Prosecutors said Wednesday they will seek a monthlong postponement in the Bensonhurst racial slaying trial while they hunt for a key witness who is missing.

Brooklyn District Attorney Charles Hynes said he plans to ask state Supreme Court Justice Thaddeus Owens for the postponement while federal and state law enforcement officials look for John Salvatore Vento, 21. Authorities said they think the witness has fled because he doesn't wish to testify.

Vento allegedly witnessed the shooting of Yusuf Hawkins, 16, and had agreed to testify at a trial set for Mar. 5 if prosecutors dropped charges against him. But authorities have been unable to locate Vento.

The August 1989 killing on a Bensonhurst street in the New York City borough of Brooklyn inflamed racial tensions. It was considered the city's worst case of racial violence since the December 1986 killing of a black teenager in Howard Beach, Queens.

Hynes said Vento's parents told the prosecution their son left town during the Christmas holidays. Authorities tracked him from upstate New York and Ohio but ''lost'' him. He is now thought to be in the New York metropolitan area.

Hynes said he believes Vento ''thought about testifying against his friends and decided to leave.''

Hynes said he had no reason to suspect Vento was the victim of foul play. Hynes called Vento ''an important witness'' but said the case against the Bensonhurst defendants would not collapse without him.

''Obviously the case would be better with Vento, but the case is still solid,'' he said.

The prosecutor took no responsibility for Vento's flight, noting the witness had fled before he took office as district attorney in January.

Hynes said efforts to contact Vento failed and in mid-February he obtained a court order to bring Vento in. The FBI then joined in the search for

Vento.

The prosecutor said that if Vento fails to show up he could be charged with second-degree murder in Hawkins' death.

Hynes said that although Vento's flight broke an agreement stating that he would be available to the prosecution, he would not seek to prosecute Vento if he turned himself in.

#90059u1685 02/28/1990 ~United Press International

CHICAGO (FEB. 28) UPI - The grain market rallied to session highs around midday Wednesday on the Chicago Board of Trade, paced by sharp increases in soybean oil futures.

Aggressive buying pushed oil to its highest levels in seven months, mainly on rumors that processors were reducing their crushing operations.

Additional support came on news that Tunisia bought 6,000 tons of soyoil and Pakistan reportedly bought 22,000 tons.

Soybeans and soybean meal rallied with the oil and closed higher across the board. Basis levels were firm on strong demand by exporters and processors.

Corn was moderately higher in active trading, although gains were limited by light commercial selling.

The posting of heavy delivery notices weighed on both corn and soybeans.

Wheat futures were mostly lower, despite the lack of delivery notices for the March contract. Commission houses were on both sides of the market but

primarily were sellers.

Country movement was light.

At the close, corn was up 1 to 2, soybeans up 5 to 7 1/2, wheat off 1 1/2 to up 1/2 and oats up 1 1/2 to 4 3/4.

#90059u1726 02/28/1990 ~United Press International

LUSAKA, ZAMBIA (FEB. 28) UPI - Southern African and British Commonwealth nation leaders pledged ''blind faith'' to Nelson Mandela and affirmed Wednesday that sanctions against South Africa must be maintained until the path toward a negotiated political settlement is irreversible.

''We are all agreed that sanctions must go on,'' President Kenneth Kaunda told reporters after Mandela met through the morning with seven African presidents, Commonwealth officials and other leaders, including PLO chief Yasser Arafat.

The meetings in Lusaka, the African National Congress' headquarters in

exile, were Mandela's first extensive talks abroad since his Feb. 11 release from 27 years in South African prisons. They came amid an outbreak of cholera in Zambia that has claimed the lives of more than 80 people in the past month.

The semi-official Times of Zambia reported that a ban on social gatherings enforced since Feb. 2 had been lifted for the Mandela visit.

''Hygiene has to be maintained as usual but just for this occasion people are free to mix,'' the Times quoted a source at the Cholera Information Center.

With Mandela to his right, Kaunda spoke in the garden outside his official residence as the other leaders looked on. On the greens of Kaunda's private golf course in the distance peacocks strutted and horned gazelles romped.

Kaunda, the 65-year-old leader of the six-member alliance of southern African frontline states, said the summit had agreed to abide by a U.N. General Assembly resolution in December maintaining sanctions at least until a review in July.

If it appears that ''we are now moving toward abolishing apartheid and that is now irreversible then of course sanctions will be dropped,'' said Kaunda, who has hosted the ANC in exile for more than a decade. ''If not, then we will pray for more sanctions.''

Britain, mother of the Commonwealth, formally lifted voluntary bans on British investment and tourist links with South Africa last week. Thousands of protesters in Britain have demanded Prime Minister Margaret Thatcher reimpose the sanctions.

The frontline leaders along with thousands of ANC exiles and Zambians provided Mandela with a hero's welcome Tuesday that residents described as the grandest celebration since Zambia's independence from Britain in 1964.

Mandela holds important meetings Thursday and Friday with the National Executive Committee of the ANC, where the agenda is expected to include debate on the mounting pressure on the organization to suspend its armed struggle and the re-establishment of the ANC inside South Africa following the lifting of a 30-year ban on the movement.

Referring to the possible outcome later this week of the ANC executive committee, Kaunda said, ''We believe you will be giving each one of us instructions. As in the past, we stand ready to cooperate.

''We have got blind faith in you, especially after we have come to know you in person,'' Kaunda told Mandela.

Joe Slovo, the South African Communist Party's secretary general in exile since 1963 and an NEC member, described Mandela as the ''most impressive leader around and for us this is a remarkable addition of strength.''

One Western official who attended Mandela's briefing with frontline leaders described the black nationalist leader's presentation as "masterful."

Among the other topics the NEC is expected to discuss is the composition of an ANC delegation that would meet President Frederik de Klerk in unprecedented talks to discuss obstacles still standing in the way of formal power-sharing negotiations intended to end South Africa's racial conflict.

Mandela told reporters that the ANC would continue to insist that no formal negotiations could begin until a 44-month-old state of emergency was lifted in its entirety, all political prisoners were freed and questions concerning the return of ANC exiles resolved.

Kaunda, who said the armed struggle had not been discussed in Mandela's talks with frontline leaders, appeared to back down slightly on his call for the immediate suspension of the armed struggle.

The ANC should suspend ''operations inside South Africa, not outside,'' Kaunda said, adding the ANC's military wing and training of cadres should remain ''in place ready to move into South Africa if need be.''

Kaunda described the 71-year-old Mandela as a man of ''very rare qualities'' and said the meetings with him since his arrival in Zambia were a ''humbling experience.''

DETROIT (FEB. 28) UPI - Plastics. That was the business Ben was advised to get into in "The Graduate," a movie made nearly a quarter of a century ago.

That has proved to be sound advice, according to a study of 300 U.S. automotive design engineers issued Wednesday by Mobay Corp., which said plastics and plastic composites will see a much greater use in the auto industry by the year 2000.

The study, released in conjunction with the 1990 Society of Automotive Engineers Congress in Detroit, contrasts an earlier report by the University of Michigan that claims steel has a solid future in automotive applications.

In fact, 85 percent of the engineers polled in the Mobay study said steel will be used far less in automobiles, while rubber and magnesium will also experience reduced usage by the end of this century. The U-M study predicted that a major reduction in steel usage is not forecast by the 21st century.

"Engineers expressed their strong conviction that plastics, sparked by technical breakthroughs, will continue their relentless inroads in the automotive market," said Richard L. White, executive vice president of marketing for Mobay, a unit of West Germany's Bayer AG.

Not surprisingly, Mobay has been in the plastics business for some time, providing a wide range of plastic products for use as car bumpers, body panels, structural parts and interiors to the worldiode auto industry.

The plastics versus steel controversy has been going on for years in the auto industry, which is seeking ways to reduce vehicle weight, corrosion and manufacturing complexity while raising quality levels.

Most respondents to the Mobay study also agreed that import competition

and designing higher quality cars will remain the primary challenges for domestic carmakers through this decade.

Also having a significant impact on future automotive design will be government pressures to reduce emissions while raising fuel efficiency, which Mobay insists brightens the future for plastic parts.

In fact environmental concerns ranked as the top influence affecting future car designs in the study, while styling, comfort, price and safety followed, in that order.

Mobay, the largest automotive supplier of polyurethene parts and one of the top five plastics suppliers to the vehicle industry, also plans to have one company executive responsible for overseeing business with the expanding transplant automakers, or those Japanese automakers building cars in North America.

The company already has a specific executive for each of the nation's Big Three carmakers - General Motors Corp., Ford Motor Co. and Chrysler Corp. - and has been producing parts like cargo box panels for Ford's 1990 Ranger and bumbers for GM's new front-drive minivans.

Mobay also quoted statistics that predict worldwide passenger car demand will approach 49 million units by 2000, up 41 percent from 1988 - also providing a greater market for plastic components.

#90059u1751 02/28/1990 ~United Press International

MANAGUA, NICARAGUA (FEB. 28) UPI - The National Opposition Union rejected Wednesday Sandinista conditions for transferring power and charged the Supreme Electoral Council was ''hiding'' vote results in an apparent attempt to increase the Sandinista's legislative representation.

The ruling Sandinista National Liberation Front ''cannot put any condition on tranferring power, it simply must transfer it,'' said Gustavo Tablada, a member of the political directorate of the opposition coalition, known as UNO, that won Sunday's national elections.

President Daniel Ortega demanded Tuesday an immediate demobilization of the U.S.-backed Contra rebels as a condition to transferring power to President-elect Violeta Chamorro on April 25.

UNO also favors the Contra demobilization ''but we cannot accept this to be made as a condition for the transition, and we cannot commit ourselves to it because (the rebel's disbanding) is beyond us,'' Tablada said. ''UNO and the Contra are two completely different organizations.''

In a telephone conversation Tuesday with United Press International from Tegucigalpa, Honduras, Contra leader Israel Galeano, known as ''Commander Franklin,'' said the rebels will disband only after the Sandinistas transfer the government to Chamorro.

''It must be understood that Nicaragua has only taken a first step,'' Galeano said. ''The rest is yet to be seen and we will wait to see where this process leads.''

Chamorro, calling on the rebels to disband, said ''the causes of this civil war have dissapeared.''

The nine-year Contra war has caused more than 50,000 deaths and hundreds of millions of dollars of damage to the Nicaraguan economy.

Sandinista and opposition representatives have held discussions on the power transfer, and the first session was attended by former President Jimmy Carter, Secretary-General Joao Baena Soares of the Organization of American States, and the U.N. envoy Elliot Richardson.

Thousands of foreign observers verified the fairness of the elections that gave an unexpected victory to the opposition, but UNO leader and Vice President-elect Virgilio Godoy said Wednesday the electoral council was tampering with the vote figures.

''A discrepancy exists between the figures in voting stations for the presidential election, and the figures for the Legislative Assembly,'' Godoy said.

Godoy called the alleged differences ''curious'' because each polling station's report carries the numbers of votes for president, vice president, deputies and municipal council members.

''We cannot understand what the reason is for this total hiding of votes for (municipal) councils and the partial hiding of votes for the legislative assembly,'' Godoy said.

According to the vice president-elect, officials in charge of the manual counting of votes are voiding ''without any legal authority'' UNO votes and ''validating'' them in favor of the Sandinistas, Godoy said. The alleged tampering has affected up to 30,000 votes in the Managua district alone, according to Godoy.

#90059u1754 02/28/1990 ~United Press International

PHILADELPHIA (FEB. 28) UPI - The bronze likeness of Sylvester Stallone, which once towered in front of the Philadelphia Art Museum, could end up

outside a hot dog eatery in the historic district if an offer Wednesday to buy the statue is accepted.

The saga of where to put the Rocky Balboa statue, which has become more contentious than some of the fictitious boxer's battles in the ring, took another turn when the Ginger Group announced it wanted to buy the sculpture from the city for $10,000.

The food company would erect it in front of its Levis Hot Dog Restaurant in the city's historic Society Hill section.

The 8-foot-6-inch statue recently was moved from the Spectrum arena to the top of a flight of steps in front of the Art Museum to serve as a prop in Stallone's upcoming movie, ''Rocky V.''

Robin Shamberg, a spokesman for the Ginger Group, said the recent controversy over where the statue should be permanently kept led the company to make the offer to buy it.

Stallone has hired a lawyer to try to have the statue kept atop the art museum's steps. Those who want the statue at the museum, where Stallone made his famous run up its 72 steps in the first Rocky epic, say it is a symbol of Philadelphia and the underdog.

But museum officials and others who contend the statue is not art but merely a movie prop were successful in having the statue removed from the museum grounds on Monday. The statue is scheduled to be unveiled at the Spectrum, its previous home, Thursday.

''They're moving the Rocky statue all over the place and nobody wants it '' Shamberg said. ''The art museum doesn't want it, the city doesn't know what to do with it... .''

The spokesman added that the location of the hot dog restaurant is an ideal place for people to gather and have their picture taken.

The Philadelphia Art Commission is studying the matter for 60 days and will make a decision on where its final resting place should be, said Sandy Bressler, the commission's executive director. The commission has had other offers to buy the statue.

''The work is not for sale to the best of my knowledge,'' Bressler said. ''I'm sure the city is open to looking at all the options for the location of the Rocky statue, but there has not been a recommendation that it be sold.''

Debbie Albert, a spokeswoman for the Spectrum, where the statue stood before being moved for the shooting of the latest Rocky tale, said the

facility is perfectly happy to keep the statue.

''It's so happy to be back the bronze is practically melting off its face '' Albert said. ''We want the Rocky statue to stay here. It should not leave the Spectrum. This is where it lives.''

#90059u1809 02/28/1990 ~United Press International

WASHINGTON (FEB. 28) UPI - Mayor Marion Barry pleaded innocent Wednesday to all eight perjury and cocaine charges against him, interrupting five weeks of substance abuse treatment to return to Washington for a 10-minute arraignment.

Barry's attorney, R. Kenneth Mundy, told U.S. District Judge Thomas Penfield Jackson that Barry ''enters pleas of not guilty to each and every count.''

Jackson released Barry on his own recognizance and set a June 4 trial date after Mundy waived Barry's right to a speedy trial. Mundy said he will ask for a jury trial.

Under the terms of his release, Barry will not have to undergo court-ordered urinalysis exams.

Barry, looking fit and wearing a navy blue suit, did not speak during the 10-minute hearing, and was hurried away in a car from a side door of the courthouse. Barry's wife, Effi, was not present.

''Mayor Barry is confident that after his side of the case is explained to the court of law, he will be vindicated,'' Mundy told reporters.

''We are anticipating the trial and we are anticipating winning in the trial,'' he said. ''We will not be plea bargaining and the mayor is not considering resignation, because there is no reason for him to resign.''

Barry's spokeswoman, Lurma Rackley, had said Tuesday she expected Barry to return to the Fenwick Hall substance abuse treatment center near Charleston, S.C., shortly after his arraignment. But Wednesday, neither Rackley nor Mundy would discuss whether Barry would immediately re-enter treatment.

Mundy said Barry is ''not going to give out any information today about his treatment for alcoholism,'' claiming the move was in response to heavy press coverage of Barry's 31-day stay at the Hanley-Hazelden Center in West Palm Beach, Fla., which Barry left last Thursday when he moved to Fenwick Hall.

''Citizens can rest assured, however, that top officials who need to know the mayor's whereabouts and who need to be in touch with him are always kept informed,'' Mundy said, reading from a statement. ''The mayor believes reporters do not need to know where he is at all times during this period when he is seeking to heal himself.''

Rackley said Barry would be ''resuming treatment,'' but said she did not know if Barry would return to Fenwick Hall Wednesday. ''None of us believes that is information anybody needs to have,'' she said.

Barry was arrested Jan. 18 during an FBI-police sting operation at which he allegedly was videotaped smoking crack cocaine at the downtown Vista International Hotel.

The three-term mayor was indicted Feb. 15 on three felony perjury and five misdemeanor cocaine possession counts. If convicted of all the counts, Barry could be sentenced to 20 years in prison and fined $1.25 million.

Barry, whose arraignment was postponed one week at Mundy's request, came to the city Tuesday for the first time since he began substance abuse treatment Jan. 22.

He was appearing in public for the first time since a speech on Jan. 21 - three days after his arrest - when he admitted having an unspecified problem and announced he would seek treatment ''to begin to heal my body, mind and soul.''

Barry, who turns 54 next Tuesday, has acknowledged being an alcoholic but has never publicly said he used drugs.

Barry turned over control of the city's day-to-day operations to City Administrator Carol Thompson Jan. 19, and it was unclear Wednesday if or when Barry would resume his duties. Mundy said Barry has ''complete satisfication with the job that she's been doing.''

The grand jury investigation of Barry - which has continued for nearly 14 months - was prompted by an aborted police raid on a room in another downtown hotel, the Ramada Inn, in December 1988 when police learned the mayor was in the room with Charles Lewis, the target of the raid.

Lewis, once described by Barry as a ''friend,'' has been convicted of dealing drugs in Washington and the U.S. Virgin Islands, and he testified before the grand jury that he provided crack to Barry and smoked the drug with the mayor more than once.

The perjury charges against Barry stem from his testimony before the same grand jury last year, when he denied using drugs.

Last week the Justice Department subpoenaed records of close Barry associates prompting suggestions that the probe is turning towards allegations of corruption. U.S. Attorney Jay Stephens said Wednesday prosecutors are proceeding ''aggressively'' with the ongoing probe.

Rackley, who spoke briefly with Barry in the courtroom, said he appeared rested.

''He looks good and he seems to have gotten sun in Florida and he says that he feels optimistic and is looking forward to getting this whole thing resolved in the courts,'' Rackley said.

About 20 members of the crime-fighting group the Guardian Angels picketed outside the court asking Barry to resign, and some were taunted by Barry supporters.

Barry, whose term ends next January, has not announced if he will seek a fourth term. Under city law, Barry would be forced to step down only if jailed after a felony conviction.

#90059u1814 02/28/1990 ~United Press International

MANAGUA, NICARAGUA (FEB. 28) UPI - Joy in Washington, D.C., over the victory of Nicaragua's National Opposition Union strikes fear in the hearts of the ''Sandalistas'' - the sandal-shod Americans in Nicaragua to help the Sandinistas.

The ''Sandalistas'' fear the conservative UNO administration will recruit pencil-pushing International Monetary Fund-type U.S. advisers in three-piece suits to replace them.

''Lets talk about what were going to do in the future,'' an organizer tells 200 American carpenters, teachers, doctors and technicians gathered in Managua to plot their strategy for dealing with the new government.

''But first, did anyone bring a guitar? Lets sing a song and then will talk about what we'll do in the future.''

Affectionately called the ''internacionalistas'' or ''sandalistas'' for their idealism and 1960s-style dress, the technicians from Nicaraguan solidarity groups in America and other countries enjoy cordial relations with outgoing President Daniel Ortega's Sandinista government. The Sandinistas use American volunteers in their training programs and even in government offices.

The internacionalistas back the economic reforms of the Sandinista Front, which redistributed big plantations to peasants, nationalized the banks and made loans available to poor people, controlled trade and dared to take on the U.S. government.

They fear the new pro-U.S. party will welcome the ''usual'' U.S. advisers who will tell the government to privatize banks and industry.

''Ten years of democratic training may now be in jeopardy,'' Carter Garber warns the crowd.

''They (the new government) may try to smash the democratic institutions built over the last 10 years'' says Garber, a Tennessee economist who has been in Nicaragua for 1 1/2 years working on development projects.

Timothy Dylan Wood, 18, his long brown hair tied up in a red bandana, has spent several months in Nicaragua planting trees. He was stunned by the election results.

''I was pretty shocked, based on the polls and the strength I saw at the Sandinista rallies,'' Wood said.

The internacionalistas say they plan to stay or to keep visiting Nicaragua but they forsee tough times ahead.

Augustin Romero, secretary of international relations for the Student Union of Nicaragua, says he has helped direct the use of 145 student workers from 23 countries. He ties their future to the ability of the Sandinistas to hold on to political countrol.

''Before we surrender political power, we have a lot of things to negotiate,'' Romero said in an interview. ''We will maintain control of some important ministries like the Interior and Immigration. This will give us the possibility of maintaining some of our agreements regarding the students.''

Lisa Brown, an economics professor at Eastern Washington University, is teaching a macro-economics seminar at the University of Central America in

Managua.

Even though it's a Jesuit university, she is worried the new government may have influence there and may interfere with her finishing her program. Her brand of economics is not of the free market variety embraced by UNO.

Brown is more worried that the new government will tamper with the partially state-controlled economy and replace it with a more conservative model used in other Central American countries.

Salt Lake City gynecologist Regala Burki says the U.S. trade embargo has made her work vital. Nicaraguan doctors could not get replacements for U.S.-made health equipment such as anesthesia machines and portable incubators, she says. So she helped smuggle them down.

''We were doing hysterectomies and caesareans under local anesthesia,'' Burki said. ''They would wake up during the operation and start screaming.''

Burki says she supports the Nicaraguan health system. She says that Nicaraguans don't have access to all the same health options Americans do, but she says resources are distributed equitably and most Nicaraguans have better access to health care than poorer Americans.

#90059u1831 02/28/1990 ~United Press International

(FEB. 28) UPI - President Bush is headed to New York for a fund-raising luncheon on behalf of Republican congressional candidate Susan Molinari on Staten Island. Bush will continue his efforts on behalf of the G-O-P by flying to San Francisco for an evening fund-raiser for gubernatorial candidate Pete Wilson.

Marion Barry pleaded innocent today to drug and perjury charges, with a judge setting a June 4th trial date for the three-term Washington, D-C, mayor. Barry was released on his own recognizance... and is expected to return to a South Carolina substance abuse treatment center this afternoon.

A consumer group wants the Food and Drug Administration to require birth control pills to include warnings that long-term use may increase the risk of breast cancer. The Public Citizen Health Research group says the F-D-A ignored studies linking use of oral contraceptives and breast cancer in women under age 54... most of whom developed breast cancer before age 45.

An economist at Chicago's Northern Trust says ''the world isn't going to change'' on a revision in the Gross National Product estimate. Robert Dederick says the goverment's new G-N-P estimate of three percent growth for 1989 means the economy is a little stronger than previously thought

and the risk of recession is a little less.

Residents of east Beirut fled their homes for shelter amid heavy artillery fire as rival armies appeared ready to resume fighting for control of the Christian enclave. Observers say military strongman Michel Aoun needs control of the neighborhood to open a path to Beirut's port, a vital shipping point where he can get supplies from abroad.

#90059u1886 02/28/1990 ~United Press International

MANAGUA, NICARAGUA (FEB. 28) UPI - Nicaraguan president-elect Violeta Chamorro called for the Contras to lay down their arms just hours after outgoing President Daniel Ortega said disbanding the U.S.-backed rebels was a condtion for the transfer of power.

''The causes which began the civil war in Nicaragua have disappeared. There is no reason for more war,'' Chamorro said in a Tuesday night radio address.

''That is why those who took up arms should lay down their rifles and return peacefully to Nicaragua with their families to work toward the reconstruction of our fatherland,'' said Chamorro of the U.S.-backed National Opposition Union, or UNO.

High-level meetings began between Humberto Ortega, brother of the president, UNO representative Antonio Lacayo to discuss conditions of the transfer of power, scheduled to take place April 25. Former President Jimmy Carter, United Nations representative Elliot Richardson, and Oganization of American States Secretary-General Joao Baena Soares participated in the meeting.

UNO vice-president elect Virgilio Godoy accused the Sandinista-controlled Supreme Electoral Council of "hiding" votes in the count for legislative races.

Ortega told thousands of cheering supporters Tuesday he will not allow Chamorro to roll back the decade-old Sandinista revolution, and called for the immediate disbanding of the Contra rebel force.

''This election in no way means an end to the revolution,'' Ortega told 5,000 stalwart Sandinista faithful Tuesday at a morale-boosting campaign rally.

After Ortega's address, the crowd marched five blocks to Revolution Plaza where they chanted and cheered the outgoing president for more than an hour.

Ortega outlined in a stern tone the "fundamental conquests of the revolution," including the Sandinista Popular Army and a revolutionary agrarian reform program.

''The Sandinista Front will defend the integrity and professionalism of the Sandinista Popular Army ... and the Interior Ministry,'' Ortega said.

''Just one army!'' came his supporters' cries.

''We were born down below, and we are used to fighting from below,'' Ortega said, pledging uncompromising opposition to Chamorro's National Opposition Union that is scheduled to take office April 25. ''With the Nicaraguan people, the Sandinista Front will continue to govern from below.''

Ortega predicted that the Sandinistas soon would return to office. He also promised to oppose any firing of state workers or the reversal of the state-owned banking system and government-controlled foreign trade.

Reading from a proclamation approved minutes earlier by an assembly of more than 1,500 Sandinista leaders and activists, Ortega also demanded ''immediate dismantling of the (U.S.-backed Contras) so that a peaceful and orderly transition of government can occur.''

It was not immediately clear whether the demand was meant as a condition

for turning over power to the 60-year-old Chamorro.

Israel Galeano, military leader for the 10,000 anti-Sandinista rebels, said Tuesday in a telephone interview from Tegucigalpa, Honduras, the Contras would not surrender their weapons until the Sandinistas turn power over to the opposition April 25.

Ortega said the Sandinistas would support peace but would not tolerate aggression from the new government.

''The people have sufficient power to confront and crush those who come looking for vengeance,'' he said.

Chamorro Tuesday attended Mass presided over by Managua Archbishop Miguel Obando y Bravo to give thanks for her 55 percent to 41 percent election victory.

When Ortega hands over the presidency, it will be the first time this century in Nicaragua that a governing party willingly gives up power to an opposition party after an election.

The opposition Radio Catolica denounced the pro-Sandinista media for stirring up an already tense political conflict, saying the calls to Sandinista activists to remain militant ''could have unpredictable consequences.''

At least one person was wounded Monday night when UNO supporters celebrating Chamorro's victory in the streets clashed with Sandinista sympathizers. Riot police broke up the melee firing tear gas.

Former President Jimmy Carter, who observed Sunday's elections and pronounced them honest and fair, was investigating the incident, members of Carter's delegation said.

#90059u1887 02/28/1990 ~United Press International

WASHINGTON (FEB. 28) UPI - Americans risk receiving inadequate care at many of the growing number of non-hospital health facilities providing services ranging from radiation therapy to drug treatment and cataract surgery, government investigators said Wednesday.

A General Accounting Office report said so-called free-standing providers may be performing up to 40 percent of all diagnostic procedures and surgeries, but still operate with little and often with no state licensing or regulation.

States with licensing rarely impose sanctions, usually because of a

lengthy appeals process or a lack of intermediate penalties, the GAO said, and nearly half the states lack a system for processing complaints.

''Because of minimal state regulatory efforts, consumers do not have adequate assurance that unlicensed free-standing providers are offering quality care,'' the report concluded.

Gayle Elliott, a director of the Accreditation Association for Ambulatory Health Care in Chicago, said her group has accredited 300 to 400 of the several thousand providers under a voluntary program. But she said sometimes there ''is no way of knowing the quality of care provided by a facility.''

Rep. Edward Roybal, D-Calif., chairman of the House subcommittee on health and long-term care, who released the report, said he would introduce a bill establishing federal standards.

''The care provided in these facilities can literally mean the difference between life and death,'' he said.

Federal quality standards now exist for certain free-standing providers - such as surgery centers - that participate in the Medicare program.

The number of free-standing providers has expanded rapidily in response to cost-control efforts, improved technology and increased competition. At the same time, health maintenance organizations have emphasized keeping patients out of hospitals, fueling the growing ambulatory market, the report said.

The GAO studied 16 kinds of free-standing providers and found that, as of Sept. 30, 1987, only two states, New York and Montana, required each provider known to be operating within its borders to obtain a license.

Massachusetts, Nebraska, New Hampshire, Rhode Island and New Jersey required licenses in nearly all cases, but the report said states usually were ''at the other end of the spectrum.''

Iowa and Vermont required no licenses at all, it said, and 10 other states required licenses for 25 percent or fewer of their providers.

No states required licenses for cancer treatment centers, using either radiation or chemotherapy, or for pain control centers, although such facilities were known to be operating in 14 to 18 states, the report said.

Only two of 11 states with known cardiac catherization labs required them to be licensed for the procedure, which involves inserting a tube into the heart, the GAO said. Just four of the 25 states with ambulatory emergency centers required licenses, it said.

Alcohol and drug abuse treatment, surgical centers and home health providers were licensed by more than 70 percent of states with such facilities. Hospice care and clinical labs were licensed most cases.

But nine states did not license their surgical centers; eight did not license substance abuse treatment; and 13 did not license home health care.

Most states did not license their walk-in clinics, psychiatric centers, general diagnostic centers, diagnostic imaging centers such as those providing breast cancer diagnosis, and comprehensive or specialized rehabilitation centers.

#90059u1898 02/28/1990 ~United Press International

MANILA, PHILIPPINES (FEB. 28) UPI - Opposition leader Juan Ponce Enrile, arrested and charged for allegedly plotting to oust President Corazon Aquino, asked the Supreme Court Wednesday to order his release from detention.

Enrile, 66, the former defense minister who helped oust late dictator Ferdinand Marcos and install Aquino in a popular revolution four years ago was detained Tuesday on rebellion and murder charges in the Dec. 1-9 uprising.

Six others, including ex-army Col. Gregorio Honasan, the alleged leader of the insurrection who remains at large, were charged in the coup attempt that turned downtown Manila into a war zone.

Enrile, a Harvard-trained lawyer, spent Tuesday night at the National Bureau of Investigation headquarters and was transferred Wednesday to the northern police headquarters at suburban Camp Karingal. He was being held in a private room.

Aquino issued a statement denying the arrest of Enrile was politically motivated.

''It is simply a legal process,'' she said, adding Enrile's rights under the constitution will be protected.

Police said they found two homemade bombs at a waterpump house and a parking lot in a shopping mall and theater complex in the Makati financial district Wednesday, but it was not immediately known if they were connected to the Enrile case.

A respected congressman, who would not be identified, warned the arrest of Enrile could spark another uprising in the country whose armed forces has

been on red alert - the maximum state of preparedness - since Feb. 14 amid threats of another coup attempt.

Lawyers for Enrile petitioned the Supreme Court to free Enrile, the lone opposition in the 23-member Senate, contending he was being detained on criminal charges that no longer exist in statute books.

The 18-page petition to the high tribunal prepared by seven of the nation's top lawyers, including two former Supreme Court justices, also questioned Judge Jaime Salazar's decision to refuse bail to Enrile. The charges against Enrile carry a maximum penalty of life imprisonment.

Enrile, in a telephone interview with Cable News Network, said, ''I am a little surprised why the Aquino government claiming to be a democratic government has gone this far in charging me ... with a baseless crime that is not defined in our laws...''

He added the charge was based on evidence ''that did not exist. It was a total falsehood.'' Enrile maintained that throughout the coup attempt he was either home with his family or speaking with American reporters to denounce U.S. ''intervention'' in providing air cover for Aquino's forces.

At least 119 people were killed and more than 500 were wounded in the December uprising, the sixth and strongest challenge to Aquino since she came to power four years ago.

Enrile has repeatedly denied the charges calling them a ''fabrication.''

''I can understand their bitterness and anger and their desire for revenge '' Enrile said Wednesday in a radio interview.

As defense minister and chief martial law administrator during the Marcos years, he was the jailer of Aquino's late husband, opposition leader Benigno Aquino, for more than seven years.

The Rep. Bonifacio Gillego, an outspoken member of the congressional committee on defense, warned the arrest of Enrile could ''exacerbate tensions'' in the nation facing the threat of uprising from some 150 mutineers still at large.

''It could have a destabilizing influence. The sentiment of the armed forces is always a question mark, especially when you have a breakdown in the chain of command, a breakdown in intelligence and discipline ... the malaise is there,'' said Gillego.

Gillego said that many in the armed forces, particularly the idealistic and reform-minded junior officers, see Enrile as the patron of Honasan, his one-time chief security officer.

''To these officers, Honasan is an ideal, a symbol to be emulated,'' Gillego said.

In the last few weeks, Aquino reacted sharply to Enrile's constant carping specifically to his remarks that her daughter was involved in a plan to sell government property in Tokyo and his ''apology'' to the nation for handing power to Aquino.

#90059u1915 02/28/1990 ~United Press International

WASHINGTON (FEB. 28) UPI - Federal officials, taking unprecedented action to protect the endangered striped bass, said Wednesday they are imposing a ban on fishing for the prized sport fish in New Jersey coastal waters.

The ban will take effect at midnight Thursday and is being imposed because the state has failed to adopt and enforce limits on catches of striped bass required by federal law, the Interior and Commerce departments announced.

The action in New Jersey is the first time a fishing ban has been imposed on a state under the federal Atlantic Striped Bass Conservation Act.

Under that law, Atlantic Coast states from North Carolina to Maine must comply with regulations drawn up by the Atlantic States Marine Fisheries Commission to protect the striped bass, which has begun to make a comeback after dwindling to record-low numbers in the mid-1980's due to overfishing.

The commission, an interstate agency empowered under federal law to enforce fishing regulations, has adopted a striped bass protection plan that limits the number of fish that can be caught daily by each fisherman and prohibits the taking of fish under 28 inches in length.

Federal officials said New Jersey's striped bass regulations expired at the end of 1989 and the state has not renewed them.

The officials said the federal ban would be enforced by agents from the Interior Department's Fish and Wildlife Service and the Commerce Department's National Marine Fisheries Service. In addition, the Coast Guard will conduct patrols.

Penalties for violating the ban include fines up to $1,000 per violation and the forfeiture of boats and equipment used in illegal activity.

Striped bass, also known as rockfish and stripers, are valuable both as a commercial food fish and as a sport fish.

For the past few years, the government has made a major effort to restore the fish, with key efforts focusing on restocking the Chesapeake Bay, the major spawning ground for striped bass that migrate along the entire East Coast.

#90059u1941 02/28/1990 ~United Press International

WASHINGTON (FEB. 28) UPI - The U.S. Agency for International Development reported Wednesday that up to 5 million people in Ethiopia face death this year because of the combined threat of famine and civil war.

Andrew Natsios, director of AID's Office of Foreign Disaster Assistance, told the African subcomittee of the House Affairs Committee, ''The two worst nightmares for relief administrors are now converging on the people of Ethiopia - famine and civil war. Alone each is difficult enough to deal with, together they are catastrophic.''

Natsios said that the problem began last summer with the failure of the usual rains in northern Ethiopia. The AID mission in Addis Abbaba estimated that more than 4.9 million people were at risk of starvation.

But plans to send in emrgency relief supplies, from the United States and other donors, were blocked when fighting broke out between Ethiopian government forces and the insurgent Eritrean and Tigrayan Peoples Liberation Fronts.

The EPLF captured the crucial port of Massawa, destroying the port facilities in the battle and making it impossible to unload ships with food supplies.

''Perhaps as many as 3 million of the 4.9 million people at risk are now trapped by the fighting with no access to relief food,'' Natsios said.

The fighting is continuing, he said.

''Concern for the lives of millions of innocent people seems lost in battle plan troop movements. This picture does not offer much hope,'' Natsios said.

He said the United States is pushing a policy of bringing the United Nations in to take the lead in negotiating agreements to move food and relief supplies.

According to AID figures, the United States has already sent $71 million in food aid to northern Ethiopia, while the rest of the international community has contributed $84 million.

But the problem of delivering the food has not yet been solved, he said, with daily reports and rumors of new heavy fighting in the Ethiopian civil war.

#90059u1946 02/28/1990 ~United Press International

NEW YORK (FEB. 28) UPI - Lockout '90 became the third-longest work stoppage in modern big-league history Wednesday, with negotiators separated by a continent and another day of spring training games canceled.

On the eve of what would have been Opening Day of the Cactus and Grapefruit League seasons, union head Don Fehr flew to Los Angeles to brief players, who have been locked out of spring training for 14 days.

In New York, a spokesman denied Fehr's assertion that Commissioner Fay Vincent has replaced Chuck O'Connor as the owners' negotiator.

''There's been no change,'' a spokesman for the commissioner said. ''I don't know what Don's talking about.''

Negotiators announced no resumption of the talks that broke off Saturday. By reaching two weeks, this lockout passed the 1972 strike, which lasted 13 days and delayed the start of the regular season. An owners' lockout in 1976 lasted more than three weeks, and a players' strike in 1981 went 50 days.

Fans around the country kept up their display of resentment. A radio station in New York's Hudson Valley embarked on a campaign to remind Yankee and Met executives that fans were being ''screwed'' by the lockout.

WVOS in Liberty, N.Y., asked its listeners to send screws to the station, which would dump the assorted hardware at Yankee and Shea Stadiums on baseball's official Opening Day.

The Cincinnati Reds joined several other clubs by announcing cancellation of some exhibition games. Teams are allowing 10 days of training before games and so every day that passes without a settlement results in corresponding cancellations.

Both sides say the regular-season opener, scheduled for April 2, is in jeopardy.

Players vowed unity at an executive board meeting Tuesday in Phoenix, where Fehr briefed them on talks that began Nov. 28. Fehr said Commissioner Vincent has replaced O'Connor as negotiator for the owners.

''I don't know why anybody is talking about Chuck O'Connor,'' Fehr said. ''He's clearly ceased being the chief management spokesman.''

Among the exhibition games canceled was the World Series rematch between the Oakland A's and San Francisco Giants. The game was to have benefited victims of the Oct. 17 earthquake that struck the San Francisco area as the third game of the series was about to begin.

#90059u1951 02/28/1990 ~United Press International

AUSCHWITZ, POLAND (FEB. 28) UPI - Israeli Foreign Minister Moshe Arens visited the former death camp of Auschwitz Wednesday and said he was deeply moved by the scope of the Nazi genocide during World War II.

''One cannot believe it happened - but it did happen,'' he said after saying a prayer for the dead.

About 3 million Jews and 1 million Poles plus other nationalities died in the camp at Nazi hands at the camp.

Arens considered canceling the visit to Auschwitz when he heard about infighting inside the right-wing Lukud party and a campaign launched Tuesday by party hardliners to challenge Prime Minister Yitzhak Shamir, aides said. Arens is an ally of the prime minister.

When asked what he thought about the prospect of German unification, he said he was so impressed by the Nazi crimes in the camp that he could not utter a word.

The Polish government newspaper Rzeczpospolita carried an interview with Arens who praised the Polish reforms.

''We are prepared to help Poles in the process of changes,'' he said.

He said a group of top Israeli businessmen and economic experts

accompanied him to expand economic relations following the re-establishment of diplomatic ties with Poland Tuesday after a lapse of 22 years.

#90059u1953 02/28/1990 ~United Press International

JAKARTA, INDONESIA (FEB. 28) UPI - Peace talks on Cambodia broke down Wednesday over Vietnam's insistence on describing the former practices of the Khmer Rouge as genocidal, just hours after accord was reached on an enhanced U.N. role to end 11 years of war.

"The result is very disappointing," said Australian Foreign Minister Gareth Evans, who had spent three days attempting to persuade the four warring factions to accept Australia's plan for a transitional U.N. authority pending elections.

Indonesian Foreign Minister Ali Alatas, co-host of the negotiations, said the lack of a unanimous accord among the 10 countries present made it impossible to recommend reconvening international peace talks in Paris, the primary goal of the Jakarta gathering.

''When the time is ripe, we'll make a decision on the next meeting,'' said co-host Claude Martin, the French Foreign Ministry's Director for Asia.

Evans blamed the failure on Vietnamese Foreign Minister Nguyen Co Thach and Khmer Rouge leader Khieu Samphan. Co Thach demanded a paragraph be inserted in the 17-point agreement guaranteeing the ''prevention of the genocidal practices'' of the Khmer Rouge under Pol Pot, who was ousted by the Vietnamese invasion of Cambodia in 1978.

Khieu Samphan balked, and neither side could be persuaded to back down.

The regime under the leadership of Pol Pot is blamed for the deaths of more than 1 million Cambodians during their four-year reign.

''All the world realizes this is a crime against humanity,'' said Co Thach.

''We had agreement on U.N. supervision of elections, security matters and some degree of civilian administration,'' Evans said. ''The only disagreement was over the reference to genocidal practices. It is deeply regrettable.''

Evans said the issue was not totally unexpected since it surfaced in Paris last August and was among the factors leading to the deadlock there. Two earlier peace talks in Jakarta also failed to make significant progress toward ending the 11-year-old conflict.

Cambodian Prime Minister Hun Sen backed Co Thach's move.

''We cannot accept a political solution if there is no complete, effective measures to prevent the return of the Khmer Rouge,'' he said.

Hun Sen maintained it was essential the reference to genocide be included ''to satisfy the wishes of the people of Cambodia and also to respect the memory of the Cambodians who faced execution.''

Officials said the breakdown was particularly disappointing after Hun Sen, in a major turnaround, accepted a U.N. interim authority pending free elections.

''All doubtful issues should be meticulously controlled and supervised by the U.N. so as not to let those issues be used as pretexts for the continuation'' of the war, said the Hanoi-backed Hun Sen, only 24 hours after limiting the U.N. to election supervision.

Hun Sen's unexpected change of heart left the Khmer Rouge the lone faction refusing to endorse a temporary U.N. authority in Cambodia.

Khmer Rouge leader Khieu Samphan, the strongest partner in the U.N.-recognized coalition headed by Prince Norodom Sihanouk, still insisted upon the dismantling of Hun Sen's government and the setting up of an administration composed of the three resistance parties plus Hun Sen.

Hun Sen, 40, has steadfastly rejected calls for the dissolution of his government.

Since the negotiations started Monday night, Evans, armed with a 156-page report outlining the details and costs of a temporary U.N. administration, had worked tirelessly to persuade Hun Sen to abandon his earlier position against major U.N. involvement.

Prince Norodom Ranariddh, representing his father Sihanouk, had previously endorsed the Australian proposal along with former Prime Minister Son Sann. Sihanouk, who refused to leave Cambodia after returning Friday following a decade of exile, dispatched Ranariddh in his place.

Delegates were hopeful Hun Sen' switch would pave the way for the reconvened Paris talks, which include the five members of the U.N. Security Council, until the row over the genocide reference erupted.

Negotiators at the talks included the warring Cambodian parties, the six members of the Association of Southeast Asian Nations, Vietnam, Laos, France, U.N. envoy Rafeeuddin Ahmed and Australia. ASEAN groups Singapore, Malaysia, the Philippines, Thailand, Indonesia and Brunei.

WASHINGTON (FEB. 28) UPI - A committee approved and sent to the Senate Wednesday legislation that would elevate the Environmental Protection Agency to a Cabinet-level department.

The vote by the Senate Governmental Affairs Committee was unanimous, except for the abstention of Sen. David Pryor, D-Ark., who has expressed reservations about the frequent use of private consultants and contractors by the EPA.

Pryor won approval of an amendment that would require that ''inherently

governmental functions'' at the EPA be performed by federal employees rather than outside hires.

Pryor complained that the ''mind-set at the EPA'' to hire outside consultants, who may also work for ''the nation's polluters,'' is ''a path that leads to conflicts of interest.''

The bill, introduced by committee Chairman John Glenn, D-Ohio, and Sen. William Roth, D-Del., would make the EPA the nation's 14th Cabinet-level department.

Supporters of the bill say it will boost the agency's profile and make sure the environment remains high on the presidential priority list. President Bush, who made a campaign pledge to be sensitive to environmental issues, endorsed the measure shortly after the two Democrats introduced it in January.

Among the provisions of the bill are expansions of the agency, including the establishment of an interagency committee on global environmental change and a bureau of environmental statistics.

The committee approved an amendment by Sen. Joe Lieberman, D-Conn., that would automatically make current EPA Administrator William Reilly head of the interagency committee on global change.

A 6-6 vote killed an amendment offered by Sen. Jeff Bingaman, D-N.M., aimed at excluding political influence from the new statistics office. Bingaman said he would rework the amendment and submit it on the Senate floor.

#90059u1965 02/28/1990 ~United Press International

NEW YORK (FEB. 28) UPI - Exxon Corp.'s stock dropped Wednesday in the wake of federal criminal indictments related to last year's Alaska oil spill and analysts believed its price may now continue to lag the rest of the industry. Exxon common stock was trading down $1.375 at $47 a share in late afternoon trading on the New York Stock Exchange.

A federal grand jury in Anchorage, Alaska, late Tuesday handed down five criminal indictments for negligence and unlawful conduct that could result in fines up to $700 million. Exxon and the Justice Department had failed to reach a plea-bargain agreement.

"Obviously, this tends to keep uncertainty going for a longer period of time beyond what a plea-bargain agreement would have done," said Frank Knuettel, senior oil analyst with Prudential-Bache Securities Inc.

Apparently, the stock had risen previously on the belief that a plea-bargain deal would be struck, the analyst said. He noted that Exxon's stock was trading as high as $50 a share at the beginning of the year. Over the past year, the stock has traded as high as 51 5/8 and as low as 41 1/2.

Knuettel said he has been rating Exxon stock as "a good solid hold," neither a buy nor a sell. "People thought the company's liability might be ended. It turns out it wasn't," said Todd Bergman of Goldman Sachs.

Rosario Ilacqua, vice president of equity research for Nikko Securities Co., said he thought the indictments may increase chances that Exxon stock would continue to lag the rest of the oil industry.

Exxon, which wrote off $1.68 billion in cleanup costs against earnings in 1989, has not come near matching the 36 percent rise of oil stocks over the past year as crude oil prices rose, Ilacqua said. But, the analyst added, "I don't know where this thing is going to go." Even with the $1.68 billion write-off, Exxon still managed to earn $3.5 billion in 1989.

George Friesen of Deutsche Bank Group agreed saying, "Anything I say at this point is speculative." But he added, "I'm pretty sure the company is going to try for an out-of-court settlement" despite the failure to reach a plea-bargain accord. "A plea bargain could have limited the company's liability. But the leak to the press stopped the plea bargaining," Friesen said.

Friesen said the possible fines for conviction in the case "being bandied about in the media are not going to sink the company." But, he said, 65 percent of Exxon's stock is owned by smaller, relatively unsophisticated investors, who might be influenced by negative news on television more than larger institutional investors.

A continuation of negative news might lead to a significant number of the small investors selling their stock, thus driving the price down, Friesen said. Friesen said he was neutral on Exxon stock, recommending neither a buy nor a sell. "If the stock goes down to $44 or $45 (a share), it would look more attractive. ... I would view this as a buying opportunity," he said.

Exxon may be snakebit on the negative news front. Within hours after the indictments, some 24,000 gallons of heavy oil leaked early Wednesday from a barge at an Exxon's Bayonne, N.J., dock, forcing the closure of the Kill Van Kull waterway - one of the two chief entrances to New Jersey's main port area.

It follows a Jan. 2 spill of 567,000 gallons of home-heating oil from Exxon pipelines connecting Bayonne and Linden, N.J., that closed the

nearby Arthur Kill waterway and polluted more than five miles of shoreline. That spill took more than a month to clean up.

Both New Jersey and the city of Elizabeth have filed damage suits against Exxon in the wake of the Jan. 2 spill. The city's suit charged that the company took care of "obvious cleanup" but did little to clean piers, boats, and wharves in the area.

ANCHORAGE, AK (FEB. 28) UPI - Two other loaded oil tankers last Mar. narrowly missed Bligh Reef, where the Exxon Valdez grounded, and the captains involved conducted maneuvers similar to Joseph Hazelwood's, according to testimony Wednesday in the Exxon skipper's state criminal trial.

A state expert witness, who has attacked Hazelwood as reckless, also criticized the other tankers for pursuing a risky course of action.

The Arco Juneau, traveling even faster than the Exxon Valdez, missed Bligh Reef by about a half mile. The Brooklyn, traveling about the same speed as the Exxon Valdez, missed the reef by about six-tenths of a mile. The Exxon Valdez smacked into the underwater rocks, well-marked on charts and visible to mariners because of a lighted buoy.

The 987-foot Exxon Valdez ripped open its hull as it came to a rest on the reef, spewing nearly 11 million gallons of oil into Prince William Sound just after midnight last Mar. 24.

Exxon Corp. and Exxon Shipping Co. were indicted Tuesday on five federal charges arising from the spill, the largest in U.S. history.

Hazelwood is the only individual on trial, charged with reckless endangerment, operating the tanker while intoxicated, negligent discharge of oil and criminal mischief.

The trial, now in its fifth week, was adjourned early Wednesday when Redoubt Volcano erupted again, blackening the skies over Anchorage with ash. The prosecution is supposed to finish its case Friday.

Former tanker Capt. Robert Beevers, testifying as an expert witness for the prosecution, said Hazelwood acted recklessly by turning on the automatic controls heading into a detour, by driving out of tanker lanes without closely inspecting the ice and by leaving the bridge of the ship

and letting two unqualified crewmen take over.

The Exxon Valdez set out late Mar. 23 on its detour around icebergs based on a radioed ice report from the 853-foot Arco Juneau, which took roughly the same course several hours earlier traveling at a higher rate of speed.

The captain of the Arco Juneau, who successfully navigated his iceberg detour, was reckless, too, the state expert told the jury in the Hazelwood case. That skipper is not on trial.

The Brooklyn, also maneuvering to avoid ice earlier Mar. 23, took less of a risk but still came close to Bligh Reef. And the Brooklyn had no one with a Prince William Sound license endorsement as it sailed passed Bligh Reef, Beevers said.

Part of Hazelwood's alleged recklessness involved letting a mate take charge while Hazelwood left the bridge even though the skipper was the only one licensed to control the tanker in Prince William Sound.

Although Beevers attacked virtually all Hazelwood's judgments, decisions and actions, he also found fault with two other tanker captains who do not figure in this case.

Beevers said Hazelwood's turn instructions were simple and that the Exxon Valdez should have missed Bligh Reef like the other two tankers.

Hazelwood's turn commands apparently were executed too late by the crewmen left on the bridge for the Exxon Valdez to miss Bligh Reef.

Beevers noted that the skipers of the other two tankers remained on the bridge during the detour out of shipping lanes to avoid icebergs, something Hazelwood should have done.

The significance of Beevers' testimony was that the Exxon Valdez was taking a course of action routinely taken by other tankers but even that was judged risky and reckless by the state's prosecution witness.

Defense lawyers said it is significantly helpful to their case that Beevers' acknowledged other tanker captains took actions for which Hazelwood is charged with crimes.

The 43-year-old Huntington, N.Y. man faces seven years, three months in jail and a $61,000 fine.

#90059u1984 02/28/1990 ~United Press International

LANSING, MI. (FEB. 28) UPI - Three separate house fires broke out across

Michigan early Wednesday, killing 10 people, including at least six children, authorities said.

A house fire in the Lansing suburb of Delta Township killed four children, their parents and an adult visitor who authorities believe was a man.

Two children died in a Detroit fire and a person was killed in a house fire in Gladwin County's Bourret Township in central Michigan.

The Delta Township fire was so intense, heat and flames drove back firefighters and they were unable to go into the structure in search of possible victims, fire department spokesman Ken Caron said.

The fire crew was alerted to the blaze at 2:15 a.m. by a neighbor, Caron said.They arrived to find the entire house ablaze as flames shot from the windows and doors.

The fire was extinguished after about 75 minutes and an investigation was started into the cause, Caron said.

In the Detroit fire, the parents of the victims said they heard voices outside their west side home and then a booming sound before the fire started at around midnight.

A 6-month-old boy was dead at the scene and his year-old brother was dead on arrival at Children's Hospital. The parents escaped without injury.

Asked whether the incident sounded like a firebombing, the spokesman would only say, ''The cause of the fire is still under investigation.''

The Gladwin County fire was reported at 1:10 a.m. A spokesman for the Gladwin County's Sheriff's Department could not release the name, age or sex of the victim. Three fire departments were called to the scene.

#90059u2002 02/28/1990 ~United Press International

WASHINGTON (FEB. 28) UPI - The House voted overwhelmingly Wednesday to preserve 1.1 million acres of public land in Arizona as wilderness, following a last-minute compromise by key lawmakers on the thorny issue of water rights.

Companion legislation that would designate 1.2 million additional acres of Arizona wilderness in four national wildlife refuges is expected to gain House passage in the near future.

Both measures won swift approval by the House Interior Committee three weeks ago, but the latter bill must still clear the Merchant Marine and Fisheries Committee, which has some jurisdiction over management of wildlife refuges.

Together, the bills would more than double the 2 million acres of

wilderness already set aside in Arizona, most of that in national forests and national parks. Nearly identical legislation has been introduced in the Senate.

Rep. Morris Udall, D-Ariz., chairman of the Interior Committee and chief sponsor of the bill, said the measures reflect a great deal of compromise between commerical interests that wanted less wilderness and conservationists who sought more.

''I think we could have had more acreage in this bill - there were those of us who wanted a lot more,'' Udall said. ''But in the tough negotiations I thought it was more important to have quality rather than quantity.''

The bill approved Wednesday, on a vote of 356-45, would accord wilderness protection to 39 areas across the state totaling nearly 1.1 million acres of land administered by the federal Bureau of Land Management.

Udall's original bill would have set aside 1.4 million acres of wilderness areas. Nevertheless, the compromise measure still protects most of Arizona's remaining riparian areas - 90 percent of which have already been developed - as well as spectacular desert mountain ranges such as the Arrastra Mountains.

Nearly 950,000 additional acres that have been managed as de facto wilderness would be reopened to mining, logging and other commercial activities generally permitted on public lands.

In addition, the bill contains provisions allowing current livestock grazing in the wilderness areas to continue, along with wildlife management.

About 70 percent of the land to be designated as wilderness lies in the district represented by Rep. Bob Stump, R-Ariz., the lone member of the Arizona congressional delegation opposed to the bill.

''When we designate wilderness areas, we are not just preserving lands for future generations. We are telling future generations that we don't trust them on how to use and manage lands in the future,'' Stump said.

By law, land designated as wilderness must be managed to preserve its primitive, natural character. Roads, dams, buildings and other permanent structures are prohibited, as are motorized vehicles.

The legislation embodies a compromise on the size and location of wilderness areas reached by six of the seven members of Arizona's congressional delegation on the eve of the Interior Committee vote Feb. 7.

But a final settlement on language governing federal water rights for the

wilderness areas in the bill eluded lawmakers until minutes before the vote on the House floor.

Agreement on the water rights provisions avoided a skirmish on the House floor over the sticky issue.

WASHINGTON (FEB. 28) UPI - President Bush will nominate Dexter Lehtinen, subject of a recent crush of adverse publicity, to be U.S. attorney for Florida's southern district, the White House announced Wednesday.

The announcement came as Bush began a five-day political trip to California and after weeks of speculation about Lehtinen's future. A White House official said the nomination probably would be sent to the Senate for confirmation within a week.

Lehtinen, 43, has been the acting U.S. attorney for the southern district of Florida for 20 months. He is married to Rep. Ileana Ros-Lehtinen, R-Fla., whom he met when both served in the Florida Legislature.

An administration source said Bush decided to go ahead with the nomination because Lehtinen ''was highly recommended'' by former Attorney General Edwin Meese - who initially picked him for the job on an interim basis - and was endorsed by current Attorney General Richard Thornburgh.

''He has had a distinguished career and has an excellent reputation,'' the source said.

Lehtinen, a graduate of the U.S. Coast Guard Academy and Vietnam veteran, received his law degree from Stanford University and served in the Florida Legislature for eight years, six in the House and two in the Senate.

In 1975-77, he served as an assistant U.S. attorney in California, and in 1977-78 served on the Justice Department's Miami Organized Crime Strike Task Force.

Despite that record, clouds of controversy have gathered around Lehtinen in recent months. For instance, Lehtinen moved to take over the high-profile job as the lead prosecutor in the drug case against deposed Panamanian leader Manuel Noriega, but that duty has been given to another prosecutor in the office.

There have been reports the move was prompted both by Lehtinen's lack of trial experience and by questions about his volatile personality.

Also, a series of reports in The Miami Herald said an FBI background check of Lehtinen contained allegations he had been violent toward his former wife and his former mistress, had broken furniture during uncontrolled temper outbursts, and had been removed from the payroll on an earlier job with a law firm because he failed to show up regularly.

The newspaper also disclosed a 1980 police report, which the FBI had not checked out, in which a motorist claimed Lehtinen had charged him in a rage and threatened to attack him with a battery cable during a traffic dispute.

Meese had appointed Lehtinen to a 120-day term as ''interim U.S. attorney'' on June 17, 1988. Meese resigned as attorney general the next month.

Since the interim appointment expired, Lehtinen has continued to serve on an ''acting'' basis.

The 120 days was supposed to give the FBI time to investigate Lehtinen's past. The background investigation has taken much longer than normal because, a Justice Department spokesman recently explained without elaboration, Lehtinen is considered ''controversial.''

U.S. attorneys - the chief federal prosecutors - usually are selected after consulation with senators from the state involved and generally are confirmed without controversy following a cursory hearing before the Senate Judiciary Committee.

NEW YORK (FEB. 28) UPI - Pan Am Corp. has offered to sell to Deutsche Lufthansa AG its profitable West Berlin corridor routes that are protected by postwar air traffic restrictions, the West German carrier said Wednesday.

"Pan Am has offered to sell its West Berlin routes to Lufthansa but so far, we have no comment to make about the talks," said Lufthansa spokesman Hannes Schloesser.

"Pan Am flies from Frankfurt, its hub in West Germany, to West Berlin," Schloesser added. "Pan Am also flies to West Berlin from a number of German cities, including Dusseldorf, Hamburg, Hanover, Cologne, Munich, and Stuttgart." Pan Am declined to confirm that it has approached Lufthansa about the deal. "We have no comment at all to make," said Pan Am spokeswoman Pamela Hanlon.

An airline industry source said Pan Am was seeking as much as $350 million for its routes to West Berlin, adding that Lufthansa is finding the offer "too high."

Industry analyst Louis Marckesano of Janney Montgomery Scott in Philadelphia said the price currently reflected the value of one of Pan Am's most profitable European routes.

Those routes, however, might soon lose their value if the reunification of the two Germanys eliminates existing air-traffic restrictions over East

Germany.

Under a postwar agreement between the four occupying powers - Britain, France, the Soviet Union, and the United States - Pan Am has rights to fly through restricted air corridors over East Germany into West Berlin's Tegel airport.

British Airways and Air France have the same rights as Pan Am, while the Soviet carrier Aeroflot lands near East Berlin. Trans World Airlines is the only other U.S. carrier allowed to fly into West Berlin, and it operates two daily flights between Frankfurt and the former German capital. Under the same four-power agreement, Lufthansa has been barred from the air corridors connecting West Germany with West Berlin.

"These routes always have been a very profitable segment of Pan Am. But if Germany gets reunified, the purpose of the four-power pact on the West Berlin airport loses its purpose," Marckesano said.

"Perhaps Pan Am sees the writing on the wall and realizes that eventually the traffic will go to Lufthansa, if there are no restrictions left," he said. "Pan Am is valuing those routes on past performances. But Lufthansa feels time is on its side and it could negotiate a better price," he added.

A West German diplomat said restrictions could be lifted in the near future as representatives of the four powers were meeting this week in Bonn to discuss changes in the air-traffic agreement between the two Germanys.

"A question being discussed among the four powers this week in Bonn is a relaxation of aviation regulations between the two German states," the diplomat said. Restrictions banning Lufthansa from flying to West Berlin could be lifted soon as part of a new air-traffic agreement, he said.

Marckesano said Pan Am's financial situation remains serious. The airline, which reported a $72.7 million loss on revenues of $3.5 billion in 1988, is expected to announce another loss when it releases its 1989 financial statement next week.

"Pan Am has to find a merger partner or a major influx of capital in the $1 billion range, just to keep up with the industry and avoid liquidation " Marckesano said.

Even if all restrictions were lifted, Lufthansa might need to seek other airlines' gates and time slots at the crowded Tegel airport, an industry expert said. "The question is how much they will want to pay for this," he said.

Lufthansa already flies to West Berlin, through its EuroBerlin partnership with Air France. The French carrier owns 51 percent of EuroBerlin and

Lufthansa the remainder.

British Airways did not expect lifting of air restrictions to challenge its operations on the profitable route to West Berlin. "We have a very extensive route network to Berlin and we shall remain competitive with anybody on the routes," a British Airways spokesman said.

#90059u2068 02/28/1990 ~United Press International

NEW YORK (FEB. 28) UPI - Hearst/ABC-Viacom Entertainment Services said Wednesday it will launch an advertiser-supported video service to be shown in doctors' waiting rooms.

Called Healthlink, the service will consist of hour-long healthcare programs tailored for visitors to pediatricians, obstetricians/gynecologists and primary care doctors.

The shows will include nine minutes of commercials, said Thomas F. Burchill, president and chief executive officer of Hearst/ABC-Viacom Entertainment Services.

No sponsors have yet been signed, although Burchill said he expected advertising on Healthlink to be consumer-driven and include food and nutritional types of products.

Burchill said the service, to begin sometime this spring, is expected to reach 20,000 waiting rooms by the end of the first year and ultimately be delivered to 50,000 doctor's offices.

Healthlink will provide free to waiting rooms a video system that includes a 25-inch monitor, video disc player and a cabinet, Burchill said. Programming, to be produced by Heart/ABC-Viacom's Lifetime network that broadcasts health and medical shows over cable and satellite, will change once a month.

Burchill said Healthlink has reached an agreement with the American Academy of Pediatrics to produce programming for pediatricians' waiting rooms.

''The only requisite for the service is that it be shown continuously during waiting room hours,'' Burchill said.

Burchill declined to specify the company's investment in Healthlink or its start-up costs.

''We believe it has the potential to be as successful as a basic cable channel,'' he said.

Last year, Whittle Communications Inc. - the controversial producer of the Channel One educational network that plans to deliver advertising-sponored news programming to schools beginning next week - announced it will launch a television service in physicians' waiting rooms. It, too, will be sponsored by advertisers.

Burchill shunned any comparisons between the two services, however.

''We're not looking to put ads in neat places,'' he said. ''We're committed to health-care information.''

Representatives of Whittle were not immediately available for comment.

#90059u2081 02/28/1990 ~United Press International

ANALYSIS BY JOAN HANAUER

NEW YORK (FEB. 28) UPI - Martin Mull has temporarily deserted such off-beat pursuits as ''The History of the White People in America'' in order to appear in a network sitcom.

''I thought it was high time I took a real job,'' Mull said in an interview. ''I'd been having just too much fun all my life.''

After appearing in Norman Lear's syndicated ''Mary Hartman, Mary Hartman'' and its spinoff, ''Fernwood 2-Night,'' as well as the ''White People'' spoofs on paycable, Mull now stars in ''His & Hers,'' a sitcom to premiere on CBS Monday, Mar. 5, 10:30-11 p.m. Eastern time.

Mull plays Dr. Douglas Lambert, a divorced marriage counselor with two teenage kids, who is remarried to Stephanie Faracy as Dr. Regina Hewitt, a never-before-wed marriage counselor.

''It was very calculated on my part,'' Mull said of his new project. ''For the last five, six, eight years I've been four-walling everything I did except the directing. I was writing, producing - and always writing myself into the starring role. I'm no fool.

''The responsibilities and pressures are extreme and I also was rather curious whether each hat, each aspect, was directly diminished by the pressure of others. Maybe I would be more of an actor and learn more about that skill if I had nothing to do with anything else.''

He found the pilot script for the show funny, ''and I thought it had some chance to grow and change and be even funnier and more adult and sophisticated.''

He feels unsure about the finished product - and with some reason.

The opening show has some very funny moments as it explores the infertility problems of its central characters, marriage counselors who have their own domestic problems.

At the infertility clinic, when he is given a specimen container, he just smirks with embarrassment and takes off for a private room saying, ''I'll just go in there and do whatever I'd do if I were in prison.''

Mull and Faracy are funny and their chemistry is good, and Blake Soper comes across as Mull's teenage boy who lives with them and gives off the emotional warmth of wallboard. There also is a white cat named Fluffy who looks like she inspired Don King's hairdo.

''I'm not an animal hater,'' said Mull, who during the first show drops the cat out the window several times, ''but that cat... It would not hit a mark and we were down an hour trying to get this thing to stay on a chair. If I was supposed to have animosity toward that cat - it was not method acting.''

Acting is something Mull strayed into on his way to becoming an artist - he supported himself through college and a master's degree in art at the Rhode Island School of Design by playing the guitar, singing and being funny. Eventually he moved to Los Angeles.

''My live music show was basically comedy because I can't sing. I thought, if I'm going to break into acting, why not on a show I considered quite funny and irreverent,'' he said. That was ''Mary Hartman, Mary Hartman.''

''I met with Norman Lear and six months later they called me back to read for a part and I thought, this is wonderful.

''The role they handed me was a wife abuser. One of the few things in life I do not find funny is wife abuse. Here I was doing very serious acting. Fortunately I had the likes of Dabney Coleman, Louise Lasser and Mary Kay Place whispering in my ear. Then Norman spun off into 'Fernwood 2-Night,' probably in deference to my acting. Give this guy something he can do.''

Maybe CBS will ride herd on the scripts of ''His & Hers'' to give Mull something he does brilliantly - comedy.

For almost 20 years, civil war has been raging in Mozambique, the poorest country in the world, and it has killed 1 million people and orphaned 200,000 children.

That's the blood-curdling story Tom Jarriel reports on in ABC's ''20-20,'' to air Friday, Mar. 2, 10-11 p.m. Eastern time.

The rebels call themselves Renamo - others call them ''bandidos'' or bandits - and they want to overthrow Mozambique's socialist government.

Jarriel says the U.S. State Department has attributed 94 percent of the killings in Mozambique to Renamo. The atrocities range from recruiting 8-year-olds and training them to kill to boiling children alive in front of their parents.

Firinice, a 9-year-old boy, describes what happened when Renamo soldiers overran his village when he was 6.

''They killed me mother, they cut her into pieces and then they cooked her in the pot. My father, too. They killed him, they cut him into pieces, put him in a pot and cooked him,'' Firinice said.

His mother's head was impaled on a post.

Jariell says, ''Funding for Renamo is believed to come from South Africa, from right-wing conservative groups in the United States and Europe ...''

#90059u2101 02/28/1990 ~United Press International

(FEB. 28) UPI - President Bush is on the road today, stopping on New York's Staten Island for a fund-raising luncheon on behalf of congressional candidate Susan Molinari... before traveling West. She is vying for the seat held by her father, former U-S Representative Guy Molinari, who left Congress to become Staten Island Borough President. From New York, Bush goes to San Francisco for a fund-raising dinner for

California Senator Pete Wilson... a gubernatorial candidate.

The White House announced that President Bush and Soviet leader Gorbachev spent 30 minutes on the phone discussing Eastern Europe and Nicaragua today. White House spokesman Marlin Fitzwater announced the morning call in a brief statement but offered NO details. The Bush administration has pressed the Soviet Union to halt the flow of weapons into Nicaragua, and Moscow is opposed to the Bush administration's desire to have a unified Germany in NATO.

In Moscow today, the Soviet Parliament gave farmers the right to leave collective farms and set up private homesteads. The Supreme Soviet passed the land law 349-7. It does NOT abolish collective farms but allows peasants to own their own farms if they wish. The move comes one day after the Soviet Parliament established a presidency, giving Mikhail Gorbachev broad new powers to push through his reform programs.

BOSTON (FEB. 28) UPI - Gov. Michael Dukakis sported a cast on his left hand Wednesday to protect two fingers he broke in a fall while helping his father-in-law dig his car out of the snow.

Dukakis, the Democratic presidential candidate in 1988, said he slipped over the weekend while helping father-in-law Harry Ellis Dickson shovel the car out of snow drift at Dickson's western Massachusetts home. The governor said he tried to break his fall with his hands, but broke the foruth and fifth metatarsal bones.

''It means either my bones are getting more brittle or I am falling less well,'' Dukakis quipped at a news conference.

He said the injury will require minor surgery later this week.

(FEB. 28) UPI - The U-S Supreme Court says the Fourth Amendment stops at the border. Today's 6-3 high court ruling gives law enforcement officials wide authority to ignore constitutional guarantees when operating outside the United States. The ruling comes in a case involving a Mexican citizen involved in the death of a U-S agent... but could affect the trial of Panama's deposed ruler Manuel Noriega.

Marion Barry returned to Washington, D-C, today for his arraignment on drug and perjury charges. Barry's lawyer, Kenneth Mundy, entered innocent pleas on his client's behalf, while predicting that the mayor will be

vindicted at his trial. Mundy also told reporters that Barry's treatment at a South Carolina substance abuse clinic is ''going well.'' The mayor trial's is set for June 4th.

#90059u2123 02/28/1990 ~United Press International

BUCHAREST, ROMANIA (FEB. 28) UPI - Ten days after a humiliating attack on its headquarters, the interim government announced stiff penalties Wednesday for anyone convicted of breaking into its property or ''disturbing the smooth run'' of official business.

The decree, carried by the official news agency Rompres, set penalties of up to three years imprisonment for violators and up to seven years if the person carried a weapon.

''The decree is meant to prevent any act of violence which hinders the country's advance toward democracy and to establish a climate of certainty and free expression,'' Rompres said.

The move is an apparent reaction to the Feb. 18 ransacking on the government's headquarters by more than 1,000 anti-government protesters.

Before being dispersed by soldiers, the mob smashed windows with crowbars and clubs, damaged furniture, threw books out of windows and nearly pushed a deputy prime minister from a balcony.

The disturbance, the worst since the overthrow of communist dictator Nicolae Ceausescu, prompted the ministries of defense and interior to beef up security forces and order the police and military to use force in quelling future disturbances.

Wednesday's decree outlaws breaking into the headquarters of the national or provincial governments as well as the offices of political parties and organizations representing ethnic minorities.

The penalties also apply to anyone convicted of ''disturbing the smooth run'' of these groups, Rompres said.

In another development, Defense Minister Gen. Victor Stanculescu revealed Wednesday that Ceausescu's dreaded Securitate, or secret police force, had numbered 10,000 men - half of whom are still employed by the government.

Stanculescu confirmed for the first time that a special force of 1,600 officers had been given orders under Ceausescu to ''repress and stifle democracy.''

Of the 1,600, about 1,000 were discharged and the others were integrated

into the army and given non-command positions, he said. Some 210 former Securitate officers are under criminal investigation.

Ion Ratiu, president of the World Union of Free Romania and a leading figure in the opposition, welcomed the long-sought release of information on the Securitate but said many questions remained unanswered.

''The ministry still hasn't made a full disclosure about the Securitate. We still don't know who they are,'' he said. ''We want to know their names and we want lists of informers. It is impossible to function without this. The guilty must be punished.''

#90059u2127 02/28/1990 ~United Press International

(FEB. 28) UPI - Federal health officials are advising state officials to notify the sexual partners of AIDS carriers to warn them that they may have been exposed to the virus that causes the deadly disease. But AIDS activists are critical of today's draft proposal by the Centers for Disease Control in Atlanta. They say it does NOT address the nation's need for AIDS treatment programs.

India is again the scene of ethnic protest. About 200-thousand Moslems rode a a caravan of 400 buses and vans through Srinigar today, chanting ''Indian dogs go home'' and ''We want independence.'' The massive anti-India demonstration 400 miles north of New Delhi was to press demands by Moslems seeking secession of the northern Kashmir Valley from India.

LOS ANGELES (FEB. 28) UPI - Prosecutors said Wednesday they will dismiss a conspiracy count against former McMartin Pre-School teacher Raymond Buckey, but tentatively intend to retry him on 12 remaining molestation counts.

''We do not intend to proceed with the conspiracy count, which will shorten the trial considerably and strengthen our case,'' Deputy District Attorney Joseph Martinez said.

Martinez made his remarks to reporters following a hearing in which Superior Court Judge Stanley Weisberg, selected Monday to preside over the retrial, ordered jury selection to begin March 9.

Martinez said that as of Wednesday, he was intending to present as witnesses the five remaining alleged victims in the case. Those five children represent 12 molestation counts against Buckey, 31.

Martinez said he had tentative agreements from the parents of the five children that they would testify. However, he hinted that fewer than five children may wind up testifying at the trial if the parents of any of the youngsters feel it is in their best interests not to testify.

District Attorney Ira Reiner said several weeks ago that as few as two children could testify against Buckey.

''Nothing is final until we file'' the counts against Buckey on Tuesday, Martinez said.

Defense attorney Danny Davis, meanwhile, told reporters once again that he understood that none of the five children was willing to testify at the retrial.

''My information remains the same: no child witnesses are available,'' Davis said.

Responded Martinez: ''It's not uncommon for attorneys to talk and not know what they speak of. Certainly there will be child witnesses.''

Buckey and his mother, Peggy McMartin Buckey, 63, were acquitted Jan. 18 of 52 molestation counts stemming from the alleged sexual abuse of children at the now-closed Virginia McMartin Pre-School in Manhattan Beach.

Jurors deadlocked on one count of conspiracy and 12 other molestation counts.

The verdicts climaxed a nearly three-year, $13 million trial, the longest, costliest criminal trial in U.S. history.

Martinez, selected by Reiner following the acquittals to re-trial Buckey, estimated that the re-trial will take only six months to complete.

''We don't expect to have another epic trial,'' he said. Assisting Martinez at the retrial will be Deputy District Attorney Pam Ferrero.

When initially filed in 1984, the case was the largest molestation case in U.S. history. Later, however, five co-defendants and scores of charges were dismissed because of insufficient evidence.

NEW YORK (FEB. 28) UPI - An adviser to Soviet President Mikhail Gorbachev, two Americans and a British scientist Wednesday received the Encyclopedia Britannica awards for excellence in disseminating knowledge for the benefit of mankind.

Robert Gwinn, chairman and chief executive officer of Encyclopedia Britannica, said the honorees not only contributed to the sum of knowledge but they have been known for their ''abilities in communicating knowledge and their thirst for the dissemination of learning.''

The award recipients, Grigori Tunkin, one of Gorbachev's advisers, British-born physicists Freeman Dyson, American historian John Hope Franklin and evolutionary biologist Stephen Jay Gould, each received a check for $25,000 and a gold medal.

The award citation said Tunkin's ''concepts are a source of perestroika, encompassing genuine East-West cooperation in the United Nations, the International Court and world problem-solving.''

In accepting the prize, Tunkin called for the strengthening of the United Nations.

''To survive, mankind has to make a supreme effort to replace the law of force by the force of law,'' Tunkin said.

Gould was honored as a major interpreter of scientific phenomena and for his controversial work on human evolution.

Dyson, who has witnessed many of the major advances in physics in the postwar era, said unpredictability in physics can be applied in economics and international politics.

''We have seen in the last year a number of revolutions in Eastern Europe that the conventional wisdom had declared impossible,'' Dyson said.

He said he believes that the phenomenon of unpredictability has been at the core of scientific discoveries and it also applies to other fields.

Dyson said that overdue revolutions, whether in the sciences, politics,

economics or society, ''are unpredictable but not impossible.''

Franklin spoke of the continuing existence of the color line despite progress in improving race relations from the 18th century to the present.

He expressed the hopes that the 21st century ''will be suffused with a spirit of racial tolerance and understanding, and that it will bring in its wake a program of political, economic, and social reordering of our society.''

WASHINGTON (FEB. 28) UPI - President Bush announced Wednesday that he intends to nominate Leo Giacometto, a Montana legislator and rancher, as U.S. Marshal for Montana.

If confirmed by the Senate, Giacometto, 27, of Billings, Mont., would succeed Ronald Alles.

Giacometto has served as a representative in the Montana Legislature since 1986, and as executive assistant to Sen. Conrad Burns, R-Mont., since 1988. During the past eight years, he has also owned and managed a ranch in Alzada, Montana.

DOVER, Del. (MARCH 1) UPI - The Delaware Supreme Court has reaffirmed the merger between Time Inc. and Warner Communication Inc., finding the deal ''reasonable and proportionate.''

A 41-page opinion reaffirms the decision made by the state's highest court last July, when it sided with a Chancery Court decision that allowed the two companies to merge into the world's largest communication concern.

The merger was challenged by Paramount Communications Inc., which had made an uninvited tender offer for Time.

In addition to the Paramount attempt, two groups of shareholders sought relief from the state Supreme Court to block the deal.

In affirming the Chancery Court decision, Justice Henry R. Horsey wrote in the opinion that Time's response to the Paramount tender offer was reasonable under the circumstances.

''We find that Paramount's tender offer was reasonably perceived by Time's board to pose a threat to Time and that the Time board's response to the threat was, under the circumstances, reasonable and proportionate,'' the opinion, released Tuesday, stated.

The opinion also states that while Time had to incur a heavy debt in order to acquire Warner Communications, ''that fact alone does not render the board's decision unreasonable so long as the directors could reasonably perceive the debt load not to be so injurious to the corporation as to jeopardize its well being.''

Time purchased Warner for $14 billion.

WASHINGTON (FEB. 28) UPI - John Poindexter's lawyers argued Wednesday that Ronald Reagan's personal diaries are even more crucial as evidence now that the former president claims to have forgotten key details about the Iran-Contra scandal.

The lawyers asked U.S. District Judge Harold Greene to require Reagan to turn over some 30 excerpts from his personal diaries to be used at Poindexter's trial, scheduled to begin Monday.

Poindexter, who was Reagan's White House national security adviser, faces five criminal charges in connection with the biggest scandal of the Reagan administration. It involved secret weapons sales to Iran, efforts to free American hostages in Lebanon and the financing of covert military supplies for the rebel Nicaraguan Contras.

Reagan gave videotaped testimony in Los Angeles Feb. 16 and 17 and a transcript was released last Thursday. During the testimony, Reagan said at least 124 times that he could not recall details related to the scandal.

''During his testimony, Mr. Reagan professed an inability to recall several key issues which the defense believes to be accurately documented in his diaries,'' Poindexter's lawyers noted Wednesday.

Greene ordered Reagan to turn over the diary excerpts Jan. 30, but the former president refused and invoked the doctrine of ''executive privilege.'' The Justice Department, representing President Bush, also invoked executive privilege in the dispute over Reagan's diaries.

Greene has not ruled on the executive privilege claims and it was not clear when he would do so.

In renewing efforts to obtain the diaries, Poindexter's lawyers said that because of Reagan's ''inability to recall certain key events,'' the videotaped testimony ''can serve as no substitute for the more accurate and more contemporaneous record of those same events that the diaries

provide.''

''Mr. Reagan's diaries provide not only the 'best evidence' but the only evidence on questions central to this case,'' they said, labeling Reagan's claim of executive privilege as ''wholly illusory.''

During his testimony, Reagan said he did not know the full extent of involvement by his aides in the Iran-Contra scandal, but always told them ''we don't break the law.''

Reagan also said he never saw ''one iota'' of evidence that profits from secret arms sales to Iran were being diverted to the Contras.

#90059u2295 02/28/1990 ~United Press International

WASHINGTON (FEB. 28) UPI - The farm price index, influenced by an abrupt drop in milk prices, dipped in February despite the highest tomato prices on record because of the freeze-shortened crop, the government said Wednesday.

Nonetheless, the index, which measures the prices paid to farmers for their crops and livestock, still was 2.7 percent higher than one year ago.

''Tomato prices for February were at the highest level of records,'' the Agriculture Department said in its monthly report. ''The large increase is due to short supplies brought on by the freeze in Florida in December.''

Although cattle and broiler prices also were up, the impact was outweighed by lower prices for milk, eggs, lettuce and wheat.

''The sharp drop in milk prices from January was the largest month to month absolute decline of record, exceeding the April-May 1974 decline by 21 cents,'' the report said.

Milk prices fell 80 cents between January and February to average $14.90 per 100 pounds in February.

Tomato prices averaged $122 per 100 pounds, a $6 increase from the preceding month. Prices during January and February were about double the previous record set in March 1985.

Cattle prices advanced 90 cents per hundredweight during February to average $74.60. Market hog prices increased by $1 to average $48.90.

Egg prices dropped 15.7 cents from January to average 63.1 cents a dozen. Broiler prices averaged 33.5 cents a pound, up 2.8 cents.

Since January, wheat prices fell 14 cents for a February average of $3.57 a bushel. Corn prices dropped 4 cents to average $2.27 a bushel while barley was off 18 cents to $2.15 a bushel.

Prices for nearly all the fruits used in the index went up during February with oranges having the largest effect. The December freeze slashed production. Orange prices went up 23 cents a box to average $4.93 a box.

The February index stood at 171, compared to 172 in Janaury and 170 in December. After dipping to 160 last September, the index climbed each month until February.

(FEB. 28) UPI - People living on state and government farms in the Soviet Union have been granted the right to own private homesteads. The Soviet Parliament today passed the land law 349-7... the latest move in Mikhail Gorbachev's perestroika reforms. The law seeks to give farmers more incentives and to jolt Soviet agriculture into becoming more productive.

Another oil spill has closed down one of two main entrances to New Jersey's main port area. Authorities say a Coast Guard national pollution strike team was sent to the area, where about 24-thousand gallons of heavy oil leaked from a barge at an Exxon dock early today. The accident is the second in the area in two months. More than 400 water birds were killed in a spill last month.

Law enforcement officials were given wide authority by the Supreme Court today to ignore constitutional guarantees when operating outside the United States. The high court ruling could affect the trial of Panama's ousted dictator General Manuel Noriega. In a 6-3 decision, the justices said Fourth Amendment guarantees against unreasonable search and seizure do NOT apply to property owned by a NON-resident alien located in a foreign country.

#90059u2364 02/28/1990 ~United Press International
(MARCH 1) UPI - DIGEST:

Baseball

The Minnesota Twins signed free-agent left-hander John Candelaria to a one-year contract that hinges on his passing a physical examination. Candelaria, 36, split last season between the New York Yankees and Montreal Expos. The Twins also signed infielder Paul Sorrento to a one-year contract. ... The Yankees named Jack Lawn vice president and chief of operations. He last served as Administrator of the Drug Enforcement Administration.

Basketball

The Minnesota Timberwolves extended forward Tyrone Corbin's contract through the 1992-93 season. The Wolves also have an option for 1993-94.

Boxing

Briton Nigel Benn leaves Saturday for Miami to complete preparations for his April 29 clash with World Boxing Organization middleweight champion Doug de Witt. Benn is hoping for an eventual meeting with Thomas Hearns for the WBO super-middlweight crown.

Football

The Atlanta Falcons promoted defensive coordinator Doug Shively to assistant head coach and hired former New England Patriots assistant Jimmy Carr as secondary coach. ... Tight end Bob Mrosko became the Houston Oilers first Plan B free agent loss, signing a three-year contract with the New York Giants. ... Former Philadelphia Eagles defensive back Herman Edwards has joined the Kansas City Chiefs as a talent scout. ... The Arena Football League will offer franchises to individuals and corporations. All franchises had been owned and operated by the league.

Skiing

International Ski Federation officials said by telephone from their headquarters in Bern, Switzerland, they still had not been able to find a venue for the women's World Cup races scheduled for this weekend. Originally a giant slalom and a slalom were planned for Candanchu, Spain, but these were canceled Tuesday after FIS official Heinz Krecek of West Germany reported insufficient snow at the resort near the northern Spanish-French border.

Television

ESPN completed its baseball announcer teams, naming Hall of Famer Jim Palmer and Tommy Hutton as analysts and Steve Zabriskie as play-by-play commentator. Palmer will team with Zabriskie, while Hutton works with Chris Berman. ESPN will televise 175 games in its initial season of major league baseball coverage.

#90059u2367 02/28/1990 ~United Press International

NEW YORK (FEB. 28) UPI - As many as 30,000 gallons of heavy oil leaked Thursday from a barge at an Exxon dock, forcing the closing of the busy Kill Van Kull waterway that serves as the main entrance to New Jersey's chief port area.

New York Attorney General Robert Abrams began immediate civil and criminal investigations into the leak, the second large spill involving Exxon in two months, to pinpoint liability even though a Staten Island barge company acknowledged reponsibility.

''We are going to be investigating the liability not only of the Eklof Corp., which owned the barge that leaked, but also of Exxon who was doing the loading,'' Abrams said at a news conference at the New York Coast Guard headquarters.

Told that an Exxon spokesman disclaimed any responsibility because the oil actually was owned by an ''international customer'' at the time it was loaded on the barge, Abrams said, ''To disclaim liability would not seem to be a responsible act at this time.''

Capt. Robert North, Coast Guard commander of the Port of New York, said his office was informed of the spill at 3:50 a.m. and had a team at the site by 5:30 a.m. A national pollution strike team was flown in from Mobile, Ala., Wednesday afternoon, North said.

''The Kill Van Kull will be closed to all commercial and recreational traffic until our efforts to contain and remove the oil allows it to be reopened,'' North said, adding that he could not estimate when that will be.

Abrams, who toured the area on a police launch, said oil slicks and gobs of oil spread through the Kill Van Kull and had moved into New York's Upper Bay almost to the Statue of Liberty.

He noted that the area contained several environmentally sensitive areas including the Snug Harbor area on Staten Island and Shooter's Island, a wildlife refuge, in the Kill's channel.

North said two local companies were hired for the cleanup and were on the scene with six oil-skimming vessels and a boom which was placed around Port Bayonne to prevent pollution of the opposite Staten Island shore. He said Eklof Corp. had agreed to pay for the cleanup.

The Coast Guard identified the oil as No. 6 industrial fuel oil, a heavy oil that evaporates slower than lighter home heating oils.

North said between 24,000 and 30,000 gallons of oil had escaped from a 12- by 6-inch hole in a ''damaged'' tank on the barge. He described it as a ''medium'' spill, explaining that anything between 10,000 and 100,000 gallons was in the medium category.

Al Appleton, a spokesman for the New York State Department of

Environmental Conservation, said besides two major spills in the New Jersey Terminal area since Jan. 1 there had been 20 small spills of between 50 and 100 gallons each.

Kill Van Kull, a narrow natural channel connecting New York's Upper Bay to Newark Bay, is one of the two chief entrances to the New Jersey Terminal area which includes Port Elizabeth and Port Newark. The other entrance is the Arthur Kill waterway.

The Coast Guard closed the Kill Van Kull to all marine traffic from the Bayonne Bridge to Constable Hook Reach.

A spill of 567,000 gallons of home heating oil from Exxon pipelines connecting Bayonne and Linden, N.J., closed nearby Arthur Kill briefly Jan. 2 and polluted more than five miles of shoreline including several waterfowl rookeries. That spill took more than a month to clean up.

Both New Jersey and the city of Elizabeth have filed damage suits against Exxon. The city's suit charged that the company took care of ''obvious cleanup'' but did little to clean piers, boats and wharves in the area.

(FEB. 28) UPI - Mayor Marion Barry made a brief appearance today in a Washington, D-C, federal court to plead innocent to eight counts of cocaine possession and perjury. The arraignment was the second court appearance for Barry since his arrest last month in a hotel, where he was allegedly videotaped by police as he smoked crack with a girlfriend. Barry is still undergoing treatment in a substance abuse center near Charleston, South Carolina.

Nelson Mandela met with Southern African and Commonwealth leaders today in Zambia, with all agreeing that sanctions against South Africa must continue. Zambia's president says sanctions should NOT be dropped until South Africa's white-minority government abolishes apartheid. Mandela is making his first foreign trip since his release earlier this month from more than 27 years of imprisonment.

#90059u2373 02/28/1990 ~United Press International

(FEB. 28) UPI - The Food and Drug Administration warns that a drug used to prevent epileptic seizures may lose one-third of its effectiveness if stored in damp places like bathrooms. The F-D-A asked manufacturers to change the drug's packaging to keep out moisture after studies showed that carbamazepine tablets can be weakened by moisture. Officials say the results may explain why some epileptic patients complained that the drug

sometimes varies in its ability to prevent seizures.

A five-year-old Texas boy died early today and a Fort Worth man faces felony murder charges for allegedly giving the child whiskey at a party. Police in Everman, Texas, say they will upgrade child abuse charges against Anthony Jimerson, who allegedly gave the boy alcohol at a party on Friday, telling him to- quote- ''drink it like a man.'' Raymond Griffin suffered irreversible brain damgage.

#90059u2468 02/28/1990 ~United Press International

ANCHORAGE, AK (FEB. 28) UPI - Redoubt Volcano exploded violently Wednesday and sent an enormous black cloud over Anchorage, blotting out the bright midday light.

The Alaska Volcano Observatory said the 10,197-foot mountain 110 miles southwest of Anchorage erupted twice Wednesday morning, and the Federal Aviation Administration said it shot a 40,000-foot column of ash and steam.

Winds took the volcanic plume northeast. There were scattered reports of light ashfall, but most of the volcanic material stayed airborne as it sailed over the state's largest city, darkening the skies at noon, until the cloud passed.

Air traffic was disrupted, according to Anchorage International Airport and FAA officials. Departing flights were canceled or delayed, and incoming international flights were diverted to other cities for refueling.

The Anchorage mayor's office issued a health alert because of the ash danger, warning those with breathing problems to stay inside.

''It's accumulating in a very thin film,'' municipal spokeswoman Kari Bohi said. ''People are getting it in their hair, on their cars, on their shoes.''

The jury in the trial of Exxon Valdez skipper Joseph Hazelwood was dismissed early when the sky over Anchorage turned black. State Superior Court Judge Karl Johnstone said he wanted to avoid jurors having to drive home during ashfall.

Volcano Observatory geologist Tom Miller said seismic activity increased before the eruptions, a moderate one at 8:46 a.m., followed by a large eruption at 9:47 a.m. Alaska time (1:48 p.m. EST), which created lightning.

Miller said the heaviest ashfall reported by early afternoon appeared to be over Cook Inlet, before the plume reached Anchorage, and over the Chugach Mountains which border Anchorage on the other side. He said ash

fell on oil platforms in Cook Inlet.

Scattered ash was reported in the town of Eagle River north of Anchorage, at nearby military bases, and there was a light dusting of ash in downtown Anchorage.

Flooding caused by the eruption was reported on Drift River, but no damage was reported at the Drift River oil terminal, 20 miles from the volcano. Volcanic debris cascading down Redoubt fills the river bed, raising the river level. The oil terminal, already operating under emergency rules imposed by the state and Coast Guard, was evacuated when Redoubt erupted.

Redoubt has erupted at least once a week for the last three weeks and has been exploding off and on since Dec. 14, when it awoke from a quarter-century slumber.

#90059u2474 02/28/1990 ~United Press International

KANSAS CITY, Mo. (MARCH 1) UPI - H&R Block Inc. said Wednesday its third-quarter loss was $3.88 million, compared with a loss of $9.65 million in the comparable period last year.

Revenues for the quarter ended Jan. 31 were $164.7 million, up from the year-earlier $139.4 million.

The company's loss for the nine months ended in January was $8.3 million, compared with a loss of $15.3 million in the year-ago period.

Revenues for the nine-month period were $446.5 million, compared with $384.4 million a year earlier.

H&R Block said loss before taxes of its worldwide tax operations in the latest quarter was $20.95 million, compared with a $25.5 million loss last year. Revenues from tax operations increased 40.8 percent to $42.1 million.

Tax preparation volume at company-owned and franchised offices in the United States from Jan. 1 to Feb. 15 increased 18.1 percent from last year.

Chairman and Chief Executive Officer Henry W. Bloch said that he is optimistic about H&R Block's tax season results but that it is too early to draw conclusions based on the first six weeks of the filing season.

The company's CompuServe Inc. subsidiary reported third-quarter pre-tax earnings of $10.5 million, compared with $7.7 million a year ago.

H&R Block also said directors declared a quarterly cash dividend of 32 cents a share, payable April 2 to shareholders of record as March 12.

#90059u2563 02/28/1990 ~United Press International

WASHINGTON (MARCH 1) UPI - The farm price index, influenced by an abrupt drop in milk prices, dipped in February despite the highest tomato prices on record brought on by December's freeze, the government said Wednesday.

Nonetheless, the monthly index, which measures the prices paid to farmers for their crops and livestock, still was 2.7 percent higher than one year ago.

''Tomato prices for February were at the highest level of records,'' the Agriculture Department said in its monthly report. ''The large increase is due to short supplies brought on by the freeze in Florida in December.''

Although cattle and broiler prices also were up, the impact was outweighed by lower prices for milk, eggs, lettuce and wheat.

''The sharp drop in milk prices from January was the largest month-to-month absolute decline of record, exceeding the April-May 1974 decline by 21 cents,'' the report said.

Milk prices fell 80 cents between January and February to average $14.90 per 100 pounds in February.

Tomato prices averaged $122 per 100 pounds, a $6 increase from the preceding month. Prices during January and February were about double the previous record set in March 1985.

Cattle prices advanced 90 cents per hundredweight during February to average $74.60. Market hog prices increased by $1 to average $48.90.

Egg prices dropped 15.7 cents from January to average 63.1 cents a dozen. Broiler prices averaged 33.5 cents a pound, up 2.8 cents.

Since January, wheat prices fell 14 cents for a February average of $3.57 a bushel. Corn prices dropped 4 cents to average $2.27 a bushel, while barley was off 18 cents to $2.15 a bushel.

Prices for nearly all the fruits used in the index went up during February with oranges having the largest effect. The December freeze slashed production. Orange prices went up 23 cents a box to average $4.93 a box.

The February index stood at 171, compared to 172 in Janaury and 170 in December. After dipping to 160 last September, the index climbed each month until February.

#90059u2565 02/28/1990 ~United Press International

WASHINGTON (FEB. 28) UPI - Senators and Bush administration officials have reached a tentative compromise on auto emission limits, a key roadblock to congressional action on clean air legislation, an aide to Senate Democratic leader George Mitchell said Wednesday.

''They have reached an agreement (on automobile emissions),'' said Diane Dewhurst, a spokeswoman for Mitchell, who earlier Wednesday characterized the compromise as ''a very good and strong agreement.''

However, environmentalists said they will oppose the compromise because it greatly lessens the likelihood that effective controls on automobile tailpipe emissions will be imposed after the year 2000.

''What you have here is a program that would permit continued exposure to unhealthful air for millions of Americans,'' said Richard Ayres, chairman of the National Clean Air Coalition, the umbrella organization for most of the nation's major environmental groups.

Ayres said the compromise also would strip out provisions in the Senate clean air bill that would for the first time require automakers to reduce emissions of carbon dioxide, the main pollutant linked to global warming.

Environmentalists say strong tailpipe emission standards are critical to reducing smog in the 101 cities now violating federal health standards.

Earlier Wednesday, Mitchell said senators and administration officials meeting in private clean air negotiations were ''very close'' to an agreement on automobile emissions.

The Maine senator said the agreement was hung up on a ''technical problem '' prompting negotiators to ask the Environmental Protection Agency for additional information.

''Once we get that (information), we will reach agreement quickly'' on auto emissions, Mitchell told reporters.

Late Wednesday, a spokeswoman for Mitchell confirmed agreement had been reached and Ayres said he had learned the agreement on the tailpipe standards was ''pretty solid.''

Overall, Mitchell said he hoped to bring a comprehensive compromise on clean air legislation to the Senate floor by the end of this week or early next week. He said the revisions will reflect other compromises with the administration on toxic air emissions from factories and industrial sources of smog-related pollutants.

He said there was no consensus on acid rain provisions, but that those disagreements were between senators from different regions of the country, not between senators and the administration. Midwest and southern senators are concerned the acid rain controls will impose heavy costs on their home states.

Ayres said environmentalists would oppose the comprehensive compromise to be offered by Mitchell and would lobby vigorously for strengthening amendments.

''I think the overall product will not be an acceptable revision to the Clean Air Act,'' Ayres said. ''It will not protect the public health.''

Mitchell has maintained the compromises are essential to ensure Senate passage of clean air legislation and that they represent a major improvement over current clean air laws.

Mitchell would not divulge the details of the compromise on auto emissions saying only that it was ''a very good and strong agreement.''

However, Ayres said the agreement would tie the need for stricter controls on tailpipe emissions to the progress achieved by smoggy cities in cleaning up their air.

The tailpipe standards have been one of the most difficult problems blocking an overall clean air agreement between the administration and leaders of the Senate Environment and Public Works Committee.

The clean air legislation fashioned by the Senate committee requires a two-phase effort by automakers to reduce tailpipe emissions, with one round scheduled for the mid-1990's and the second in the year 2003.

Automakers and President Bush have strongly opposed the second round of cutbacks, contending they will impose huge costs on the nation's economy while providing only modest improvements in urban air quality.

However, key senators and environmentalists contend the second-round reductions are essential to cleaning up urban smog, especially in view of studies projecting big increases in the nation's car fleet and the average number of miles traveled by Americans motorists each year.

Ayres said that, under the compromise agreement, the second-round cutbacks would take effect nationwide only if 11 or more of the nation's seriously smoggy cities outside of California still exceeded federal health standards in the year 2000.

If less than 11 non-California cities were above the health standards, the

second-round tailpipe standards could kick in for the nation's nine smoggiest cities, which are classified as suffering ''severe'' air pollution under the Senate clean air bill.

Under the compromise, Ayres said, each of the nine ''severe'' cities would test its air quality in the year 2000. If a city's smog levels were 25 percent or more above federal health standards, automakers would have to sell cars in that city that met the second-round tailpipe emission standards.

Alternatively, Ayres said the compromise agreement gave automakers the option of meeting the second-round emission standards by selling ''alternative fuel'' automobiles that run on cleaner-burning fuels such as reformulated gasoline or grain-based ethanol.

Ayres said he did not know why negotiators settled on 11 cities as the benchmark for the second-round emission reductions, saying he believed it was an ''arbitrary'' figure reached after extensive bargaining between senators and the administration.

#90059u2572 02/28/1990 ~United Press International

HIGHLAND PARK, Mich. (MARCH 1) UPI - Chrysler Corp. said Wednesday it would extend a guaranteed rebate program through March, with minor modifications.

All of the automaker's 1990 model cars and trucks available from Chrysler-Plymouth, Dodge-Dodge Truck and Jeep (R)-Eagle dealers still will be eligible for the guaranteed rebate, with the exception of all minivan and LeBaron convertible models, Chrysler said.

The program guarantees that if the rebate on an eligible 1990 vehicle purchased or leased at retail is increased between March 1 through Sept. 30, 1990, the difference will be made up to the buyer. The guarantee is limited to cash allowances offered nationally and funded by Chrysler Corp.

Several 1989 vehicles are covered by incentives but are not covered by the guaranteed rebate.

Rebates on some models have been revised downward for March. These include a reduction from $1,000 to $750 on the 1990 Plymouth Laser, Eagle Talon and 1989 and 1990 Dodge Daytona base and ES models.

An increase of $1,500 to $2,000 was announced on 1989 dodge Dakota pickups but not on the 'S' models.

#90059u2667 02/28/1990 ~United Press International
WASHINGTON (FEB. 28) UPI - The Senate confirmed the nomination Thursday of Adm. David Jeremiah as the second person ever to serve as vice chairman of the Joint Chiefs of Staff.

He replaces Air Force Gen. Robert Herres, who was given the job when it was created by the 1986 reorganization of the Pentagon. Herres retired after Army Gen. Colin Powell was appointed as chairman of the body.

Jeremiah, in addition to serving as the second-ranking military officer in the United States, will have significant responsibility for day-to-day operations at the joint staff and will serve as the senior officer when Powell is unavailable.

He was approved on a voice vote.

Also confirmed for a Pentagon position was William Haynes II of North Carolina, to be general counsel of the Army; Stephen Conover and Douglas Brook, both of Virginia, to be assistant secretaries of the Army; and Colin McMillan of New Mexico and Enrique Mendez Jr. of Puerto Rico to be assistant secretaries of defense.

-30- 1187

#90059u2726 02/28/1990 ~United Press International
CUDAHY, WI (MARCH 1) UPI - Workers at Patrick Cudahy Inc. Wednesday voted 93-72 to approve a new four-year contract, ending a bitter dispute that began when employees went on strike against the meatpacker in January 1987.

The company now employs about 300 people, 165 of whom voted on whether to accept the contract or not. On Jan. 4, 1987, when the company employed 800 members of the United Food & Commercial Workers local went on strike over demands for numerous concessions in wages and working conditions.

The basic hourly rate of pay was $9 an hour before the strike. The new pact calls for wages averaging about $7.50.

Robert Waters, an international vice president for the UFCW, said the Cudahy contract was ''not as good as the industry standard.''

The company's 300 workers include some former union members as well as workers hired since the strike began.

Bill Held, one of the strikers now back at work, said no one really won.

''It's good to go back,'' he said. ''We have to start all over. The company got hurt, we got hurt. Now we have a chance to build it up and make it.''

Despite hiring replacements at lower wages, the company was forced to close its slaughterhouse facilities in December 1987, putting 70 percent of its people out of work. Cudahy also filed for Chapter 11 bankruptcy reorganization and came out of bankrupcty last year.

The union ended the strike last April after failing in an effort to put together an employee buyout.

#90059u2967 02/28/1990 ~United Press International

(FEB. 28) UPI - The Soviet Parliament approves land reform... Nicaragua's new leadership rejects Sandinista demands for transfer of power... President Bush hits the road. The top stories and more, from the wires of U-P-I:

The Soviet Parliament chipped away at Communism today by passing a law that gives peasants the right to set up their own farms.

The new land law gives farmers the right to leave collective farms and set up private homesteads, but it does NOT abolish the 50-thousand collective and state farms already in existence.

The charges are the latest steps in President Gorbachev's ''perestroika'' program of economic reforms... aimed at jolting Soviet agriculture into becoming more productive.

Before the 1917 Bolshevik revolution, the Soviet Union was a grain exporter. Today, it imports some 40-Million tons of grain and corn per year.

The new land law, passed by a 349-7 vote, strikes at one of the basic principles of Soviet socialism, which says all means of production such as land and capital are nationalized, or collectively owned.

Soviet agriculture was collectivized 60 years ago by dictator Josef Stalin in a drive that's believed to have killed up to 10-Million peasants.

-30- 1380

#90059u2994 02/28/1990 ~United Press International

(FEB. 28) UPI - The election is over in Nicaragua, but the transfer of power has NOT even begun.

That transfer from the Marxist-led Sandinista government to opposition leader Violeta Chamorro is to take place on April 25th. Today, the National Opposition Union rejected conditions laid down by the Sandinistas for the transition.

President Daniel Ortega wants an immediate disbanding of the Contra rebels but an opposition spokesman rejects that proposal. He says the Sandinistas can't put any conditions on the power transfer.

The opposition spokesman says his group favors demobilization of the Contras, but can't commit themselves to it because his group and the Contras are separate organizations.

A Contra leader said yesterday that the rebels will NOT disband until the transfer of power is complete.

Chamorro, who won national elections on Sunday, also wants the Contras disbanded. She says the causes of Nicaragua's civil war ''have disappeared.''

President Bush went to New York today on the first stop of a five-day trip to campaign for Republican candidates and promote his anti-drug strategy.

On Staten Island, he spoke at a fund-raiser for congressional candidate Susan Molinari. Later, he's to speak at a dinner in San Francisco on behalf of Senator Pete Wilson, a candidate for governor.

The trip also includes a stop in Los Angeles, and a weekend summit in Palm Springs, California, with Japanese Prime Minister Toshiki Kaifu .

Also today, Bush said he spoke this morning by telephone with Soviet

President Gorbachev to review developments in Nicaragua and Eastern Europe.

Bush said it was a ''very constructive conversation.'' The call comes after Bush's weekend summit with West German Chancellor Helmut Kohl on German re-unification, and after Sunday's upset election victory by Nicaragua's UNO opposition.

#90059u3069 02/28/1990 ~United Press International

(FEB. 28) UPI - NASA says the shuttle Atlantis and its crew are performing well following today's spectacular pre-dawn liftoff from Cape Canaveral.

But barring an emergency, the space agency won't be releasing any information about the mission until the spaceplane touches down.

Atlantis is flying under a Pentagon-imposed security blanket, with the goal of the trip classified top secret. But the astronauts reportedly plan to launch a 37-thousand-pound satellite tomorrow to spy on the Soviet Union.

Atlantis streaked safely into orbit early today after a down-to-the-wire countdown delayed two hours by low clouds and high winds. It was the crew's sixth attempt in a week to get the shuttle up... an effort repeatedly derailed by bad weather, crew illness and a computer glitch.

Sources say NASA plans to bring the shuttle down on Sunday at Edwards Air Force Base in California.

Secretary of State Baker brought back an old Pogo comic strip line- ''We have met the enemy and it is us''- while testifying before Congress today.

Baker says he is less concerned that a unified Germany will force U-S troops from its soil than a budget-cutting Congress will demand bringing them home.

Baker says he can guarantee that the Germans won't force out U-S troops if lawmakers can give him the same guarantee that- in his words- ''Congress won't do it.''

Speaking to a Senate budget panel, Baker says stability in Europe is reinforced by a super-power accord that limits U-S and Soviet troops.

There is concern in Moscow... as well as in Poland and other Eastern European nations hit by two world wars... that a united Germany will be a military threat.

But Baker says he believes most Europeans want a re-united Germany to stay in NATO and for U-S troops to remain on the continent.

#90059u3986 02/28/1990 ~United Press International

(FEB. 28) UPI - The first test votes on how to spend the so-called ''peace dividend'' came in the Senate today, and the Democrats won. The Senate voted 79-19 for a Democratic proposal setting priorities for whatever money is saved from reduced military spending. The resolution calls for cutting the deficit, boosting domestic programs and providing tax cuts for working Americans. The Senate then rejected a proposal by

conservatives that called for cutting the deficit, and using the rest of the money for tax cuts and credits.

The Congress Party of former Indian Prime Minister Rajiv Gandhi is on the run. Gandhi's faction was handed a stunning defeat today in state assembly balloting. The defeat comes three months after Gandhi's party lost power in nationwide elections. And the voting has NOT been peaceful. 97 people have been reported killed, and troops have been deployed.

U-S census officials predict that the 1990 national survey will cause states in the Northeast and Midwest to lose seats in Congress. 250-Million people are expected to answer the census- which has been taken every decade going back to 1790. Census officials are for the first time making an intense effort to count the homeless.

The trial of Joseph Hazelwood in Anchorage, Alaska, was adjourned today when Redoubt Volcano erupted anew. The trial is in its fifth week, and the prosecution is expected to finish presenting its case on Friday. The jury heard testimony today that other oil tankers last March narrowly missed hitting Bligh Reef- the place where Hazelwood's Exxon Valdez ran aground, causing the worst oil spill in U-S history.

#90059u4201 02/28/1990 ~United Press International

(FEB. 28) UPI - A compromise has been reached in the Senate on auto emission limits... clearing the way for congressional action on clean air legislation, possibly by week's end. A spokeswoman for Senate Democratic leader George Mitchell calls the compromise ''a very good and strong agreement.'' But environmentalists say they'll oppose the compromise. They say it greatly lessens the likelihood that effective controls on automobile tailpipe emissions will be imposed after the year 2000.

There's a possible glimmer of hope for the eight U-S hostages kidnapped in Lebanon. Moslem sources say one of the hostages might be freed sometime in March as a result of behind-the-scenes talks between U-S and Iranian officials. Another Moslem source says- quote- ''the atmosphere is ripe and positive to solve the hostages issue.'' The eight U-S captives and nine other hostages have been held in secret hideouts in Lebanon.

In Nicaragua, President Ortega today restored a recently broken, unilateral cease-fire with the Contra rebels. He says the aim is to ''facilitate the immediate demobilization and disarming'' of the Contras. Also today, President-elect Violeta Chamorro responded to Ortega's earlier statement that the Sandinistas would rule Nicaragua ''from below''... despite Chamorro's election victory Sunday. Chamorro says she alone will ''be in charge from now on.''

The Coast Guard in New York says crews are working to clean up an oil spill that forced the closing of the busy Kill Van Kull waterway. The spill occurred early this morning when up to 30-thousand gallons of heavy oil leaked from a barge at an Exxon loading dock. New York Attorney General Robert Abrams began investigations of the spill, which he says has now spread through the waterway and moved into New York's Upper Bay, almost to the Statue of Liberty. It's the second large spill involving Exxon in two months.

#90059u4225 02/28/1990 ~United Press International

(FEB. 28) UPI - Lawyers for John Poindexter are stepping up their demands for parts of Ronald Reagan's presidential diaries. They asked U-S District Judge Harold Greene in Washington to force Reagan to turn over excerpts for use in Poindexter's Iran-Contra trial, which starts Monday. Reagan has refused to turn over the diaries, claiming executive privilege. But lawyers for Poindexter, who was Reagan's national security adviser, say the diaries are even more important to their case... now that Reagan has claimed he does NOT remember key events in the scandal.

Volcanic ash is raining down on Anchorage, Alaska, after a new eruption by Redoubt Volcano. The 10-thousand-foot-high mountain 110 miles southwest of Anchorage sent ash 40-thousand feet into the air this morning in a pair of explosions. Skies were darkened over the city, and a film of ash accumulated. The mayor's office has issued a health alert for people with breathing problems.

A drug-industry research team says it's on the scent of the long-sought cure for the common cold. The team, led by a Connecticut pharmaceuticals firm, reports it has discovered a drug that prevents cold viruses from infecting human cells. The researchers hope to develop a nasal spray to keep cold viruses from invading the nose- where 45 percent of all colds are said to start.

Philadelphia's unwanted statue of actor Sylvester Stallone may soon come to a very suitable resting place- outside a hot-dog stand. A group of restaurateurs has offered the city 10-thousand dollars for the statue of Stallone in his victorious ''Rocky'' pose. The Philadelphia Art Museum had the statue removed from its grounds this week, but ''Rocky'' fans might soon find it outside the Levis Hot Dog Restaurant.

#90059u4421 02/28/1990 ~United Press International

(FEB. 28) UPI - The Senate gave the nation its first glimpse today of how lawmakers feel about using the so-called ''peace dividend,'' which is the money expected to be saved from reduced military spending.

In the first test-vote on the issue, the Senate voted 79-19 in favor of a Democratic proposal that the savings be used to cut the budget deficit, boost domestic programs and provide tax cuts for working Americans. All the Democrats and 25 Republicans voted for the resolution.

The Senate then rejected, 50-48, a conservative proposal to use part of the money to cut the deficit, and the rest for tax cuts and credits instead of for government programs.

Several senators voted for both resolutions, including Senator Phil Gramm, the sponsor of the Republican proposal.

Some senators also say they're NOT sure there will be a peace dividend.

Senators and Bush administration officials who have been negotiating about clean air legislation today reached tentative compromise on auto emission limits.

A spokeswoman for Senate Democratic leader George Mitchell confirmed that the tentative agreement was reached. Disagreement on emission limits has been a key roadblock to congressional action on clean air legislation.

Mitchell earlier today called the compromise ''a very good and strong agreement,'' but he would NOT reveal details. He has said he plans to bring a comprehensive compromise on clean air legislation to the Senate floor by the end of this week or early next week.

NOT everyone is happy with the compromise. Environmentalist say they'll oppose it because it greatly reduces the likelihood that effective limits on tailpipe emissions will be imposed after the year 2000.

Richard Ayres, chairman of the National Clean Air Coalition, says the compromise- quote- ''will NOT protect the public health.''

-30- 2020

#90059u4446 02/28/1990 ~United Press International

(FEB. 28) UPI - Nicaragua's lame-duck President Ortega has restored a cease-fire with the Contra rebels.

But he says the reason for the cease-fire is so that the Contras can be disbanded.

Ortega today urged U-S officials in Washington to cut funding for the rebels and help with their re-integration into Nicaraguan society.

The outgoing Sandinista government of Nicaragua has demanded that the

Contras be disarmed before political power is turned over to the victorious opposition and President-elect Chamorro on April 25th.

Chamorro today responded with sass to Ortega's remarks yesterday that the Sandinistas would retain a strong role in the government and- in Ortega's words- ''rule from below.''

Said Chamorro... ''Whether they have heard it or NOT, I am the one who is going to be in charge from now on.''

Chamorro said one of her first acts will be to remove Ortega's brother Humberto from his post as defense minister and create what she called ''a democratically reformist armed forces.''

European civil-defense crews hurried to repair violent storm damage before a new storm made its way to the continent.

The new storm was reported to be packing winds of up to 60 miles an hour and said to be ''as dangerous'' as the weather that has already buffeted Britain and the continent for three days.

63 deaths are blamed on the series of storms.

European crews worked to repair dikes and harbor fronts on the coast and to clear mudslides and avalanches inland in alpine areas before the new storm arrived.

Weather officials reported the highest seas in 35 years along the Dutch coast.

Dikes have burst NOT only in Denmark and Holland but in Wales, where flood waters have moved two-and-a-half miles inland.

The European Community got a quick start on recovery today by pledging two-Million dollars in emergency aid.

#90059u4469 02/28/1990 ~United Press International

(FEB. 28) UPI - The waterway to New Jersey's main port is closed as authorities try to contain a 30-thousand-gallon oil spill.

The heavy oil leaked from a barge at an Exxon dock at the New Jersey Terminal. The leak was reported to the Coast Guard about 4 o'clock this morning, but it soon spread down the Kill Van Kull waterway into New York's Upper Bay, almost to the Statue of Liberty.

The Kill Van Kull is now closed to all commercial and recreational traffic

and Coast Guard officials say it will remain closed until the spill is contained. But they have NO timetable for the cleanup.

Exxon is denying liability in the spill, and the company that owns the barge admits to being responsible. But the New York attorney general has opened civil and criminal investigations, saying... ''To disclaim liability would NOT seem to be a responsible act at this time.''

A 21-year-old Texas man faces charges of felony murder with injury to a child in today's death of a five-year-old boy who might have been given as much as 10 ounces of alcohol at a party last Friday.

Police speculate that Anthony Jimerson encouraged the boy to drink so that he could be alone with the boy's mother.

Five-year-old Raymond Griffin was taken off life-support systems at a Fort Worth hospital last night and died this morning. He had suffered irreversible brain damage and went into a coma after ingesting beer, a mixture of brandy and bourbon and then straight bourbon last Friday.

Police report that Jimerson had let the boy sip from his beer early in the evening, then- while the boy's mother was out getting ice- coaxed him to have some of his mixed drink and finally gave the boy a bottle of bourbon, telling him to ''drink like a man.''

The boy began suffering brain seizures early Saturday morning, but the mother mistook them for flu symptoms and did NOT phone an ambulance until Saturday afternoon.

#90059u4548 02/28/1990 ~United Press International

(FEB. 28) UPI - C O R R E C T I O N:

In the introduction please read it xxx in March... another New York waterway oil spill involving Exxon... details of etc.

A strong earthquake hits Southern California... Moslem sources talk of a hostage release in March... another New York waterway oil spill involving Exxon... details of those stories and other top news next, from U-P-I.

A strong earthquake shook a wide area of Southern California for about 15 seconds today. There werr NO immediate reports of injuries.

The Caltech Seismology Laboratory in Pasadena says the quake measured five-point-five on the Richter scale, and was centered about 35 miles east of downtown Los Angeles. It was felt as far north as Santa Barbara, as far south as San Diego and as far east as Fort Irwin near the Nevada state line.

Highrise buildings swayed in downtown Los Angeles, and car alarms were set off. Most witnesses said it felt like a soft, rolling motion.

There was some damage reported in Claremont, about 30 miles east of L-A, and there was damage to homes in the San Gabriel Valley. A house fire in Upland may have been related to the quake.

Authorities say a smaller quake measuring three-point-three shook the same area earlier today, but caused NO damage or injuries.

In San Diego, a group of 40 regional Pacific Bell managers were participating in an earthquake simulation drill at company headquarters when the actual quake sent a ripple through the building.

Rumblings in Lebanon and elsewhere indicate at least one of the U-S hostages in Lebanon might be released soon.

A Moslem militia source told United Press International- quote ''It is quite possible that one of the American hostages would be set free in March.''

He says the release, if it happens, would be the result of secret talks between U-S and Iranian officials. He says two rounds of talks took place in December and January, in Geneva and New York, involving a State Department official and the brother of Iran's president.

Another Moslem source said- quote- ''the atmosphere is ripe and positive to solve the hostages issue.''

The sister of American hostage Terry Anderson visited Damascus last week, and Syrian officials reportedly told her they ''have greater hopes'' of gaining the release of the hostages.

Peggy Say said in London today that she thinks ''this is the beginning of the end.''

-30- 2594

#90059u4620 02/28/1990 ~United Press International

(FEB. 28) UPI - Tall buildings swayed in downtown Los Angeles and minor damage was reported elsewhere in a strong earthquake that rolled through southern California late this afternoon. The quake measured five-point-five on the Richter scale and was centered 35 miles northeast of downtown L-A, near the town of Upland.

The tremor was felt over a 13-thousand-square-mile area... a region larger than the state of Vermont. Dozens of aftershocks hit immediately after the

quake, and seismologists say more are expected.

President Bush arrived in San Francisco tonight for a one-thousand-dollar-a-plate fundraising dinner for California Republican gubernatorial candidate Pete Wilson. Bush earlier attended a fundraiser in New York City for G-O-P congressional candidate Susan Molinari.

Before he left the White House this morning, Bush telephoned Soviet President Gorbachev to review developments in Nicaragua and Eastern Europe.

An aide to Senate Democratic leader George Mitchell says a compromise has been reached on auto emission limits. The agreement between lawmakers and Bush administration officials clears the way for congressional action on clean air legislation.

A Senate panel approved and sent to the full Senate today legislation that would raise the Environmental Protection Agency to a Cabinet-level department. The bill would make the E-P-A the nation's 14th Cabinet-level department.

Nicaraguan President Ortega has declared a ''unilateral ceasefire'' with the U-S-backed Contra rebels. He also urged Washington to cut funding to the rebels and to help with their re-integration into Nicaraguan society.

-30- 1806

#90059u4635 02/28/1990 ~United Press International

(FEB. 28) UPI - Washington Mayor Marion Barry pleaded innocent today in a federal court to all eight perjury and cocaine charges against him. A June 4th trial date was set. Barry's lawyer says there'll be NO plea bargain and Barry will NOT resign because- quote- ''there is NO reason for him to resign.''

The Food and Drug Administration has issued a safety alert about the limitations of monitors used to prevent crib deaths. The F-D-A says it's worried parents may NOT always know how to properly use and care for the devices, which are designed to sound an alarm when a baby stops breathing.

A plan to prohibit abortions for ''birth control reasons'' was defeated on a tie vote tonight in a Minnesota Senate committee. Earlier, a pro-choice panel member was assigned a bodyguard after receiving a telephoned threat. Her vote was seen as a tying one.

Authorities in Michigan say 10 people were killed early today in three separate pre-dawn house fires. The deadliest blaze... in the Lansing suburb of Delta Township... killed four children and three adults.

New York police are searching for a teacher who allegedly assaulted three

12-year-old boys with a nail-studded stick at a Brooklyn grade school after he was told he would be fired. NONE of the boys was badly hurt.

Massachusetts Governor Dukakis is sporting a cast on his left hand... the result of falling and breaking two fingers while shoveling snow last weekend. He says the injury will require minor surgery later this week.

Louisiana Governor Buddy Roemer broke his right collarbone today when he reached for a shot during a tennis match. The injury forced Roemer to cancel his schedule through tomorrow. A spokesman says Roemer is ''in a lot of pain'' but probably won't require surgery.

-30- 1947

#90059u4789 02/28/1990 ~United Press International

(FEB. 28) UPI - A strong earthquake centered about 35 miles northeast of Los Angeles shook Southern California for about 15 seconds today. Authorities report at least three people injured. Some damage was reported in Claremont, about 30 miles east of L-A, and there was damage to homes in the San Gabriel Valley. Some roads were closed because of rockslides. The Caltech Seismology Lab in Pasadena says the quake measured five-point-five on the Richter scale and was felt within a radius of at least 135 miles.

Moslem sources say behind-the-scenes talks between U-S and Iranian officials might lead to the release of at least one U-S hostage in Lebanon soon. A Moslem militia source told U-P-I it's ''quite possible'' one of the American hostages will be set free in March. Another Moslem source said ''the atmosphere is ripe'' for resolution of the hostage situation. But a senior State Department official is denying any high-level contacts between U-S and Iranian officials.

More fighting today in Christian East Beirut. Forces loyal to Christian General Aoun bombarded a residential area held by Samir Geagea's rival Lebanese Forces militia, and the two sides fought along new demarcation lines in East Beirut. Also today, Lebanon's President Hrawi accused France and the Vatican of backing Aoun, and he blamed them for the current bloodshed in East Beirut. At least 710 people have died in nearly a month of fighting for control of the Christian enclave.

The Supreme Court today gave law enforcement officials wide authority to ignore constitutional guarantees when operating outside the United States. The court ruled that the Fourth Amendment protection against unreasonable search and seizure does NOT apply to property owned by aliens in a foreign country. The decision could affect the Miami trial of Panama's General Noriega. During the invasion of Panama in December, U-S forces seized documents and other evidence for use against him.

#90060b0003 03/01/1990 ~Business Wire

DENVER (MARCH 1) BUSINESS WIRE - CoCa Mines Inc. reported 1989 net income of $1.9 million, or 17 cents a share, on revenues of $28.3 million.

In 1988 earnings totalled $.2 million, or 2 cents a share, on revenues of $13.6 million. The $1.7 million increase over 1988 was the result of record gold production at the company's California mines.

The company's 1989 gold production totalled 59,400, up 150 percent from 23,700 ounces in 1988. The increase reflects a full years' production from the Shumake gold mine which commenced operations in the fourth quarter of 1988.

The company's marketing programs resulted in an average realized gold price of $404 per ounce in 1989 compared with the 1989 COMEX price of $382. In 1988 the average realized price was $448 per ounce.

Direct production costs fell to $255 per ounce from $326 in 1988. The decrease in unit costs was due to operation of the lower cost Shumake Mine.

CoCa Mines is a North American gold producer. Its shares are listed on NASDAQ (COCA) and trade on the Toronto Stock Exchange (CMI).

MONROE, LA (MARCH 1) BUSINESS WIRE - Clarke M. Williams Jr., president and chief executive officer of Century Telephone Enterprises Inc. (NYSE:CTL), Thursday announced that the board of directors has voted to increase the leveraging of the company's Employee Stock Ownership Plan (ESOP) and to amend the company's Shareholder Rights Plan.

The board approved additional leveraging of the company's ESOP, with intent to purchase shares of Century common stock, up to an aggregate market price of $5 million from time to time in the open market or in privately negotiated transactions.

The board also decided to lower the threshold at which Century's Shareholder Rights Plan is activated. Previously, rights issued under the plan would have become exercisable whenever an individual or group acquired 20 percent or more of the company's common stock.

Following the board's action, the rights will become exercisable when an individual or group acquires 15 percent or more the company's common stock. At that point, unless the rights are redeemed pursuant to the plan each right can be exercised to purchase one-one hundredth of a share of the company's Series AA Junior Participating Preferred Stock for $85.

Williams stated that the amendment was not adopted in response to any specific takeover threat but was designed to conform with recent trends in shareholder protection plans and to provide shareholders the opportunity to realize the long-term value of their investment in Century, given recent volatility in the company's stock price and accumulation of the company's stock.

Williams said: ''Our board of directors has reiterated its position that Century Telephone has a bright future and that it is in the best long-term interest of the company and its shareholders that there be additional

protection against abusive and coercive takeover tactics.''

Century Telephone Enterprises Inc., headquartered in Monroe, is a diversified telecommunications company with operations in 16 states.

#90060b0031 03/01/1990 ~Business Wire

GREELEY, CO (MARCH 1) BUSINESS WIRE - An arbitrator has ruled that Monfort Inc. did not violate a labor agreement with the United Food and Commercial Workers Union (UFCW) when the company leased a new addition to its Marshalltown, Iowa pork plant to an operating company.

In a decision handed down Feb. 27, Arbitrator Llewellyn E. Slade of Des Moines, Iowa, concluded: ''There was not a transfer of work away from the workers represented by the Union, and, there has not been any subcontracting of work by the company, as claimed by the Union, in violation of the expressed sections of the contract or of the implied good faith and fair dealing. The grievance is denied.''

The award concluded a five-day proceeding held in November 1989 in Des Moines before the arbitrator, selected from a panel supplied by the Federal Mediation and Conciliation Service. The hearing produced thousands of pages of transcript of testimony and exhibits.

Llewellyn, a native of Iowa, is former executive vice president and director of the Iowa Power and Light Co., and is a member of the local and national bar associations and the National Society of Professional Engineers.

The arbitration was conducted following grievances filed by the Union, alleging the company violated the labor agreement when it leased new operations within the Marshalltown plant to a third party, MSP Resources.

In addition, the Union had filed an unfair labor practice charge against Monfort and MSP over the matter. The regional director of the National Labor Relations Board dismissed the charge and deferred the question to arbitration.

A multi-million dollar expansion at the Marshalltown plant was concluded early in 1989, at which time Monfort began to increase its slaughter and fabrication production work force from 428 employees to the current 949.

At the same time, it leased the new ham and loin boning operations to MSP, which currently employs 240 production workers. Monfort production and

maintenance employees are covered under a labor agreement recently negotiated between the company and the UFCW. The Teamsters Union represents production and maintenance employees of the contracting company MSP.

MENLO PARK, CA (MARCH 1) BUSINESS WIRE - FAFCO Inc., the nation's oldest and largest manufacturer of solar heating systems, announced that it has agreed in principle to market its IceStor off-peak air conditioning equipment exclusively through the Snyder General Corp. in the United States and Canada under the McQuay brand name.

Snyder General Corp. is a leading manufacturer of air conditioning equipment with well-established manufacturing and distribution facilities throughout the United States and Canada.

Freeman Ford, FAFCO's president, commented that, ''combining FAFCO's off-peak air conditioning equipment expertise with Snyder General Corporation's established distribution and application engineering experience is expected to have a positive effect on sales of FAFCO's IceStor products.''

Thermal energy storage products offer a partial solution to the electric utility industry's summer peaking problem. By storing inexpensive off-peak energy at night in the form of ice, the utility can use the cold energy from the ice for air conditioning the following day. The ''peak shaving'' avoids the necessity for the utility company to build generation capacity to meet peak air conditioning demands.

#90060b0063 03/01/1990 ~Business Wire

PHOENIX (MARCH 1) BUSINESS WIRE - The Movie Superstore, Phoenix-based chain of five Valley video rental stores and one additional store under construction, has closed the initial public offering of its stock with the sale of 1.5 million units at $2 per unit.

The managing underwriter was Biltmore Equities and Securities Ltd. of Scottsdale.

The proceeds of the sale will be directed toward expansion of the two-year-old firm that was founded by Patrick Clifton, the company's chief executive officer, and his brother Michael Clifton, who is the chief financial officer. Proceeds will also be used for the purchase of inventory of video cassettes for future locations, to create working capital, and to retire certain debt of the company.

Each unit consists of one share of common stock and a common stock purchase warrant to purchase one additional share for $2.50. The common stock purchase warrants expire in nine months on Aug. 29, 1990, which date may be extended for an additional 12 months.

The National Association of Securities Dealers Automated Quotations (NASDAQ) symbol is TMSIU for the units. The common stock outstanding before the offering and a stock split approved July 31 was 2.2 million shares. The common stock outstanding after the offering is approximately 3.7 million shares since the maximum number of units were sold.

The Clifton brothers, along with Peter G. Kanton, the company's chief operating officer, have diverse business backgrounds that form the management and operational structure of the firm.

Kanton, who has had 20 years of grocery retailing experience including employment with A.J. Bayless Markets Inc. in Phoenix, introduced the sale of specialty items in the stores and a variety of promotions including contests for amateur video makers. He also oversees employee management.

The trio envisions growth for the company based on the concept that there is room in a $10 billion annual industry that has been dominated by approximately 30,000 ''mom and pop'' stores and one national chain retailer with about 1,050 stores.

In addition, growth projections were made on the expectation that by 1995 video cassette recorders will be in 90 percent of the nation's households.

SARASOTA, FL (MARCH 1) BUSINESS WIRE - OMNI Films International Inc. (NASDAQ:OFII) announced Thursday that it has entered into an agreement with a science museum in Katsushika, Japan, for installation of an OMNIVISION-870 projection system.

Under the terms of the agreement, OMNI will supply an OMNIVISION-870 projection system including a 12-kilowatt lamphouse and film transport. The system is scheduled to be shipped in May 1990.

Total contract sales announced have reached a record $5.7 million for the current fiscal year which began Oct. 1, 1989. This represents an increase of 219 percent in five months, over contract revenues earned in all of fiscal 1989.

Fred Hollingsworth III, president, stated, ''Both our OMNIVISION-870 and MOTION MASTER systems are making substantial sales gains in 1990. Our continued sales success puts us in a very strong position to achieve record revenues and earnings for the balance of the 1990 fiscal year. ''

The OMNIVISION-870 system is a technologically advanced product which projects a 160 degree by 120 degree spherical image onto a hemispherically shaped screen completely surrounding the viewer. The OMNIVISION-870 system requires the use of only a single camera and single projector.

OMNI Films International specializes in the design, sale and installation of five separate and distinct 70mm wide screen cinema systems, and produces, distributes, and licenses 70mm films for these systems. Since inception, OMNI has delivered approximately 200 of its cinema systems to locations in 53 countries, including every continent except Antarctica.

OMNI is traded on the NASDAQ system under the symbol OFII.

DEARBORN, MI (MARCH 1) BUSINESS WIRE - Ford Motor Co. confirmed Thursday that Ford of Mexico has reached a new labor agreement with the union representing its employees at the Hermosillo Stamping and Assembly Plant in Hermosillo, Sonora, Mexico.

''We are pleased that this settlement was reached without any labor disruption,'' said William E. Scollard, vice president, manufacturing operations, Ford Motor Co., North American Automotive Operations.

''We congratulate all those that were involved in this successful negotiation. We look forward to continuing the excellent working relationships at Hermosillo Stamping and Assembly Plant as the facility begins production of the 1991 Mercury Tracer and Ford Escort.''

Scollard said the settlement is consistent with the Mexican government's economic pricing and income stabilization program designed to reduce inflation. It is also in line with the labor agreement reached earlier at the Ford of Mexico Chihuahua Engine plant, he added.

The Hermosillo Stamping and Assembly Plant was opened in 1986. The plant, which employs more than 2,100 people is in the final stages of a retooling and retraining program leading to the launch of all the new 1991

subcompact products. Ford invested $300 million in the recent expansion of the plant.

SEATTLE (MARCH 1) BUSINESS WIRE - Alaska Airlines announced Thursday that it will distribute $10.8 million to the carrier's eligible employees through its 1989 profit sharing plan.

Some 4,697 of the airline's 5,717 employees will receive individual awards averaging nearly 9 percent of their annual salaries. That equates to about four weeks pay per person and represents the highest percentage profit-sharing distribution in the airline industry for 1989.

''Despite high fuel prices and other factors that cut into fourth quarter eanings, 1989 was a record year for us,'' said Chairman and Chief Executive Officer Bruce R. Kennedy. ''Our employees worked hard to reduce costs, increase revenues and enhance our top-notch service. Now they can share in the earnings they helped produce.''

Alaska'a board of directors first approved a profit-sharing plan in late 1985 and implemented it for the first time in 1986. Since then, $29.5 million has been awarded to participating employees. Nearly $24 million of the total has come in the last two years.

Alaska serves 36 cities in Alaska, Mexico and five western states.

SCOTTSDALE, AZ (MARCH 1) BUSINESS WIRE - Famous Restaurants Inc. (NASDAQ:FAMS), operator of full-service Mexican and seafood restaurants, Thursday reported net income of $941,000 for the year ended Dec. 31, 1989, compared to an operating loss of $273,000 for the 1988 fiscal year.

The 1988 results are prior to a charge of $711,000 for the establishment of a reserve for underperforming seafood restaurants. The income per share for 1989 was 15 cents compared to a per share loss of 17 cents for 1988.

Revenues for 1989 were $92,938,000 compared to $68,542,000 in 1988.

For the fourth quarter of 1989 the company reported an operating income of $8,000 compared to an operating loss of $856,000, before the charge, and a net loss of $1,567,000, after consideration of the charge, in 1988. The per share income for the fourth quarter of 1989 was 0 cents compared to a loss of 26 cents in the fourth quarter of 1988. Revenues for the 1989 fourth quarter were $21,951,000 compared to $15,657,000 in 1988.

During 1989 two new Garcia's Mexican Restaurants were opened, one in Las Vegas and one in Phoenix, and one Famous Fish Co. was opened in Las Vegas, along with the acquisition of the 11 Casa Lupita Mexican Restaurants, two of which were subsequently converted to the Garcia's format.

Thus, the company currently operates 44 Garcia's Mexican Restaurants, nine Casa Lupita Mexican Restaurants, and two Famous Fish Co. Restaurants. There are also four franchised Garcia's Mexican Restaurants open and one under construction in New Jersey.

On Feb. 5, 1990, the company, through its board of directors, announced that Dennis B. Mullen, its chairman, president and chief executive officer was considering the feasibility of the possible acquisition of Famous by a new company in which Mullen and other members of senior management would be substantial shareholders.

It was indicated that if a purchase offer was made it was expected to be at $2.50 a share or an aggregate cash value of approximately $17.5 million. On Feb. 2, 1990, the closing market price for Famous stock was $1.50.

The announcement stated that the possible acquisition of Famous by Mullen's company would be subject to that company's obtaining financing and to various other matters. The Famous board of directors emphasized that no specific acquisition offer has been made by Mullen and that no decision has been made by the board whether it would accept or recommend any offer of any nature for the purchase of the company.

An offer, if made, would be presented to both the board and shareholders of Famous. The board announced that the company does not anticipate issuing further information or releases until a definitive offer is received.

BELLEVUE, WA (MARCH 1) BUSINESS WIRE - Daniel J. Evans, former governor and United States senator, Thursday was elected to the board of directors of Puget Sound Power & Light Co.

Evans, 64, is president of his own consulting firm and commentator for KIRO-TV, both in Seattle. He also is a board member of Washington Mutual Savings Bank and McCaw Cellular Communications. In civic activities, he is a a member of a number of non-profit boards locally and nationally, and currently serves as chairman of the National Academy of Sciences Commission on Policy Options for Global Warming.

''We are very pleased to have Dan Evans as a member of our board,'' said Chairman John W. Ellis in making the announcement. ''He brings a breadth of background and experience in national and regional energy policy, as well as his environmental and educational credentials.''

An engineer by education and profession, Evans served as governor of Washington state, 1965-1977; president of The Evergreen State College, 1977-1983; and United States senator, 1983-1989. While at Evergreen, he chaired the Pacific Northwest Electric Power and Conservation Planning Council through its first two years of existance, 1981-1983.

Evans will serve on the board until the company's annual meeting, scheduled for May 8 in Bellevue, at which time he will be a candidate for election by the shareholders to a full three-year term.

LAS VEGAS (MARCH 1) BUSINESS WIRE - On Thursday, the Riviera Hotel & Casino opened the world's largest casino and continued its metamorphosis to ''The Star of Las Vegas.''

The 125,000-square-foot facility houses more than 1,600 slot and video poker machines, as well as 90 table games, including blackjack, dice, roulette big six, pai gow, poker and baccarat.

The expansion added more than 70,000 square feet to the existing casino, extending the front of the resort almost all the way from its original 1955 location to the sidewalk of the famous Las Vegas Strip.

''The expansion and renovation have been planned for the maximum benefit of our guests,'' said hotel president Mark Sterbens. ''We want our customers to remember the Riviera as the entertainment and fun center of Las Vegas.''

Maroon walls, specially-milled ''Riviera'' carpeting, marble flooring, brass columns and a touch of pink neon adorn the interior of the casino.

''Customers enter through the 325-foot-long airdoors, which are designed for easy access for foot traffic off the Strip,'' said Dov Odents, executive vice president in charge of construction, planning and development.

Located in the new casino will be a second keno parlor with 85 seats, an elegant baccarat pit, two slot redemption booths, a new showroom box office and a 200-seat lounge where the best lounge acts can be seen.

The casino expansion is the second-phase of a three-phase $200 million expansion program.

Construction will begin this summer on a 50-story tower, the tallest building in Nevada. It will bring the total number of guest rooms at the Riviera to almost 4,000. It is scheduled for completion in mid-1992.

Opening in April will be a 250-seat race and sports book, the Mardi Gras Food Court -- an array of nine fast-food eateries, open 24-hours a day -- and a spacious second level to the casino, highlighted by three new restaurants, a second swimming pool and Jacuzzi and a garden area.

SUNNYVALE, CA (MARCH 1) BUSINESS WIRE - ILC Technology Inc. of Sunnyvale,

announced Thursday the signing of an agreement with Opto-Sensors Inc. of Torrance, Calif., for the sale to Opto-Sensors of substantially all of the assets of ILC's UDT Components Group and UDT Opto-Hybrids Group and of Akra-Tool Inc.

Akra-Tool makes tooling for transfer and injection-molded opto-electronic parts. Opto-Sensors manufactures custom photo-diodes and optical subassemblies. The company previously announced in September and December of 1989 and in January 1990, its plans to restructure the company which included the divestiture of its UDT division.

The sale contemplated by the agreement with Opto-Sensors does not include the sale of ILC's UDT Instruments Group which is being negotiated with other interested parties. The UDT Instruments Group designs and manufactures photometry, radiometry fiber optic test, and position sensing instruments.

The purchase price is approximately $6.5 million, subject to a final determination by the parties based on confirmation and agreement of financial data. Completion of the sale is subject to numerous customary conditions, including the securing by OSI of financing commitments for consummation of the purchase. The parties anticipate that the closing of the transaction will occur on or before March 30.

The common stock of ILC is publicly traded and the prices for the stock are quoted in the National Association of Securities Dealers Automated Quotation System.

NEW YORK (MARCH 1) BUSINESS WIRE - The Mazda MX-5 Miata sports car has added the American Marketing Association's prestigious ''Edison Best New Product Award'' to the growing list of honors and accolades that it has received since its introduction last summer.

The award was presented March 1, at a ceremony during the AMA's annual new products conference.

Rod Bymaster, product manager/sports and sporty cars for Mazda Motor of America Inc., said: ''This award backs up our belief that the marketplace was ready for a car like the Miata -- a true sports car that brings the joy and freedom of open-air driving back to a large part of the buying public. Mazda has demonstrated with this car that it can, and will continue to, look for needs in the market and fill them with the right products.''

The Miata was one of 11 products introduced during the past year which were chosen by the AMA as best representing ''lasting value, marketplace success and societal impact'' as well as marketing and technological innovation. Among the other products receiving recognition were the NeXT computer, Sony Discman portable CD player and the Acuvue disposable contact lens.

Since its introduction, the Miata has been named: AUTOMOBILE magazine's ''Automobile of the Year''; one of ROAD & TRACK magazine's ''World's Best Cars''; one of CAR AND DRIVER magazine's ''10 Best Cars of the Year''; and TIME magazine's ''Best of the Decade - Design.''

Most recently, one of the television commercials created for the Miata, ''Takes You Back/Country,'' won first place in the automotive category of the MOBIUS Broadcasting Awards at the U.S. Industrial Film and Video Festival in Chicago.

HACHIOJI, Japan (MARCH 1) BUSINESS WIRE - Applied Materials Inc. has announced the opening of its newest facility in Japan, a service center in Hachioji to serve the growing number of customers with wafer fabrication facilities in western Tokyo.

Tetsuo Iwasaki, president of Applied Materials Japan, said the continued growth of Japanese semiconductor manufacturers and the need for rapid response to customers makes the new office a logical move for Applied Materials Japan.

''Our regional offices provide rapid service very close to our customers with a complete line of spare parts in stock and an AMJ field engineer who works closely with customers to develop processes that meet their needs.''

The west Tokyo facility is AMJ's 11th regional sales and service office. Applied Materials opened four service centers last year in Japan. In addition, the company has a manufacturing and technology center in Narita, Chiba Prefecture. Applied Materials' total workforce in Japan is 560 employees.

This brings the company's total worldwide sales and service presence to 36 offices in 11 countries. Company sales in 1989 were more than $501

million, with Japan contributing 40 percent of the company's revenue.

Business in the remainder of the Asia/Pacific region, comprised of Korea, Taiwan and the People's Republic of China, amounted to 10 percent of company sales in 1989.

Applied Materials, based in Santa Clara, Calif., is the leading independent supplier of wafer fabrication systems to the worldwide semiconductor industry.

It is a global growth company with market leadership in chemical vapor deposition, dry plasma etching and silicon deposition, and is rapidly increasing market share in ion implantation, its fourth product technology.

FLAT ROCK, MI (MARCH 1) BUSINESS WIRE - Mazda Motor Manufacturing (USA) Corp. (MMUC) announced appointment of Osamu Nobuto to chairman, Masahiro Uchida, president and creation of two new executive offices at its vehicle manufacturing plant here.

The appointments are effective immediately.

Osamu Nobuto, president of MMUC since its establishment in 1985, and a senior managing director of Mazda Motor Corp. (MC), its parent company, has been appointed chairman of MMUC. He will be stationed at MC headquarters in Japan.

Masahiro Uchida, formerly executive vice president of MMUC, has been promoted to president. As president, Uchida, will be responsible for all production operations, personnel, purchasing and corporate planning functions of the company.

Mamoru Takebayashi, formerly general manager of Mazda's Hofu, Japan manufacturing plant, becomes executive vice president, operations, reporting to Uchida. He continues to be a director of Mazda Motor Corp. Takebayashi's responsibilities include manufacturing, operations planning and purchasing.

Ray Hedding, general manager, manufacturing, Toshihide Saeki, vice president, operations planning, and Mutsumi Fujiwara, vice president, purchasing, will report to Takebayashi.

Henry Schultz, who had been assistant to the executive vice president, has been promoted to general manager, human resources, in a move that re-established this office. His appointment fulfills a pledge made by MMUC last fall to appoint qualified Americans to top-level positions. He will report directly to Uchida.

Hiroshi Hosaka, formerly an assistant general manager in MC's office of overseas affiliates, has been appointed general manager, corporate planning, covering finance, general affairs, public relations and information systems. He replaces Kazuo Sonoguchi who is moving to a senior executive position at Mazda Motor of America, in Irvine, Calif., Mazda's sales and marketing arm in the United States.

Tom DeFrain, who was responsible for the company's stamping operation, becomes manager, employee relations. He will report to Schultz.

LOS ANGELES (MARCH 1) BUSINESS WIRE - Bima Entertainment and Telstar Satellite Corporation of America (dba Satellite Corporation of America) (SCA) Thursday announced the signing of an agreement which will provide for Bima's acquisition of SCA.

On Feb. 27 the bankruptcy court authorized the submission of Bima's acquisition of all assets and stock of TSCA for approval by TSCA's bondholders, stockholders and creditors.

Bima Entertainment currently is engaged in film product development for theatrical, television and video cassette distribution worldwide.

The addition of SCA's pay-per-view business broadens Bima's distribution pipeline to include satellite distribution to home dish (DBS), MDS and cable system customers, and marks the company's entry into development and distribution of live special event pay-per-view programming.

With more than 25 film, television and video projects currently under development, Bima Entertainment lists among its recently completed film productions ''Death Before Dishonor,'' starring Fred Dryer (NBC's ''Hunter'' series), which grossed approximately $24 million domestically and abroad; ''Slipstream,'' a soon-to-be-released futuristic thriller featuring among its cast Mark Hamill (''Star Wars'' trilogy); F. Murray Abraham (''Amadeus'') and Ben Kingsley (''Ghandi'').

Bima Chairman William E. Braunstein has long been involved in the development, acquisition, financing and production of feature film and television properties. Prior to forming Bima, Braunstein provided business management for major entertainment personalities and production companies including Don Rickles, Zsa Zsa Gabor, B.J. Campbell, David Lansberg, LDL Productions and Braun Productions.

Veteran entertainment executive Richard Tienken will be joining Bima's advisory board following an eight-year association with Eddie Murphy during which time he represented Murphy in all negotiations with Paramount Pictures, NBC and CBS Records and co-produced four blockbuster films including ''Beverly Hills Cop,'' ''The Golden Child,'' ''Beverly Hills Cop 2'' and ''Eddie Murphy Raw.''

The agreement between the two companies provides for the exchange of corporate stock, the conversion of SCA revenue bonds to Bima common stock and the issuance of Bima common stock warrants. Upon conversion of the bonds and exercise of all outstanding warrants, Bima will have obtained approximately $4 million in additional working capital and valuable assets to expand further into the entertainment business.

REDMOND, WA. (MARCH 1) BUSINESS WIRE - Interpoint Corp. (NASDAQ:INTP) Thursday announced that J.T. Montgomery has become senior vice president and general manager of the Custom Hybrid Group.

Montgomery, formerly senior vice president operations at Interpoint, will have worldwide manufacturing, engineering and sales responsibility for Interpoint's custom hybrid business. Representing about half of

Interpoints' revenues, custom hybrids are micro-miniaturized electronic circuits built according to stringent quality standards to precise customer specifications.

Interpoint President Peter van Oppen said: ''We are absolutely delighted to be able to put half our business, our future and more than 300 of our people in J.T.'s capable hands.''

Montgomery, holds a Bachelors Degree in Electrical Engineering from Arizona State University and was an honors graduate in the Charter Class (1985) of the University of Washington Executive MBA program. He has more than 20 years of engineering and manufacturing experience including 14 years at Boeing and seven years at Advanced Technology Laboratories, where he was vice president operations.

Founded in 1969, Interpoint designs, manufactures and markets a broad range of proprietary power converters and custom hybrid microcircuits for aerospace and industrial applications with headquarters in Redmond. Production facilities are located in Redmond and in Kaohsiung, Taiwan. Sales offices are located in Minneapolis, Long Island, N.Y., and London.

#90060b0165 03/01/1990 ~Business Wire

PALMDALE, CA (MARCH 1) BUSINESS WIRE - The X-31, a new experimental aircraft built to demonstrate techniques and equipment to make next-generation fighters more agile, rolled out from Rockwell International's aircraft assembly complex in Palmdale Thursday.

The new ''X-plane'' will begin flight testing soon, with initial flights originating from the Palmdale Airport.

Officials from U.S. and West German government and industry were on hand at Palmdale Thursday for the roll-out ceremony.

The aircraft is one of two demonstrators being built by Rockwell International's North American Aircraft and its West German industrial partner on the X-31 Enhanced Fighter Maneuverability program, Messerschmitt-Bolkow-Blohm (MBB) of Munich, West Germany.

Funding for the program comes from defense agencies in both the United States and the Federal Republic of Germany.

Donald R. Beall, Rockwell chairman and chief executive officer, said the

X-31 cooperative partnership demonstrates ''the future course of most projects of significance in aerospace.'' The Rockwell chairman also stressed that ''as we proceed into the future, radical changes will be required to improve the procurement process in the face of reduced international tensions and constrained budgets.

Sam F. Iacobellis, Rockwell executive vice president and chief operating officer, called the X-31 program a ''trailblazer'' and said the aircraft was the ''first major product of an initiative by the U.S. to encourage joint development programs with other NATO countries.''

Iacobellis noted ''the sponsors of that initiative were U.S. Sen. Sam Nunn and former senator, and now vice president, Dan Quayle.''

U.S. funding for the program is approximately $135 million.

The X-31 will use specifically designed flight controls, thrust vector controls and other techniques to enable its pilot to turn tighter and point at targets more quickly than today's conventional fighters.

The new single-seat experimental aircraft is 43 feet long, with a wing span of 24 feet and a maximum takeoff weight of just over 15,000 pounds. At an altitude of 30,000 feet, its jet engine can push it to a speed of Mach 1.3 -- nearly 900 m.p.h.

     #90060b0166 03/01/1990 ~Business Wire

SAN FRANCISCO (MARCH 1) BUSINESS WIRE - In the 1990s, any company that ''fails to recruit, retain, retrain, and promote qualified people of any race or gender will be engaging in self-destruction,'' the board chairman of Pacific Gas and Electric Co. said Thursday.

Richard A. Clarke, who is also chief executive officer of PG&E, was the keynote luncheon speaker as the American Association of Blacks in Energy began its 13th annual convention in Oakland.

Clarke forecast that enlightened self-interest by America's employers will become the effective spur for equal opportunity in the 1990s.

Realizing the ''full potential of our human resources,'' together with increasing competitiveness and improving the environment, is the enormous collective challenge facing those in energy in the coming decade, Clarke said.

Tracing the history of equal opportunity, Clarke noted it was first propelled by good intentions and later by legal mandates.

''But today and more so tomorrow, the engine of equal opportunity will be powered by the greatest fuel of all: enlightened self-interest,'' he said.

Equal opportunity programs are not only the right thing to do, Clarke emphasized, they are also in the best interest of business because of the changing nature of the American work force.

''In the future, the vast majority of the American work force will be women or minorities,'' he said.

The Pacific Gas and Electric chairman also pointed out that American workers are shouldering more responsibility than ever before. Computer literacy is in demand at every level and other new and advanced skills will be required for virtually every job.

''There'll be no sanctuary for the uneducated, even in entry-level jobs,'' Clarke said.

Discussing PG&E's programs, Clarke said he took great pride in the Department of Labor ''Opportunity 2000'' award won last year by PG&E for its national leadership in affirmative action and equal opportunity programs.

PG&E was honored for some 50 major outreach, educational and employee empowerment programs.

The American Association of Blacks in Energy, headquartered in Washington, has 16 chapters and more than 500 members who are professionals in oil, gas and utility companies; education; state and federal regulatory agencies; and small businesses.

#90060b0192 03/01/1990 ~Business Wire
LOS ANGELES (MARCH 1) BUSINESS WIRE - Mercury General Corp., a major California automobile insurer, reported Thursday that income for the year was $33.9 million, or $2.51 per share, a 14 percent increase over net earnings of $2.21 per share, reported in 1988.

Per share results in both years are based on 13,505,000 average shares outstanding.

Nineteen eighty-nine results reflect a provision of $15 million representing management's estimate of the maximum potential impact of refund liability under the rate rollback mandated by Proposition 103, a statewide initiative passed by Californiqa voters in November 1988 and sustained in part by the California Supreme Court on May 4, 1989. The after-tax impact of the refund provision was $10 million, or 74 cents per share.

The estimated provision of $15 million for potential worst case refund liabiltiy is for the period from Nov. 8, 1988 through Dec. 31, 1989 and is substantially less than the provision of $29 million recorded at Sept. 30, 1989. The year-end estimate is based on a proposed methodology for dealing with the mandated rate refunds which was advocated by the California Department of Insurance on Jan. 22, in the so-called ''generic'' hearings being conducted on the numerous issues raised by the California Supreme Court's ruling that no rate refund could be required if it produced less than the constitutional standard of a ''fair rate of return.''

Fourth quarter net income of $22.3 million was significantly distorted by the reduction in the estimate of potential refund liability and comparisons with prior periods are not meaningful. Premiums earned in the quarter increased 12.3 percent to $123.3 million and the combined ratio measuring underwriting results (GAAP basis), exclusive of the refund provison, was 96.6 percent, compared with 105.9 percent a year ago.

Underwriting results were favorably affected by a virtual absence of rainfall in November and December.

Investment income in 1989 increased 27.9 percent, to $42.8 million. In the final quarter, investment income was $11.8 million, a year-to-year increase of 31 percent.

CHICAGO (MARCH 1) BUSINESS WIRE - Illinois Tool Works Inc. (NYSE:ITW) announced Thursday that its Ransburg Corp. subsidiary is starting to sell some of the common stock of Binks Manufacturing Co. (ASE:BIN) that it had previously acquired.

ITW's chairman and chief executive officer, John D. Nichols, had advised Binks on Feb. 26, that such action was among those under consideration. Nichols said that while remaining ready to enter into negotiations, ITW would continue to act in the best interests of the ITW stockholders.

PHOENIX (MARCH 1) BUSINESS WIRE - America West Airlines (NASDAQ:AWAL; PSE:AWA) Thursday indicated that it was pleased that the Federal Aviation Administration had issued a notice of proposed rulemaking that has suggested several changes in the FAA's current civil penalty program.

Martin J. Whalen, America West's senior vice president and general counsel said: ''We have completed a preliminary review of the FAA's proposed changes and it appears to us that many of the issues that America West, other airlines and other commentators have raised with respect to the current civil penalty program have been addressed in this proposal. America West intends to participate fully in the rulemaking proceeding that the FAA has instituted. This proposal constitutes, in our view, a clear signal from the FAA that it intends to work with the industry in an effort to reach a mutually acceptable resolution of this matter. America West also looks forward to a satisfactory resolution of any proceedings that were instituted under the earlier challenged rules.''

EAST HANOVER, NJ (MARCH 1) BUSINESS WIRE - The Ultimate Corp. (NYSE:ULT) and Natick, Mass.-based VMARK Software Inc. have completed a new port to the IBM RISC System/6000 of Ultimate's ULT/ix software system, an implementation of VMARK's uniVerse relational database product.

The new port was completed in cooperation with IBM's Austin, Texas facility, according to the joint announcement by Ultimate and VMARK. Ultimate Senior Vice President Rick Dool said his company will unbundle ULT/ix and make it available on a software-only basis at very competitive prices to attract new customers, especially among the IBM VAR community.

The companies reported that shipments will coincide with the availability of RISC System/6000 hardware from IBM.

The availability of ULT/ix on IBM's newly announced RISC System/6000 with AIX dramatically expands the Ultimate/VMARK strategic alliance involving the support of Pick-based industry-specific applications software in a UNIX environment.

Ultimate Chairman and President Michael J. O'Donnell said, ''The combination of our proven ULT/ix software system, the price/performance features of IBM's RISC System 6000 and Ultimate's focus on the vertical markets served by Pick/UNIX gives us significant advantages in the pursuit of our valued-added product, vertical-market and dealer-oriented business strategies.''

VMARK Vice President Jim Murphy commented, ''We expect a very high level of IBM VAR and market acceptance for this product. Piqued by Ultimate's competitive unbundling, the performance and features of ULT/ix, and the ability of IBM VARs to build on their relationships with IBM, this new port should be a real winner.''

Ultimate has strategically based its Pick/Unix offerings on VMARK's uniVerse software. The company's ULT/ix software features enhancements that support Ultimate functional extensions of standard Pick and is available for the IBM/RT, Bull DPX/2 and DPX/2000, HP Series 9000, and Sequoia 300 hardware platforms.

VMARK Software Inc. is a developer of software and database management products for the UNIX marketplace. The company's application development and execution and environment, uniVerse, enables Pick and Prime INFORMATION-based applications packages to run on more than 100 different UNIX-based computer systems from over 28 manufacturers. In addition to its domestic operation, VMARK has subsidiaries in Canada and Australia as well as distributors in 13 other countries.

The Ultimate Corp. provides business solutions to companies of all sizes by integrating system-level software and application software on hardware platforms from premier computer vendors such as Bull HN, Hewlett-Packard, IBM and Sequoia.

Ultimate also provides education, training, consulting and field maintenance to customers across a wide range of vertical markets. In addition to its domestic operations, Ultimate has subsidiaries in the United Kingdom, Canada, France and Australia.

Editors Note: RISC Systems/6000, AIX and IBM/RT are trademarks of the IBM Corp. UNIX is registered trademark of AT&T. ULT/ix is a trademark of The Ultimate Corp. UniVerse is a trademark of VMARK Software Inc. Pick is a registered trademark of Pick Systems. Sequoia is a trademark of Sequoia Systems Inc. Prime INFORMATION is a trademark of Prime Computer Inc. PHOENIX (MARCH 1) BUSINESS WIRE - ''The Amalgamated Council of Greyhound Local Unions has advised its 19 Local Unions that represent 9,000 Greyhound employees to prepare to go on strike at 12:01 a.m. MST, Friday, Mar. 2, 1990.

''The decision to initiate preparations for a nationwide work stoppage came after the Union unanimously rejected a modified contract proposal submitted by the company last night.

''The Union has been attempting to avert a work stoppage, but the company has not agreed to delay implementation of its Jan. 10, 1990 offer, which was soundly defeated by the Union's membership by a 91.9 percent margin.

''The Union is now in the process of making a counter-offer in order

to avert a work stoppage if at all possible. However, the 9,000 employees of Greyhound Lines Inc., have been instructed to go on strike at 12:01 MST tomorrow morning unless they are instructed to do otherwise by the Amalgamated Council or by Local Union officials.

''Union members have also been urged to do what they can to assist the traveling public if a strike becomes necessary. The Union's strike is not against the public. It is against a company that has refused to bargain in good-faith; a company that wants million for management but pennies for the people who drive and maintain the buses, and the people who ensure the safe and efficient operation of the Greyhound system.

''The Union's counter-offer will cost the company no more than $20 million during the first year -- reflecting a wage and benefit increase averaging 4 percent to 5 percent.''

HOUSTON (MARCH 1) BUSINESS WIRE - Packaging Corporation of America (PCA),

a unit of Tenneco Inc., has acquired Pressware International Inc., the leading producer of environmentally acceptable pressed paperboard trays in North America, in a move that significantly boosts PCA's range of food packaging products.

Pressware International, which reported annual sales of more than $24 million in 1989, manufactures and markets a variety of paperboard trays used for packaging food items in the frozen food, fast food, bakery, supermarket and institutional food industries. The company is based in Columbus, Ohio. The terms of the sale were not disclosed.

''Pressware International gives PCA a strong presence within the food processing market,'' said Monte R. Haymon, president and chief executive officer of PCA. ''It adds a major component to PCA's already extensive capabilities in dual ovenable and microwave-only packaging, and positions it strongly in growing markets for recyclable microwave and take-out food packaging.''

Consumer demand for the convenience of prepared food and microwave cooking has driven the pressed paperboard market in recent years. According to Patrick J. Fortune, senior vice president and general manager of PCA's aluminum and plastics group, pressed paperboard products are not only cost effective but environmentally acceptable, a factor that will become even more important in the 1990s.

''Consumers want packaging which is economical, safe for use in microwave and conventional ovens, and environmentally friendly. Pressed paperboard meets these requirements perfectly,'' Fortune said, ''and Pressware's reputation for quality and service make them a particularly attractive acquisition for PCA.''

Recent market research reveals that close to 85 percent of U.S. homes now contain microwave ovens, a figure which should reach 95 percent by the middle of the decade. Also, retail sales of frozen dinners should reach $18 billion, up more than 400 percent since 1986.

Pressware International, created in 1978 as a division of International Paper, employs 180 workers and sells its products primarily through a direct sales force.

Packaging Corporation of America is one of the nation's leading manufacturers of corrugated containers, containerboard, molded fibre products, disposable plastic and aluminum containers, folding cartons and recycled paperboard.

Tenneco Inc. is a Houston-based diversified industrial corporation with major business interests in natural gas pipelines, agricultural and construction equipment, automotive parts, shipbuilding, packaging,

chemicals and minerals.

SCOTTS VALLEY, CA (MARCH 2) BUSINESS WIRE - Seagate Technology (NASDAQ/NMS:SGAT) Thursday announced the appointment of Rick Heupel to vice president, Singapore Drive Operations, Tuas Facility.

The company is pleased to have promoted Heupel from within the newly acquired Imprimis Technology, formerly the disc storage subsidiary of Control Data Corp. He will be based in Singapore and will report to Cal Reed, vice president, Scotts Valley and Singapore Operations.

Heuple, most recently director of operations for Seagate's Tuas Plant, will assume the position of vice president with 14 years of extensive experience in manufacturing and engineering.

As director of operations for Imprimis' Rigidyne subsidiary, a manufacturer of 3.5-inch high-performance rigid disc drives, Heupel ensured the successful and smooth operations of the manufacturing teams under his direction. His expertise in module operations, process control, plant layout, product development, machine design and fabrication, and quality assurance make him an invaluable asset to Seagate.

During his six years with Imprimis, Heupel also managed the company's Module Manufacturing Operations for eight-, nine- and 14-inch disc drives. His superior work was recognized with Control Data's prestigious Divisional Outstanding Performance Award and the Technical Excellence Award.

Previous to his work with Imprimis, Heupel contributed his managerial and technical expertise to Gould Inc. as engineering manager of their Activair Division.

Heupel began his career in 1974 as an industrial engineer with Dayton Hudson Operation and as a manufacturing engineer with Litton Industries in 1976.

Heupel holds a bachelor's degree in industrial engineering from North Dakota State University, 1974.

Seagate Technology is the world's leading supplier of disc storage products to original equipment manfacturers and remarketers.

IRVINE, CA. (MARCH 1) BUSINESS WIRE - AST Research Inc. announced Thursday the resignation of Bruce Cassell, senior vice president of U.S. sales.

Cassell cited personal reasons for his departure, including his desire to return to Northern California.

Cassell joined AST in 1988 to direct AST's domestic sales operations. He is credited with the expansion of AST's distribution channels through major computer retail chains, including ComputerLand Corp., MicroAge Computer Stores Inc. and Sears Business Systems Centers.

U.S. sales will be directed by the current management team, which oversees major chains, resellers, distributors and OEM activities.

''Cassell did an excellent job expanding AST's channels of distribution,'' said Tom Yuen, AST chief operating officer. ''The management team he established will continue to develop our U.S. sales programs.''

AST Research's corporate headquarters are located at 16215 Alton Parkway, P.O. Box 19658, Irvine, Calif., 92713-9658. Telephone: 714/727-4141.

CUPERTINO, CA (MARCH 1) BUSINESS WIRE - The management team of the Gould Design and Test Systems Division (manufacturer of Logic Analyzers) and Toyo Corp. have reached agreement with Gould Electronics Inc. and its parent company, Nippon Mining Inc., to acquire the division.

As of March 1, 1990, the division will become a private company under its original name, Biomation Corp. The purchase includes the design and manufacturing operations in Cupertino, plus the sales and service operations located in the United States. The purchase price and terms were not disclosed.

Biomation, founded in 1968, was acquired by Gould Inc. in 1978. Biomation's innovative approach to digital measurement problems has created the technology base for today's measurement products: Logic Analyzers and Digital Storage Oscilloscopes.

Biomation introduced the world's first timing logic analyzer in 1973, thereby creating the Logic Analysis market and defining the key features for products in the market today. Since the acquisition by Gould, DTD/Biomation has focused on high-performance logic analysis products.

According to Prime Data, Gould DTD/Biomation was ranked third in worldwide logic analyzer sales in 1988 with $25.2M of end-user sales.

The Toyo Corp. and Gould/Biomation have had a successful, ongoing relationship for almost 20 years. As the exclusive Japanese distributor

of Gould/Biomation digital-instrumentation products in Japan, Toyo has maintained a market share of greater than 20 percent over that period.

This long-term relationship gives Toyo a detailed knowledge of the logic-analysis market and an understanding of Biomation's current strengths and future potential.

Biomation will assume all of the commitments made to customers and vendors including warranty repair and continuing service for Gould logic-analysis products. Biomation will continue to sell its products in the United States with a direct sales force. The sales organization will continue to offer Biomation manufactured and compatible third-party offerings.

Gould has agreed to continue to distribute and support Biomation products in the major European markets.

Toyo Corp., formed in 1958, is publicly held and traded on the Tokyo Stock Exchange. Toyo's electronic instrumentation business is primarily associated with the distribution of American and European manufactured products in Japan.

Biomation manufactures the test and verification tools needed by digital hardware and software engineers that use high-performance RISC and CISC microprocessors and ASIC devices. In January 1989, Biomation introduced a Configurable Logic Analysis System, the CLAS 4000, which addresses measurement problems which require high measurement speeds and channel count.

This instrument may be configured as several independent instruments. It is controlled by an innovative windowing environment which makes the CLAS 4000 extremely easy to use. Biomation also offers a family of portable logic analyzers including the high-performance K450B and the low-cost K50 series.

Biomation plans to continue its strategic direction with development programs to enhance these product offerings.

#90060b0614 03/01/1990 ~Business Wire

EMERYVILLE, CA (MARCH 1) BUSINESS WIRE - Farallon Computing Inc. Thursday announced that the company is shipping its PhoneNET StarController EN and StarConnector EN products.

These products, when used in conjunction with Farallon's existing line of

connectivity products, allow Macintosh computer users to access either AppleTalk or Ethernet networks over existing telephone wires without locking users into one network or the other. This ''eithernet'' solution is available only from Farallon.

Farallon also announced that its PhoneNET Ethernet products are compatible with Novell's Kinetics EtherPort L family of products for the Macintosh, making it more economical for computer users to implement Farallon's PhoneNET EN networks.

In well-designed networks, the LocalTalk communications protocol provides maximum throughput for users who primarily access electronic mail, print and occasionally transfer files. In networks where users frequently run network-intensive applications, such as desktop publishing or CAD, or access a central database, Ethernet will improve performance by offering up to 10 times the throughput.

An Etherport L board simplifies the Ethernet connection and makes it more economical for users by combining the function of a StarConnector EN with the Ethernet card for their Macintoshes. The StarConnector EN is needed for network devices such as the FastPath, which will not accept an EtherPort card and for other Ethernet interface board cards that do not accept a twisted-pair connection directly.

Farallon's ''Eithernet'' solution also makes sense for network managers looking for peak network performance combined with reliability and ease of use. StarCommand 2.0 network management software, bundled with each StarController EN, helps network managers by constantly monitoring both AppleTalk and Ethernet networks.

When a network problem occurs, the StarController isolates the problem device and StarCommand 2.0 automatically alerts the network manager. When the problem is solved, the StarController automatically returns the device to the network.

The Farallon PhoneNET System star wiring topology is compatible with LocalTalk, Ethernet, ISDN and Token Ring twisted-pair networks, and complies with the IEEE 802.3 networking standard. The suggested retail price for Farallon's StarController EN is $2,495, including the StarCommand 2.0 software. The suggested retail price of Farallon's StarConnector EN is $195.

Upgrades to StarCommand 2.0 will be available free to all registered StarController customers. The suggested retail price of the EtherPort card is $595. Farallon's EN products and Novell's Kinetics EtherPort board are available through computer retailers.

Farallon is the world's leading provider of twisted-pair local-area

networks, with more than one million PhoneNET System nodes installed in Fortune 500 companies, universities and government agencies. The company produces personal communications products and technologies, primarily for use by Macintosh computers. Farallon products embrace a variety of communications media, including ISDN, analog and digital voice, data, fax and video.

The company has 161 employees and is headquartered in Emeryville, with research facilities there and in Lawrence, Kan. Farallon sells its products world-wide through retail distribution and makes its technologies available through OEMs and relationships with other major vendors.

SAN JOSE, CA (MARCH 1) BUSINESS WIRE - Significant price reductions across its coprocessor product line will be implemented March 1 by Integrated Information Technology Inc.

Integrated Information officials cite the impact of broad market acceptance of its coprocessor products as the incentive for lowering prices. The resultant cost efficiencies and lower manufacturing costs will be shared with IIT's customers. Integrated Information's IIT-2C87 and IIT-3C87 are direct replacements for Intel's 80287, 80C287A and 80387 products respectively.

Integrated Information's prices for its coprocessors were originally equivalent to its competitor. New pricing reflects a price savings of 9 percent for the IIT-2C87, and a 23 percent savings on the IIT-3C87, effective March 1. The new recommended list prices for the coprocessors are as follows:

Part Speed Recommended list price IIT-2C87-8
$293 IIT-2C87-10
339 IIT-2C87-12 413
IIT-2C87-20 439 IIT-3C87-16

439 IIT-3C87-20
499 IIT-3C87-25 639 IIT-3C87-33
779

Integrated Information was first to introduce high-performance coprocessor alternatives for use in the 286 and 386 microprocessor arenas. Plug and object-code compatible with Intel Corp.'s 80287, 80C287A and 80387, Integrated Information's products include hardware microcode for performing 4x4 matrix transformations.

Additionally, Integrated Information supplies a library of code that can easily link the 4x4 algorithm to a number of popular compilers.

A worldwide network of master distributors have been established to sell Integrated Information's products. Domestic distribution is managed primarily by Specialty Software Development Corp., Austin, Texas, a specialized distributor which represents suppliers to the retailer/reseller market as though it were a direct sales force for the supplier.

Distribution channels in the Pacific Rim and Europe have also been successfully implemented.

Integrated Information Technology Inc., headquartered in Santa Clara, Calif., designs, develops and markets compute-engine-based silicon products.

KENT, WA (MARCH 1) BUSINESS WIRE - FlowMole Corp. (NASDAQ:MOLE), the leader in trenchless technology for underground utility installation, Thursday announced that Dr. Yih-Ho (Michael) Pao and Dr. John B. Cheung have resigned as directors of the corporation, effective immediately.

''Mike Pao and John Cheung were prime movers in the founding of FlowMole and made many contributions of vital importance to the company in its formative years. They have said that they are very pleased with FlowMole's recent achievements and are confident in the future of the company under its current board of directors and management team. Mike

and John have decided to devote themselves to their other business enterprises. We wish them every success in those endeavors and appreciate their many contributions to the company,'' said John C. Martin, chairman.

FlowMole recently reported strong third quarter results and a record performance for the first nine months of fiscal 1990. Net income was $965,000, or 14 cents per share, on revenues of $10.1 million for the third quarter ended Dec. 31, 1989, compared to net income of $263,000, or 4 cents per share, on revenues of $9.5 million in the like quarter of fiscal 1989.

Nine month net income reached a record $2,775,000, or 41 cents per share, on record revenues of $31.0 million compared to net income of $772,000, or 11 cents per share, on revenues of $24.8 million in the first nine months of fiscal 1989.

FlowMole Corp. installs and replaces underground utility cable and pipe with minimal surface disruption using proprietary high-pressure fluidjet cutting and electromagnetic guidance techniques to accurately bore small diameter tunnels up to 400 feet in length.

#90060b0622 03/01/1990 ~Business Wire

COSTA MESA, CA (MARCH 1) BUSINESS WIRE - US Facilities Corp. (NASDAQ:USRE) Thursday announced 1989 fourth-quarter and Dec. 31, 1989,

year-end results.

Total revenues for the quarter rose 48 percent to $17,539,000, compared with $11,857,000 in the similar period last year.

Net income for the quarter was $791,000, or 21 cents per share, in contrast to a net loss of $2,964,000, or 79 cents per share, recorded in the 1988 fourth quarter.

For the year, the company reported net income of $2,104,000, or 56 cents per share, on a 54 percent gain in total revenues to $62,941,000. In 1988, the company reported total revenues of $40,821,000 and a net loss of $4,703,000, or $1.26 per share.

Net investment income, including realized gains, increased to $1,276,000 for the 1989 quarter, from $708,000 reported for the fourth quarter in 1988. For the year ended Dec. 31, 1989, net investment income reached $3,897,000, compared with $2,818,000 in 1988. The increases for the respective periods were primarily due to a larger investable asset base.

The company's investment portfolio consists of highly rated bonds and short-term instruments.

The company indicated that US Benefits realized a commission and fee income gain of 82 percent in 1989, due to premium increases for the year.

The premium improvement reflects a continuation of the acceptance of substantial rate increases for its excess medical stop-loss coverage, because of the recognition of increasing costs of medical care and an increase in price from other companies offering health insurance coverage.

Because USF RE reinsures 50 percent of the net medical stop-loss business produced by US Benefits under terms of a reinsurance treaty with the company that issues that coverage, the increased medical stop-loss production resulted in USF RE's earned premiums increasing 51 percent over the prior year.

USF RE earned premiums in 1989 also benefited from a 14 percent increase in net written property and casualty reinsurance premiums over 1988.

SPARTA, NJ (MARCH 1) BUSINESS WIRE - Laser Recording Systems, Inc. (''LRS'') (NASDAQ:LRSIU) (Boston Stock Exchange:LRSU) Thursday announced that it has signed an agreement to join Digital Equipment Corporation's (NYSE:DEC) Independent Software Vendor Group (''ISV'').

As a Digital ISV, Laser Recording Systems gains access to Digital's worldwide network of software developers, qualifies for low-cost capital equipment, obtains free technical support from senior engineers at Digital and receives worldwide product promotion for generating sales leads.

Carver Washburn, President of LRS commented, ''We look forward to a productive and mutually beneficial strategic alliance with Digital and appreciate their confidence that LRS' proprietary software operates in a Digital environment. With Digital's international sales presence and premier reputation, we are confident that new opportunities, as a result of this relationship, will play an integral role in LRS' development.''

''The platforms on which software is available is key to determining a development company's success and growth,'' said Mike Mancuso, Group Marketing Manager, Digital ISVG. ''We believe the information technology marketplace is moving in directions that favor the Digital style of distributing computing, and we look forward to capitalizing on the opportunities that will become open as a result of LRS joining the ISV Group.''

Digital Equipment Corporation, headquartered in Maynard, MA is the leading worldwide supplier of networked computer systems and services. Digital offers a full range of computing solutions and systems integration for the entire enterprise -- from the desktop to the data center.

Laser Recording Systems, Inc. offers an integrated optical disk-based systems solution through the application of proprietary software, data base management, local area networking and optical technologies. LRS's first product line is designed to significantly reduce the time and expense to the pharmaceutical industry and the FDA in processing new drug applications.

NEW CASTLE, DE, SAN JUAN, Puerto Rico (FEB. 1) BUSINESS WIRE - American Mirrex Corp. Thursday announced a strategic alliance with the Health Care Division of PM Co. (formerly Paper Manufacturers Co.) whereby PM Co. will act as the exclusive marketing representative for Mirrex rigid PVC packaging films in Puerto Rico.

PM Co. operates in Puerto Rico as Perfecseal International de Puerto Rico Inc., with Hector Pagan as general manager.

According to American Mirrex Chairman David Kollock, PM Co. will market Mirrex films in conjunction with its own packaging products directly to medical device and pharmaceutical manufacturers and thermoformers located in Puerto Rico.

''Because of PM Co's preeminence in medical device packaging in Puerto Rico, we expect a dramatic increase in sales to result from the agreement, along with improved customer service,'' Kollock said in making the announcement.

PM Co. Chairman and Chief Executive Officer Donald O'Neill said the alliance will improve his company's ability to service medical device manufacturers and thermoformers as well as the many pharmaceutical companies which manufacture in the Caribbean.

''We currently supply the lidding material for medical device packages while American Mirrex supplies the base tray sheet,'' O'Neill said. ''Under the new alliance, we will supply the materials used to form both parts of the package, along with printed labels and other converted packaging materials, making us a single source for our medical device and pharmaceutical customers' packaging needs.''

The Health Care Division of PM Co. offers a complete line of high performance flexible packaging materials. American Mirrex currently manufactures more than 100 million pounds of rigid PVC film roll and sheet products annually at its New Castle, Del. production facility.

CORAL SPRINGS, FL (MARCH 1) BUSINESS WIRE - NPF Associates Ltd. Inc., an executive search firm with clients in the Fortune 50, has formed a new subsidiary, NPF Group, to specialize in retained search.

Arthur B. Staples was named president of NPF Group; previously he was a director of NPF Associates.

NPF Group will expand its executive search assignments from specialization in human resources to cover middle and upper management positions in all diciplines.

''The new group reflects our commitment to meeting the growing need of our clients,'' says Nick P. Fischler, chairman and chief executive officer of NPF Associates. ''Over the last 10 years we have become one of the most nationally prominent firms in human resources placement.

Many of our clients requested that we fill executive positions in other specialties so we responded by creating a subsidiary for retained search.

NPF Group President Arthur B. Staples has more than 15 years experience in professional recruiting. Before joining NPF Associates, he owned and operated an executive search firm in New England.

For more information on NPF Group, 1999 University Dr., Coral Springs, call 305/753-8560.

CHICAGO (MARCH 1) BUSINESS WIRE - The nation's third-largest Sizzler franchisee has filed a $25 million lawsuit against Los Angeles-based Sizzler Restaurants International (NASDAQ:SIZZ) alleging fraud and breach of covenant of good faith and fair dealing.

The suit was filed in U.S. District Court in the Northern District of Illinois late last week.

The plaintiffs, FBN Food Services Inc. and Midwest Restaurant Concepts Inc., are affiliated companies which have common ownership and own and operate 24 Sizzler restaurants of which 21 are in the Chicago area.

The suit alleges that:

o Sizzler deceived the plaintiff regarding the advertising and

marketing expenditures; and Sizzler had entered into

negotiations with other franchises to reduce their advertising

commitment and provide preferential treatment.

o That the plaintiffs were pressured to purchase additional

restaurants to protect their existing franchises and huge

investment in the Chicago market.

o And that Sizzler International was trying to undermine the

plaintiff's financial position so that the company could

acquire the restaurants in Chicago at a reduced price to

gain control of the market.

The suit requests $15 million in real damages and $10 million in punitive damages.

PLEASANTON, CA (MARCH 1) BUSINESS WIRE - ComputerLand Corp. announced Thursday that for the 1990 fiscal first quarter, the company met its performance targets, continuing to lead the industry in terms of sales growth and reporting solidly profitable earnings.

For the 1990 fiscal first quarter ended Dec. 31, 1989, ComputerLand consolidated worldwide retail sales grew 23.3 percent to $810 million, with domestic sales, including its National Accounts Program, up 29 percent.

The company noted that fiscal 1990 first quarter net revenues of $36 million, while flat for the quarter, reflected an anticipated slowing of sales associated with restructuring efforts at its Australia operation. Excluding Australia, ComputerLand's 1990 first quarter net revenues were up 10 percent.

Net income for the 1990 fiscal first quarter was $4 million, including significant final restructuring expenses in ComputerLand's Australia

operation.

ComputerLand Corp. is the world's largest multi-vendor reseller of personal computers, with 760 stores in 36 countries.

FORT LAUDERDALE, FL (MARCH 2) BUSINESS WIRE - Ronald A. Cass, chairman of Hospital Staffing Services Inc. (NASDAQ/NMS:HSSI), Thursday announced that the company has concluded negotiations with five major hospitals in the United Kingdom to provide these institutions with U.S. travel nurses on an exclusive basis for a one year period.

Although the contracts have a one year duration, each registered nurse is expected to work in the U.K. for at least six months. Taken together, the five contracts represent in excess of 35 nursing positions. Three of the hospitals are located in London and two are located in Oxford, England.

The five hospitals include St. Thomas Hospital (London), St. Mary's Hospital (London), The Hammersmith Hospital (London), Radcliffe Infirmary (Oxford), and the Newfeld Orthopaedic Hospital (Oxford).

Thew world famous St. Thomas Hospital in London, also houses the Florence Nightingale Museum and School of Nursing. St. Thomas is an 800 bed teaching hospital located on the Thames across the Westminster Bridge from Big Ben, the House of Parliment and Westminster Cathedral.

St. Mary's Hospital, a celebrated landmark among London teaching hospitals was founded in 1851 and houses 613 patient beds. It is also known as a pioneer research facility, having taken part in the development of penicillin and helping to produce the electrocardiograph machine.

The Hammersmith Hospital in London, which shares a 500 teaching bed campus with the Royal Postgraduate School of Medicine, first opened in 1905 as an infirmary and institute for the poor.

It has since grown into an institution with many specialties and is known for being the first institution to train the disabled to live a normal life. Hammersmith is also known as one of the pioneers in the field of in-vitro fertilization.

The city of Oxford, rich in a tradition of education, is also home of the world famous Radcliffe Infirmary and the Newfeld Orthopaedic Hospital, which, together, provide 560 beds for the use of Oxford residents.

Hospital Staffing Services Inc. is a leading professional recruitment organization specializing in the placement of medical personnel, on both an interim and permanent basis, in hospitals and other health care facilities located throughout the United States and in the United Kingdom.

NEW ORLEANS (MARCH 2) BUSINESS WIRE - Freeport-McMoRan Resource Partners, Limited Partnership (NYSE:FRP), a 62-percent owned affiliate of Freeport-McMoRan Inc. (NYSE:FTX), announced Thursday that it has completed the sale of certain of FRP's nitrogen fertilizer assets to Agricultural Minerals Corp. (AMC) for $230 million in cash and the assumption of certain liabilities.

Including the release of working capital committed to these assets, FRP will realize approximately $275 million.

The assets that have been sold include the nitrogen fertilizer production facilities at Blytheville, Ark., and Verdigris, Okla., selected terminal facilities, and other related assets.

AMC is a newly formed corporation organized by Robert B. Gwyn, former president of FRP's Agrico Chemical Co., and The Morgan Stanley Leveraged Equity Fund II, L.P. FRP is the largest and one of the lowest-cost integrated phosphate fertilizer producers in the U.S. and will use these proceeds to reduce debt and ultimately fund the development of the Main Pass Block 299 sulphur deposit.

MILWAUKEE (MARCH 1) BUSINESS WIRE - Fiserv Inc., a leading computer-services company providing data processing and information

management systems to financial institutions worldwide, announces the acquisition of Financial Accounting Services Inc. (FAS) of Pittsburgh.

Renamed Fiserv Pittsburgh, Financial Accounting Services provides full service data processing for financial institutions in five eastern states.

Stockholders of FAS, a privately-held organization owned by multiple financial institutions, voted to approve their board of directors' proposal to select Fiserv for the future of their data processing.

FAS is the fourth cooperative and the 15th regional data processing company to align with the national resources of Fiserv since the Fiserv organization was formed six years ago. Terms of the acquisiton were not disclosed.

Fiserv Pittsburgh currently provides full-service data processing to 85 financial institutions. These institutions have combined assets of approximately $8 billion and serve over 1.4 million customer accounts in Pennsylvania, New Jersey, Ohio, Maryland and West Virginia.

FAS was ranked by an independent industry survey as the 13th largest servicer of savings institutions in the country. Formed in 1978, the Fiserv Pittsburgh center employs 90 professionals.

''I am very pleased with the opportunity to have this fine organization join Fiserv,'' comments George D. Dalton, chairman and chief executive officer for Fiserv. ''In the addition of FAS we're gaining a group of people with many years of experience and dedication to their client base.

''With Fiserv, both the clients and people of FAS have a distinct business advantage,'' continued Dalton. ''They are immediately provided with the benefit of our Company's 1989 investment of over $24 million in research and design of our advanced systems and new product introductions.

''They quickly become more responsive in a volatile industry as they align with the depth in experience, focused capital strength and proven financial stability of Fiserv. And all without the need for the FAS clients to convert from their local Pittsburgh Center.''

FAS President Glenn Frankle becomes president of Fiserv Pittsburgh. ''The decision to join Fiserv came from our desire to keep our clients at the forefront of the industry,'' Frankle comments.

''Through the expanded resources we've gained as part of the Fiserv network, we will have more opportunities to offer our Clients the new services and products enhancements they need now and for the future.

''We will continue to process FAS Clients through the Pittsburgh Center,'' Frankle says. ''This means existing FAS clients will continue to be services and processed by the people they know well. In addition, they will receive new features and functions in an improved product through the center, without the need for conversion to an alternate system.''

The acquisition of Fiserv Pittsburgh follows the recent release by Fiserv of record earnings for its fourth quarter and year end as of Dec. 31, 1989. Fiserv reported fourth-quarter earnings of $3.1 million, up 25 percent from the like period last year, on revenues of $44 million, which were up 16 percent.

Earnings per share were 36 cents for the most recent quarter. Earnings for the year rose 23 percent, to $11.4 million, and revenues rose 31 percent, to $164 million, for the like period. Earnings per share were up 20 percent to $1.34.

With the addition of the Pittsburgh Center, Fiserv operates 22 data and remote-service centers providing processing for over 850 banks, credit unions and savings institutions, maintaining over 19.5 million customer accounts on its systems nationwide.

Headquartered in Milwaukee, Fiserv employs 2,400 dedicated professionals in its multiple centers for information management.

In addition to its leadership position in account processing for financial institutions, Fiserv Inc. is a market leader in its related information management subsidiaries:

1. First Trust Corp. is one of the nation's leading providers of administration and data processing services for self-directed retirement plans, currently serving as trustee for approximately 190,000 plans with assets valued at over $3.1 billion;

2. Sendero Corp. is the world's largest and leading specialist in the implementation of processes for measuring and managing interest rate risk through financial modeling technology, education and client services;

3. Fiserv Forms & Graphics designs and produces custom business forms applied throughout the financial industry.

A publicly-held company, Fiserv stock is traded in the NASDAQ over-the-counter market system under the symbol FISV.

Data Processing and Service Centers: Baton Rouge, La.; Beaumont, Texas; Bowling Green, Ky.; Chicago; Cleveland; Dallas; Fresno, Calif.; Hartford, Conn.; Honolulu; Houston; Los Angeles; McAllen, Texas; Milwaukee;

Minneapolis, New Haven, Conn.; Pittsburgh; Portland, Ore.; San Antonio, Texas; Seattle; Shreveport, La.; Spokane, Wash.; Tampa, Fla.

Subsidiaries: First Trust Corp., Denver; Fiserv Forms & Graphics Division Seattle; Sendero Corp., Scottsdale, Ariz.

#90060b0688 03/01/1990 ~Business Wire

COLUMBUS, OH (MARCH 1) BUSINESS WIRE - Bob Evans Farms net sales for the 9-month period ended Jan. 26, 1990, were $337,542,000, an increase of 7 percent over $314,889,000 a year ago.

Net income for the nine months was $21,148,000, or 66 cents per share, compared with $23,649,000 or 73 cents per share in fiscal 1989.

The increase in net sales over a year ago for the third quarter and the 9-month period was mainly due to more restaurants in operation in the restaurant segment. In addition, higher wholesale prices were charged for sausage products in the sausage segment, and slightly more pounds of sausage were sold.

The decrease in net profit for the 9-month period compared with a year ago was primarily due to higher live hog costs in the sausage segment, which decreased profit margins. Also during the third quarter, the restaurant segment experienced increased costs, particularly in food and labor, which adversely affected net profits compared with those for the like period a year ago.

The Bob Evans Farms board of directors declared a six-and-one-half cents ($.065) per share quarterly dividend on Jan. 12, 1990, payable March 1, 1990, to stockholders of record at the close of business Feb. 9, 1990.

Bob Evans Farms Inc. currently owns and operates a chain of 232 family restaurants in 14 states, including Owens Family Restaurants in Texas.

#90060b0693 03/01/1990 ~Business Wire
ELMSFORD, NY (MARCH 1) BUSINESS WIRE - EPIC Health Group Inc. (NASDAQ:EPIC) Thursday announced results for the fourth quarter and year ended Nov. 30, 1989.

For the three months ended Nov. 30 1989, revenues increased to $10,605,952 from $9,434,155 in the fourth quarter of the previous fiscal year. Net income was $96,587, or 1 cent per share, including a tax credit of $139,161, compared to net income of $13,822 in the prior fiscal year's fourth quarter.

For the year ended Nov. 30, 1989, revenues increased to $39,314,830 from $34,932,706 in the previous fiscal year. The net loss for the year was $1,102,021, or 10 cents per share, compared to net income of $291,496, or 2 cents per share, in fiscal 1988.

In fiscal 1989, the increase in revenues was the result of an expanded customer base, additional sales to existing clients and increased drug

prices. The loss for the year was comprised of an after-tax loss from operations of $572,633, an increase in the company's provision for uncollectable accounts receivables of $229,606 which arose in prior years, and an inventory shrinkage of $299,782.

Improved operating results achieved in the fourth quarter of fiscal 1989, in which the pre-tax operating loss of $42,574 compares favorably to a pre-tax loss of $187,124 in the third quarter of fiscal 1989, are attributable to the company's ongoing stringent cost-cutting measures.

Management is anticipating a return to profitable operations in the first quarter of fiscal 1990 as revenues are expected to reach approximately $11 million.

EPIC Health Group also announced the signing of a multi-million dollar contract to provide its mail-order prescription programs to a major insurance company, effective March 1, 1990. As such, the Company expects to realize a significant impact on revenues beginning in the second quarter of fiscal 1990.

Country risk provisions include 72p million (1988 10p million) in respect of outstanding interest. Equity to assets and free capital ratios exclude securities trading assets/liabilities and related capital.

Chairman's Statement

The Barclays Bank Group made a profit in 1989, before country risk provisions and tax, of 1,675 million pounds, up by 20 percent on 1988.

Additional country risk provisions of 983 million pounds reduced pre-tax profit to 692 million pounds and post-tax profit to 477 million pounds.

The Group has announced a second interim dividend of 16.0 pence per ordinary share (+ 23.1 percent), bringing the total dividend for the year to 27.4 pence, an increase of 19.1 percent.

After country risk provisions, minority interests and dividends, the group added 144 million pounds in retained earnings to its capital base to support continued future growth. The dividend was 1.5 times covered; 3.6 times before charging country risk provisions.

Strong growth in most of the major areas of the business was responsible for the underlying improvement in earnings. Key features were again the performances of UK domestic banking and treasury operations, where profit

increased by 33 percent to 1,030 million pounds, and financial services divsion, up by 59 precent to 165 million pounds.

In a difficult year for investment banking, BZW improved its profit by 64 percent to 54 million pounds, after charging 32 million pounds provisions in respect of local authority swaps. Most of the international operations advanced strongly and profit increased by 29 percent to 154 million pounds, depsite continuing losses in Australia.

Provisions for credit risk rose by 42 percent to 414 million pounds from the exceptionally low level recorded in 1988. The ratio of provisions to total lendings, however, remained at the low end of its historical range, reflecting the positive impact of the risk management procedures adopted by the group in recent years.

Total operating income rose by 17 percent, while the rise in operating expenses was held at 13 percent depsite further substantial investments in systems and new operations. The group's cost income ratio fell from 66.4 percent to 64.0 percent.

Group capital resources rose by 1.2 billion pounds to 9.5 billion pounds. The increase included a 200 million pound Capital Notes issue, a 242 million pound surplus arising from a property revaluation, 144 million pound in retained earnings and a US$500 million preference share issue, which counts as tier 1 capital under the Basle capital convergence guidelines.

A proposal to capitalise some 450 million pounds of reserves, by a bonus issue of two ordinary shares for every five ordinary shares held, will be put to shareholders at an extraordinary general meeting on March 20.

Total assets grew only by 1 billion pounds in the second half year, reflecting the underlying economic slow-down especially in the United Kingdom. Over the full year they advanced by 22 percent to 127.6 billion pounds.

Notwithstanding this strong growth in what is one of the largest banks in the world, the group's capital to risk assets ratio at the year-end of 9.0 percent remained comfortably above the minimum requirement of 8.0 percent, while, more significantly, that for tier 1 captial was 5.7 percent.

Taking into account the proposed capitalization issue and the proceeds arising from the recent sale of the interest in Yorkshire Bank, the ratios improve to an even healthier 9.2 percent and 6.2 percent respecitvely.

Commenting on the results, Barclays Chairman, Sir John Quinton, said today ''Strong underlying growth in 1989 lays a secure base for the future expansion of our business.

''This performance is a most encouraging achievement in a year when competition intensified in many of our markets and economic conditions slowed down.

''During the past 18 months we have reduced our exposure to LDCs by over $1 billion. The outlook for them has worsened, however, and I regret that we have now felt it prudent to make additional provisions. This will also provide us with room for manoeuvre in continuing our efforts to manage country debt problems and minimise its impact on shareholders.

''By raising the provisions on LDC debts to 70 percent, I believe that these are now adequately covered and this removes a factor which might have depressed our profits in future and has certainly adversely affected our share price in the past.

''I am very pleased to report the strong performance in the UK. Our focus on deposit gathering in 1989 was particularly successful in raising an additional 7.4 billion pounds and thus reducing our need to raise more expensive money market funds. Equally noteworthy were our cross-selling efforts, demonstrated in the improvement in the results of our financial services division which offset the costs of the introduction of interest on current accounts and the elimination of many charges for our personal customers.

''Lending growth in the UK was concentrated on the business sector. Our mortgage lending slowed under the impact of higher interest rates and maintenance of prudent lending criteria. This was followed by a cooling off in our consumer lending. These trends - the higher cost of funds and a decline in consumer lending - had a marked effect on Barclaycard and Mercantile Credit, both of which saw substantial declines in profit in 1989.''

In conclusion, Sir John said, ''Barclays sound position as one of the most strongly capitalized banks in the world, and the underlying strength of our businesses, means that we are well placed to meet the challenges ahead and to continue to prosper with our customers and shareholders. To that end, we have increased the dividend for the year by 19.1 percent.''

#90060b0704 03/01/1990 ~Business Wire

DENVER (MARCH 1) BUSINESS WIRE - Cellular Inc. (NASDAQ/NMS: CELS), Thursday announced that it has entered into an agreement to acquire the wireline construction permit for rural service area (RSA) Iowa 6, which

has a population of over 153,000.

The acquisition is subject to regulatory approval.

''Upon consummation, this acquisition will increase our presence in the state of Iowa to nine RSAs, as well as one metropolitan statistical area (MSA), bringing total net company 'pops' to more than 2.1 million,'' said Arnold C. Pohs, president and chief executive officer of Cellular Inc.

Cellular Inc., founded in 1983, provides management, financing and operational services for the cellular interests of independent telephone companies (''telcos''). Currently, the company has affiliations with 156 telcos in 17 states and has interests in 11 operational MSA markets and 69 RSA markets, the majority of which will become operational during 1990.

#90060b0719 03/01/1990 ~Business Wire
CHICAGO (MARCH 1) BUSINESS WIRE - AM International Inc. Thursday reported its results for the fiscal 1990 second quarter ended Jan. 27, 1990.

The company also indicated that its second half operating results will show improvement over the first half, but will be below those of the prior year. As a result, the company said its fiscal 1990 net income will be significantly lower than the $31.0 million, or 47 cents per share, reported in fiscal 1989.

For the three-month period, revenues were $218.3 million vs. $206.7 million for the prior year period. Operating income was $1.9 million compared to $9.9 million in the second quarter of last year.

The net loss to common sharheolders in the quarter was ($4.5) million, or ($.09) per share, compared to net income of $4.1 million, or $.08 share, last year.

For the six months, revenues were $411.1 million vs. $398.2 million for the prior year period. Operating income, which includes $10.0 million of patent licensing income, was $9.8 million compared to $18.6 million for the same period last year.

The net loss to common shareholders for the six month period was ($2.7) million, or ($.05) per share, compared to net income to common shareholders of $6.0 million, or $.12 per share, last year.

AM International, with world headquarters in Chicago, sells and services a

wide range of design, display, reproduction and finishing products and supplies to the worldwide graphics industry.

The company conducts its business through group and division operations, 16 subsidiaries and a dealer organization located in over 100 countries. AM International's annual revenues are in excess of $9 million. AM International's common and preferred shares are traded on the New York, Pacific and Midwest Stock Exchanges under the ticker symbol ''AM''. The company's warrants are traded on the American Stock Exchange under the ticker symbol ''AML.WS.''

BOCA RATON, FL (MARCH 1) BUSINESS WIRE - Boca Raton Capital Corp., a South Florida based venture capital firm, Thursday announced the appointment of Robert A. Kennedy as managing director of its newly formed subsidiary, Mariner Venture Capital Corp., a small business investment company (SBIC) licensed by the Small Business Administration under the Small Business Investment Act in 1958.

Kennedy has more than 20 years of commercial bank/merchant bank experience both in New York City as well as in London where he was senior officer with Marine Midland Bank managing a loan portfolio exceeding $2 billion. Earlier, Kennedy served as director of finance for Southmark Corp., a New York Stock Exchange listed company.

As managing director of Mariner Venture Capital Corp., Kennedy has overall responsibility for selecting investments for this SBIC which show promise of significant growth and meet Mariner's investment criteria.

Additionally he will assist the Boca Raton Capital Corp. team in its analysis and selection of other corporate and real estate investments.

Boca Raton Capital Corp. is a closed-end investment company regulated as a business development company under the Investment Company Act of 1940. Its stock is traded on NASDAQ under the stock symbol ''BOCA.''

BOCA RATON, FL (MARCH 1) BUSINESS WIRE - Gary O. Marino, chairman of the

board, president and chief executive officer of Boca Raton Capital Corp., Thursday announced that Stanford H. Cohan has rejoined the company's board of directors and that Morton D. Weiner has been elected to serve on the board.

Cohan previously served as a member of Boca Raton Capital Corp.'s board and its executive committee from 1984 to 1987. He presently serves as chairman of the board for both SouthCoast Bank, West Palm Beach, Fla., and RUEL Laboratories, a mid-Atlantic based cosmetics company.

He is also a director of Express Travel Franchise Corp. and Variety Clubs International. He is chairman of the board of Federal express Management Corp., Glen Burnie, Md.

Weiner was president and director of Avnet, a Fortune 500 company and was responsible for the formation of Norin Corp., another Fortune 500 company of which he was president, chief executive officer and a director. He was also chairman, president and chief executive officer of National Investor's Life Insurance Co. of Little Rock, Ark.

He presently serves on the board of the City National Bank of Florida.

Prior to this, he was executive vice president and director of the Detroit Hockey Club and was chairman of Maple Leaf Mills Ltd., Toronto. He was a captain in the U.S. Signal Corps and saw overseas duty in the India-Burma Theater.

Boca Raton Capital Corp. is a closed-end investment company regulated as a business development company under the Investment Company Act of 1940. Its investment portfolio includes equity investments in railroads, manufacturing companies and a sports complex as well as income producing real estate.

It recently fromed Mariner Venture Capital Corp., a small business investment company (SBIC) licensed by the Small Business Administration under the Small Business Investment Act of 1958. Boca Raton Capital Corp.'s stock is traded on NASDAQ under the symbol ''BOCA.''

LOS ANGELES (MARCH 1) BUSINESS WIRE - Leisure Technology (NYSE:LVX) announced Thursday that net income for the third quarter of fiscal 1990 ended Dec. 31, 1989, was $231,000 compared to $164,000 for the third quarter of fiscal 1989.

Revenues increased to $55,494,000 from $29,408,000 a year earlier. Third quarter revenues for the current fiscal year included approximately $21 million from the sale of properties in New Jersey and Florida. The company generated a gross profit of $2,202,000 on the asset sale in New Jersey which was recognized in the third fiscal quarter.

The gross profit of $3,513,000 on the asset sale in Florida has been deferred to future periods, pursuant to generally accepted accounting principles. Although such asset sales occur from time to time, there were no similar dispositions of land in last year's third quarter.

After deducting preferred dividends, Leisure Technology reported a primary and fully-diluted loss per share of 5 cents versus a primary and fully-diluted loss per share of 7 cents last year.

For the nine months ended Dec. 31, 1989, Leisure Technology reported net income of $82,000 compared to net income of $613,000 for the same period of the prior fiscal year. Gross profits of $3,788,000 have been realized from the sale of assets during the nine months ended Dec. 31, 1989. An additional gross profit of $3,513,000 has been deferred to future periods.

Housing revenues increased 23 percent to $96,767,000 from $78,479,000 in fiscal 1989. Total revenues also increased to $127,935,000 from $81,739,000 a year earlier. The fiscal 1990 revenues include $27,510,000 generated from the sale of land held for future development or sale.

After deducting preferred dividends, the company reported a primary and fully-diluted loss per share of 27 cents for the nine months ended Dec. 31 1989, versus a primary and fully-diluted loss per share of 18 cents for the same period last year.

Leisure Technology, established in 1957, is the largest nationwide developer of active adult communities and is currently developing active adult, single-family or full-service retirement communities in New Jersey, New York, Florida, Illinois and California.

AUSTIN, TX (MARCH 1) BUSINESS WIRE - SEMATECH has signed a joint development agreement with Hampshire Instruments Inc., of Marlborough,

Mass., to fabricate and evaluate X-ray optics.

Ultraviolet light, used in today's lithography processes, may be replaced by X-rays in the future. Lithography is the process of patterning circuits onto computer chips. Each generation of memory chips requires higher resolution lithography. X-ray lithography has been used to fabricate transistors as small as 200 nanometers, or about 1/500 the width of a human hair.

''SEMATECH views X-ray technology as a high-risk, high-return technology area,'' said Dr. Thomas Seidel, SEMATECH's vice president and director of manufacturing equipment and materials. ''There will eventually be a day when X-ray technology is required. We wish to support selected developments along the X-ray path, and Hampshire's moderate cost approach is particularly interesting.''

SEMATECH's joint development program was established in an effort to regain America's leading role in semiconductor manufacturing. To accomplish this objective, SEMATECH works with U.S. suppliers to develop new equipment, materials and processes that support manufacturing requirements for future generations of technology.

SEMATECH, a consortium of 14 U.S. semiconductor manufacturers, has an annual budget of $200 million. More than half of its funding is derived from member firms and the remainder from the federal government through the Defense Advanced Research Projects Agency (DARPA).

Hampshire Instruments, a privately held producer of X-ray lithography systems, has locations in Rochester, N.Y., and Marlborough, Mass. Hampshire is actively involved in industry and government programs to recapture U.S. global leadership in semiconductor manufacturing.

Hampshire is a member of SEMI/SEMATECH and a prime contractor to the U.S. Government's Microelectronics and National X-Ray Lithography Programs.

LA BELLE, FL (MARCH 1) BUSINESS WIRE - Mr. Ben Hill Griffin Jr., chairman of Alico Inc., passed away at home on March 1 after a short illness.

He was 79.

Griffin first became associated with Alico in 1961 when he was elected to the board of directors. He was elected chairman and chief executive officer in 1973 and served in both capacities until 1988. He continued as chariman until his death.

Ben Hill Griffin Inc., of which he was also chairman and chief executive officer, purchased a major block of Alico stock in 1972. Ben Hill Griffin Inc. subsequently acquired additional stock, with current ownership of approximately 49 percent of outstanding shares.

Alico made substantial gains during Griffin's tenure. Revenue increased from $3.8 million in Fiscal Year 1972 to $26.8 million in Fiscal Year 1989. Earnings per share increased from nine cents per share in 1972, as adjusted for a subsequent four-for-one stock split, to $1.24 per share in 1989.

Stockholders' equity was $8.3 million in 1972 and $45.9 million in 1989.

Ben Hill Griffin III, son of the former chairman and currently vice-chairman and chief executive officer of Alico, stated that, ''The Chairman was particularly fond of Alico and enjoyed spearheading the Company's expansion and diversification efforts.

Griffin III continued, ''As regards the future, I have the same strong commitment to Alico as did the Chairman. We will continue to pursue the goals which had been planned prior to the Chairman's passing. With the assistance of our Board and staff, we anticipate no change in our day-to-day operations.''

The appointment of a new chairman will be considered at the next meeting of the board.

JERUSALEM, ISRAEL (MARCH 1) BUSINESS WIRE - Teva Pharmaceutical Industries Ltd. (NASDAQ: TEVIY), Israel's largest pharmaceutical company, Thursday reported that net income for the year ended Dec. 31, 1989 rose 34 percent on a 27 percent increase in sales.

Sales for the twelve months ended Dec. 31, 1989 reached a record 527,038,000 adjusted New Israeli Shekels (NIS) ($268,486,000 US) compared with 414,374,000 adjusted NIS in the prior year. Operating income rose to 59,479,000 adjusted NIS ($30,300,000 US) from 46,274,000 adjusted NIS in

1988.

Net income for the year increased to 31,646,000 adjusted NIS ($16,121,000 US), or 1.44 adjusted NIS, 1.38 fully diluted, ($0.73, $0.71 US, respectively) per American Depository Receipt (ADR). This was 34 percent higher than the prior year when net income was 23,572,000 adjusted NIS, or 1.07 adjusted NIS per ADR.

Sales for the fourth quarter ended Dec. 31, 1989 amounted to 137,508,000 adjusted NIS ($70,050,000 US), up 6 percent from 137,508,000 adjusted NIS a year earlier.

During the year, Teva's overseas sales increased 33 percent to $116.2 million or 43 percent of total sales compared to 42 percent in the prior year. These sales includes results for TAG Pharmaceuticals Inc., Teva's jointly owned U.S. subsidiary, which rose about 29 percent to a record $60 million.

Teva Pharmaceutical Industries Ltd. (NASDAQ: TEVIY) develops, manufactures and markets human pharmaceuticals, pharmaceutical chemicals, medical disposables, veterinary products, baking yeast and alcohol. The largest supplier of such products to Israel's public and private healthcare markets, the Company has manufacturing facilities in Israel, Western Europe and the United States and markets its products in 50 countries.

NOTE: All results are reported in New Israeli Shekels (NIS) adjusted to the rate of exchange between the NIS and U.S. dollar at December 31, 1989 which was 1.9630 NIS per U.S. dollar and in accordance with Israeli generally accepted accounting principles (GAAP).

CHICAGO (MARCH 1) BUSINESS WIRE - United Airlines said Thursday that, according to industry figures reported to the U.S. Department of Transportation (DOT), it has surpassed Northwest Airlines and Japan Airlines to become the largest airline across the Pacific.

''United Airlines clearly has restored these routes to the level of quality for which they were once famous,'' said Stephen M. Wolf, chairman and president. ''The traveling public has responded to our efforts to build a premier U.S. flag carrier by making United the preferred carrier between the United States and Pacific destinations.

United said it surpassed its competitors by responding to customer demand for quality service in the highly competitive Pacific travel market. After acquiring the Pacific Division of Pan Am in February 1986, United invested millions of dollars refurbishing its fleet of Boeing 747s, upgrading the training of its domestic U.S. and international staff and enhancing its service with quality innovations such as the concierge program it pioneered for international First Class passengers.

Last fall, United announced a $45 million enhancement to its international Business Class service. United also increased its capacity over the last four years through a combination of expanded flying on trans-Pacific routes and upgrading to larger aircraft to meet the growing demand for its international service.

United has more than doubled its Pacific capacity since acquiring Patravel

for the year 1989. United posted 1989 Pacific ASMs of 21,710,000,000 versus 21,338,000,000 for Northwest. Available seat miles are defined as one seat flown one mile.

Additionally, United has surpassed Northwest in revenue passenger miles (RPMs) for the total Pacific every month since September 1989. For the fourth quarter, United posted Pacific RPMs of 3,877,000,000 versus 3,569,000,000 for Northwest. A revenue passenger seat mile is defined as one revenue passenger carried one mile.

Last year, United strengthened its trans-Pacific schedules by adding service between San Francisco and Seoul, Taipei and Tokyo and between Honolulu and Tokyo and its intra-Asian schedules with new service between Tokyo and Bangkok. This month, the airline added non-stop service between Newark and Tokyo.

Capacity also was increased with the addition of the new Boeing 747 400 aircraft on trans-Pacific routes. United presently operates four of these state-of-the-art aircraft in the Los Angeles-Sydney/Melbourne and San Francisco/Hong Kong markets. United will receive eleven additional Boeing 747-400s between now and 1992. United said it plans further expansion of its Pacific operation this summer when the carrier will establish mini-hubs at Seoul and Taipei, add new flights from Bangkok and Singapore and introduce Los Angeles Seoul non-stop service.

WOODBURY, NY (MARCH 1) BUSINESS WIRE - Comverse Technology Inc. (NASDAQ:CMVT) announced Thursday that it has signed a contract with U S WEST Business Resources Inc., on behalf of U S WEST Communications operating units, for the supply of large capacity facsimile store and forward systems.

U S WEST has placed an initial order under this contract for equipment to be delivered in 1990.

The equipment to be provided under this contract is based on Comverse's TRILOGUE Message Management System equipped with FaxLogue, Comverse's unique voice/fax integration option. It will serve as the trial platform for U S WEST's planned test of its recently reported facsimile service.

This service, the first of its kind to be offered by a Regional Bell Operating Company, will be furnished by U S WEST on a subscription basis, and will provide a wide range of options for sending, receiving, and storing fax messages. Callers will be guided by voice instructions to use features such as fax broadcasting and delayed fax sending.

Prior to the contract, U S WEST purchased a TRILOGUE system from Comverse to prototype the new facsimile services. The initial purchase under the contract will be used for the first large scale trials of the serivce scheduled in 1990.

Kobi Alexander, president and chairman of Comverse, stated that ''Comverse is extremely pleased to participate in this first planned offering of advanced fax messaging services to the public.

Comverse, located in Woodbury, N.Y. develops, manufactures and markets high performance computer systems for commercial and defense communications applications, including integrated multi-media message management systems marketed under the name of TRILOGUE.

U S WEST, headquartered in Englewood, Colo., provides telecommunications services to businesses and residential customers in its 14-state area.

DALLAS (MARCH 1) BUSINESS WIRE - Universal Belo (NYSE:BLC), the new joint venture of Universal Press Syndicate (UPS) and A. H. Belo Corp., will introduce and market an unprecedented advertising campaign this spring to increase general newspaper readership.

The campaign centers around the well-known UPS features ''Dear Abby,'' ''Cathy'' and ''Ziggy'' and will be developed for television, radio, and print media. The campaign will be marketed in varying combination packages with a custom tagline to U.S. metropolitan daily newspapers.

Through a combination of animation and live action, the TV campaign underscores how reading the newspaper daily adds value to everyday life.

John McMeel, president of Universal Press Syndicate, said, ''Universal

Belo is responding to the mandate of the American Newspaper Publishers Association -- to increase newspaper readership by targeting and attracting the occasional reader. This program is designed to accomplish that by offering newspapers an affordable and professionally produced media campaign involving three of the most successful syndicated features in the country.''

McMeel added, ''The creators have already been instrumental in the development of a quality newspaper product. Now, they can go another step for editors and publishers to attract readership and make yet another important contribution to the industry.''

Belo president Jim Sheehan commented, ''Many papers across the country lack the resources to create their own campaigns, and other newspapers may need to augment and reinforce existing ad programs. We hope this advertising will provide an extra dimension to current industry efforts to stimulate readership and sales.''

Created by Tracy-Locke Inc. of Dallas, the advertising campaign will be introduced at the International Newspaper Marketing Association convention in New Orleans in May.

Universal Press Syndicate, headquartered in Kansas City, Mo., is the largest independent newspaper syndicate in the country and the parent company of a number of subsidiaries established to provide additional creative opportunities for its columnists, cartoonists, and other non-UPS-related properties.

These include Andrews and McMeel (A&M), the book publishing company, and its gift and stationery division, OZ; Trexler Designs, a mail-order handcrafts operation; and Universal Licensing Corp., which explores other outlets for Universal's creators.

Belo owns The Dallas Morning News and seven community newspapers in the Dallas-Fort Worth area. In addition, Belo owns and operates network-affiliated television stations WFAA-TV (ABC) in Dallas-Fort Worth, Texas, and KHOU-TV (CBS) in Houston; KXTV (CBS) in Sacramento, Calif.; WVEC-TV (ABC) in Hampton-Norfolk, Va.; and KOTV (CBS) in Tulsa, Okla.

MELBOURNE (MARCH 1) BUSINESS WIRE - The Broken Hill Proprietary Company Limited's (NYSE:BHP)subsidiary, BHP Petroleum, announced Thursday that Griffin-1 well, in permit WA-210-P in the Barrow Sub-basin about 96 kilometers north east of Exmouth, has been successfully tested.

Griffin-1 flowed oil from a depth interval of 2656 meters to 2664 meters at a stabilized rate of 5400 barrels a day through a 3/4 inch choke at a flowing pressure of 886 PSI. It also flowed oil at a maximum rate of 6400 barrels a day through a 70/64 inch choke at a flowing pressure of 593 PSI. Oil gravity was measured at 54 degrees API.

No estimates of the size of the reserves would be given at this time. Within the next week further production tests will be carried out over a shallower depth interval.

The Manager Exploration, Northern Australia, Peter Watson said that although it was early days yet, the commercial prospects of Griffin looked very encouraging.

''We're not sure how large the accumulation is and we are looking at the likelihood of further appraisal drilling in order to evaluate it. There is also a further exploration well planned for this year,'' Mr. Watson said.

BHP Petroleum acquired permit WA-210-P in June 1988. The well was spudded in December last year by the drillship Energy Searcher, which also conducted the production test.

After the Energy Searcher has completed its work at Griffin-1, it will drill BHP Petroleum's first exploration well in India. The drilling will take place in KK-OS-VI, a 27,700 sq. km. acreage situated off the west coast of southern India.

As the operator in WA-210-P, BHP Petroleum has 45 percent interest, Mobil Exploration Australia Pty. Ltd. has a 35 percent interest and Inpex Alpha Ltd. has a 20 percent interest.

The Broken Hill Proprietary Company Limited is an international resources company with three principal lines of business: oil and natural gas, minerals, and steel. Headquartered in Melbourne, it operates on six continents. U.S. operations are headquartered in San Francisco, California.

#90060b0799 03/01/1990 ~Business Wire

CHESTNUT HILL, MA (MARCH 1) BUSINESS WIRE - The Neiman Marcus Group Inc. (NYSE:NMG) Thursday reported higher revenues, improved operating margins and increased earnings for the second quarter of its 1990 fiscal year.

For the 14 weeks ended Feb. 3, 1990, the company had revenues of $541.1 million, up 20.4 percent from $449.4 million in the 13 week period a year ago. Operating earnings were $45.9 million, up 32.5 percent from $34.7 million the previous year. Net earnings were $18.5 million in the current year's quarter, up 33.5 percent from $13.8 million a year ago.

After preferred dividends, The Neiman Marcus Group had earnings per share applicable to common shareholders of 38 cents, compared to 24 cents in last year's quarter. Fiscal 1990 is a 53-week year with the additional week included in the second quarter of the current year.

For the 27 weeks ended Feb. 3, 1990, the company reported revenues of $940.2 million, up 20.4 percent from $780.8 million in the 26 week period a year earlier. Operating earnings were $78.0 million, a 30.2 percent increase from $59.9 million the previous year.

Net earnings were $30.4 million in the first half of fiscal 1990, up 27.8 percent from last year's earnings of $23.8 million. After preferred dividends, earnings per share applicable to common shareholders were 56 cents, up from 35 cents last year.

The company reported that merchandise inventories at the end of the quarter were $253.9 million, compared to $238.3 million a year earlier. Smith indicated that overall, inventories were current and at satisfactory levels with the exception of Horchow, where disappointing sales have resulted in higher-than-planned inventories.

The effect of the LIFO method of accounting for inventories compared to the FIFO method was to decrease pre-tax earnings in the second quarter of fiscal 1990 by $2.0 million compared to $3.5 million in the previous year.

The Neiman Marcus Group is a leading specialty retailer which is 60

percent owned by General Cinema Corp. Its three operating units are Neiman Marcus, Bergdorf Goodman and Contempo Casuals.

TAMPA, FL (MARCH 1) BUSINESS WIRE - Eastern Environmental Services Inc. (NASDAQ: EESI) Thursday announced that it plans to construct a waste reduction and recycling facility at its wholly owned landfill subsidiary.

This facility will increase the amount of waste which the landfill can accept by reducing the volume of waste brought to the landfill for disposal. The recycling facility may also convert certain waste materials into marketable products including alternative energy sources.

Installing a waste reduction and recycling facility at EESI's landfill should increase company profits by increasing the amount of waste materials which the profitable landfill subsidiary can accept, stated EESI Chairman William C. Skuba.

The sale of certain recycled waste products produced by the facility may also generate additional revenue for the landfill subsidiary stated Skuba. Company principals anticipate that the recycling facility may be fully operational within the next several months.

EESI has recently entered into three preliminary agreements to acquire additional landfills in the Southeast, Midwest and Northeast United States and may construct similar recycling facilities at these sites. Acquisition of additional landfills is part of EESI's plan to concentrate primarily on landfills and waste transportation.

BURLINGTON, MA. (MARCH 1) BUSINESS WIRE - M/A-COM Inc. (NYSE:MAI) announced Thursday the integration of its Solid State Products Division located in Hudson, N.H., with its Passive Products Division located in Merrimack, N.H.

The combined operation, a part of M/A-COM's Signal Processing Components

Group, will be located in the existing M/A-COM facility in Merrimack.

Dr. Thomas A. Vanderslice, chairman and chief executive officer, said, ''This action is part of M/A-COM's ongoing effort to lower fixed and indirect costs in order to successfully compete in its increasingly competitive military and commercial marketplaces.'' The Merrimack facility will undergo considerable modification and remodeling to enable the integration to occur with minimal disruption.

Dr. Vanderslice added, ''Since the two divisions' product lines have no significant overlap, the vast majority of employees will be transferred to Merrimack from Hudson or will remain in Merrimack in their present positions.'' A small workforce reduction of less than 20 people of the combined population of over 600 employees has taken place in order to better align the operations for the consolidation.

The Hudson facility will be sold upon completion of the consolidation which is expected to occur by late in the year.

M/A-COM is a leading producer of radio frequency, microwave and millimeter wave semiconductors, components and subsystems for applications in telecommunications, radar, navigation, missile guidance, electronic warfare, surveillance and command-control- communications-intelligence (C3I) systems. M/A-COM also supplies surveillance products used in intelligence collection applications.

The company's products are used primarily in defense electronics systems, but also have numerous commercial applications.

CHICAGO (MARCH 1) BUSINESS WIRE - The board of directors of AM International Inc. Thursday approved the sale of the company's Wohlenberg machine tool and foundry businesses to Bremer Vulkan AG.

The Wohlenberg machine tool and foundry businesses, with about $20 million in revenues and some 200 employees, will become part of Vulkan Industrie Gmbh, a unit of Bremer Vulkan AG.

Terms of the sale, which is scheduled to be completed for cash within the next 60 days, were not disclosed. The sale will reduce goodwill but will have no profit impact.

AM International, with world headquarters in Chicago, sells and services a

wide range of design, display, reproduction and finishing products and supplies to the worldwide graphics industry.

The company conducts its business through group and division operations, 16 subsidiaries and a dealer organization located in over 100 countries. AM International's annual revenues are in excess of $900 million.

AM International's common and preferred shares are traded on the New York, Pacific and Midwest Stock Exchanges under the ticker symbol ''AM''. The company's warrants are traded on the American Stock Exchange under the ticker symbol ''AML.WS.''

#90060b0829 03/01/1990 ~Business Wire

WASHINGTON (MARCH 1) BUSINESS WIRE - The Avionics Group of Rockwell International Corp. announced Thursday that the company has begun developing a cost-competitive, two-way satellite data communications and automatic vehicle location service for users in North America.

Rockwell will offer a complete satcom service featuring mobile terminals and dispatch system interfaces. A Rockwell-developed control center will use advanced data switching to efficiently route communications and location messages between vehicles and dispatchers.

The company has applied for a license with the Federal Communications Commission which would enable the system to use the satellite services of the American Mobile Satellite Corp.

The Rockwell mobile L-band satcom equipment will allow vehicle fleet dispatchers to broadcast messages to entire fleets or to a group of vehicles -- or to conduct two-way communications with a specific vehicle.

In 1985, the Collins Avionics Divisions of Rockwell International participated with a team of five organizations in demonstrations of a two-way aeronautical satellite communications data link during a series of flights over the North Atlantic Ocean.

The objective of the demonstrations was to verify the technical characteristics for an airborne satellite data link which could be used to improve communications and air traffic control surveillance capabilities in oceanic airspace.

A data link system, satcom transceiver and a Navstar Global Positioning System receiver were integrated into an operational satcom/positioning system for the flights by the Rockwell division.

Following the flight demonstrations, the Collins Air Transport Division developed a two-way L-band satcom system for commercial airlines. The system will provide weather and air traffic control information for transoceanic flights in addition to passenger telephone service.

The system has been ordered by 5 major airlines -- Cathay Pacific, Japan Airlines, Northwest, United, Qantes -- and the U.S. Federal Aviation Administration. The system is scheduled to be in operational service early in 1990.

Rockwell International is a $12 billion, multi-industry company applying advanced technology to a wide range of products in its aerospace, electronics, automotive and graphics businesses.

NEW YORK (MARCH 1) BUSINESS WIRE - Granada Investments Inc. announced Thursday that in its court action aginst DWG Corp. (ASE:DWG) a trial date of May 1st, 1990 has been set and a show cause hearing has been scheduled for this coming Monday (March 5, 1990) to determine why an investigative audit team should not be apppointed by the Federal Court.

Chief Judge Thomas D. Lambros of the Ohio Federal District Court stated in his order that the ''appointment of an investigatory audit team with full and unfettered access to the books, records, financial and management

employees, and auditors of DWG Corporation, its controlled subsidiaries and affiliated entities as the audit team shall deem necessary is appropriate.''

The judge stated that ''The parties reported that settlement discussions continue, although no final resolution has yet been achieved. Many issues however, have been resolved.''

The judge further stated that ''The parties shall continue in thier attempt to settle this matter.''

In its suit filed in U.S. District Court in Cleveland last year, Granada charged the DWG board of directors and its principal shareholder Victor I. Posner, with breach of fiduciary duty for refusing to consider the $22 cash per share merger offer for all outstanding common stock of DWG, which was submitted by Granada to DWG's board of directors in March of 1989.

DWG Corp. (ASE:DWG) manufactures apparel textiles, distributes liquefied petroleum gas, produces Royal Crown soft drinks, owns the Arby's fast-food chain and processes and distributes citrus products.

WAYLAND, MA (MARCH 1) BUSINESS WIRE - Candela Laser Corp. (CLZR) announced Thursday that it has filed suit against Technomed International Inc. and Technomed International S.A. in the U.S. District Court for the District of Massachusetts charging infringement of United States Patent No. 4,887,600.

The General Hospital Corp. (MGH), the co-owner of the patent, joined the suit. This Patent covers major technology and instrumentation for treating calcified objects within the body by laser induced shockwaves. The patented technology was jointly developed and has applications in treating kidney stones, gallstones and other calcified materials.

Candela Laser Corp. first obtained approval for its product in 1987 and has successfully introduced the product into this country and several foreign markets. In December, 1989, the United States Patent issued for the technology. Patents have issued in five other countries and additional foreign patents are pending.

Candela is seeking injunctive relief against the continued infringement by Technomed. Candela intends to aggressively enforce the patent rights in

order to protect and foster their continued research activities.

HOUSTON (MARCH 1) BUSINESS WIRE - Powell Industries Inc. (NASDAQ: POWL) Thursday reported record first quarter revenues. For the fiscal quarter ended Jan. 31, revenues from continuing operations were $28,837,000, an increase of $11,073,000 (62 percent) from $17,764,000 for the first quarter of 1989.

Earnings from continuing operations for the quarter were $1,086,000 or 10 cents per share compared to $576,000 or 6 cents per share for the first quarter of 1989, an increase of $510,000 (89 percent).

Net earnings for the quarter were $1,086,000 or 10 cents per share compared to $297,000 or 3 cents per share in the first quarter of fiscal 1989. The order backlog at Jan. 31, was $70.4 million, a 23 percent percent increase from the $57.4 million backlog at Jan. 31, 1989.

Thomas W. Powell, president and chairman of the board of Powell Industries, Inc., stated: ''Despite higher costs in the switchgear division of our business, we were able to achieve the improved results in our first quarter due to the turnaround and profitable operations of U.S. Turbine Corp., as well as continued improvement in our Unibus and our Delta-Unibus operations.

''Revenues and profitability of U.S. Turbine, which designs, packages, installs and services gas turbine and engine generator sets, primarily for the cogeneration market, increased significantly over the prior year's first quarter. I am optimistic U.S. Turbine will maintain its profitability throughout the 1990 fiscal year.

''The outlook for most areas of our business remains good for 1990. Our capital resources and liquidity are strong with only $15 million of our $20 million bank line currently borrowed. With the new programs we are implementing, I am confident we will continue to improve our operations."

COLUMBUS, OH (MARCH 1) BUSINESS WIRE - Buckeye Financial Corp., parent of Buckeye Federal Savings and Loan Association, announced Thursday the signing of a definitive agreement for the acquisition of Buckeye by National City Corp., parent of BancOhio National Bank.

Under the terms of the agreement, Buckeye shareholders will receive .2 shares of National City Corp. stock and $3.08 in cash for each share of Buckeye stock. Completion of the merger, which is subject to approval by regulatory agencies and Buckeye's shareholders, is anticipated by the third quarter of 1990. Until that time all Buckeye offices will continue to operate as usual.

Buckeye also said that its Employee Stock Ownership Plan (''ESOP'') intends to purchase approximately 105,000 shares of Buckeye common stock to fulfill a commitment made to employee participants in the ESOP. The purchase will be made pursuant to Internal Revenue Code requirements and will enable Buckeye to avoid the payment of excise taxes. Buckeye said the ESOP plans to purchase the stock promptly either in the over-the-counter market or in private transactions. Buckeye currently has 2,665,102 shares outstanding.

Buckeye Federal, headquartered in Columbus, had year-end assets of $928 million. BancOhio had year-end assets of $5.9 billion.

DALLAS-FORT WORTH AIRPORT (MARCH 1) BUSINESS WIRE - American Airlines will inaugurate the first nonstop San Jose-Honolulu service Friday, March 2 with ceremonies beginning at 5 p.m. at Gate 15, at San Jose International Airport.

''This important step in the development of our San Jose hub not only makes it easier for Silicon Valley citizens to access the splendors of Hawaii, it brings Australia and New Zealand closer as well,'' said Anthony DeSocio, regional sales manager. ''And it further opens both the pleasure and business opportunities of the Pacific to the entire Western United States.''

Flight 955 will leave San Jose at 7 p.m. Friday. The DC-10 will arrive in Honolulu at 10:33 p.m. The return flight, flight 278, leaves at 12:30 a.m. and arrives in San Jose at 7:23 a.m. Both flights offer connections with American's newest service -- flights to Sydney, Australia and Auckland, New Zealand.

''This hub opened just over a year ago, and already we have seen excellent growth,'' said John Ross, American's manager for San Jose. ''We are pleased with the community's support.''

American last year applied for San Jose-Tokyo service in a route case which has since been decided in favor of a competing airline out of another gateway. ''That is not a final decision and we are certain that San Jose is the best gateway, and American is the best carrier for this route,'' DeSocio said. ''We will continue to press our case.''

American has also applied for San Jose-Tokyo and San Jose-Nagoya authority under a new route case. ''American is an outstanding choice for new Pacific-rim traffic, and we will pursue this and other opportunities for growth,'' he said. ''We know we can count on San Jose's continued support and look forward to working closely with the community as we expand.''"

BRENTWOOD, TN. (MARCH 1) BUSINESS WIRE - George L. McTavish, president and chief executive officer of Comdata Holdings Corp. (NASDAQ/NMS:CMDT), Thursday announced results for the year ended Dec. 31, 1989.

Highlights of the year included a 43 percent increase in revenues and a 36 percent increase in income from operations.

McTavish pointed out that the company recorded an expense of approximately $5.7 million in the fourth quarter. The expenses resulted primarily from a reduction in the carrying value of certain real estate holdings following the consolidation of the company's offices during the fall of 1989 and the write-down of certain equipment in the Retail Services Division in anticipation of the introduction of new products and services in 1990.

Of the total $5.7 million expense, $1.9 million was recorded as a restructuring charge and the remainder was recorded as a reduction in income from operations.

Revenues for 1989 advanced to $159,229,000 from $111,315,000 last year. Operating income for the period totaled $39,776,000 compared with $29,111,000 in 1988. The net loss for the year totaled $11,712,000, or 35 cents per share, vs. a net loss of $8,805,000, or 29 cents per share, in 1988 and reflected the special charges discussed above.

Comdata is a leading supplier of funds transfer, cash advance, permits, check guarantee and telecommunications services to the transportation, leisure and retail industries. The company's shares are traded in the NASDAQ National Market System under the symbol CMDT.

WASHINGTON (MARCH 1) COMTEX - The 8-K report filed at the SEC shows on Feb. 1, 1990, Automobile Protection Corp. acquired substantially all assets of Aftermarket Profits Plus Inc., in accordance with an asset purchase agreement dated Jan. 31, 1990.

Automobile Protection immediately transferred the assets of Aftermarket to its wholly owned subsidiary, AutoCredit Financial Inc., which intends to change its name to Aftermarket Profits Plus Inc. once all purchase contingencies are satisfied.

The price paid was $234,000 in cash plus options to purchase 132,000 shares of Automobile Protection at $1.00 each up until Feb. 1, 1995, plus the payment to Aftermarket's former owner of 20% of the pre-tax net income of Autocredit Financial Inc., up to a maximum aggregate sum of $1 million.

Aftermarket Profits served as a marketing and consulting firm, developing methods for evaluating an automobile dealer's management and accounting practices with designs to increase efficiency and profitability and customer satisfaction.

#90060c0051 03/01/1990 ~Comtex

WASHINGTON (MARCH 1) COMTEX - The 8-K report filed at the SEC shows North American Bancorporation Inc. (NAB) of Waterbury, Connecticut, lost $1.11 million, or $0.68 per share, for its 1989 fiscal year. This result compares with earnings of $1.44 million, or $0.44 per share, for fiscal 1988.

NAB owns and operates North American Bank and Trust Co. and attributes results for 1989 to the bank's operations. As assessed by the president of NAB in the 8-K, the 1989 loss was principally attributable to "the steep downturn in the East Coast real estate market values, which adversely impacted loans made by the bank in earlier years and the capacity of borrowers to service and repay these loans.

"Other conditions contrubuting to the loss were a decline in the growth rate of the Connecticut economy in late 1988, impacting other borrowers, and uncertainty about the future direction of this economy in the face of real estate industry problems, and state and municipal deficits."

The president continues, "The bank reacted to these conditions by increasing substantially its reserve against loan losses in 1989 and charging off loans of questionable collectibility. The increase in the loss reserve totalled $3,690,000 for the year versus $496,000 in 1988; and the charge off of loans totalled $2,308,000 in 1989 versus $159,000 in 1988."

According to the 8-K filing, the bank is also cutting expenses by laying off non-essential employees and not filling positions as they become vacant.

The executive office of North American Bancorporation is located at 132 Grand Street, Waterbury, CT 06702, and its telephone number is (203) 573-4960.

-30- 1846

#90060c0052 03/01/1990 ~Comtex

WASHINGTON (MARCH 1) COMTEX - The 8-K report filed at the SEC shows on Feb. 15, 1989, SIS Corp. engaged the services of Laventhol & Horwath as their independent public accountants.

Laventhol & Horwath had assisted the company prior to their engagement in preparing a pro forma balance sheet for inclusion in the company's reorganization plan with the bankcruptcy court.

For the previous two years, audits performed by its former auditors contained no adverse opinion or disclaimer of opinion nor were they modified as to uncertainty, audit scope, or accounting principles.

For the previous two years, there were no disagreements between the former auditors and the company.

WASHINGTON (MARCH 1) COMTEX - The 10-Q report filed at the NASD shows Pro-Dex Inc. earned $11,841, or $0.01 per share, on revenues of $484,828 for the quarter ended Dec. 31, 1989.

This compares with losses of $177,000, or $0.15 per share, on revenues of $518,100 for the same period in 1988.

-30- 440

#90060c0054 03/01/1990 ~Comtex

WASHINGTON (MARCH 1) COMTEX - The 8-K report filed at the SEC shows Raycomm Transworld Industries Inc.'s former public accountants of Blonder, Seymour & Shapss refused to issue a letter agreeing to statements on an 8-K filed by Raycomm on Feb. 7, 1990. Those statements regarded agreement and general non-dispute between Raycomm and Blonder, Syemour & Shapss over issues of accounting and business practice for the two years prior to that dismissal.

The former accountants refused to write the release letter because they claimed that because of an outstanding indebtedness of Raycomm to the accounting firm, it no longer considered itself independent and, accordingly, the letter would not be furnished until the independence issue was resolved.

#90060c0096 03/01/1990 ~Comtex

WASHINGTON (MARCH 1) COMTEX - Several government agencies today endorsed the objectives in a bill banning "backhauling," the practice of transporting food or beverages in trucks which are also used to transport garbage and chemicals, but disagreed on who should take the lead in enforcing such a measure.

"The practice of putting hazardous chemicals in a tanker with food is ridiculous," declared Sen. Albert Gore (D-TN). "No one should be afraid our food is contaminated. There must be a law to end this."

John Daly, the assistant director of the Department of Agriculture, told the Senate Subcommittee on Surface Transportation that it is impossible for individual states to regulate interstate commerce and that Congress should pass a law on the national level which would be a blueprint in establishing state programs.

Daly estimates the problem is probably not widespread but concedes it is difficult to quantify.

"Some truckers keep two different sets of records of what they transport," Daly said. "I would guess that less than 1 percent engage in backhauling but when you have 125,000 tankers in the United States, that's a substantial figure."

There are two Senate bills circulating which would ban backhauling. The legislation would give the Department of Transportation a leading role in establishing and enforcing regulations to end this practice. But DOT is not interested.

"While DOT endorses the objectives of the bills, we don't share the view that DOT should take a lead role," said Alan Roberts, director of the Office of Hazardous Materials for the DOT. "We believe the issue should be addressed by agencies with expertise in the area - Department of Agriculture, Heath and Human Services, the Food and Drug Administration."

"We have to mix it up -- trucking (DOT) with food (FDA)," Gore responded. "We must cross jurisdictional lines. I want the DOT to come forward and help solve this problem."

Officials from the Department of Agriculture and FDA told the Senate panel that they have not come across any specific instances of food contamination resulting from backhauling but acknowledged action must be taken on this matter.

"Our investigations have not identified actual contamination from backhauling practices," said Robert Lake, director of the Office of Compliance, Center for Food Safety of the FDA.

"There is no instances of meat or poultry contamination as a result of this issue," said Dr. Wilson Horn of the Department of Agriculture. "We are, however, concerned about the potential of this problem. There is no reason to haul garbage in refrigerated trucks."

When asked if there should be better coordination between the government departments, DOT's Roberts replied "no, because the areas of violations fall on the other agencies."

"We're not taking a hands off attitude," he added. "This is a systems issue. This would assign new statutory authority to DOT which already exists in other agencies. "We don't have the resources or time to duplicate them."

An exasperated Sen. Slade Gorton (R-WA) took issue with Roberts. "The DOT testimony is bizarre," Gorton said. "Maybe your saying you don't care or we should not pass the statute because you won't enforce it."

Lake said the FDA had the expertise and authority to handle the problem, but added, "My impression is expectations probably go beyond anyone's authority for enforcement. The FDA samples the food to check for contaminants, not the trucks themselves."

HONG KONG (MARCH 2) - Taiwan traders bought Chinese raw silk on the local market in the past week amid a price-cut caused by plentiful supplies across the border, local traders reported Friday.

The undisclosed quantity of the Taiwan purchase was made for grade "AAA" spots of Chinese raw silk steam filature white 2022 denier at around 52 U.S. dollars a kilo, down from the previous week's 54 U.S. dollars, they said.

They said they had to dispose of their stocks at cheaper prices as supplies of the commodity were abundant at a recent silk fair in Chengdu, central China.

At the fair April-June futures of the commodity were going for only 50 U.S. dollars a kilo, according to the dealers here.

SEOUL, March 1 (AFP) - South Korea's consumer prices rose by 0.9 percent in February following a one percent rise in January, the government's Economic Planning Board reported Thursday.

The report stressed that the price rise in the last two months was nearly four times the 0.5 percent rise registered during the same period last year.

Analysts said that the figures indicated the government's target of five to seven percent price rises this year was no longer realistic.

They also pointed out that the February figures did not include a sharp 50 percent increase in housing rents in the last two months amid the continuing increase in real estate costs.

The government has said it plans to lower electricity, city gas and telephone charges to curb inflationary pressure.

The Korean Chamber of Commerce and Industry also reported signs of stagflation as the economy remained stagnant, while prices of daily necessities rose by 10 to 20 percent in the last two months.

Last year, South Korea registered 5.2 percent inflation.

#90060d4140 03/01/1990 ~French/German News Agency

SYDNEY, March 1 (AFP) - Australia sank further into debt Thursday on the eve of a business summit called to discuss ways of dragging the country out of the red and with a general election only three weeks away.

The Bureau of Statistics reported Thursday that Australia's net foreign debt ballooned by 19 percent last year to 118.4 billion Australian dollars

(89.7 billion U.S.) at the end of December, compared with the previous year's 99.3 billion dollars (75.2 billion U.S.).

The bureau also reported the deficit on the current account for January was 1.97 billion dollars (1.49 billion U.S.), up 27 percent on January 1989.

The cumulative deficit for the first seven months of the June 30 fiscal year was 12.38 billion dollars (9.37 billion U.S.), 30 percent worse than the 9.5 billion dollars (7.19 billion U.S.) in the same period the previous year.

And the net income deficit, which is largely made up of interest payments on overseas loans, contributed 1.16 billion dollars (870 million U.S.) to the January shortfall - five percent more than the previous year - and accounted for 7.76 billion dollars (5.9 billion U.S) or 60 percent of the year's cumulative deficit.

The data offers little joy to a government facing the voters on March 24, with the state of the economy a key issue.

Fuelling the economic debate is a conference on Australia's foreign debt, which gets under way Friday in Melbourne.

The Business Council of Australia (BCA) has called a National Business Summit on Debt, involving some 350 delegates discussing how to deal with Australia's growing overseas indebtedness.

Treasurer Paul Keating said Thursday the January balance of payments figures, when taken with those of recent months, showed the economy was slowing and provided scope for further falls in interest rates.

Mr. Keating has forecast that Australia's overall current account deficit would stabilise within three years at about 2.5 percent of Gross Domestic Product (GDP).

That would also bring foreign debt back to about 2.5 percent of GDP and allow Australia to "emerge once again as a modern, sophisticated industrial economy and not just a backward place shipping a bit of wheat and wool."

TOKYO (MARCH 1) - New vehicle sales in Japan jumped 27.3 percent in January from a year earlier to 496,620, the Federation of Japan Automobile Dealers' Association said Thursday.

Association officials attributed the sharp increase to the Japanese economy's continued boom.

Sales of passenger cars soared 36.2 percent to 364,000 and sales of trucks rose 7.9 percent to 131,000, although bus sales fell 1.9 percent to 1,580, it said.

JAKARTA (MARCH 1) - Bank Duta, one of Indonesia's largest private banks, plans to sell shares on the Jakarta Stock Exchange (JSE), Bisnis Indonesia daily reported Thursday.

President Suharto, who heads the three charity foundations that control 90 per cent of the bank's equity, has given the go ahead to the planned listing, Bisnis quoted Bank Duta President Abdulgani as saying.

The bank planned to place 24.9 percent of its equity, or 35 million shares, and raise between 110 million and 138 million dollars, Mr. Abdulgani said.

Talks were currently under way with the capital market executive agency and formal listing was expected in May, he added.

Bank Duta is ranked as the fourth largest private bank in the country with total assets of 1.05 billion dollars as at the end of last year.

Seven banks are currently listed in the JSE and two others besides Bank Duta are in the process of going public. Indonesian law bars foreign investors from owning shares in national banks.

WIESBADEN, West Germany (MARCH 1) - West German import prices fell 0.6 percent in January over the December level, the federal statistics office said here Thursday.

On a year on year basis, import prices were down 1.7 percent, the first annualised fall since April 1988.

Domestic fuel prices fell 11 percent in January, and non-ferrous metals 6.7 percent, while natural gas prices rose five percent and petrol 8.6 percent.

SOFIA (MARCH 1) - Bulgaria expects a 1.2 billion leva (1.2 billion dollars) budget deficit for 1990 with foreign debt up 660 million dollars over the current 10.84 billion dollars, the Communist Party daily said

Thursday.

Gross national product is expected to fall 4.4 percent and national revenue will be down 3.7 percent according to the budget approved by the parliamentary economic development commission Wednesday, the Rabotnitchesko De

Subsidies would be reduced by 1.5 billion leva, spending on management organisations would be cut by 50 million leva and investment by 700 million leva.

Subsidies to political organisations will be scrapped, meaning a saving for the government of 192 million leva.

The Bulgarian parliament is to approve an economic development programme, the budget and economic reforms during a session which opens Monday.

#90060d5120 03/01/1990 ~French/German News Agency

TAIPEI (MARCH 1) - Taiwan has bowed to pressure from its business community and has opened direct trade links with the Soviet Union and Albania effective Thursday, an official said here.

Hsu Ko-sheng, director general of the Board of Foreign Trade (BOFT) said that following the political changes in Eastern Europe, "the Cabinet decided to officially open direct trade ties with the Soviet Union and Albania."

He said the move would help local exporters to diversify their overseas outlets and help manufacturers acquire cheaper raw materials.

The right-wing Nationalist government here had allowed only indirect business contacts with the Soviet Union and Albania, which it considers hostile. Trading with other Eastern European countries is unrestricted.

The Soviet Union, Taiwan's largest trading partner in Eastern Europe followed by Poland and East Germany, indirectly shipped 105.57 million U.S. dollars worth of goods to Taiwan last year, a 242 percent surge over 1988, according to statistics compiled by the BOFT.

Exports from this export-oriented island to the Soviet market grew 914 per cent to 35.77 million U.S. dollars over the same period. Taiwan exported consumer goods, electrical appliances and information products and imported lumber, minerals and industrial raw materials.

BOFT statistics also showed that trade between Taiwan and Eastern European, including the Soviet Union, increased 30 percent to 547.28 million dollars

last year, amounting to 0.43 percent of the island's total foreign trade in 1989.

#90060d5290 03/01/1990 ~French/German News Agency

EINDHOVEN, Netherlands (MARCH 1) - Dutch electronics group Philips reported Thursday a 30.1 percent rise in net profits last year to 1.37 billion guilder (650 million dollars).

Consolidated turnover was up two percent at 57.2 billion guilder (28.5 billion dollars), and operating profit fell 4.2 percent to 2.3 billion guilder (1.1 billion dollars).

Dividend for the year was unchanged at two guilder.

Exceptional items accounted for 582 million guilder, largely due to "movements in Philip's property interests," group president Cor van der Klugt said.

He gave no details, but financial sources said the sale of Philips' Paris offices in the third quarter accounted for profit of around 250 to 300 million guilder.

Consumer items such as household electrical appliances remained the key activity with turnover up nine per cent at 23.5 billion guilder, and operating profit more than doubled at 1.1 billion guilder.

Mr. van der Klugt said the relative stagnation of the lighting sector, with turnover up nine per cent at 7.5 billion guilder and operating profit down 5.4 per cent at 763 million guilder was due to falling profit margins in Latin America.

"Galloping inflation (in this region) could not be compensated for in retail prices," he said.

The computer systems and integrated circuits divisions made heavy losses, and were not expected to move out of the red in the next two years, Mr. van der Klugt said, but Philips would continue to invest in this sector until it became profitable.

He was apparently seeking to scotch rumours that Philips was planning to move out of this sector eventually.

#90060d5920 03/01/1990 ~French/German News Agency

TOKYO (MARCH 1) - Japan's holdings of gold and foreign exchange reserves

dropped 2.27 billion dollars from the previous month to 80.44 billion dollars at the end of February, the Finance Ministry said Thursday.

The decline followed a 2.2 billion dollar fall in January and reflected sales of dollars by the Bank of Japan to support the yen, officials said.

The Japanese currency fell sharply towards the end of the month, fluctuating between a high of 144.10 yen to the dollar and a low of 149.50 yen.

-30- 687

#90060d5930 03/01/1990 ~French/German News Agency

TOKYO (MARCH 1) - Japan and the United States are likely to conclude a new supercomputer agreement to guarantee a fair and open market here for U.S. companies, a senior U.S. official said Thursday.

The official, who attended the two-day talks on supercomputers which ended here Thursday, said the negotiations had come to an "interesting phase" where the two sides were talking over "actual terms of the new arrangement which the Japanese government would use to purchase computers."

Both governments plan to reach a new agreement "on a reasonable schedule," he said, adding that it was desirable to conclude an agreement before U.S. Trade Representative Carla Hills reviewed the issue at the end of April.

Since the 1987 supercomputer agreement, the U.S. official said, the Japanese government had not bought a single U.S. supercomputer.

The two sides will hold another meeting soon but the date has not been fixed, he added.

During the two days of talks, U.S. delegates criticized Japanese companies for selling supercomputers to government organizations and universities at excessive discounts, a senior Japanese trade official said at a press briefing.

The U.S. side also pointed out that the Japanese government's insufficient budget allocation for U.S. supercomputers hampered sales, the official said.

Washington has charged that U.S. companies were effectively barred from selling supercomputers to government organizations due to the lack of an open and competitive procurement procedure.

Together with satellites and forest products, supercomputers have been targeted by Washington as unfair trade areas, a designation that could lead to retaliation under the so-called "Super 301" provision of the 1988

Trade Act.

#90060d6030 03/01/1990 ~French/German News Agency
TOKYO (MARCH 1) - Japan Air Lines (JAL) said Thursday it would enter negotiations with the East German and Hungarian flag carriers for possible tie-ups with the East European airlines.

The agreement to start talks has been reached between a 10-member JAL mission which visited the two countries recently and ranking officials of East Germany's Interflug and Mariv Hungarian Airlines, JAL officials said.

"This will be the first time for a Japanese airline to join hands with the East German and Hungarian carriers," a JAL official said.

JAL would first discuss cooperation on ticket sales connecting JAL flights with Interflug and Mariv flights.

They also said JAL hoped to inaugurate regular flights from Japan to Berlin and Budapest in the future.

TOKYO (MARCH 1) - Japan's Matsushita Electric Industrial Co. Ltd., one of the world's largest consumer electronics manufacturers, said Thursday it would supply video camcorders to Siemens-Electrogerate GmbH of West Germany.

Matsushita will manufacture 20,000 video camcorders a year for a consumer electronics division of Siemens AG starting this year.

Siemens will receive two types of video camcorders designed for Video Home System (VHS), VHS compact (VHS-C) and a better quality video, Super VHS-C.

The German company will sell the new products through its specialized dealers throughout Europe as well as Australia, Singapore and Hong Kong.

The new Siemens video will be sold from May along with existing 8mm camcorders, another format of home video cameras.

Matsushita sells its camcorders throughout the world under the brand name of National, Panasonic, Technics and Quasar.

PARIS (MARCH 1) - The European space consortium Arianespace has won a new U.S. contract to launch two satellites, it was announced here Thursday, a week after an Ariane rocket blew up shortly after takeoff with two Japanese satellites on board.

The two new satellites, Galaxy VI and Galaxy VII, made by Hughes Communications Inc and each weighing 2,575 kilograms (5,665 pounds), are to be launched in 1992 and 1993, the two companies said in a joint statement.

With the new order, Arianespace has 34 satellite launches on its order books with a total value of 14.2 billion francs (2.4 billion dollars).

The contract with Hughes includes an option for the launch of two more satellites of the same type.

The deal was signed in Washington by Arianespace president Frederic d'Allest and Hughes chief Stephen Petrucci.

Hughes had put the launch of the Galaxy satellites out to tender "open to all space transport companies in operation," Mr. Petrucci said in the joint statement.

"We chose Arianespace for its commercial competitivity and its technical and operational competence."

Mr. Allest said that Arianespace was "particularly impressed by the renewed confidence shown in the signing of this major contract by Hughes, the largest private satellite operator and one of the world's leading satellite builders."

Galaxy VI and Galaxy VII are from Hughes' new generation of HS-601 series, and have a 12-year operating life in orbit.

They will be used to relay television and private telecommunications networks.

The 36th Ariane rocket blew up soon after lift-off from Kouru in French Guiana last Thursday with two Japanese satellites on board, triggering speculation that the setback might affect orders.

#90060d6220 03/01/1990 ~French/German News Agency

LONDON (MARCH 1) - British insurance company Royal Insurance said Thursday its pre-tax profit fell 43.4 percent last year to 126 million pounds (210 million dollars).

The fall was in line with market expectations, and was largely due to increased payments during the year due to Hurricane Hugo in the United States, earthquakes in San Francisco and Australia and storm damage in Britain.

Total revenue from premiums was up 19.5 percent at 4.74 billion pounds (7.9 billion dollars), and dividend for the year was put at 25.5 pence, up from 22.5 in 1988.

Royal Insurance shares were down 15 pence at 180 in mid-morning trading in London.

#90060d7100 03/01/1990 ~French/German News Agency

FRANKFURT, West Germany (MARCH 1) - The West German banking authorities on Thursday ordered an audit of the accounts of the DG Bank, involved in a multi-million dollar dispute over bond dealings with several French banks.

"We have handed over the accounts of DG Bank to a specialised audit firm," said Ludwig Stauch of the federal office charged with overseeing the operations of West German banks.

Earlier Thursday, French Economy Minister Pierre Beregovy had urged the French central bank and the country's banking commission to "intervene actively with the West German authorities" in the dispute.

"Like Mr. Beregovoy, we are of the opinion that our banking institutions should fulfil their engagements," Mr. Stauch said.

"The question is to find out exactly what undertakings were given by the DG Bank."

The Deutsche Genossenschaftesbank (DG Bank) has rejected claims by nine rench banks that it had promised to repurchase West German government bonds it sold to them.

The dispute has blazed into a multi-million dollar scandal because of a steep fall in bond prices since the deals were made, and DG Bank has said the French banks stand to lose 560 million Deutsche marks (333 million dollars).

DG Bank has argued that there was no written commitment to buy back the bonds, and that it is not bound by verbal assurances given by an employee acting in excess of his authority.

The bank has also alleged that it has been the victim of a fraud and has filed charges against former employee Friedrich Steil.

Several of the French banks have said however that they do have written confirmation of the repurchasing commitment, and have also argued that DG Bank cannot offload responsibility for the problem onto a third party employed by the bank and acting in its name.

MOSCOW (MARCH 1) - Cuba is the Soviet Union's biggest debtor, owing the equivalent of 24 billion dollars of Moscow's total loans out of 137 billion dollars equivalent, the Izvestia newspaper said Thursday.

Cuba headed a list of 49 debtor countries published by Izvestia with 15.4 billion rubles, followed by Mongolia with 9.54 billion and Vietnam with 9.1 billion.

Izvestia said that much of the debt came from arms supplies and that Moscow could not hope to recover all it was owed.

The list of major debtors included countries whose military equipment is supplied almost entirely by Moscow.

Iraq was one of the major debtors, at 3.79 billion rubles, but Iran's debt totalled only one billion rubles.

India, which has a large amount of Soviet-supplied military equipment, was fourth on the list with 8.9 billion rubles.

#90060d8110 03/01/1990 ~French/German News Agency
CAPE TOWN (MARCH 1) - President Frederik de Klerk said Thursday he had learned of an alleged army death squad for the first time in January, from Minster of Defense General Magnus Malan.

Mr. De Klerk, reported Wednesday to have been unaware of the unit before this year, told a special combined sitting of the three Houses of Parliament here that "everybody wanted to know whether I knew of the...Civil Cooperation Bureau" and he now wished to "enlighten" the Houses.

Mr. De Klerk said Gen. Malan had at a meeting in January given him details of the CCB and had later outlined the charges being levelled against it in the press.

The CCB has been described in the press since mid-February to have been a squad used to assassinate anti-government activists and known to top army generals and Gen. Malan.

Mr. De Klerk also told the Houses a judicial commission he had appointed in January to investigate death squad charges would also probe the role of Namibian anti-apartheid lawyer Anton Lubowski, gunned down apparently by a death squad last September and alleged Monday by Gen. Malan to have been an agent of Pretoria.

The president told the special sitting he had been advised that existing audit procedures for secret funds were inadequate, and that this matter would be addressed.

Gen. Malan has for the past ten days been at the center of a national storm of protest over his supposed control of the CCB, whose existence was

acknowledged by the military on February 9.

The cabinet reportedly pressured Gen. Malan into announcing the suspension Monday of all CCB activities.

The liberal opposition Democratic Party has called for Gen. Malan's resignation for what DP co-leader Denis Worrall labelled his "apparent involvement in sordid killings."

Gen. Malan said Wednesday he would give evidence to the judicial commission into death squads of his claim that Mr. Lubowski had worked for Pretoria and of "various related matters."

The CCB had been formed to "reconnoitre" those "trying to undermine the state," military spokesmen said after revealing the unit's existence in response to court papers filed in early February during an unsuccessful action for the release from detention of a suspected death squad member.

But police Brigadier Floris Moster on February 14 directly implicated the CCB in the murder of at least two anti-apartheid activists, including Mr. Lubowski, following speculation among policemen that their senior officers did not want to take the blame for covert military action.

A rift to cabinet level developed over the death squad issue between the military and police, a police source told Agence France-Presse last week, although the two forces officially deny any friction.

#90060d9060 03/01/1990 ~French/German News Agency

NEW YORK, UNITED NATIONS (MARCH 1) - Talks on a divided Cyprus were extended an extra day Thursday at the request of U.N. Secretary General Javier Perez de Cuellar, a U.N. spokesman said.

Cyprus President George Vassiliou and Turkish-Cypriot leader Rauf Denktash agreed to extend the talks -- which began Monday -- to Friday on the equality of Greeks and Cypriots on the island, said U.N. spokesman Francois Giuliani.

Mr. Perez de Cuellar had proposed the discussions to seek agreement on the structure of a united Cyprus, which has been divided into Greek- and Turkish-speaking sectors since 1974 when Turkish troops occupied the northern third of Cyprus following a Greek-inspired coup in Nicosia.

He also proposed that the talks be carried out in two phases: first to address the main questions on the issue, and second to outline an accord.

Diplomatic sources said Thursday that the talks may have been extended an

extra day because Mr. Denktash said he had submitted "new proposals."

Those undisclosed proposals might address recognition by the Greek-Cypriots -- numbered at 500,000 -- of the island's 120,000 Turkish-Cypriots, the sources said.

Mr. Denktash said the Turkish residents do not consider themselves a community, but a separate people.

COTONOU (MARCH 1) - A National Conference here decided Thursday to abrogate the basic law that has been in effect since 1977, dissolve the Revolutionary National Assembly, and have the government resign, an official communique broadcast on the radio said Thursday evening.

It said that the measures reflect decisions made on Wednesday by representatives of the Benin people meeting as a National Conference, which were officially accepted by President General Mathieu Kerekou.

The communique, read by Information Minister Ousmane Batoko, said the ministers would remain in office until designation of a transition government. The latter will be formed by Nicephore Soglo, a former World Bank official, designated by a very large majority of the National Conference to become the new prime minister.

In addition, the members of the Permanent Committee of the Revolutionary National Assembly and members of the government have changed the country's name to Republic of Benin, from the previous People's Republic of Benin.

The prefects of the six provinces have been dismissed, but remain in office until replaced.

Mr. Soglo met Wednesday with the president, and a presidential decree is expected to confirm his nomination to be prime minister, a position he is expected to take on March 12.

In another development, a very reliable source said on Thursday that Romain Villon Guezo had resigned "for health reasons" as general secretary of the National Union of Labor Unions of Benin (UNSTB), the country's only labor federation, which began a congress here on Thursday.

He is also a member of the Politburo of the People's Revolutionary Party, which recently renounced Marxism-Leninism.

The majority of unions affiliated with the UNSTB broke links with it in January, criticizing it for excessive dependence on the People's

Revolutionary Party.

BOHEMIA, NY (MARCH 1) PR NEWSWIRE - American Therapeutics Inc. (ATI), a manufacturer and distributor of generic pharmaceuticals located in Bohemia announced today it has reached agreement with the U.S. Attorney for the District of Maryland to the filing of a single count Information citing the company for the delivery of a gratuity to a Food and Drug Administration (FDA) official by its former president, Raju V. Vegesna, in 1987. The company has agreed to plead guilty to the Information and faces a maximum possible penalty of $500,000.

ATI, which has cooperated fully with the government investigation, also announced that it has voluntarily taken the following actions:

-- The company has accepted the resignation of Raju Vegesna as president and chief executive officer effective immediately. A search committee has been formed to find a permanent replacement for Vegesna, who has permanently resigned as a director of ATI. The position temporarily will be filled by Vish Raju, chief financial officer for ATI.

-- An enhanced quality control program, in keeping with Good Manufacturing Practice requirements of the FDA, was instituted months ago to ensure the continued high quality of all ATI pharmaceuticals.

-- A Board Audit Committee was formed in 1989 and is overseeing ATI's production and research activities with the assistance of outside experts, including former FDA officials.

-- ATI has undertaken to provide detailed Good Manufacturing Practice training to all managers and other appropriate employees and has

instituted an internal corporate ethics program.

"American Therapeutics remains dedicated to delivering safe, effective, and high quality pharmaceuticals," said Dr. John Meloy, director of ATI. "We believe that these steps and others we have taken will ensure the continued high quality of our products and allow the company to move forward in a positive direction in full cooperation with the Food and Drug Administration."

OXNARD, CA (MARCH 1) PR NEWSWIRE - Ventura County National Bancorp (NASDAQ: VCNB) has entered the insurance premium financing market through its lead banking subsidiary, Ventura County National Bank it was announced here today by W.E. McAleer, president and chief executive officer. The bank has hired a complete complement of seasoned management, marketing and administrative staff formerly employed by a California finance subsidiary of an undisclosed Southwestern savings and loan association.

McAleer noted that Ventura County's new division is budgeting 1990 pre-tax earnings in the range of $230,000 to $240,000 on a loan portfolio rising to $12 million by year-end. "These returns more than offset the division's first quarter start up expenses and position it for even more substantial returns in 1991," stated McAleer.

He noted that Ventura's extensive commercial customer base should be potential clients for the insurance premium finance division. In addition, the marketing staffs at Ventura and its sister bank, Frontier Bank, N.A. will be utilized to promote the new division's premium finance services while non-bank customers will be introduced to Ventura's other special and proprietary services through the division's marketing efforts.

The new division will operate out of a separate loan production office in Glendale, Calif. This office will also be utilized to expand the bank's Small Business Administration (SBA) loan activities in Los Angeles County. In addition to serving the contiguous counties of Ventura, Los Angeles, and Orange, the division has marketing representatives located in San Diego and San Francisco.

Brady Mora, who brings 24 years of insurance premium financing experience to Ventura, has been named senior vice president of the bank and will head the new division.

Ventura County National Bancorp is the holding company for Ventura County National Bank, founded in 1982 and the La Palma-based Frontier Bank, N.A.

acquired in October 1989. These two commercial banking subsidiaries offer services to middle market businesses, their owners and select professionals in Southern California through five offices.

#90060p0019 03/01/1990 ~PR Newswire

TORRANCE, CA (MARCH 1) PR NEWSWIRE - Everything is getting smaller. Not just the world, but light bulbs. A California company, Carley Lamps, has created an industry niche by making sub-miniature light bulbs so small that they would fit into the hole in the middle of a Cheerio. This fete could be just the thing for a dieter on a "light breakfast" quipped Jim Carley, president of the firm and mastermind of its unique sub-miniaturization technology.

Carley, who has been working with miniature lights since the age of 14, outlined the many places his lights have been used. The applications range from the latest which is inside the shaft of a golf club to help develop the "perfect swing" ... to a trip to the moon atop helmets of the first astronauts on the Apollo 11 flight.

Currently the lights are on their way to deep space on board the Voyager. The lights are used as part of the television transmission process from the space ship. They also are used in the "deep throat" as doctors have created a "Laryngoscope" which features a Carley light on the end of a plastic light rod used in medical procedures.

The miniature special effects "space car" used in the film "Back to the Future II" has headlights which are Carley's sub-miniature creation. And spacecraft miniatures form the Lucas Film Library often feature Carley's tiny lights as they tour space in fantasy adventures.

Carley not only looks to the miniature model cars used in fantasy films as customers for his tiny lights, but the full-sized autos from Detroit.

He is now developing for the auto industry market a sub-miniature bulb filled with Xenon gas that reportedly has a lifetime average up to 20,000 hours. The new lamps are aimed at the auto industry instrumentation segment. Their luminescence and tiny size make their use attractive to the automakers, particularly those who make the lamps part of their fiber optics "package."

Carley is not restricted to using Xenon gas, which is somewhat limited in worldwide supply, but offers gas combinations such as Xenon with Krypton or Argon.

Have you ever wondered what happens if you're a coal miner deep down into the earth and your light goes out? Carley is a major supplier of the lights that go atop miner's helmets. Carley's "miner bulbs" feature a "back up" or spare filament plus a patented "focusing collar" on the lamp base for a more finite light beam. So, if one filament burns out, the spare takes over.

What's in the future for sub-miniature lamps? According to Carley, who is working on the next generation of sub-miniature products, it will be sub-miniature, low-voltage Halogen lamps for common use in the home and workplace. They will be smaller in size and use less energy in keeping with the trends of the next decade of the nineties for energy conservation.

#90060p0020 03/01/1990 ~PR Newswire

MORRIS TOWNSHIP, NJ (MARCH 1) PR NEWSWIRE - A new radar system developed by Allied-Signal Aerospace is being tested by the Federal Aviation Administration. It could reduce delays, boost airport capacity by 40 to 50 percent in bad weather, save fuel and lower airline operating costs.

The Precision Runway Monitor System, which would allow the use of closely spaced parallel runway in inclement weather, could be in operation as early as next year.

The system being tested by the FAA at Raleigh-Durham International Airport uses electronic scanning to provide position updates once every five seconds -- 10 times the speed of current mechanical systems.

The Precision Runway Monitor is expected to permit the simultaneous landings of aircraft on runways closer than 4,300 feet during instrument conditions. Such landings are currently not allowed by the FAA.

"Recent figures released by the FAA show that air traffic delays rose by 16 percent in 1989, with more than half the delays attributable to bad weather," said Bill Reed, manager of marketing for Allied- Signal's Bennix Communications Division, Towson, Md.

"In addition, we have serious airport capacity problems due to the increase of air travel since deregulation, and we're not building new airports to accommodate this expansion," he said. The FAA is predicting the number of airline passengers to double by the year 2000. By that year, the new monitoring system could be saving $350 million annually, in terms of fuel and lost time of passengers.

"Major airports, including John F. Kennedy Airport in New York, Love Field in Dallas, and those in Minneapolis and Ft. Lauderdale, have parallel runways closer together than 4,100 feet," said Reed. "More than 100 other airports have converging runways, which are also subject to FAA restrictions that affect capacity during poor weather."

The current testing includes a "bookful of landing scenarios and blunders " Reed said. "American Airlines has its southeastern hub at Raleigh-Durham. They will participate in the testing by using their Ft. Worth simulator where pilots can perform simulated approaches to Raleigh-Durham interspersed with live traffic.

Allied-Signal's Bendix Communications Division was awarded the Precision Runway Monitor contract in May 1987 through MSI Services Inc., which had been selected by the FAA to establish the system.

Allied-Signal Aerospace is a unit of Allied-Signal Inc., an advanced technology company with businesses in aerospace, automotive products and engineered materials.

JACKSONVILLE, FL (MARCH 1) PR NEWSWIRE - Blue Cross and Blue Shield of Florida reported today a net gain of $35.4 million for 1989, a dramatic improvement following 1988 losses of $51.6 million. The consolidated net gain represents all the company's lines of business and subsidiaries, including Blue Cross and Blue Shield of Florida's health mainenance organizations (HMOs).

"With the financial improvements we achieved in 1989, we are entering the new decade better positioned to help our customers manage their health care and its costs," said Richard Thomas, senior vice president of finance and treasurer.

Contributing to the company's earnings was a $1.3 million net gain for 1989 by its HMO group -- Health Options, Inc. and Capital Health Plan. For 1988, the HMO operations posted a $30.6 million loss.

At year's end, total corporate assets stood at $552.9 million and policyholders' equity was $132.8 million, an increase of $37.5 million from a year ago.

The company's revenue for 1989 was $1.287 billion with total expenses at $1.281 billion, including claims payments of $1.020 billion. Investment

income for the year was $30.1 million.

Thomas cited several factors that strengthened the company's financial position: Setting appropriate rates and adjusting benefits, integrating administrative functions, cost savings from managed care programs and better-than-expected return on investments.

"In the 1990s we will be concentrating even greater efforts on managing the cost of health care -- through new products and cost-effective benefit designs, as well as innovative programs that help ensure our members receive the care they need economically," Thomas said.

#90060p0024 03/01/1990 ~PR Newswire

SAN DIMAS, CA (MARCH 1) PR NEWSWIRE - Vestar Inc. (NASDAQ: VSTR) announced today that it has filed for regulatory approval to market AmBisome, an antifungal agent, in Europe. The company also reported that it is receiving revenues from physician requests to purchase AmBisome for the treatment of the severely ill in Europe.

AmBisome is the trade name for the intravenous liposomal formulation of amphotericin B, a broad-spectrum, anti-infective agent used to treat the potentially fatal systemic fungal infections that often occur in heavily treated cancer, post-organ/bone marrow transplant and AIDS patients. Vestar stated that in clinical trials AmBiosome virtually eliminated the acute and chronic toxicity associated with conventional amphotericin B, even at 3-4 times higher doses and, as a result, obtained an 80 percent clinical response in patients who had already failed conventional therapy, or in whom it was contraindicated. The company is seeking approval to market AmBiosome for such patients.

The company reports that market authorization applications have been filed in West Germany, UK, Ireland, Sweden, Norway and Finland. Filings in Austria and Switzerland are anticipated shortly. The company tends to seek approval in the remaining European Community (EC) countries using the multistate procedure, which provides for an accelerated review process once approval is obtained in one EC country.

While the European regulatory approval process varies by country and by product, the company noted that European authorities have tended to give a high priority to life-saving products such as AmBiosome.

In a number of European countries, physicians may purchase drugs on a patient-by-patient basis prior to marketing approval. Vestar reports that

it began receiving such requests in November 1989; $99,000 of revenues from such requests were received in the 1989 fourth quarter, and the company is continuing to receive such requests during the first quarter of 1990.

Vestar reported that for its fourth quarter ended December 31, 1989, the company had total revenues of $379,000 and a net loss of $2.1 million, or $0.33 per share. This compares with total revenues of $834,000 and a net loss of $1.9 million, or $0.30 per share, for the 1988 fourth quarter.

For the fiscal year ended December 31, 1989, Vestar had total revenues of $3.5 million and a net loss of $7.6 million, or $1.19 per share. This compares with total revenues of $3.1 million and a net loss of $6.4 million, or $1.01 per share for fiscal 1988.

Vestar Inc. is a pharmaceutical company focused on the development of therapeutic and diagnostic agents for cancer and AIDS.

SELLERSVILLE, PA (MARCH 1) PR NEWSWIRE - Lemmon Co. today announced the formation of a new division, GATE Pharmaceuticals, to market branded drug products.

The announcement was made by William A. Fletcher, chief executive officer of Lemmon.

Fletcher said products to be marketed initially by the GATE division include a neuroleptic, a weight control drug and a number of others which were previously sold by Lemmon. In addition, several innovative products developed by Lemmon's parent company, TAG Pharmaceuticals Inc., are currently in the clinical study stage, said the Lemmon executive.

"GATE will share the physical facilities, manufacturing capabilities and marketing services of Lemmon and will have all the resources of our parent company, TAG Pharmaceuticals, at its disposal," said Fletcher. "The transfer of Lemmon customer service experience, sales support expertise and experienced field sales personnel will greatly aid the new firm in its branded drug marketing efforts.

"GATE's product development efforts will be targeted at selected market niches," he continued. "The focus will be on development and delivery to the U.S. marketplace of specialized therapeutic class products that enjoy market exclusivity."

As an example of this niche marketing strategy, Fletcher pointed to a neurological product being investigated for the treatment of multiple sclerosis, and research in the area of bone metabolism and nephrology.

GASTONIA, NC (MARCH 1) PR NEWSWIRE - Rauch Industries, Inc. (NASDAQ-NMS: RCHI), today announced record sales and earnings for the third consecutive year. Rauch Industries is America's oldest and best-known manufacturer of Christmas tree ornaments and related products.

Net sales for the twelve months ended December 31, 1989, were $38.3 million, as compared to $32.7 million for the year ended December 31, 1988. This is an increase of $5.6 million or 17.1 percent. Net income for the year ended December 31, 1989, was $2.5 million as compared to $1.9 million for the previous year. This is an increase of $572,000, a 30.1 percent increase. Per share results were $1.51 this year as compared to $1.16 for the previous year.

Results for 1989 include a pre-tax charge to income of $500,000 for settlement of litigation. This amounted to an after tax charge to earnings of $.20 per share.

Marshall A. Rauch, chairman, said the year-end results were consistent with projections. The Company recently completed the annual showing of its product-line in New York City. The actual results of the show will not be known for several months, but the initial reaction from customers was very favorable.

NEW YORK (MARCH 1) PR NEWSWIRE - American Standard Inc. has entered into a definitive agreement to sell the North American operations of its Railway Braking Products Group to a partnership formed by Investment AB Cardo, a Swedish corporation, certain members of management of WABCO Railway, the principal component of the Railway Braking Products Group, and Vestar Capital Partners, Inc., a New York-based private investment firm specializing in management buyouts.

In addition to the joint venture in North America, where the parties will share ownership, Cardo will acquire 100 percent of the non-North American operations of the Railway Braking Products Group, which include assets primarily in Europe.

WABCO rail brake system products are considered the industry's leaders in technology, quality and reliability.

WABCO's origin is the Westinghouse Air Brake Company, which revolutionized the U.S. railroad industry with the introduction of the railway air braking system over 120 years ago. Today, a majority of the North American rail and passenger transit vehicle fleet is equipped with WABCO-supplied braking systems and related parts.

Cardo is an investment and industrial holding company listed on the Stockholm stock exchange, with annual revenues of approximately US$1.2 billion. The company is headquartered in Malmo, Sweden. Approximately 90 percent of its revenues come from outside Sweden.

The worldwide railway business of Cardo is complementary to the Railway Braking Products Group. It consists of SAB, a manufacturer of slack adjusters, tread brakes and other railway devices; Lucas Railway, a manufacturer of tread brakes, actuators and other related equipment, a Faiveley North American, a manufacturer of air conditioning and anti-slide equipment for railways. The worldwide combination of these two groups will greatly enhance the strategic position of both parties for railway and passenger transit applications.

WABCO has more than 1,800 employees and annual sales in North America of approximately $200 million.

MOUNTAIN VIEW, CA (MARCH 1) PR NEWSWIRE - Silicon Graphics Inc. (NYSE: SGI) today announced price reductions for the Personal IRIS(TM) 4D/25 systems, peripherals and memory.

"The Personal IRIS has changed the definition of general purpose computing. Users are now able to incorporate the use of color and real-time 3D into their computing tasks, and all for the price of a high-end PC," commented Michael Ramsay, vice president, Entry Systems Division. "We are dedicated to making visual processing as affordable as possible for our customers. We are pleased to be able to pass on the benefits of production efficiencies, and reduced cost for peripherals and memory, to our customers."

The price reduction reflects recent shifts in the price of peripherals and memory as well as manufacturing efficiencies and cost reduction programs. Prices for the Personal IRIS 4D/25, which was introduced in July 1989, have been decreased by up to 18 percent. New prices for the systems with a 16 MIPS CPU range from $18,000 to $34,000. Memory prices have been slashed by 67 percent. System and option disk pricing have been reduced by 33 percent.

Silicon Graphics Inc. is the leading manufacturer of high performance workstations and computing systems for visual processing applications. These workstations are used by engineers, scientists and creative professionals in the design, analysis, manufacture and simulations of three dimensional products and services. The company's stock trades on the New York Stock Exchange under the symbol SGI.

IRIS is a registered trademark, and Personal IRIS is a trademark of Silicon Graphics Inc.

STERLING HEIGHTS, MI (MARCH 1) PR NEWSWIRE - Jim M. Jung, president of MetroCell cellular phones and service, announced the company is instituting - for a limited time - a six-months free monthly service charge plan. This is in response to the recent rate restructuring by local cellular phone carriers.

In addition to receiving free monthly service charge for six months, customers will receive 15 minutes of air time a month at no charge. MetroCell's free service charge plan is expected to attract new customers who currently do not have cellular phones and cellular subscribers wishing to let MetroCell convert their service to Ameritech. (In the western part of Michigan, Century Cellunet is the carrier).

MetroCell is Ameritech's largest cellular dealer within a five-state region comprised of Michigan, Wisconsin, Indiana, Illinois and Ohio.

"The cellular phone war has caused us to pull out all stops and prove MetroCell is the mobile communications leader," said Jung. "We want to do whatever it takes to satisfy our current customers as well as win new ones so there need not be any more confusion in the marketplace about who is undoubtedly offering the best service," added Jung.

MetroCell's remaining high usage customers may choose from a series of new Ameritech service plans that are designed to provide the most economical service depending on the volume of calls made. MetroCell assists customers in selecting the plan that best suits their usage needs.

MetroCell's new six-months free service charge plan will be announced in print and radio ads that will debut in March.

"We realize that we're taking a bold and aggressive step in our attempt to set ourselves apart from other retail cellular phone outlets. And it's a step that will be somewhat costly for us from a short-term standpoint. But in the long run, we know that taking such a risk will pay off for us, not just in increased sales, but for long-term customer relations and the image of the company as well," said Jung.

MetroCell is the Midwest's largest dealer for cellular phones, service and mobile communications. MetroCell services businesses and consumers throughout Michigan and operates retail outlets in Sterling Heights, Farmington Hills, Grand Rapids and Muskegon.

#90060p0040 03/01/1990 ~PR Newswire

NASHVILLE, TN (MARCH 1) PR NEWSWIRE - Metropolitan Federal Savings and Loan Association (NASDAQ-NMS: MFTN) announced today that additional reserves for possible loan losses of up to $30 million will be established.

In making the announcement, Edwin W. Moats, Jr., chairman and chief executive officer, said that the additional reserves are the result of

management's continuing review of the loan portfolio and tentative findings of recently concluded regulatory examinations by the Office of Thrift Supervision (OTS), and the Federal Deposit Insurance Corporation (FDIC).

"The additional reserves will have a significant impact on our earnings and capital," said Moats, "but the exact impact will not be determined until final examination results are received and the tax effects of the additional reserves can be established. Nevertheless, based on these preliminary findings, Metropolitan Federal will continue to exceed all current regulatory capital requirements as established under the Financial Insitutions Reform Recovery and Enforcement Act, FIRREA, which became effective August 9, 1989."

"The regulatory standards for the valuation of development projects and individual guarantors of loans apparently are changing dramatically for all financial institutions, and particularly for savings and loans. The current regulatory approach being applied seems to value collateral at forced liquidation prices, which anticipates little or no opportunity for the orderly development and sale of properties," Moats said.

"Metropolitan Federal consistently has been managed within the standards applicable to savings and loans as applied by our principal regulatory agency, the Office of Thrift Supervision (formerly the Federal Home Loan Bank Board)," added Moats. "While changing standards is difficult, we intend to make the necessary adjustments to appropriately adapt to the standards imposed by the FDIC as they are formulated and interpreted."

Metropolitan Federal, Tennessee's largest publicly-traded savings and loan with 19 offices, operates throughout the state. Metropolitan Federal's common stock is traded on the over-the-counter market in the National Market System under the NASDAQ symbol MFTN.

PONTIAC, MI (MARCH 1) PR NEWSWIRE - Perry Drug Stores, Inc. (NYSE: PDS) reported today that results of its first quarter ended Jan. 31 not only built on the dramatic turnaround achieved in fiscal 1989 but also indicate that Perry will enjoy a good year.

Chairman and Chief Executive Officer Jack A. Robinson said the first quarter's pre-tax earnings "represent our best first-quarter pre-tax

performance in the past four years. We improved our profitability throughout fiscal 1989 and it is clear the momentum is continuing."

"We now have recorded six consecutive comparable quarters of improved earnings," Robinson said. "This performance is additional evidence that we are a revitalized, recharged company, a company which has restructured itself not only for improved profitability in this fiscal year but for the decade of the 1990s."

Pre-tax earnings for the first quarter totaled $4.5 million compared to pre-tax earnings in 1989 of $4.2 million.

Net earnings for the quarter were $3 million, equal to 30 cents per share, compared to the 1989 first quarter of $4.2 million.

For financial statement purposes, the first quarter reflects a provision for income tax purposes of $1.5 million. Last year's first quarter did not include an income tax provision due to the utilization of tax loss carryforwards.

However, Perry will not have to make any cash payments on income taxes in fiscal 1990 since the company has loss carryforwards available for tax payment purposes.

Robinson said Perry was "particularly pleased with continued improvement in our gross profit margins" which increased more than 1 percent in the first quarter over the same period of last year.

In addition, Perry reported that, excluding increased advertising outlays for the Christmas season, warehouse, store operating and administrative expenses continued to decrease.

The first-quarter earnings were achieved on sales of $179 million compared to 1989 first-quarter sales of $184 million.

Perry, a New York Stock Exchange company headquartered in Pontiac, operates 214 drugstores in Michigan, Illinois, Wisconsin and Indiana. It also operates several health-care businesses in Michigan.

TROY, MI (MARCH 1) PR NEWSWIRE - Two Michigan-based automotive supplier companies, VOPLEX Corporation (AMEX: VOT) and Bilcor Plastics, Inc., have reached final agreement in forming a joint venture to be called Hillsdale Plastics.

Joseph W. Bauer, president and CEO of VOPLEX, along with James A. Capolongo, chairman of Bilcor Plastics, stated that the new firm will manufacture automotive interior trim components and be located in Hillsdale, Mich.

Under terms of the agreement, VOPLEX will provide business support and Bilcor will provide Hillsdale Plastics with its initial manufacturing facilities.

Both Bauer and Capolongo agree that strategic alliances of this type "are becoming more prevalent in the automotive industry today because it allows suppliers to take advantage of synergies which would not be available independently, ultimately benefiting our customers by expanding both product and process capabilities as a full-service supplier."

VOPLEX is a $72 million supplier company in Troy that designs, engineers and manufactures decorative trim products and interior systems, while Bilcor is a custom injection molding company in Hillsdale with annual sales of $13 million.

YORK, PA (MARCH 1) PR NEWSWIRE - The demand for recycled plastic is quickly outstripping the supply according to Sonoco Graham Co., the nation's largest manufacturer of polyethylene bottles.

"Since we began making bottles with recycled plastic, the response from our customers has been overwhelmingly positive," said Phil Yates, senior vice president.

"That's why we've decided to build our own recycling plant to process used bottles into the plastic pellets our plants use to make new bottles."

Yates was joined in making the announcement by Pennsylvania Lt. Gov. Mark S. Singel who said the state is particularly pleased that the new plant will be in York.

"This new plant will work hand-in-hand with Pennyslvania's new mandatory recycling law. In fact, Sonoco Graham has made a commitment to our administration to accept and recycle every polyethylene bottle that is collected in the commonwealth," Singel said.

"The commonwealth has made a strong commitment to recycling," he said. "We want to make Pennsylvania a showplace and a model for the whole

country. Facilities like this are an important part of the equation to solve our solid waste problems."

Graham Engineering Corp., one of the Graham family of companies, is engineering and installing the new plant.

The new Sonoco Graham Recycling plant will be located in York County, Pa., and will create 35 new jobs. The $5 million dollar facility will incorporate the latest recycling technology to process more than 20 million pounds of HDPE plastic per year -- the equivalent of 200 million used bottles. In addition, the plant will also recycle PET plastic and plastic film, according to Phil Yates.

HDPE or high density polyethylene plastic is used to produce plastic bottles for household, automotive, personal care and assorted food products. PET plastic is used primarily in plastic soda bottles while plastic film is used to make products such as grocery bags.

"This plant is different from existing plastic recycling plants," said Yates, "in that it has been specifically designed to reprocess plastic bottles for use in new bottles. That's real recycling as far as we're concerned.

A private company based in York, Sonoco Graham is 60 percent owned by The Graham Companies, a privately held group, and 40 percent owned by Sonoco Products Co. (NASDAQ: SONO) of Hartsville, S.C.

NEW YORK (MARCH 1) PR NEWSWIRE - Champion figure skater Dorothy Hamill

and Bausch & Lomb, Rochester, the world's leading maker of contact lenses today asked consumers to take steps toward better vision health practices in the 1990's. Hamill is a Bausch & Lomb In Vision Institute spokesperson.

In support of the American Optometric Association's (AOA) annual "Save Your Vision Week" March 4-10, Bausch & Lomb is urging Americans to make an appointment to see an eye care practitioner.

"We want people to pay the same attention to caring for their vision as many do for their dental health," said Hamill, a long-time contact lens wearer.

Experts from the InVision Institute recommend yearly vision exams. "Many people wouldn't think of seeing the dentist less often, yet they sometimes wait years between visits to an eye doctor," she explained. "We believe that awareness is the key to keeping people from taking their vision for granted. Through our consumer education focus, we will shed more light on proper vision care," Hamill said.

Hamill suggested that individuals in need of a regular eye care practitioner should call their local chapter of the AOA for a list of doctors in their area. Friends, family and co-workers are also good sources for referral.

Hamill has teamed up with the Baush & Lomb InVision Institute to teach Americans about proper vision care and correction, including contact lens use. The not-for-profit InVision Institute is dedicated to consumer education and serves as America's vision information resource.

For free information about the eyes and vision, consumers may send a SASE to:

MIDDLETOWN, OH (MARCH 1) PR NEWSWIRE - Negotiators for Armco Steel Company's Middletown Works and the Armco Employees Independent Federation have reached a tentative four-year agreement covering the plant's hourly employees. The new pact is subject to ratification by the 4,100 employees represented by the AEIF. The tentative agreement was reached about 10:15 p.m. last night.

"We are extremely pleased to have reached an agreement we feel is good for our customers, our employees and the company," said Lyle Warren, plant manager for the Middletown Works. "We are hopeful and optimistic for membership approval so we can begin the all-important task of regaining the confidence of our customers in the Middletown Works as a reliable source of quality steels," he said.

Warren praised negotiators for the company, union and a federal mediator who participated in the negotiations for their roles in reaching the tentative agreement.

"The entire negotiating team is to be commended for staying at the bargaining table many long hours to bring about this settlement," he said. "I thing this (reaching tentative agreement) demonstrates the desire of all employees of the Middletown Works to continue our commitment to become a true world-class steel producer."

Details of the tentative agreement were not released by the company pending formal ratification by the AEIF membership. Warren said term and conditions of current contract will be extended to allow normal operation of the plant pending ratification.

Armco Steel Company, L.P. is a limited partnership between Armco Inc. (NYSE: AS), Parsippany, N.J., and Kawasaki Steel Corporation, Tokyo. The partnership was formed May 13, 1989, to own and operate Armco's former Eastern Steel Division. The company employs about 9,600 men and women. The company produces flat rolled carbon steels for automotive, appliance, construction, manufacturing and service center markets.

FORT LEE, NJ (MARCH 1) PR NEWSWIRE - A. L. Laboratories, Inc. (NYSE: BMD) today reported revenues and earnings for the year and fourth quarter ended Dec. 31, 1989.

For the 1989 year, total revenue increased 12.6 percent reaching $266,292,000 compared with $236,482,0000 in 1988. Net income rose 35.3 percent to a record $11,841,000 compared with $8,750,000 last year. Per share earnings on a fully diluted basis were $1.04 in 1989 versus $0.86 in 1988. At Dec. 31, 1989, shareholders' equity increased to $93,342,000 or $8.35 per share, compared with $81,792,000 or $7.34 per share at year end 1988.

For the fourth quarter of 1989, total revenue declined slightly to $64,159,000 compared with $66,467,000 in 1988 primarily because of a

planned de-emphasis on low profit nutrition products. Net income increased 37.6 percent to $3,912,000 compared with $2,842,000 in the same period of 1988. Fully diluted per share earnings were $0.33 in the 1989 fourth quarter versus $0.25 in the same quarter of 1988.

Commenting on the results, I. Roy Cohen, president and chief executive officer, said: "Our 1989 results reflect the strong performance of our operations, most notably Barre-National and Animal Health, and are especially gratifying because they were accomplished despite difficult pharmaceutical industry conditions."

A. L. Laboratories is a specialized international pharmaceutical company engaged in developing, manufacturing and marketing branded value-added pharmaceuticals and animal health micronutrients, with plant sites in Chicago Heights, Ill.; Niagara Falls, N.Y.; Baltimore, Md.; Bellevue, Wash.; Copenhagen, Denmark; and Jakarta, Indonesia.

NEW YORK (MARCH 1) PR NEWSWIRE - Woolworth Corporation (NYSE: Z) reported that total sales for the four weeks ended February 24 rose 13.9 percent to $561 million from $493 million in the comparable year- earlier period. Domestic sales increased 13.7 percent to $330 million from $291 million, and foreign sales, expressed in U.S. dollars, increased 14.3 percent.

If foreign exchange rates had remained constant, foreign sales would have increased 10.6 percent and total sales would have increased 12.6 percent. Domestic comparable store sales rose 11.7 percent.

Harold E. Sells, chairman and chief executive officer, stated, "February's double-digit percentage gains in total and domestic sales were the highest for that reporting period in over 10 years.

"We were particularly pleased with the strong sales performances by our Kinney operation in the United States and by our Woolworth subsidiary in West Germany, which each posted double-digit comparable- store sales increases over the comparable prior-year period."

MIDLAND, MI (MARCH 1) PR NEWSWIRE - The Midland Cogeneration Venture

(MCV) partnership announced today the selection of Morgan Stanley & Co., Incorporated, to replace Drexel Burnham Lambert for completion of the financing of approximately $500 million in MCV lease debt.

It is expected that the proceeds generated from the sale of the debt will be used to pay off outstanding bank construction loans.

The MCV is a limited partnership formed to convert the former Midland plant into a gas-fired, combined-cycle, cogeneration facility. When it goes into operation later this month, it will generate as much as 1,370 MW of electricity and up to 1.35 million pounds per hour of process steam for industrial use.

Equity partners include MEI Limited Partnership, an affiliate of Asea Brown Boveri, Inc.; CMS Midland, Inc., a subsidiary of CMS Energy Corporation; Coastal Midland, Inc., a subsidiary of The Coastal Corporation; C E Midland, Inc. (limited partner), a subsidiary of Combustion Engineering, Inc.; Rofan Energy, Inc. (limited partner), a subsidiary of The Dow Chemical Company; Micogen Limited Partnership, an affiliate of Fluor Corporation; and Source Midland Limited Partnership, an affiliate of Panhandle Eastern Corporation.

DALLAS (MARCH 1) PR NEWSWIRE - Recognition Equipment Incorporated (NYSE: REC) announced today that it has sold a substantial portion of its long-term receivables from sales-type leases and installment sales contracts to Security Pacific Credit Corporation for approximately $19.2 million.

Approximately $3.8 million of the purchase price has been retained by Security Pacific and will be paid to the company over the next four years subject to certain conditions. Of the remaining $15.4 million, approximately $13.7 million has been used to prepay Recognition's $4.5 million term loan from Chemical Bank and First National Bank of Boston and to collateralize other obligations of Recognition and its affiliates to these banks and their affiliates.

In the fourth quarter of 1989, Recognition announced a strategic plan to focus on the market for document imaging products and to sell certain assets. The sale of these receivables is the first of the proposed asset sales to be completed.

Recognition sells and services data capture, document scanning and image processing systems to customers around the world. These systems include

terminal-based keyboard products and fully integrated systems which utilize networks, high-speed paper-handling, optical character reading and image manipulation hardware and software.

#90060p0065 03/01/1990 ~PR Newswire

DETROIT (MARCH 1) PR NEWSWIRE - The Wayne State University chemistry department has received an equipment grant from AT&T valued at more than $500,000 to set up a research network within the university.

The grant, which includes equipment and installation, will be coordinated with WSU's $100,000 installation of a fiber-optic cable. The new WSU Research Network will also improve research areas in biochemistry, computer science, medicine and molecular biology, and will expand into other research departments in the university.

The grant is part of AT&T's University Equipment Donation Program (UEDP) that has given more than $200 million to colleges and universities since its inception in 1984. AT&T awards grants to colleges and universities that propose innovative applications for computing and networking in support of research or instruction.

"AT&T is committed to furthering computer research on the nation's campuses," said Data Systems Consultant Joseph Tylutki. "With decreasing government participation in the funding of university research and education, private business must assume more of the responsibility for support. AT&T is delighted to contribute to WSU's growth in technological and academic excellence."

For the past four years, AT&T has invested in the WSU chemistry department by continuing to improve its computing and data handling capabilities, explained chemistry Chairman Richard Lintvedt. "Our department is very grateful for the interest and trust that AT&T has shown in our programs," he said.

Funding of the most recent proposal will not only significantly enhance the computer networking capabilities of the chemistry department, it will have a similar effect on much of the university. Implementation of the new equipment will represent a computing milestone for WSU, and will place it in an excellent position to make full use of the computing power both within and outside of the university, according to Lintvedt.

The proposal submitted to AT&T was written by chemistry Professor Karl-Heinz Brose who said, "This is the initial step in establishing a modern, high-speed network. A fiber-based, campus network is essential

for our research at the university, and necessary to educate our students in the technology that will be used in the marketplace." He said that the AT&T installation, which will integrate the existing local network as well is a major step forward in the use of national research networks.

Two major projects in the Center for Molecular Biology, which is based in the School of Medicine, require the computer capabilities that the AT&T grant will provide. Working with the National Institutes of Health and the Department of Energy on the international effort to map the entire human genetic apparatus (Human Genome Initiative) demands outstanding storage and interacting networks which will now be possible, according to Center Assistant Director Peter Lalley. The new facilities will also contribute to the development of the Comparative Gene-mapping Database, which is a gene-mapping approach for species other than man, a rapidly growing area of research.

WSU is one of 47 institutions of higher learning to be selected from 61 that submitted proposals. For additional information, contact the WSU chemistry department at 313-577-7784.

#90060p0066 03/01/1990 ~PR Newswire

MIDDLEBORO, MASS. (MARCH 1) PR NEWSWIRE - The Mayflower Co-operative Bank (NASDAQ: MFLR) announced consolidated net earnings of $64,000 or 7 cents per share for the third quarter ended Jan. 31, 1990, compared with net income of $198,000 or 23 cents per share for the same period in fiscal 1989.

The bank's 1990 fiscal year earnings continue to be lower than the preceding year's earnings due to the bank's non-performing assets which amounted to $2,187,000 or 2.43 percent of total assets at Jan. 31, 1990. Included in non-performing assets is approximately $555,000 relating to a "check kiting" scheme which the bank had discovered during the quarter ended Oct. 31, 1989. Subsequent to Jan. 31, 1990, the bank has been successful in recovering the amounts due it. Mayflower will not suffer any material losses as a result of the incident. Not included those funds which the bank has recovered, the bank's non-performing assets would have been $1,632,000 or 1.82 percent of total assets as of Jan. 31, 1990.

On Feb. 8, 1990, the bank declared its regularly scheduled quarterly dividend of 5 cents per share, payable March 16, 1990, to stockholders of record on Feb. 23, 1990.

At Jan. 31, 1990, the bank's stockholders' equity totaled $10,663,000 and

the bank's equity-to-assets ratio stood at 11.87 percent.

GLENDALE, CA (MARCH 1) PR NEWSWIRE - ATI Medical Inc. (AMEX: ATI) posted a 120 percent increase in net income on 32 percent higher sales for the six month period ended January 31, 1990, it was announced today. The company also achieved record results for the second quarter, reflecting ATI's continued penetration of the medical equipment rental market.

Net income for the six months more than doubled to $1,665,844, or 31 cents per share, compared with $757,254, or 14 cents per share, in the prior year period. Revenue increased 32 percent to $24,133,662 from $18,274,403 last year.

For the second quarter ended January 31, 1990, net income rose 60 percent to a record $873,479, or 16 cents per share, from $547,411, or 10 cents per share, in the same period last year. Revenues for the quarter increased 29 percent to $12,627,852 from $9,795,067 in the year-earlier period.

Paul E. Stevenson, president and chief executive officer, said the continued improvement in profits, which outpaced the sales growth, was indicative of the higher productivity per office being achieved nationwide.

"We are realizing our potential in all of the company's markets," Stevenson said. "Not only is the total market expanding, but ATI is capturing a larger share of it."

Stevenson said the trend should continue, with sustained profit growth expected over the balance of fiscal 1990.

"This progress will be achieved even without the benefit of other new markets presently being evaluated for ATI," he said.

ATI Medical Inc. rents medical equipment primarily to hospitals as well as the entertainment industry through offices in major cities across the country. ATI also sells medical equipment and certain disposables and markets, through its subsidiary, CAMS Inc., a software system to monitor equipment usage within hospitals.

LANSDALE, PA (MARCH 1) PR NEWSWIRE - Central Sprinkler Corp. (NASDAQ: CNSP) reported today its sales and earnings for the first quarter ended Jan. 31, 1990.

Sales for the quarter increased 9 percent to $17,035,000 from the $15,678,000 reported in the comparable fiscal 1989 quarter. Net income of $1,286,000 was also 9 percent greater than the $1,175,000 reported in the first quarter of fiscal 1989.

Earnings per share for the first quarter of fiscal 1990 was $.31 compared to the $.29 earned in the first quarter of fiscal 1989.

Sales for the quarter were strong at most of the company's regional distribution centers in the United States. Sales in the month of January exceeded expectations while sales in earlier months fell short of expectations, particularly, in several sales regions. Unusually cold weather and freezing conditions hurt sales at all of the company's regional distribution centers in the northern part of the United States. Sales from the company's San Francisco regional distribution center were also adversely affected by the major earthquake in that region.

PALISADES PARK, NJ (MARCH 1) PR NEWSWIRE - Metrobank Financial Group, Inc. (NASDAQ: MFGR), of Palisades Park, the parent company of Metrobank For Savings, FSB ("Metrobank"), announced the suspension of dividends on its common stock. While earnings results for fiscal 1989 have yet to be completed, Malcolm Marsa, chief executive officer, cited the depressed real estate market, which has negatively impacted earnings, and the need to maintain regulatory capital as the reasons for discontinuing dividends.

MFGR will record a loss for the quarter and the year ended Dec. 31, 1989. The depressed real estate market has been characterized by a drop in the demand for and a decline in the market value of residential housing and commercial real estate and will require Metrobank to reduce the book value of certain real estate assets and increase its reserve for possible loan losses for the year ended Dec. 31. 1989. MFGR anticipates releasing its earnings for the year ended Dec. 31, 1989 in March.

DETROIT (MARCH 1) PR NEWSWIRE - Little Caesars(R) Pizza's 1990 sales and restaurant opening projections should once again place the pizza chain among the fastest-growing franchises in the world.

By the end of 1990, the world's largest carry-out pizza chain projects that it will hit the $1.5 billion mark in sales. Additionally, Little Caesars projects that it will add another 600 restaurants, bringing its total number of restaurants worldwide to 3,300.

Over the past five years, Little Caesars sales have grown by 232 percent, and its number of restaurants has grown by 200 percent.

In 1989, both Entrepreneur and Venture magazines named Little Caesars as one of the top five fastest-growing franchises. Also, in February 1990, Restaurants & Institutions magazine's consumer survey, "America's Choice in Chains," named Little Caesars as the "best value" of any chain in the United States.

The chain ended 1989 with $1.13 billion in sales and 2,700 restaurants. Little Caesars Pizza's 1990 projections reflect a 33-percent increase in systemwide sales and a 22-percent increase in its number of restaurants.

Little Caesars restaurants are presently located in all 50 states, Canada and England.

Little Caesars, the world's largest carry-out pizza chain, is based in Detroit. Little Caesars Pizza restaurants serve Pizza!Pizza!(R) and Pan!Pan!(TM) (Two Great Pizzas! One Low Price.(R)), Slice!Slice!(TM), Caesars Sandwiches(R), Crazy Bread(R), Crazy Sauce(R), assorted salads and soft drinks.

#90060p0084 03/01/1990 ~PR Newswire

INDEPENDENCE, OH (MARCH 1) PR NEWSWIRE - The Centerior Energy Corporation (NYSE: CX) board of directors has approved an early retirement opportunity program as part of a major cost-reduction effort.

Along with attrition resulting from a restrictive hiring program, the voluntary early retirement program should help reduce staffing to levels recommended in an ongoing cost-control study. If these efforts do not result in a large enough staff reduction, the company will resort to a voluntary employee separation program. If needed, an involuntary

separation program also is available as a last resort to achieve recommended staffing levels.

The staff reduction is part of a major restructuring that will enhance the company's competitive position in the electric utility industry.

The foundation for the restructuring is a comprehensive cost-control study that began in April 1989. Final recommendations of the review, conducted with the management consulting firm of Cresap, will be made public when the study is completed in about two months.

The study is part of the January 1989 rate agreement that settled the then-pending rate cases of Centerior's operating subsidiaries, The Cleveland Electric Illuminating Company (NYSE: CVX) and The Toledo Edison Company (NYSE: TED).

As part of that agreement, Centerior agreed to reduce controllable operation and maintenance expenses beginning in 1991 by a target range of $40 million to $100 million from a 1988 level of $676 million. Staff reductions, with the associated savings in salaries and employee benefits, are an integral part of reaching the target.

The voluntary early retirement program is available to be offered to employees who are at least age 55 with at least 10 years of service. Among the 9,000 employees of Centerior and its subsidiaries, about 800 employees meet the age and service requirements. Retirements under the program will be effective by mid-year.

A key facet of the management audit has been to identify work activities at the three companies that could be eliminated or consolidated and thus reduce staff. The voluntary severance program will be offered only in organizational elements where early retirements do not sufficiently reduce staffing.

The ultimate savings from and cost of the early retirement and severance programs will depend upon how many employees leave the company. The programs were designed to be sufficiently flexible to help reach the targeted savings.

This will be the second early retirement program at Centerior within the past several years. In 1987, 544 employees took early retirement.

WILMINGTON, DE (MARCH 1) PR NEWSWIRE - DuPont (NYSE: DD) today announced a major three-year expansion that will increase worldwide capacity for "Nomex" aramid products by more than 50 percent.

The expansion will include about $200 million to construct a previously announced plant in Asturias, Spain. Construction is expected to begin by mid-1990.

Also planned is a capacity expansion for "Nomex" aramid fiber and paper at the Spruance plant in Richmond, Va., beginning next year.

"The European facility will serve growing regional markets and needs for specialty products worldwide," said P. W. Kerry Kehoe, business director. "The overall program also will serve to improve product quality, fiber processing and coloration technologies in response to customer needs and market opportunities."

Commercialized in 1965, "Nomex" is used in protective apparel, filtration, and electrical and mechanical papers because of its thermal stability, chemical resistance and inherent flame resistance.

"Nomex" is the first fiber to meet airline design requirements and Federal Aviation Administration heat release standards for cabin interior vertical surfaces in newer aircraft. FAA regulations covering these panels will take effect in August.

DuPont Japan Ltd. recently started up a plant for "Nomex" paper in Osaka. It is the first manufacturing facility for "Nomex" outside the United States.

DuPont is a leading supplier worldwide of fibers and systems to the industrial, textile, flooring systems, and advanced composites markets.

UNIVERSAL CITY, CA. (MARCH 1) PR NEWSWIRE - The MCA Music Entertainment Group announced that on Feb. 28, 1990, it had acquired all of the outstanding common shares of the independent record label, GRP Records Inc., for shares of MCA Inc. common stock valued at approximately $40 million.

As outlined by Al Teller, chairman of the MCA Music Entertainment Group, Larry Rosen and Dave Grusin, co-founders and co-presidents of GRP Records, the label, which has been distributed by MCA Distributing since 1987, will continue to operate out of its New York headquarters. Rosen will assume

the new title of president with Dave Grusin as executive vice president. It was emphasized that the company does not intend to make any changes in its management or staff as it is now structured. As Rosen pointed out,

Founded in 1983 by Grusin and Rosen as an outgrowth of Grusin- Rosen Productions, GRP has become one of the most successful independent record labels in the world, combining world class artistry with state of the art technology, and innovative marketing and business strategies. Since its inception, the label has gone from approximately $800,000 to over $20 million in annual worldwide gross sales. GRP pioneered on all digital recording philosophy long before the advent of the compact disc. The company became the first non-classical American label to manufacture and market the new CD format and is the first American company to commercially to introduce its product on DAT (Digital Audio Tape). Reaching the adult consumer ranging in age from 24 to 54, GRP has consistently dominated the contemporary jazz charts, has been nominated for over 45 Grammy Awards and was named in 1989 as the No. 1 contemporary jazz label by Billboard Magazine. Winning four Grammy Awards in 1990 alone, GRP's renowned artist roster is led by Grusin, an Academy Award winner and recent three time Grammy Award winning keyboardist, arranger and composer. The roster boasts such stars as Chick Corea, Lee Ritenour, The Rippingtons, David Benoit, Diane Schuur, Tom Scott, Gary Burton, New York Voices, the recently signed Patti Austin and vocalist Carl Anderson. GRP's most recent successes include such No. 1 chart toppers as "Happy Anniversary Charlie Brown," Grusin's "Migration," "The Chick Corea Akoustic Band," David Benoit's "Waiting For Spring," and the surprise hit soundtrack, "The Fabulous Baker Boys."

GRP Records' success has extended beyond the United States and includes their wholly-owned subsidiary GRP Ltd., set up to market and distribute GRP product throughout Europe. GRP Ltd. is headquartered in Zurich, Switzerland. Through distribution and licensing agreements with such major companies as JVC in Japan and EMI in Hong Kong and Southeast Asia, GRP product is available throughout the world.

HARLEYSVILLE, PA (MARCH 1) PR NEWSWIRE - The policyholders of the three companies of Berkshire Mutual Insurance Group, Pittsfield, Mass., have approved their affiliation with Harleysville Group Inc. (NASDAQ: HGIC), a regional insurance holding company.

As a result, Harleysville Group has assumed management control of Berkshire Group's operations.

At separate meetings last week, the policyholders of Berkshire Mutual Insurance Co.; Boothbay Mutual Insurance Co., Boothbay, Maine, and the Mutual Insurance Company of Burlington, Burlington, Vt., voted to adopt new bylaws that expand their boards of directors and change their annual meetings to April to coincide with the annual meeting of Harleysville Group.

Harleysville Group announced in December that it had reached a tentative agreement with the Berkshire Group to manage the companies' operations. The Berkshire management will report directly to the Worcester Insurance Co., a Harleysville Group subsidiary in Worcester, Mass.

Harleysville Group Inc. is a regional holding company for four property and casualty insurers whose marketing territory encompasses the entire East Coast. In addition to Worcester, the companies are Atlantic Insurance Company of Savannah, Harleysville Insurance Company of New Jersey and Huron Insurance Company.

MILWAUKEE (MARCH 1) PR NEWSWIRE - Midwest Express Airlines today began new nonstop service between its Milwaukee hub and Los Angeles, with continuing service to San Diego, using two new McDonnell Douglas MD-88 aircraft.

According to Timothy E. Hoeksema, president of Midwest Express, the new service includes West Coast connections through Milwaukee from Appleton,

Madison, Wausau/Stevens Point, LaCrosse and Green Bay, Wis.; Grand Rapids and Muskegon, Mich.; and Rockford, Ill. Connecting service is provided by Midwest Express and Skyway Airlines, The Midwest Express Connection.

The addition of California service is the latest stage in the five- year, $120 million expansion plan announced in November 1987. Since that time, Midwest Express has relocated its headquarters to Milwaukee from Appleton; constructed a 60,000-square-foot maintenance facility at Mitchell International Airport; added eight aircraft and 10 cities to its route system; increased employment by over 530, bringing the total number of employees to 800; signed a marketing agreement with Skyway Airlines to operate as The Midwest Express Connection, feeding passenger traffic from 17 midwestern cities through Milwaukee; and is currently expanding its facilities at Mitchell International Airport by nine gates, bringing its total number of gates in Milwaukee to 14.

Midwest Express Airlines, based in Milwaukee, is a wholly owned subsidiary of K-C Aviation, which, in turn, is a subsidiary of Kimberly-Clark Corporation (NYSE: KMB). Midwest Express has approximately 800 employees throughout its system.

Skyway Airlines is a wholly owned subsidiary of Mesa Airlines, a regional carrier based in New Mexico, and operates as The Midwest Express Connection through a marketing agreement with Midwest Express Airlines. Skyway operates new Beechcraft model 1900 19-passenger propjets, painted in Midwest Express colors. Skyway Airlines has approximately 80 employees.

AUSTIN, TX (MARCH 1) PR NEWSWIRE - SEMATECH has signed a joint development agreement with Hampshire Instruments, Inc., of Marlborough, Mass., to fabricate and evaluate X-ray optics.

Ultraviolet light, used in today's lithography processes, may be replaced by X-rays in the future. Lithography is the process of patterning circuits onto computer chips. Each generation of memory chips requires higher resolution lithography. X-ray lithography has been used to fabricate transistors as small as 200 nanometers, or about 1/500 the width of a human hair.

"SEMATECH views X-ray technology as a high-risk, high-return technology area," said Dr. Thomas Seidel, SEMATECH's vice president and director of manufacturing equipment and materials. "There will eventually be a day when X-ray technology is required. We wish to support selected

developments along the X-ray path, and Hampshire's moderate cost approach is particularly interesting."

SEMATECH's joint development program was established in an effort to regain America's leading role in semiconductor manufacturing. To accomplish this objective, SEMATECH works with U.S. suppliers to develop new equipment, materials and processes that support manufacturing requirements for future generations of technology.

"SEMATECH is forming partnerships with U.S. equipment suppliers to accelerate the development of critical technologies," said Sen. Alfonse D'Amato (R-N.Y.). "By sharing the cost of this development with Hampshire Instruments, SEMATECH is strengthening the domestic equipment infrastructure than is vital to the competitiveness of the entire U.S. semiconductor industry."

SEMATECH, a consortium of 14 U.S. semiconductor manufacturers, has an annual budget of $200 million. More than half of its funding is derived from member firms and the remainder from the federal government through the Defense Advanced Research Projects Agency (DARPA).

Hampshire Instruments, a privately held producer of X-ray lithography systems, has locations in Rochester, N.Y., and Marlborough. Hampshire is actively involved in industry and government programs to recapture U.S. global leadership in semiconductor manufacturing. Hampshire is a member of SEMI/SEMATECH and a prime contractor to the U.S. Government's Microelectronics and National X-Ray Lithography Programs.

CLEVELAND (MARCH 1) PR NEWSWIRE - Banner Industries, Inc. (NYSE:BNR) today reported that all of its outstanding 8 percent cumulative convertible preferred stock had been converted to class A common stock.

Banner earlier announced plans to redeem the preferred stock at $26.40 per share, but indicated that it expected all preferred holders to exercise the option of converting their preferred into class A common shares at a conversion ratio of 3.75 shares of common for each preferred share. Banner's class A common stock closed at $10.75 per share yesterday on the New York Stock Exchange.

Banner had 1.4 million 8 percent cumulative convertible preferred stock shares outstanding, 383,600 of which were in the hands of nonaffiliates of the company. The conversion increases the number of common shares

outstanding from 14,827,771 to 16,266,271.

Banner is a leading supplier of aerospace products, industrial products and communications services and has a minority interest in Rexnord Corporation.

GOLDEN, CO (MARCH 1) PR NEWSWIRE - Canyon Resources Corp. (NASDAQ: CYNR), a Colorado-based mining company, announced today that more than 600,000 ounces of gold have been discovered at the Briggs deposit in the Panamint Range, Calif.

In its recent purchase of Addwest Gold Inc., Canyon acquired 100 percent ownership of the Briggs property which includes approximately 24,000 acres of mining leases and claims in the southern Panamint Range.

The 600,000 ounces of gold in the Briggs deposit occur in 17.2 million tons of rock which contain an average grade of 0.035 ounce gold per ton. The deposit has been defined by 78,000 feet of drilling in holes drilled on a grid pattern with approximate 100-foot spacing and is open in several directions. Drilling to determine its further extent is planned ofr 1990. In additon to the known deposit, the Briggs property contains numerous exploration targets with gold mineralization at the surface. Some of these targets are in Wilderness Study Areas of the Bureau of Land Management.

"Further evaluation of the Briggs deposit will be necessary, including environmental studies, metallurgical test work, and engineering feasibility during 1990 and 1991, before its full significance can be realized," stated Richard H. De Voto, president. The work to be conducted on the Briggs and other Addwest properties acquired by Canyon will require the company to obtain additional financing.

"The company plans to work closely with local, state, and federal regulatory agencies to insure that the appropriate environmental actions are taken prior to development of the Briggs deposit. Monitoring of biologic conditions on the property has commenced. Careful evaluation, engineering, and permitting of an environmentally acceptable mine plan will be completed before mine construction begins," stated De Voto.

FORT LAUDERDALE, FL (MARCH 1) PR NEWSWIRE - Telematics International, Inc. (NASDAQ: TMAX), announced today that it has recently learned of a document suggesting that there may be undisclosed liabilities up to an amount approximating $2 million in connection with secured loans made by a bank to Globenet, Inc. and resulting from a transaction involving the chief financial officer of the company, Edward L. Savage. Savage has been placed on leave of absence pending clarification of the circumstances relating to the actions involving Savage and the impact on the company's previously reported financial results. The company has directed counsel to investigate the circumtances relating to this recently uncovered information and its independent accountants, Ernst & Young, are conducting a review of the financial implications of the actions taken by Savage.

While the implications of the recently uncovered information remain unclear, they may have a material impact on financial information reported in previous years. The company expects to make a filing in the near future with the Securities and Exchange Commission describing the circumstances of the recently discovered information and its implications for the company.

Founded in 1982, Telematics designs, manufactures and markets general-purpose computers and software products for communications applications and networks. The company's products include a full range of programmable packet switching systems, low-end protocol converters and switches, and T1 multiplexers. Telematics has approximately 400 employees worldwide. Headquartered in Fort Lauderdale, Fla., Telematics also has facilities in Calabasas and San Mateo, Calif.; Herndon, Va.; Basingstoke, England; Paris; Frankfurt, Germany; and Tokyo.

DEARBORN, MI (MARCH 1) PR NEWSWIRE - Ford Motor Company (NYSE: F) confirmed today that Ford of Mexico has reached a new labor agreement with the union representing its employees at the Hermosillo Stamping and Assembly Plant in Hermosillo, Sonora, Mexico.

"We are pleased that this settlement was reached without any labor disruption," said William E. Scollard, vice president - Manufacturing Operations, Ford Motor Company, North American Automotive Operations.

"We congratulate all those that were involved in this successful negotiation. We look forward to continuing the excellent working relationships at Hermosillo Stamping and Assembly Plant as the facility

begins production of the 1991 Mercury Tracer and Ford Escort."

Scollard said the settlement is consistent with the Mexican government's economic pricing and income stabilization program designed to reduce inflation. It is also in line with the labor agreement reached earlier at the Ford of Mexico Chihuahua Engine plant, he added.

The Hermosillo Stamping and Assembly Plant was opened in 1986. The plant, which employs more than 2,100 people, is in the final stages of a retooling and retraining program leading to the launch of the all new 1991 subcompact products. Ford invested $300 million in the recent expansion of the plant.

NEW YORK (MARCH 1) PR NEWSWIRE - Lamalie Associates, Inc., one of the nation's ten largest executive search firms, said today that it has merged with the New York search firm of Flanagan & Webster, Incorporated. The merger was announced jointly by John F. Johnson, Lamalie president and chief executive officer, and Anthony B. Cashen, formerly president of Flanagan & Webster, and now managing partner of the combined New York offices. Terms of the transaction were not disclosed.

"The combination of the two firms," Johnson said, "significantly enhances Lamalie's position in New York, and also provides key linkage with our European clients. By teaming up with Dale Flanagan, John Webster, Tony Cashen and their partners," he added, "we broaden our visibility in the Northeast and mid-Atlantic regions to provide better service to national and international clients."

The companies said that Lamalie's New York office will remain at 101 Park Ave. In mid-May the two firms will join forces as Lamalie Associates at Flanagan & Webster's 489 Fifth Ave. offices.

Flanagan & Webster, which was founded in 1975, conducts senior level executive search assignments on a retainer-only basis. The firm's expertise is in the financial services area, serving important clients in investment banking, investment management, commercial banking and insurance, as well as diverse areas of manufacturing and real estate, health care, education and other not-for-profit sectors.

Lamalie Associates, Inc., with offices in Atlanta, Chicago, Cleveland, Dallas, Houston, New York and Tampa, Fla., ranks among the top executive search firms in the nation. The firm also conducts international search assignments through its Caldwell Lamalie International joint venture.

ATLANTA (MARCH 1) PR NEWSWIRE - Telecom USA (NYSE: TTT) and SURAnet today announced a cooperative agreement to provide jointly enhanced communications technology to SURAnet, the largest National Science Foundation-sponsored regional network.

Under the agreement, the parties will exchange information relative to fiber optic T-1 technology and packet-switching.

Telecom USA, the nation's fourth-largest long distance carrier, will provide digital data telecommunications lines through T-1 fiber optic cable. The company offers 100 percent digital switching capabilities over fiber optic facilities throughout the country. In addition, Telecom USA was one of the first in the long distance industry to install Signaling System Seven (SS7) throughout its network, for faster connection times with lower associated long distance costs. These features help ensure maximum accuracy, reliability and faster network access.

SURAnet, funded by the National Science Foundation in 1986 as its first regional computer communications network, is a wide-area network which now extends throughout 13 southeastern states, Puerto Rico and the District of Columbia.

SURAnet has close to 80 nodes and provides interconnection among academic, governmental and industrial local area networks. SURAnet facilitates communciation and collaboration among scientists in academic and other research and educational organizations. It provides access to the NSF-sponsored Supercomputer Centers as well as other unique resources available via the Internet, the international computer network community.

The three-year agreement will seek to enhance the existing network in key areas such as speed and connectivity. The first priority is to permit SURAnet to handle increasing traffic by upgrading the existing network from 56 kilobits to 1.5 megabits per second using Telecom USA T-1 facilities. Installation is scheduled for mid-March.

Telecom USA, headquartered in Atlanta, provides a wide range of long distance services to over 500,000 customers throughout the country. The company is publicly traded on the New York Stock Exchange under the symbol "TTT."

MORRIS TOWNSHIP, NJ (MARCH 1) PR NEWSWIRE - Allied-Signal Aerospace Company announced today that Finnair has selected the Bendix/King Traffic Alert and Collision Avoidance System (TCAS) for its fleet of international aircraft.

Terms of the contract were not disclosed.

Finnair, the national airline of Finland, is the 11th airline worldwide to select the Bendix/King TCAS system. Others include American, Delta, Continental, Lufthansa, USAir, Iberia, Southwest, Cathay Pacific, All Nippon Airways and Continental Express.

"Finnair has one of the best safety reputations in aviation and we are honored to have been selected as its TCAS supplier," said Robert M. Handley, director of marketing for Allied-Signal's Bendix/King Air Transport Avionics Division, which manufactures the TCAS system in Ft. Lauderdale, Fla.

TCAS, which operates independently of ground-based radar stations, is an airborne collision avoidance system that informs pilots of the presence and location of other aircraft in their vicinity, alerting them to potential collisions. If the situation warrants, the system issues an advisory for correcting the aircraft's vertical course.

The Federal Aviation Administration has ordered that all aircraft carrying more than 30 passengers and flying in U.S. airspace be equipped with TCAS equipment by the end of 1993.

Allied-Signal Aerospace Company is an operating unit of Allied- Signal Inc. (NYSE: ALD), an advanced technology company with businesses in aerospace, automotive products and engineered materials.

METAIRIE, LA (MARCH 1) PR NEWSWIRE - Chemfix Environmental Services Inc. (CES), a wholly owned subsidiary of Chemfix Technologies Inc. (CTI) (NASDAQ: CFIX) has entered into an agreement with Waste-Tech Services Inc. (WTS) to design and operate an ash-fixation system for its Kimball, Neb. hazardous waste incinerator facility.

The contract is valued at approximately $3.5 million over the five-year period of the agreement.

Robert W. Hirsch, president of CES, stated that the Chemfix(R) process was selected by WTS as the most appropriate fixation process for the incinerator ash. He further stated that this was CES's first fixed facility designed to treat a single source of hazardous waste using the Chemfix(R) process. The processing system will have the capabilities to receive up to 18,000 tons of ash each contract year.

Harry Conger, president of WTS, said: "The Kimball facility has been designed to handle RCRA solids, sludges and liquids, and delist the ash residue from the process. This facility clearly demonstrates WTS's mission to minimize generators' cradle-to-grave risks and liability."

Waste-Tech Services Inc., an affiliate of Amoco Oil Co., provides hazardous waste incineration services to commercial industrial generators.

Chemfix Technologies Inc. is an environmental services company that provides analysis and treatment of hazardous and nonhazardous waste materials for industry and government. The Chemfix(R) process chemically fixates and solidifies hazardous solids and sludges, municipal sewage sludges, oil and gas waste, and many other types of waste, converting them into environmentally safe solid, claylike materials that can be reused in many cases.

NEW YORK (MARCH 1) PR NEWSWIRE - Three of the nation's leading grassroots organizations and MCA Music Entertainment Group have joined Coors Brewing Company in a $40 million, five-year campaign to promote family literacy. The "Literacy -- Pass It On" campaign was announced today by Peter Coors, president of the Golden, Colo.-based brewery.

Coors announced the establishment of the Coors Foundation for Family Literacy to support the Literacy -- Pass It On campaign's three-fold mission of supporting grassroots family literacy organizations, heightening public awareness and raising funds for literacy through a national concert tour.

Coors Brewing Company has awarded each of the following groups $250,000 in 1990: SER-Jobs for Progress, a Dallas-based organization meeting employment needs of the Hispanic community; Opportunities Industrialization Centers of America (OIC), a Philadelphia-based group which provides the disadvantaged with job training and education; and the National Volunteer Literacy Campaign (NVLC), a national organization which promotes the effective use of volunteers in the fight against illiteracy.

SER, OIC and the NVLC working together as the "Coors Literacy Corps" have committed to training 30,000 adults to read in 1990. Speaking on their behalf at the kick-off announcement were Peter Waite, chairman of the NVLC; Elton Jolly, president of OIC; and Pedro Viera, president of SER.

The public awareness component of the Literacy -- Pass It On campaign represents commitment of approximately $8 million by Coors that includes a multimedia campaign on the issue of family literacy, and funding and promotion of a national toll-free literacy information and referral line (1-800-228-8813). In addition, Coors will be promoting "Kylie's Song," a children's book about self-esteem, to raise funds for the Foundation. The public awareness campaign will debut this spring.

The Coors literacy program also features a seven-city concert tour to be held in partnership with MCA Music Entertainment Group. Funds raised during the tour will be distributed to groups by the Coors Foundation for Family Literacy. Details of the concert tour will be announced this spring.

Also present for the announcement were comedian George Lopez, MCA Records artist Sheena Easton and Motown Records artist Smokey Robinson, who will participate in the Pass It On 1990 concert tour.

An advisory council, comprised of Elton Jolly, Al Teller, Pedro Viera and Peter Waite, will provide input on literacy issues to the Coors Foundation for Family Literacy.

PHILADELPHIA (MARCH 1) PR NEWSWIRE - Consolidated Rail Corp. (NYSE: CRR) announced today that it has realigned its marketing and sales department so that each of its business groups is dedicated to serving customers in one of seven major product areas.

Also, a new unit, Marketing Services, has been created to provide pricing support services to the business groups.

In the business group realignment, the grain and food businesses handled by the former Chemical and Agriculture Group and the former Boxcar Group have been transferred to a Food and Grain Group. As a result, the seven commodity and product-based business groups are: Automotive; Petrochemicals and Minerals; Coal, Coke and Iron Ore; Food and Grain; Forest and Manufactured Products; Intermodal, and Steel.

A major goal of the new Marketing Services unit is to broaden the use of automated rates and tariffs, simplify the pricing process, and reduce billing discrepancies. Other responsibilities of Marketing Services include billing, marketing information systems, and forecasting.

Directing Conrail's efforts in the restructured business groups as assistant vice presidents are George P. Turner, Petrochemicals and Minerals; Dr. Joseph F. Folk, Food and Grain; and Dennis H. Paranzino, Forest and Manufactured Products. Richard W. Lynch, former assistant vice president-Chemicals and Agriculture, has been named assistant vice president-Coal, Coke and Iron Ore, succeeding Warren G. Barber, who has retired. Assistant vice pPresidents who continue to lead the other groups are John T. Bielan, Automotive; John P. Sammon, Intermodal, and Timothy P. Dwyer, Steel. Marianne S. Gregory has been named assistant vice president-Marketing Services.

Conrail operates a rail freight network in 14 Northeast and Midwest states the District of Columbia, and the Province of Quebec.

#90060p0131 03/01/1990 ~PR Newswire
CHICAGO (MARCH 1) PR NEWSWIRE - United Airlines said today that, according to industry figures reported to the U.S. Department of Transportatin (DOT), it has surpassed Northwest Airlines and Japan Airlines to become the largest airline across the Pacific.

United said it surpassed its competitors by responding to customer demand for quality service in the highly competitive Pacific travel market. After acquiring the Pacific Division of Pan Am in February 1986, United invested millions of dollars refurbishing its fleet of Boeing 747s, upgrading the training of its domestic U.S. and international staff and enhancing its service with quality innovations such as the concierge program it pioneered for international First Class passengers. Last fall, United announced a $45 million enhancement to its international Business Class service.

United also increased its capacity over the last four years through a combination of expanded flying on trans-Pacific routes and upgrading to larger aircraft to meet the growing demand for its international service. United has more than doubled its Pacific capacity since acquiring Pan Am's Pacific Division in 1986. Capacity in 1990 will be 115 percent higher than it was in 1986.

According to the industry figures reported last month to the DOT, United led Northwest in available seat miles (ASMs) for total Pacific travel for the year 1989. United posted 1989 Pacific ASMs of 21,710,000,000 versus 21,338,000,000 for Northwest. Available seat miles are defined as one seat flown one mile.

Additionally, United has surpassed Northwest in revenue passenger miles (RPMs) for the total Pacific every month since September 1989. For the fourth quarter, United posted Pacific RPMs of 3,877,000,000 versus 3,569,000,000 for Northwest. A revenue passenger seat mile is defined as one revenue passenger carried one mile.

Last year, United strengthened its trans-Pacific schedules by adding service between San Francisco and Seoul, Taipei and Tokyo and between Honolulu and Tokyo and its intra-Asian schedules with new service between Tokyo and Bangkok. This month, the airline added non-stop service between Newark and Tokyo.

Capacity also was increased with the addition of the new Boeing 747 400 aircraft on trans-Pacific routes. United presently operates four of these state-of-the-art aircraft in the Los Angeles-Sydney/Melbourne and San Francisco/Hong Kong markets. United will receive eleven additional Boeing 747-400s between now and 1992.

United said it plans further expansion of its Pacific operation this summer when the carrier will establish mini-hubs at Seoul and Taipei, add new flights from Bangkok and Singapore and introduce Los Angeles Seoul non-stop service.

STILLWATER, MN (MARCH 1) PR NEWSWIRE - INCSTAR Corporation (AMEX: ISR) reported today that non-recurring expenses related to its acquisition of Clinical Sciences Inc., and the transfer of two subsidiary businesses to its primary Stillwater facilities led to a loss for the quarter and the nine-month fiscal period ended Dec. 31, 1989. The company has changed its fiscal year end from March 31 to Dec. 31.

INCSTAR reported a loss for the quarter ended Dec. 31, 1989, of $4,282,300 compared with net income of $434,200 in the comparable period of the previous year, while sales increased to $5,175,900 from $4,472,500. On a per share basis, the loss widened to 78 cents versus net income of 13 cents a year earlier, as the average number of shares outstanding increased 64 percent to 5.5 million from 3.3 million, as a result of the mid-December merger.

For the nine-month fiscal period, INCSTAR recorded a loss of $5,769,600, or $1.47 per share, compared with (unaudited) net income of $1,445,800 or 44 cents per share, in the same period of the previous year. Net sales increased 5 percent to $14,610,500 from $13,943,000.

In December 1989, INCSTAR merged with Clinical Sciences through the issuance of .8772 shares of INCSTAR common stock for each share of Clinical Sciences stock. In a related transaction to the merger, INCSTAR sold approximately 3.8 million shares of its common stock for $27.1 million to Bioengineering International B.V. (BEI) an affiliate of the FIAT Group. As a result of the merger and stock sale, INCSTAR's common stock outstanding grew from 3.6 million to 14.3 million, with BEI owning approximately 52 percent of the total shares outstanding.

Included in the third quarter results were $2.8 million in one-time expenses associated with the business combination. In addition, INCSTAR announced in December the closing of Clinical Sciences' New Jersey facility and the transfer of those operations to its primary facility in Minnesota, resulting in a non-recurring charge of $1.1 million for the quarter.

However, sales for the quarter rose 16 percent, reaching $5 million for the first time in the company's history, as INCSTAR's medical diagnostic test kits continued to penetrate domestic and international markets, according to Orwin L. Carter, Ph.D., president and chief executive officer. The sales growth reflected "the underlying strength of our products and marketing network," Carter said. He noted that the addition of Clinical Sciences sales after the acquisition on Dec. 13 had only a

minimal impact on quarterly sales.

INCSTAR Corporation, based in Stillwater, a suburb of St. Paul manufactures and markets immunodiagnostic test kits; reagents for the detection of metabolic diseases, infectious diseases, sexually transmitted diseases, and diseases of the immune system; and related products used by major hospitals, clinical reference laboratories and researchers. INCSTAR is a 52 percent owned subsidiary of Bioengineering International B.V., a member of the Italy-based FIAT Group of Companies.

ALEXANDRIA, VA (MARCH 1) PR NEWSWIRE - PHP Healthcare Corporation (NASDAQ-NMS: PHPH) reported a 61 percent increase in net earnings in its third quarter, ended Jan. 31, 1990.

Net earnings for the third quarter increased to $742,000 (20 cents per share) over $462,000 (13 cents per share) for the comparable quarter last year.

For the nine months ended Jan. 31, 1990, earnings before extra- ordinary items also increased 61 percent to $2,042,000 (55 cents per share) over $1,211,000 (33 cents per share) for the comparable nine months last year. Net earnings for the nine months ended Jan. 31, 1990 remained relatively unchanged, $1,292,000 (35 cents per share) for fiscal year 1990 and $1,269,000 (35 cents per share) for fiscal year 1989, due to the $750,000 (20 cents per share) settlement of litigation in the first quarter of fiscal year 1990.

Management attributes these strong earnings results from its restructured business mix and the start up of three new projects during the quarter. Management is concentrating on maintaining these improved earnings through the conclusion of fiscal year 1990 and beyond.

LONDON (MARCH 1) PR NEWSWIRE - For the first half of its third full year of operations, Anangel-American Shipholdings Limited ("AASL") (NASDAQ: ASIPY) reports net income for the six months to Dec. 31, 1989, of US$22,398,000 compared to US$17,390,000 for the six months to Dec. 31, 1988, an increase of 28.8 percent.

Net income was stated after a depreciation charge of US$2,677,000 and a gain on disposal of an investment in an associated tanker company of US$6,000,000. EPS declined from $2.04 for the six months to Dec. 31, 1988 compared to $1.33 for the six months to Dec. 31, 1989, reflecting an increase of approximately 8,100,000 in the average number of shares outstanding consequent upon the company's July 1989 ADR offering and the operation of its dividend reinvestment plan. A dividend of 85 cents per share has already been distributed in respect of the six months, as compared with $1.00 for the period to Dec. 31, 1988. The proceeds of the July offering have now been fully invested and, through its subsidiaries, the company now operates a fleet of seventeen modern Japanese built dry bulk vessels totaling 711,000 DWT valued at US$312,000,000 as at Dec. 31, 1989.

Management expressed its satisfaction with results and noted the strong 78.5 percent increase in profit from shipping operations for the six-month period to US$16,703,000 compared with US$9,358,000 in 1988, principally attributable to the expansion of the group's fleet.

NEW YORK (MARCH 1) PR NEWSWIRE - Lord & Taylor, the oldest specialty store in the country, will open its 48th store in Westfield, N.J., on Thursday, April 12, 1990. To celebrate the opening, Lord and Taylor will host a reception and private shopping evening on Wednesday, April 11, to benefit The United Fund of Westfield and Westfield Symphony Orchestra.

The two-level, 124,000-square-foot store will feature the essence of American fashions and accessories for women, updated traditional clothing and furnishings for men, and complete selections for children from layette

through teens, as well as crystal and gifts for the home. Red Rose Service Lord & Taylor's Personal Shopping Service, will also be available.

The Lord & Taylor symbol of the American beauty rose is representative of the store's heritage for quality, service and community responsibility. Lord & Taylor's tradition of fashion authority, quality merchandise and friendly customer service will be integral features at the new Westfield store, as in all Lord & Taylor stores. Each store is designed to create a comfortable, pleasurable shopping experience.

The exterior of the store features dual entranceways of white marble and black granite. The interior is a contemporary environment with the utmost attention to detail in lighting, display cases, fixtures and general decor. As part of a new breed in store design for Lord & Taylor, the Westfield store uses high quality materials, such as fabric- wrapped panels and white-washed oaks, to accent the merchandise.

The classic elegance of the interior has a honey-vanilla color palette as a backdrop. On the lower level, the clean beiges are complemented by corals in Sportswear and peaches in Dresses and Accessories. Natural cherry wood flooring and forest green accents create a rich atmosphere for Men's on the upper level. Soft grays highlight Junior's and mint and sea foam greens accent Children's and Intimate Apparel.

Lord & Taylor, the oldest specialty store in the country, currently operates 47 stores in 14 states and the District of Columbia.

HIGHLAND PARK, MI (MARCH 1) PR NEWSWIRE - Earl G. Graves, publisher of BLACK ENTERPRISE Magazine and a nationally recognized authority on black business development, today was elected to the Board of Directors of Chrysler Corporation.

Lee A. Iacocca, chairman of Chrysler Corporation, said, "Earl Graves is an outstanding business executive and a talented entrepreneur. We are looking forward to his contributions to the Chrysler Board of Directors."

Graves is president and chief executive officer of Earl G. Graves, Ltd., parent corporation for the Earl G. Graves Publishing Company, publisher of BLACK ENTERPRISE Magazine.

He serves on the Board of Trustees of Howard University and the boards of directors of Rohm & Haas Corporation and the New York State Urban Development Corporation. He is chairman of the Black Business Council and is on the Board of Selectors for the American Institute of Public Service.

He also serves on the Executive Committee of the Council for Competitiveness and is a trustee of the Council for Economic Development and the New York Economic Club.

He recently was appointed a member of the Minority Enterprise Development

Advisory Council of the U.S. Department of Commerce.

Graves received his B.A. in economics from Morgan State University, Baltimore, and has received Honorary Doctor of Laws degrees from 24 universities, including his alma mater. He has lectured at Yale University as a Poynter Fellow.

Long active in Scouting, he serves as the National Commissioner of Scouting and on the Executive Board of the National Office of the Boy Scouts of America. He is the recipient of Scouting's highest recognition awards for volunteer service, including the coveted Silver Buffalo.

Graves is a ROTC graduate, attended Airborne and Ranger School, and finished his Army career (with the rank of captain) as a member of the 19th Special Forces Group, the Green Beret. He is also the recipient of the U.S. Army Commendation Award.

BRYN MAWR, PA (MARCH 1) PR NEWSWIRE - Arthur E. Morris has been appointed president of PSC Engineers & Consultants Inc. (PSC E&C), a subsidiary of Philadelphia Suburban Corp. (NYSE: PSC).

Headquartered in Limerick, Pa., with offices in Lancaster, Allentown and Reading, Pa., and Hunt Valley, Md., PSC E&C provides a broad range of engineering, architectural and operational consulting services.

Morris is the former mayor of the city of Lancaster, an elected position he held for 10 years, until Jan. 2, 1990, when he joined Philadelphia Suburban Corp. as vice president-municipal services. A civil engineer, Morris began his career with the city of Lancaster in 1970. Among the positions he held were director of public works and city engineer.

Morris is the chairman of the Advisory Panel for the Decontamination of Three Mile Island, Unit Two, which is located approximately 25 miles from Lancaster. During his time as mayor, he served as president of the Pennsylvania League of Cities. He also served on the board of directors for that organization and on the Advisory Committee of the National League of Cities.

Born in Widnes, England, his family immigrated to the United States when Morris was 14. He holds a B.S. degree in civil engineering from Penn State University. He and his wife Linda will continue to live in Lancaster.

Philadelphia Suburban Corp. operates Philadelphia Suburban Water Co., one of the nation's largest investor-owned water utilities, as well as several non-regulated subsidiaries that provide information and engineering services mainly to utility and municipal customers.

DENVER (MARCH 1) PR NEWSWIRE - Martin Marietta Astronautics Group has been awarded a study contract by NASA's Lewis Research Center, Cleveland, for an experiment on the behavior of cryogenic fluids in the low-gravity conditions of space flight.

Martin Marietta Space Systems at Denver will study conceptual designs for a Space Shuttle flight experiment that will use liquid nitrogen to collect information on the behavior of cryogenic fluids in space. The experiment is expected to fly on the Shuttle in early 1995. Martin Marietta is one of two companies to receive contracts for the experiment.

"The liquid nitrogen experiment will provide vital data on storage and resupply of cryogenic fluids in space," said William J. Bailey, Martin Marietta's cryogenic program manager. "It also will give us information on the best means of storing liquids on the Space Station. Cryogenic management technology is essential to future space flights, particularly those on which vehicles must refuel during long missions," he said.

Martin Marietta has been studying the storage and supply of these fluids in space under a previous contract as part of NASA's Cryogenic On-Orbit Liquid Depot Storage, Acquisition & Transfer Satellite (COLD-SAT) program, a spacecraft that will conduct cryogenic management experiments in space.

DOMINGUEZ, CA (MARCH 1) PR NEWSWIRE - Pic 'N' Save Corp. (NASDAQ: PICN) announced today that its sales for the four weeks ended Feb. 25, 1990, were $32,253,000, an increase of 15.7 percent over sales of $27,875,000 in the prior year. Sales in comparable stores were 1.5 percent higher than in 1989. The four weeks ended Feb. 25, 1990, represent the first fiscal period of the company's new 1990 fiscal year following the January transition period.

"Despite the impact of bad weather, particularly in the far West, and difficult comparisons against our inventory liquidation markdowns in the New York area stores last year, our trends are up and we believe that the modest February comparable store sales increases indicate a strengthening of our overall business," said Lewis B. Merrifield III, president and chief executive officer.

Merrifield further stated that March sales comparisons will be extraordinarily challenging against strong Easter sales in March, 1989, but should improve during the 1990 Easter season in April.

Pic 'N' Save closed one store in February at its Encino, Calif. location, and currently operates a chain of 189 retail stores in the Western and Southern United States and the New York metropolitan area. These stores specialize in new, close-out, variety general merchandise which is sold at substantial reductions from original retail prices.

CONTACT: William M. Jacobs Jr., VP, 213-761-4210, or John F. Hoffner, VP 213-761-4246, both of Pic 'N' Save, or Richard M. Brodrick of Hill and Knowlton, 213-937-7460, for Pic 'N' Save

#90060p0164 03/01/1990 ~PR Newswire
ALLENTOWN, PA (MARCH 1) PR NEWSWIRE - Air Products and Chemicals Inc. (NYSE: APD) is constructing a major coal refuse-fired cogeneration facility near the town of Ebensburg in Cambria County, Pa., roughly 70 miles east of Pittsburgh, marking a further expansion of the company's environmental and energy systems businesses.

Air Products developed the Cambria project, and will own and operate the new facility which will generate approximately 80 megawatts of electricity for Pennsylvania Electric Co. The plant also will co- produce steam for space heating at a nearby nursing home and for coal drying at a local mine. The electricity and steam supply arrangements will be provided under 20-year contracts. The project, which is expected to be completed in the spring of 1991, will cost in excess of $150 million. It will be partially financed by tax-exempt bonds issued under an allocation from the

Commonwealth of Pennsylvania.

In addition to cogeneration, the company's environmental/energy systems portfolio includes Air Products' American Ref-Fuel joint venture for building waste-to-energy facilities; and its Pure Air joint venture that markets advanced flue gas desulfurization systems on an own-and- operate basis. In these three areas alone, the company and its partners have invested $1.2 billion in six projects that have been completed or are under construction (see following table). In each of these areas, Air Products has capitalized on the "on-site" skills it has developed over several decades in its industrial gases and chemicals businesses where it has established leadership positions. These skills include engineering, financing, owning and operating large process facilities under long-term contracts.

Air Products entered the cogeneration business on a commercial basis in the mid-l980s after the company had gained experience in constructing and operating cogeneration systems at several of its own facilities. The company's first commercial venture in this area is a $100-million, 49-megawatt plant it brought on stream in Stockton, Calif., in 1988. Having achieved a better than 99 percent on-stream record during the past summer, this profitable facility is recognized as one of the most reliable circulating fluidized-bed, coal-fired power plants in the United States.

The Cambria facility also will employ circulating fluidized bed combustion technology to burn bituminous waste coal -- removing 90 percent of its sulfur content. The fuel will be obtained from a 30- million ton waste coal pile adjacent to the 77-acre plant site and from another smaller pile in the area. Raw coal from local mines may be blended with the waste coal to maintain consistent boiler fuel properties. Ash produced during the combustion process, which will have alkaline properties, will be returned to the acidic waste coal piles to aid in their reclamation. The ash material also may be suitable for use as a concrete additive, soil conditioner or roadbed fill material.

As it did with the Stockton facility, Air Products intends to sell a 50 percent equity interest in the Cambria project to outside investors.

GREENWICH, CT (MARCH 1) PR NEWSWIRE - W.R. Berkley Corporation (NASDAQ: BKLY), an insurance holding company, today announced that net income per share (including realized investment gains) increased to $1.22 for the quarter ended Dec. 31, 1989 from $1.14 recorded in the comparable period of the prior year. Net income per share for the full year 1989 was $4.73 compared with $4.71 per share earned during 1988.

Net income for the fourth quarter of 1989 was $14,431,000 in comparison with $13,781,000 earned during the comparable 1988 period. Net income for the years ended Dec. 31, 1989 and 1988 was $55,753,000 and $59,365,000, respectively.

The 1989 fourth quarter and year to date results were impacted by catastrophe losses of $1,960,000 ($.17 per share), and $12,302,000 ($1.04 per share), respectively, in comparison with catastrophe losses of $1,007,000 ($.08 per share) and $6,110,000 ($.48 per share) incurred during the corresponding 1988 periods.

For the fourth quarter and full year 1989, results include realized investment gains of $1,824,000 ($.15 per share) and $2,127,000 ($.18 per share), respectively, in comparison with realized investment gains of $275,000 ($.02 per share) and $532,000 ($.04 per share) recorded during the comparable 1988 periods.

There were fewer shares outstanding during the 1989 periods due to the company's common stock repurchase authorization which was completed during the first quarter of 1989.

Total revenues of $141,843,000 and $550,795,000 for the 1989 fourth quarter and year to date periods represent increases of 6 percent and 3 percent, respectively, over comparable 1988 revenues. The increases in the 1989 periods were due to significantly greater levels of both service fee and investment income which more than offset a decline in earned premium. The growth in investment and service fee income resulted from internal expansion and acquisitions completed during 1988 and 1989.

W.R. Berkley Corporation is a holding company whose subsidiaries operate in three major segments of the insurance business: regional property casualty insurance; specialty lines of insurance (including excess and surplus lines, commercial transportation and reinsurance); and insurance services operations (including management of alternative insurance market mechanisms).

BARBERTON, OH (MARCH 1) PR NEWSWIRE - Novar Electronics Corporation (NASDAQ: NOVR) and The RTZ Corporation PLC announced today that, following approval of the transaction at a special meeting of shareholders of Novar on Feb. 28, 1990, Keble Corporation, an indirect subsidiary of RTZ, has merged with Novar. As a result of the merger, Novar has become an indirect subsidiary of RTZ. Each common share of Novar outstanding on March 1, 1990, other than shares held in Novar's treasury and shares with respect to which holders elect to exercise dissenters' rights, has been converted by the merger into the right to receive $9.50 per share in cash.

A letter to shareholders and related documents describing the procedures to be followed in order to receive $9.50 per share in cash will be mailed shortly to all persons who were holders of record of Novar shares at the time of the merger.

BERLIN (MARCH 1) PR NEWSWIRE - ABB Kraftwerke AG, Mannheim - the largest member company of the German ABB Group which has been split up into legally independent units since the beginning of the year - and the state-owned East Berlin Power Plant Manufacturer VEB Bergmann-Borsig have announced their intention to cooperate exclusively in the field of power plant technology. A joint venture company of the two firms is to be established as soon as the legal conditions in the German Democratic

Republic will make this possible. If regulations allow, ABB will acquire a majority of the shares of the new company and will take over its economic management.

ABB Kraftwerke AG employs a workforce of approximately 4,000; its sales last year amounted to 1 billion Deutschmarks. Globally the entire ABB Group's sales in the power generation segment in 1988 reached $2.5 billion with a workforce of 16,000. Bergmann-Borsig is the central company of the collective combine Kraftwerksanlagenbau Berlin and employs 4,500 people in its facilities at Berlin-Wilhelmsruh. It mainly produces steam turbines, generators, thermal engineering apparatus, boilers, turbines, pipes and equipment for nuclear power plants.

ABB Asea Brown Boveri Ltd. (NASDAQ: ASEAY) is the world's leading electrical engineering company with total annual sales of about $25 billion and 215,000 employees in 140 countries.

MINNEAPOLIS (MARCH 1) PR NEWSWIRE - Cray Research Inc. (NYSE: CYR) announced today that the Atomic Weapons Establishment (AWE), Aldermaston, United Kingdom, has ordered a CRAY Y-MP8/864 supercomputer system valued at $25.1 million.

The purchased system will be installed at the AWE facility during the first half of 1990 and will use the CRAY Research operating system UNICOS, based on AT&T's UNIX System V.

The new system will replace a CRAY-1 system that has been in continuous use at the Establishment for more than 10 years. "This early CRAY-1 system still has the power to outperform its rivals, but it is being retired because of age," said Marcelo Gumucio, Cray Research president and chief operating officer. "We hope that a suitable home will be found for it in a museum in the UK."

A Ministry of Defense spokesman said, "The Cray Research systems at Aldermaston have become a cornerstone for our work here, and we are all very excited by the leading edge R&D environment the new CRAY Y-MP will offer our scientists."

Cray Research designs, manufactures, markets, and supports large-scale, high-speed computer systems for scientific and engineering applications.

AKRON, OH (MARCH 1) PR NEWSWIRE - The BFGoodrich Company (NYSE: GR) and Westlake Monomers Corporation announced today that BFG has completed the sale of its ethylene dichloride and vinyl chloride monomer production facilities at Calvert City, Ky., to Westlake.

The transaction was approved by the Federal Trade Commission on Feb. 21. BFGoodrich will retain ownership of the remainder of the Calvert City plant site, which includes a chlor-alkali plant, an ethylene plant, a specialty chemical production facility and various utilities.

BFGoodrich announced earlier that it had reached an agreement with the FTC that required the company to sell the Calvert City facility. The agreement terminated the litigation between BFG and the FTC regarding the company's purchase of a VCM facility in LaPorte, Texas, in 1982.

The unit that was sold is capable of producing one billion pounds per year of VCM, which is used to manufacture polyvinyl chloride. BFGoodrich expects to purchase a significant portion of the output of the facility.

About 500 people are employed at the Calvert City facility, and 84 work directly in the EDC/VCM unit. About 100 other employees provide services to the unit and are affected by the sale. Westlake has offered employment to all of the salaried employees who are affected by the sale and has also offered to hire the hourly employees currently working in the EDC/VCM facility.

Westlake Monomers is one of the Westlake group of companies and has been formed specifically to operate the EDC/VCM facility at Calvert City.

BFGoodrich produces vinyl materials, specialty chemical products and supplies components and services to the aerospace industry. Sales in 1989 were $2.4 billion.

BRANCHBURG, NJ (MARCH 1) PR NEWSWIRE - Metcalf & Eddy Companies Inc. (NASDAQ: METC) reported earnings today of 29 cents per share for the first quarter of 1990. Earnings per share were up 45 percent over the comparable period of 1989.

Net revenues, which represent work the company performs directly, of $43 million were 25 percent higher than the comparable first quarter of 1989 due in large part to strategic actions taken in 1989 in the areas of marketing and service line expansion. Gross revenues were lower than the comparable period in 1989 due to lower direct project expenses which are passed through to the company's clients. General and administrative expenses increased as a percent of net revenues from 35 percent for the first quarter of 1989 to 38 percent in the first quarter of 1990, reflecting increased emphasis on marketing and sales activities. Operating and net income increased by 40 percent and 49 percent, respectively.

Eckardt C. Beck, chairman, president and chief executive officer of Metcalf & Eddy Companies, pointed to the results as "indicative of the strength of our basic strategy: focus on our core markets of water, wastewater, solid and hazardous waste; expand the line of services to provide clients with single access environmental assistance; achieve

marketing and operating leverage through focused management; and continue to invest wisely to capitalize on strong markets."

Metcalf & Eddy Companies Inc., an Air & Water Technologies company, provides a comprehensive range of environmental services to governmental, commercial and industrial clients directed principally at the protection of the integrity of water resources. Air & Water Technologies provides comprehensive solutions to air and water environmental issues and is traded on the American Stock Exchange under the symbol AWT.

NEW YORK, (MARCH 1) PR NEWSWIRE - The Lexus LS 400 luxury sedan has been recognized by the American Marketing Association (AMA) as one of the "10 Best New Products" of 1989 and has received the organization's prestigious "Edison Award," the AMA announced at its annual conference here today.

The AMA is the largest professional marketing association in the world with more than 50,000 members. Nominations for the Edison Best New Product Awards are submitted by AMA members, with recipients selected by a panel of senior marketing executives.

"Selections are made based in part on marketing innovativeness, success in the marketplace, technological advances, value and impact," said Calvin L. Hadock, AMA chairman of the board. "The Lexus LS 400 certainly scored well in all those areas."

The LS 400 is a 4-door luxury sedan powered by a 250-horsepower, 32-valve, 4-cam aluminum V8 engine. It went on sale in September 1989. During the fourth quarter of 1989, Lexus dealers sold 11,574 LS 400s, outpacing rivals including the Mercedes Benz 300 series and BMW 5- and 7-series.

"The LS 400 has been a winner in every sense of the word since its introduction," said Dave Illingworth, Lexus vice president and general manager. "What makes this award special is that the LS 400 was judged against all other products introduced in 1989 -- not just cars -- and was selected as one of the 10 best."

In addition to the Edison Award, the LS 400 also has been named "Best Imported Car of the Year" by the Motoring Press Association, was selected as one of the "10 Best" cars by Car and Driver Magazine, was named to Automobile Magazine's All-Star" list, made Motor Trend Magazine's list of "Top 10 Imported New Car Buys" and received the Popular Science Magazine 1989 Grand Award for Cars as part of the Magazine's "Best of What's New" issue.

NEW YORK, (MARCH 1) PR NEWSWIRE - Colgate-Palmolive Company (NYSE: CL) today announced an agreement in principle to purchase the dental therapeutic business of Scherer Laboratories, the U.S. market leader in fluoride brush-on gel products for the professional dental community. Its Gel-Kam trademark has achieved strong acceptance within this market. The new business will be run by Colgate-Hoyt Laboratories, a supplier of products to the dental profession.

"Colgate is the global leader in oral care. Capitalizing on this leadership, we are building our presence not just with consumers but with dental professionals. The addition of Scherer's dental therapeutic business enhances our program to develop this important business globally,

beginning with the U.S., Europe and Australia," said Cyrill R. Siewert, president of Colgate-Hoyt Laboratories.

Scherer, based in Dallas, sells its therapeutic products to approximately 20,000 dental offices across the United States. The transaction is subject to negotiation of definitive agreements acceptable to both parties.

Colgate is the leader in the global oral care market with the world's number-one selling toothpaste and a full line of toothbrushes, mouth rinses and dental professional products. In addition, it is one of the world's leading consumer products companies, marketing its quality products in over 160 countries. The company's internationally recognized brand names include Colgate, Palmolive, Ajax, Fab, Irish Spring, Hill's Science Diet and Hill's Prescription Diet.

#90060p0195 03/01/1990 ~PR Newswire

SEATTLE, (MARCH 1) PR NEWSWIRE - With the help of an electronic document management system developed by Boeing Computer Services, a significant milestone was reached today in Ontario Hydro's five-year effort to rehabilitate eight aging coal plants, according to Boeing Computer Services.

The Canadian provincial power supplier has achieved its Phase I goal of entering 10,000 paper drawings and documents, including power-plant blueprints, engineering diagrams and other data, into the computerized document management system developed and installed by Boeing Computer Services.

Bhash Ganti, manager of the project for Boeing, said the Ontario Hydro Records and Information Management System (RIMS) will provide those involved in the rehabilitation effort -- architects, construction crews, engineers -- quick access to existing power-plant documents and related information. Prior to implementing the computerized system, all of the documents and drawings were stored in their paper format, and retrieving a particular document could take a week or more.

"If access to a drawing takes seven days before starting work, it adds that much time to the overall rehabilitation project," Ganti said.

"Time is of the essence because these are old plants that have to be refurbished or they won't generate power anymore; it would disrupt the production of power and service to Ontario Hydro customers."

A key element of RIMS is PPDM, a product and process document management software system developed by Boeing Computer Services. Ganti explained that PPDM essentially controls an electronic repository of the project's documents and drawings. At the heart of PPDM is a "librarian" that knows how to locate documents rapidly, provide secure and controlled access to them, manage changes and perform configuration control. Users will have on-line access to the system via 40 personal computers located at several sites.

With the computerized document management system in place, Ontario Hydro now can proceed with rehabilitating the eight plants located in the province of Ontario. The agency plans to renovate two plants at a time, with completion set for 1993. As the 25-to-30-year-old plants are rehabilitated, all new or revised drawings and documents also will be entered into RIMS. In total, some 60,000 documents are expected to be stored in the computerized document management system.

Boeing Computer Services was awarded the $2 million, four-month contract to design, integrate and install RIMS last June. Following a one-month system acceptance testing and employee training period, RIMS was put into production on time and within budget Dec. 1, 1989. Although Ontario Hydro employees now operate the system, Boeing is under contract to provide on-site maintenance for one year.

In addition to Boeing Computer Services, Ganti said two other companies have played vital subcontractor roles on the Ontario Hydro RIMS project. Spicer Corp. of Kitchner, Canada, provided the imaging software used to scan documents into PPDM and to display documents on personal computers, while the document management system runs on a Tandem NonStop computer. Tandem Computers is headquartered in Cupertino, Calif.

PHILADELPHIA, (MARCH 1) PR NEWSWIRE - Fred Cohen, chairman and chief executive officer of Marlton Technologies, Inc. (AMEX: MTY) and Donald R. Sparks, chairman and chief executive officer of Sparks Exhibits Corporation, jointly announced today that, pursuant to an executed asset purchase agreement, Marlton has agreed to acquire Sparks Exhibits Corporation.

Sparks Exhibits and its predecessors have for more than 40 years been in the business of designing and producing exhibits, displays and graphics for use in trade shows and for other similar purposes. Its customer base includes various Fortune 500 corporations, as well as other commercial and governmental clients.

Sparks has experienced recent substantial growth in both sales and profits and in 1989 doubled its facilities by moving into a new 115,000-square-foot facility in an industrial section in Northeast Philadelphia. Sales for 1989 were approximately $7,700,000, and operating income was approximately 11 percent of sales in 1989.

Cohen indicated that a major consideration in the acquisition of Sparks was the assurance, through five-year employment contracts, that Sparks would continue to have the services of Donald R. Sparks, Michael Tomkin, president and chief operating officer, and William Johnson, executive vice president, sales and marketing. Cohen stated that these individuals, along with other key Sparks personnel, have been primarily responsible for Sparks' growth and profitability, and for Sparks' reputation in the industry as a designer and builder of quality and technologically innovative products.

The purchase price for Sparks is $3,625,000 in cash and notes, plus additional incentive payments based on Sparks' performance over the next five years. A portion of such incentive payments will be payable, at the option of the seller, in Marlton common stock at $2.00 per share. Consummation of the acquisition is subject to, among other things, Marlton's receipt of an opinion from its independent financial advisor, Legg Mason Wood Walker, Inc., confirming that the purchase price is fair to its shareholders, and to approval of the transaction by Marlton's shareholders.

Cohen stated that Marlton and Sparks had been brought together by Omnivest Ventures, and that upon completion of the transaction Robert Ginsburg of Omnivest will be named president and chief operating officer of Marlton, with primary responsibility for managing all of Marlton's acquisition activities, and that Ginsburg will be a candidate for election to Marlton's board of directors at Marlton's upcoming annual meeting. Cohen also pointed out that Marlton's future plans include extensive efforts to acquire other companies that are compatible with Sparks.

NEW YORK, (MARCH 1) PR NEWSWIRE - The American Stock Exchange announced that North American Vaccine, Inc. of Montreal, is the first Canadian company to list this year. North American Vaccine is a vaccine technology company that researches, develops, manufactures and markets human immunobiological products, with emphasis on vaccines to prevent pediatric infectious diseases. The company began trading 9,343,542 common shares

today on a "when issued" basis.

Trading under ticker symbol NVX.WI, the common stock opened on 200 shares at 4.

North American Vaccine acquired the operations of American Vaccine Corporation of Beltsville, Md., and certain assets and technological information of IAF BioChem International Inc., also of Montreal, effective yesterday.

Each American Vaccine shareholder will receive one share of common and/or preferred stock of North American Vaccine for each common and/or preferred share of American Vaccine stock held as of Jan. 16.

North American Vaccine, through its American Vaccine and AMVAX Inc. subsidiaries, is in the process of developing a new pertussis or whooping cough vaccine to be marketed in combination with diptheria and tetanus vaccines as a DTP vaccine.

IAF BioChem International is a specialty pharmaceutical company that researches, manufactures and markets products to diagnose, treat and prevent immune system diseases.

ROSLYN NY (MARCH 1) PR NEWSWIRE - Cheyenne Software, Inc. (NASDAQ: CHEY) named Elliot Levine to the position of vice president- chief financial officer. Eli Oxenhorn, president of Cheyenne said he was delighted to attract Levine who has a strong operations, financial, investment and technical background.

Cheyenne Software, Inc. has developed a number of software products including Organization Analyst for human resources applications and ARCserve and Monitrix for use in local area networks (LAN). These products have recently been introduced and have received good acceptance in the press and from important customers. Cheyenne also owns 53 percent of Gates/FA (NASDAQ: FACO), a leading microcomputer distribution company headquartered in Greenville, S.C.

Levine, who has been consulting to the company during the last few months said, "I'm very excited about the open-ended opportunity that exists at Cheyenne and think the company is on the verge of significant growth. I look forward to helping Cheyenne become a successful, profitable, major factor in the industry."

Levine previously was president of VTX Electronics, Inc., a networking distribution company that he helped turn around. He also was a Wall Street investment banker and an all-star technology research analyst. He has an electrical engineering degree from CCNY, has three grown daughters and resides with his wife in Roslyn, N.Y.

#90060p0205 03/01/1990 ~PR Newswire

ST. PAUL, MN (MARCH 1) PR NEWSWIRE - Medical Graphics Corp. (NASDAQ: MGCC) announced today results of operations for the fourth quarter and year ended Dec. 31, 1989.

Sales for the year were $11,137,416, an increase of 2 percent over sales in 1988 of $10,901,978. A net loss of $487,240, or 28 cents per share, for the year includes an inventory write-down of $300,000, or 17 cents per share, related to older, lower-reliability components. Net income in 1988 was $389,611, or 21 cents per share.

Sales in the fourth quarter were $2,857,130, down 4 percent from $2,974,689 in 1988. The net loss for the quarter, including the inventory write-down, was $376,356, or 22 cents per share, which compares with a net income of $209,442, or 11 cents per share, in 1988.

Annual gross margins, before the inventory write-down, reached 56.4 percent, up from 55.9 percent in 1988.

The operating loss of $58,731 prior to the write-down was due to increased sales and marketing expenses, according to Catherine Anderson, Medical Graphics chairman and chief executive officer.

"We began expanding the sales force in the second half of 1988, but this expansion did not bring anticipated revenue increases," Anderson said. "In the second half of 1989, we reduced selling expenses, made an additional investment in training our field sales staff and the new Series 2 line of pulmonary function products and the CPX/MAX gas-exchange system."

Anderson said that management elected to take the inventory write-down on service-prone system components, including oxygen and carbon dioxide analyzers that the company has replaced with more reliable components of its own design and manufacture. The company has filed for patent protection for the new analyzers, which have been in customer sites for over a year, demonstrating superior performance and significantly improved customer satisfaction.

"We are in a strong position for 1990," Anderson said. "Our domestic sales force is stable and well-trained. Internationally, our business continues to grow, with our first orders written in the Soviet Union, Poland and Hungary in the current quarter. We have an expanded product line that maintains our technological leadership. Our objectives in 1990 are to increase sales and maintain overhead at a level which will return the company to profitability."

Medical Graphics Corp. is a world leader in providing the highest quality, easiest to use and most technologically advanced diagnostic systems for the early detection and treatment of heart and lung disease. The company's common stock is traded on the National Over-the-Counter Market System under the NASDAQ symbol MGCC.

DALLAS, (MARCH 1) PR NEWSWIRE - Halliburton Company (NYSE: HAL) announced today that Jerry B. Davis has been named to succeed Purvis J. Thrash, Sr. as president and chief executive officer of the company's Otis Engineering Corporation subsidiary upon Thrash's retirement on April 1, 1990. Other related management changes, which also will be effective on the same date, include the appointment of Lewis W. "Jody" Powers as senior vice president of operations and marketing and F.A. Waters as vice president of international operations.

Davis, 59, graduated from Texas A&M University in 1954 where he received a B.S. in petroleum engineering. He received his MBA from Southern Methodist University in 1980. Davis joined Otis in June 1967 and has most recently served with the company as vice president - domestic operations (1981-85), vice president - international operations (1985-87), senior vice president - engineering, manufacturing, and diversified services (1987-89), and executive vice president (1989- present).

Thrash, 62, graduated from Texas A&M University in 1950 with a B.S. in petroleum engineering. He joined Otis as an employee in 1958 and in

recent years served with Otis as vice president-domestic operations (1975-80), senior vice president-manufacturing (1980-81), and president and chief executive officer (1981-present). He is a member of Halliburton Company's executive committee. Thrash is a member of the Society of Petroleum Engineers and the American Petroleum Institute.

Powers, 43, graduated from the University of Houston in 1968 and received a BBA in economics and finance. He joined Otis in September 1968. Most recently Powers was vice president-international operations (1989-present). During his career, he worked in the South Louisiana and Europe/Africa Regions.

Waters, 45, graduated from the University of Texas at Arlington in 1967 receiving a BS in mechanical engineering. He has served in the engineering department and both domestic and international operations. His most recent position was regional manager, domestic eastern region in New Orleans (1988-present).

Halliburton Company is one of the world's largest diversified oil field services, engineering and construction companies. Founded in 1919, Halliburton provides oil field services and products, industrial and marine engineering and construction services, and property and casualty insurance services.

#90060p0209 03/01/1990 ~PR Newswire

MT. KISCO, NY (MARCH 1) PR NEWSWIRE - TWA has introduced a new senior discount travel program that offers travel for as low as $94.75 one way.

The TWA Senior Travel Pak, a five-coupon booklet priced at $379, contains four coupons that can be exchanged for travel on TWA within the U.S. and Caribbean, and a fifth coupon valid for a substantial discount when buying a ticket to Europe. The Pak is available to travelers 62 and older.

Each of the four domestic coupons can be used for one-way trips on TWA anywhere in the continental U.S. and Caribbean. A roundtrip requires two coupons. Travel to Hawaii requires two coupons in each direction, or four roundtrip.

The Pak also includes a Europe Bonus Certificate, which allows the passenger to purchase a roundtrip ticket from the continental U.S. to any city in Europe for as low as $449 plus tax.

"This program means the senior traveler can fly roundtrip on TWA within the continental U.S. and Caribbean for less than $190 per trip," said

Kathleen Trepper, staff vice president of marketing services. "All the way from Boston to Los Angeles, or Seattle to San Juan. This gives the traveler the option of more than 100 U.S. cities."

Senior Travel Pak travel also is permitted on TWA's Trans World Express commuter affiliate flights.

"Unlike typical senior 'passport' programs, the TWA program offers travelers the security of making reservations in advance of a trip. Some other programs only let you reserve close in to departure," Trepper said. "Our program lets you make reservations up to 14 days before departure."

Travel during the peak vacation period (May 15-Sept. 15) requires two coupons each way if the one-way trip is over 2,000 miles, "however, this is less restrictive than some other programs, which require two coupons for 2,000 or more miles any time during the year," Trepper said. "If the traveler can plan the trip during off-peak periods, the program is an exceptional value. Based on current air fares, the Senior Travel Pak can save senior travelers as much as $900 over existing Supersaver and Maxsaver prices.

"We also think the Europe Bonus Certificate is unique in several respects " Trepper explained. "We offer an international option that is truly an option, and can be used at any time within one year to purchase a ticket to Europe. The consumer doesn't pay any money up front for the Bonus Certificate, so its a 'decide later, pay later' feature."

The Europe Bonus Certificate can be used to purchase a ticket to Europe for $449 plus tax for off-peak travel (September 16-June 14), and $649 plus tax for peak travel.

"Not only does the Travel Pak offer low international fares to seniors, but these fares are locked in at the time the Travel Pak is purchased, protecting the purchaser from any fare increases," Trepper said. "No other program currently offers that."

Senior Travel Pak Travel in North America is permitted on Tuesday, Wednesday and Thursday, and travel within the continental U.S. also is permitted on Saturday. Travel to Europe is permitted any day of the week. Thanksgiving and Christmas blackouts apply and seats are limited. Travel to Hawaii is not permitted during the summer.

"When you combine the domestic savings with the incredible fares to Europe the traveler can save up to $1,200 or more on three roundtrips," Trepper said.

TWA Senior Pak booklets can be purchased through travel agents, however the Paks themselves are mailed to the customer from TWA, and tickets

issued in exchange for Travel Pak coupons must be issued by TWA. Coupons must be redeemed within one year of the date the Pak is purchased.

To order a TWA Senior Travel Pak booklet, or to request an application, travelers can call TWA at 800-221-2000, or visit their travel agent or TWA Travel Store. Proof of age is required at the time of purchase and while traveling.

NEW BRITAIN, CT. (MARCH 1) PR NEWSWIRE - Richard H. Ayers, chairman and chief executive officer, today reported: "The Stanley Works board of directors approved the following changes in officer responsibilities effective April 1, 1990: Matthew M. Bristow is appointed vice president-productivity, Paul A. Marier is appointed vice president-human resources, and Ronald F. Gilrain, vice president-public affairs, will also be responsible for the corporate marketing services function. All positions will report to me."

Ayers noted: "Mr. Bristow will oversee corporate functions of environmental affairs, facilities engineering, laboratory and traffic. In addition, he will continue as liaison between the Stanley Manufacturing Technology Center, located in Dallas, Texas, and Stanley businesses worldwide."

"The new corporate productivity department, under Mr. Bristow, will ensure that corporate functions involved are optimally servicing the needs of our divisions on a worldwide basis and are combining their respective specialities for the success of all Stanley businesses."

Bristow is a graduate in accounting from the University of Hartford. He joined Stanley in 1970 as an internal auditor, and held positions of increasing responsibility before being appointed controller of the corporation in 1982. He was elected vice president in 1983. Bristow and his family reside in Farmington, Conn.

"Paul Marier will head a new corporate department which combines two separate departments: industrial relations and organization development. He will be responsible for the corporate functions of compensation and benefits, employee relations, organization development, corporate personnel and employee administrative services," Ayers said. "The future needs of the company will be better served by having one department of human resources."

Marier is a graduate in psychology from Amherst College, and holds a

master's degree in social work from the University of Chicago. He joined Stanley in 1960 in personnel, and has actively worked in, or been closely associated with, all the functions he will now supervise. He joined the organization development department in 1975, was appointed director in 1977, and vice president in 1981. Marier and his family reside in Kensington, Conn.

"The corporate marketing services department, including national television advertising and multi-divisional trade promotions, will now report to Ronald F. Gilrain, vice president, public affairs. The activities of the public affairs and corporate marketing departments support the objectives of Stanley businesses with customers, shareholders, and members of the community at large, " Ayers said.

Gilrain is a graduate of Seton Hall University, and has an M.B.A. degree in marketing from Rutgers University. He joined Stanley in 1960 as marketing manager for Stanley Tools, and subsequently held marketing positions for Stanley in the United States, Canada and Europe. He was appointed general manager of Stanley Magic-Door in 1972 and elected vice president, public affairs in 1980.

In summarizing these changes, Ayers said: "As we head into the fast changing and challenging environment of the 1990s, these organizational changes will assist in blending managerial talents and focusing our attention on the effective utilization of our human and productive resources."

The Stanley Works (NYSE: SWK) is a worldwide supplier of tools, products and services for home improvement and consumer use, as well as specialty tools and other products for industrial and professional applications.

#90060p0219 03/01/1990 ~PR Newswire

CHARLOTTE, NC (MARCH 1) PR NEWSWIRE - A difficult competitive environment and greater-than-expected catastrophe losses contributed to a pre-tax statutory loss for Royal Insurance USA of $36.2 million for 1989, compared to a $72.2 million loss for the previous year. After federal income tax the net loss was $42.9 million, versus a $66.0 million loss in 1988. Written premiums declined slightly for the year to $2.2 billion.

The underwriting loss for 1989 rose to $470.0 million, compared to a loss of $340.9 million a year earlier. Royal's statutory combined ratio before dividends worsened to 121.5 from 115.2, while pre-tax investment income, excluding capital gains and losses, increased 6.2 percent to $301.0 million.

"Intense competitive pressures, continued reserve strengthening and a significant number of catastrophes, including Hurricane Hugo and the California earthquake, helped make 1989 a difficult year financially for Royal," said William E. Buckley, chairman and chief executive officer. Royal incurred catastrophe claims of more than $69 million, including those for Hugo and the Bay Area earthquake. "Operationally, however, we are pursuing a new strategic direction that will emphasize profitable lines and geographic areas and will aid our return to profitability in the near future," Buckley said.

At the same time in London, England, Royal Insurance Holdings plc announced its 1989 worldwide results. Pre-tax profit was $207 million compared to $397 million for 1988, and net after-tax profit totaled $148 million versus $272 million for the previous year. Investment income increased by $112 million to $856 million, while the underwriting loss rose to $657 million compared to the previous year's loss ot $430 million. Total written premiums increases by $720 million to $7.8 billion.

PHILADELPHIA (MARCH 1) PR NEWSWIRE - ExecuFirst Bancorp Inc. (NASDAQ:

FXBC), parent company of First Executive Bank, today reported that it has settled a legal challenge to its use of the name "First Executive."

In a lawsuit filed in U.S. District Court of Eastern Pennsylvania in October 1988, First Executive Corp. (NASDAQ: FEXC), a California-based holding company not affiliated with Philadelphia's First Executive Bank, sought to prevent the banking company from using its similar name.

Zvi H. Muscal, ExecuFirst chairman and president and chief executive officer of First Executive Bank, said, "First Executive Corporation agreed to withdraw its lawsuit against us, based upon a settlement agreement reached by the parties. The terms of the settlement are to remain confidential."

First Executive Bank, which opened in Center City Philadelphia in November 1988, has experienced strong growth in both loans and deposits during its first year of operation. It is a state-chartered bank and a member of the Federal Reserve System and its deposits are insured by the Federal Deposit Insurance Corp. (FDIC).

STAMFORD, CT (MARCH 1) PR NEWSWIRE - General Host Corporation (NYSE: GH) today raised the quarterly common stock dividend to 8 cents per share from 7.5 cents -- a 6.7 percent increase. The annual dividend now stands at 32 cents per share. This marks the twelfth consecutive year that General Host shareholders have seen their dividends increased. The dividend is payable April 6, 1990 to shareholders of record at the close of business on March 16, 1990.

The company also announced that it has adopted a successor shareholder rights plan which essentially extends, with some modifications, for five years until 1995, its shareholder rights plan originally adopted in 1985 which was designed to protect against unfair takeover attempts. The rights are exercisable only if a person or group acquires, or makes a tender offer for, 20 percent or more of the company's common stock, or upon the occurrence of certain business combination transactions. However the rights are not exercisable by any person or group which acquired the stock or initiated the transaction.

General Host operates the nation's largest chain of specialty retail stores devoted specifically to the sale of lawn and garden products, crafts, and Christmas merchandise. Its primary operating unit is Frank's Nursery & Crafts.

UPPSALA, Sweden (MARCH 1) PR NEWSWIRE - Pharmacia AB (NASDAQ: PHABY) today reported the following results:

PHARMACIA AB
1989 Year End Summary -- Financial Highlights
(in millions except per ADS amounts)

	SEK Jan-Dec 1989(C)	SEK Jan-Dec 1988(C)	Incr. Pct.	USD(A) Jan-Dec 1989
Net sales	7,541	6,794	11	1,171
Operating income(B)	756	1,017	(26)	117
Income after net financial items	762	975	(22)	118
Net income after estimated current tax expense	560	706	(21)	87
Net income after estimated current tax expense (U.S. PAP)	406	671	(39)	63
Average number of shares outstanding (million)	65.4	65.4	--	65.4
Net income per ADS after estimated current tax expense (U.S. PAP)(D)	4.66	7.69	(39)	0.72
Net income per ADS (U.S. GAAP)	4.95	10.32	(52)	0.77

(A) -- All amounts in U.S. dollars have been translated at the average rate for January-December 1989 (1 USD equals SEK 6.439)
(B) -- For 1989 inclusive of restructuring expenses, MSEK 169.
(C) -- Exclusive of extraordinary items.
(D) -- Under Swedish accounting and tax rules, Pharmacia may make appropriations to untaxed reserve accounts each year, resulting in deferred income taxed according to U.S. GAAP. While such appropriations have the effect of lowering net income, they have a significantly beneficial effect on cash flow since they reduce Pharmacia's effective tax rate. Correspondingly, income per share in accordance with U.S. GAAP is not the best yardstick for measuring Pharmacia's performance. The most realistic way of calculating income per share for a Swedish company would be to divide net income after current tax expense, adjusted to comply with U.S. accounting principles, by the number of shares outstanding (U.S. PAP above). Income per share calculated in accordance

with accounting principles generally accepted in Sweden was SEK 8.56 after current tax expense. Income per share after current and deferred tax was SEK 8.56.

NEW YORK (MARCH 1) PR NEWSWIRE - E.A. Kampouris, chief executive officer of American Standard Inc., today issued the following statement regarding the appointment of Patrice O'Regan as a vice president:

"I am pleased to announce that on Feb. 26, Ms. Patrice O'Regan will join the Plumbing Products staff as vice president merchandising. In this capacity Patrice, reporting to me, will consult and work closely with EPP, INTEX, and USPP personnel to develop, improve and expand the company's merchandising strategy and efforts in respect to our retail and showplace activity.

"Patrice has held a number of key merchandising positions in the retail business as well as with a major glass manufacturer. Most recently she spent 3 years with Federated Department Stores where she held the positions of divisional merchandising manager Domestic & Window Coverings, which included bedroom and bathroom accessories, and divisional merchandising manager, Tabletop & Housewares. From 1983 to 1987 she held various sales management positions with Corning Glasswares and from 1978 to 1983 she worked for Macy's where her responsibilities included the position of associate merchandising manager of the Cellar, one of the most successful and nationally recognized retail operations in the Macy's organization.

"Patrice holds a B.S. degree from Villanova University.

"Patrice brings to us a unique background in merchandising and I know you join me in welcoming her to our company."

PITTSBURGH (MARCH 1) PR NEWSWIRE - Chambers Development Co. (AMEX: CDVB) announced today the acquisition of two firms engaged in the collection and hauling of commercial and residential solid waste.

The company acquired the assets of Sweet Disposal Inc., of Johnston, R.I., and Action Garbage Services Inc., of Matthews, N.C.

The two companies are expected to generate annual revenues of $2.7 million.

Sweet Disposal will be consolidated with Chambers' operations in Providence, R.I., and Action Garbage Services with the company's operations in Charlotte, N.C.

Alexander Rangos, Chambers' executive vice president of corporate development, said these acquisitions are excellent for Chambers because each has established an outstanding record of quality service and personal attention to their customers.

The Rhode Island acquisition complements Chambers' purchase of United Sanitation in January of 1990.

Chambers Development Co., headquartered in Pittsburgh, with offices in Providence, R.I., Richmond, Va., Charlotte, N.C., Atlanta, Dallas and Indiana, is a leading environmental firm offering services in collection, hauling, disposal, recycling and landfill development.

The company also provides security services through its wholly owned subsidiary, Security Bureau Inc., which is among the 20 largest U.S. security firms.

JERICHO, NY (MARCH 1) PR NEWSWIRE - Getty Petroleum Corp. (NYSE: GTY) today completed the previously announced acquisition of the Virginia-based assets of Hop-In Food Stores, Inc., from Silcorp Limited, of Toronto.

This marks Getty's fourth acquisition since June 1989.

The principal assets acquired by Getty include 70 fee and leased gasoline/convenience food outlets and eight other fee-owned properties.

The stores, most of which sell gasoline and oil, are located throughout Virginia.

Getty plans to operate these stores under the trade name of "Getty Mart." The re-branding of the service stations and convenience stores will be done in an orderly transition.

In entering this new market Getty will be an active competitor and will offer the highest quality gasoline and convenience store items. The company will continue to operate these outlets out of its Roanoke, Va.,

office and said it welcomes all the new Getty employees to the Getty team.

Said Leo Liebowitz, Getty's president and chief executive officer, "We continue to take advantage of opportunities to increase market share throughout our existing and contiguous marketing areas. The acquisition of the Hop-In assets and the company's previous acquisitions are consistent with Getty's growth objectives."

Getty Petroleum Corp., one of the nation's largest marketers of gasoline and petroleum products, markets in a 13-state area, Maine through Virginia. The company is also a major marketer of heating oil and is a wholesale distributor of petroleum products through its East Coast petroleum storage and distribution network.

#90060p0243 03/01/1990 ~PR Newswire

FORT WORTH, TX (MARCH 1) PR NEWSWIRE - Texas-New Mexico Power Co., a wholly owned subsidiary of TNP Enterprises Inc. (NYSE: TNP), today announced that it has received a final order from the Public Utility Commission of Texas increasing annual revenues by $8.55 million in Texas. The amount approved by the commission represents 53 percent of the company's rate request and an authorized return on common equity of 12.86 percent.

The company anticipates that the new rates will become effective in March 1990. The company began billing its customers under bonded rates placed in effect in January 1990. The company expects that the excess of bonded rates collected over the authorized rates will be returned to the customers early in the second quarter of 1990.

The commission also issued an order remanding the company's application for deferred accounting treatment to the commission's hearings division for further proceedings on the following: (1) the merits of the company's application; (2) the company's financing needs during the deferral periods; and (3) the financing options available to the company for the Robertson County, Texas, generating project.

The application, if granted, would allow the company to defer the costs of owning, operating, and maintaining the first and second units of its Robertson County generating project from their respective commercial operation dates until the dates on which the costs associated with the units are reflected in rates. This filing is similar to applications recently approved by the commission for other utilities with operations in Texas.

If the application for deferred accounting is granted, the company anticipates the deferral periods could extend up to approximately 13 months for each of the two units. If the company is successful in obtaining a post-test year adjustment in its rate applications for each unit, the deferral periods would be favorably reduced. The purpose in filing for deferred accounting treatment is to preserve the company's opportunity to collect the proper cost of service actually provided to its customers.

Fair, equitable and timely regulatory treatment is essential to the company. To the extent that any proceeding is not expeditiously concluded in a favorable manner, the company may experience a negative financial

impact.

Texas-New Mexico Power Co. is a public utility engaged in the generation, purchase, transmission, distribution, and sale of electricity wholly within the states of Texas and New Mexico. TNP Enterprises is a NYSE listed company with headquarters in Fort Worth.

CONCORD, CA. (MARCH 1) PR NEWSWIRE - Natural gas, the clean- burning fuel most Californians use for heating and cooking, is now available to fuel cars and trucks at up to 30 percent less than the cost of gasoline.

Pacific Gas and Electric Co. today opened at its Concord Service Center the first compressed natural gas (CNG) refueling station available to the California public.

Richard A. Clarke, PG&E board chairman and chief executive officer, said the opening is an important environmental step.

"Expanding the use of compressed natural gas vehicles can help significantly to clean up our air," Clarke said. "It will also reduce fuel and maintenance costs for thousands of trucks, vans, cars, and buses."

The Concord facility is the first of nine refueling stations that PG&E plans to build this year in its northern and central California service area. It will initially serve about 25 PG&E vehicles and 25 customer-owned fleet vehicles powered by CNG.

Of the nine stations PG&E plans to build or modify in 1990, seven will be open to the public. In addition to the Concord station opened today, they will be in Bakersfield, Hayward, San Jose, San Rafael and Sacramento (two) Calif. PG&E will also build new stations in Richmond, Calif., and Sacramento, mainly to service its own vehicles.

Two more station are planned at customer sites in San Francisco and West Sacramento for their fleets' use. PG&E already operates CNG refueling stations for PG&E vehicles in Fresno, Oakland, San Ramon, Calif., and Sacramento (two). This brings the total number of CNG stations in PG&E's service territory to 14, seven of which will be accessible to the public.

Clarke said that marketing compressed natural gas is a logical expansion of PG&E's service to its customers.

"We already provide customers with natural gas, electricity, and a host of other energy-related services," Clarke said. "PG&E can broaden the efficient use of its products by encouraging wider applications of CNG technology."

PG&E has experimented with the use of vehicles powered by CNG since 1973 and since 1986 has had about 100 CNG vehicles in operation. By converting existing trucks, PG&E expects to double its fleet of CNG powered vehicles by the end of 1990.

Most gasoline-powered automobiles, vans and trucks can be modified to operate on CNG.

It now costs up to $2,500 to convert a vehicle to operate on CNG. A typical converted van carries two CNG storage tanks and can travel about 200 miles on CNG before refueling or switching to gasoline.

Changing from one fuel to another requires only the flip of a switch. It can be done with the motor running.

Natural gas is a clean burning fuel reducing many of the pollutants that create smog. Properly equipped vehicles surpass state and federal emissions standards for reactive (non-methane) hydrocarbons, nitrogen oxides and carbon monoxide when using CNG. And unlike current diesel-fueled engines, CNG engines don't emit black smoke -- CNG exhaust contains virtually no particulates.

Based on figures from tests conducted by the California Air Resources Board in May 1989, CNG reduces emissions of reactive (non-methane) hydrocarbons by up to 48 percent, of nitrogen oxides by up to 33 percent and of carbon monoxide by up to 47 percent, compared with emissions from equivalent vehicles fueled by gasoline.

A major selling point for CNG is its price. On a per-mile basis, CNG-fueled vehicles cost about 30 percent less to fuel than those that use gasoline. CNG also burns cleaner than gasoline, so maintenance costs are lower, motor oil and spark plugs last longer, and fewer tune-ups are necessary.

PG&E's Concord refueling station, located at 1030 Detroit Ave., will serve as a model for the new stations PG&E plans to open later this year.

Natural gas drawn from utility pipelines is fed into compressors that compress the gas to 3,000 pounds per square inch. From there, it is available for refueling vehicles via fast-fill (like a gasoline pump) or slow fill (overnight) methods. The station is open 24 hours a day to fleet vehicle operators using card keys.

For more information about PG&E's compressed natural gas vehicle program, customers can call Hanalee Corey at 415-973-3049.

PORTLAND, Ore. (MARCH 1) PR NEWSWIRE - Bioject Inc. (NASDAQ: BJCTF) today achieved a corporate milestone with the announcement of receipt of the first orders for its Biojector(R) Jet Injection System.

Health care practitioners who have used the Biojector needleless syringe favor the product for its safety and patient comfort. "It's the wave of the future for vaccinations," said one nurse.

Biojector units ordered for use in pediatric and internal medicine practices will initially be introductory/evaluation units, to be replaced with manufactured devices following start-up of the production line. Shipments will correspond with in-service training.

The Biojector jet injector is a new type of drug delivery system that delivers medication without a needle puncture of the skin. Carbon dioxide gas powers the unit by forcing medication from a patented disposable, sterile plastic ampule into the skin tissue. Because no needle penetrates the skin, the injection is more comfortable to the patient and is safer to the health-care worker. In addition, the single-use medication ampule requires no postuse special handling and may be disposed of as noncontaminated medical waste.

Physicians may choose from two models when ordering the Biojector: a subcutaneous version, which injects medication just below the skin, or an intramuscular version, which injects medication deeper into the body - into the muscles. Local anesthetics and insulin are commonly administered subcutaneously, while most vaccines and antibiotics are injected intramuscularly. Both introductory versions of the Biojector deliver a fixed 50-unit (0.5 cc) dosage of medication.

MINNEAPOLIS, (MARCH 1) PR NEWSWIRE - Cray Research Inc. (NYSE: CYR) announced today that two European educational institutions are acquiring CRAY X-MP supercomputers.

The Catalonian Research Foundation has ordered a CRAY X-MP/14se computer system to serve a network of universities in Spain. The used system, which will be purchased, will be installed at the Polytechnic University in Barcelona, Spain, in the third quarter of 1990, pending export license approval. Through a network, the supercomputer will serve three academic institutions: the Polytechnic University, the Autonomous University, and the Central University. This will be the third Cray Research system installed in Spain.

The University of Trieste in Italy has purchased a CRAY X-MP/14 computer system. The used system was installed at the Universita' Degli Studi Di Trieste Computer Center and was accepted for purchase during the fourth quarter of 1989. The public university will use the system for research in medicine, engineering, physics, computer science, and astronomy.

With these installations, Cray Research will have 38 systems installed at 32 universities around the world.

Earlier today, Cray Research announced that the Atomic Weapons Establishment, Aldermaston, United Kingdom, has ordered a CRAY Y-MP supercomputer.

Cray Research, Inc., designs, manufactures, markets, and supports large-scale, high-speed computer systems for scientific and engineering applications.

COLUMBIA, MD (MARCH 1) PR NEWSWIRE - The Rouse Company (NASDAQ-NMS: ROUS) of Columbia announced that its board of directors, at its meeting today, approved an increase in the quarterly cash dividend on the company's stock. This marks the twelfth consecutive year that the company has increased its dividend since the dividend program began in 1978. The new rate is $.15 per share per quarter, or an annual rate of $.60 per share for 1990. This compares to $.14 per share quarter and $.56 for 1989. The dividend is payable on March 30, 1990, to shareholders of record on March 16, 1990.

As in 1989, the company anticipates that the entire amount of the dividend to be paid in 1990 will be a return of capital distribution and, as such, not taxable to most shareholders.

MILPITAS, CA. (MARCH 1) PR NEWSWIRE - Dysan International, formed to continue the marketing of Dysan floppy disks in the United States on a mutually exclusive basis for Hanny Magnetics, became official today. Dysan will be operated by members of the previous Xidex management team, headed by Philip Micciche, president of the Xidex Magnetics Division of Anacomp Inc. (NYSE: AAC). Hanny Magnetics and Anacomp Inc. will join Micciche in ownership of the new company.

Henny Magnetics, a Hong Kong-based floppy disk manufacturing company, agreed to purchase the Xidex flexible disk division from Anacomp in December. Hanny had supplied Xidex with over 40 million 3.5 inch disks in 1989. "The purchase was motivated by the fact that while Hanny was a strong manufacturer of 3.5" floppy disks, it had little presence in the 5.25" market and no presence in the branded disk market," explained

Micciche, president of Dysan. "With our established distribution channels and knowledge of the floppy disk market, we can facilitate that presence," added Micciche. Sales are expected to be in excess of $120 million in the first year.

Dysan will bring Dysan, Precision, StorageMaster and XM2 branded disks, as well as bulk and white box, to market for Hanny Magnetics worldwide. Dysan will also market Dysan branded quarter-inch data tape cartridges and Dysan branded diagnostic and alignment products for floppy disk drives, previously in the Xidex product offering. "Other complementary products will be added as we grow the business," stated Micciche.

The new company will be headquartered in Milpitas with 5 sales offices in the United States and offices in Canada, United Kingdom, Germany, Australia and Hong Kong. Dysan will employ about 100 persons worldwide, all of which are ex-Xidex employees. "We want to provide our customers with as much continuity as possible, from a personnel standpoint as well as keeping successful marketing and advertising programs intact," said Micciche.

ORANGE, CT (MARCH 1) PR NEWSWIRE - Saab-Scania of America, Inc. has named Angotti, Thomas, Hedge, Inc. as the new advertising agency for its $25 million Saab automobile account. The selection was made after an extensive search and is effective April 2, 1990.

Angotti, Thomas, Hedge, Inc. is based in New York and was founded in 1985 by partners Tony Angotti, Tom Thomas and Barrie Hedge.

According to Saab-Scania of America, Inc. Advertising Manager Roy B. Steinwolf, "The selection process was extremely challenging since all three agencies demonstrated an outstanding creative approach as well as very solid, long-term strategic thinking." The other finalists were Kirshenbaum & Bond and Slater/Hanft & Martin. Both are based in New York.

HARTFORD, CT (MARCH 1) PR NEWSWIRE - Connecticut Natural Gas Corporation (NYSE: CTG) today reported consolidated net income for the year ended Dec. 31, 1989, of $12,732,000, up from the $12,542,000 earned during 1988. Consolidated earnings per share based on 7,934,356 average shares

outstanding for the year ended Dec. 31, 1989, were $1.60, down slightly compared to earnings per share of $1.63 earned during 1988 on 7,632,477 weighted average shares outstanding, which included the non- recurring benefit of $.17 per share for a change in accounting for income taxes. Consolidated revenues for the year ended Dec. 31, 1989, were $223,025,000 compared with $197,867,000 for 1988.

Consolidated net income totaled $6,904,000 for the fourth quarter of 1989, compared with net income of $4,434,000 reported for the fourth quarter of 1988. The increased earnings were principally attributable to much colder weather in the quarter and the new higher gas rates which became fully effective in October 1989. Net income per share to common shareholders amounted to $.83 on 8,920,228 average shares outstanding, compared with $.57 per common share earned in the fourth quarter of 1988 on 7,705,537 average shares then outstanding. Consolidated revenues for the three months ended Dec. 31, 1989, were $76,133,000, compared with revenues of $61,669,000 reported for the comparable period a year ago.

Victor H. Frauenhofer, president and chief executive officer, indicated that over 90 percent of consolidated net income for 1989 has been generated by the regulated natural gas distribution business of the company. The most significant impacts on the increase in net income from 1988 to 1989 were: the rate decision rendered by the Connecticut Department of Public Utility Control (DPUC); greater sales and profit margins on sales to interruptible gas customers, weather and growth in customers. These increases were offset mainly by cost increases in taxes depreciation and interest on borrowed funds.

#90060p0281 03/01/1990 ~PR Newswire
PHILADELPHIA (MARCH 1) PR NEWSWIRE - Following is the statement of Philadelphia Electric Co. (NYSE: PE) on the recommendation of the Administrative Law Judges (ALJ) to the Pennsylvania Public Utility Commission (PUC) regarding PE's request for a $549 million rate increase to be phased in over 10 years to pay for Limerick Unit No. 2:

The recommendation submitted to the PUC by the Administrative Law Judges that PE should be granted only $117 million or 21 percent of its rate increase request is completely unreasonable and unrealistic, is inconsistent with prior PUC orders and with responsible rate regulation, and would seriously damage the company's financial condition.

If the PUC accepts the ALJ's recommendation and reduces the requested rate increase, PE will have no choice but to reduce significantly its common stock dividend and will be severely hampered in obtaining funds to continue its construction program required to maintain the reliability of service to its customers.

In addition, the repercussions may well be felt by all Pennsylvania utilities for many years to come as they strive to raise funds in the capital markets. Such a condition would not be in the best interests of Pennsylvania because it could impact service reliability throughout the commonwealth.

In their report, the ALJs recommended that the PUC significantly reduce the allowed earnings on PE shareholders' investment, and that the

commission reverse its policy regarding the recovery of certain significant costs of providing electrical service. Their recommendation is based also on a conclusion that all of the capacity of Limerick Unit 2 is not needed currently to serve PE's customers.

According to PE Chairman and Chief Executive Officer Joseph F. Paquette Jr., the latter finding "is utterly irresponsible and incredible in light of the voltage reductions and service curtailments which were experienced by PE customers and throughout the Northeast in the summers of 1988 and 1989.

"Furthermore," he said, "the ALJ's recommendation completely ignores the PUC's 1985 order which concluded that Limerick Unit 2 would be in the public interest if the company completed it under a $3.2 billion cost cap, and also concluded that its capacity would be needed by the early 1990s."

Paquette said "actual events have proven that Limerick Unit 2 is needed even more and is more economical today than was anticipated in the 1985 PUC order. It was completed nine months ahead of schedule and $382 million under the cost cap, and today's peak electric demands are much higher than were anticipated by anyone in 1985."

In addition, as reported in the Wall Street Journal on February 28, another national energy expert has concluded that "the point of crisis" is here for eastern and central Pennsylvania and blackouts up and down the East Coast are unavoidable. "The United States," this expert said, "is on the verge of a power shortage that threatens the economic vitality of the country."

Therefore, it is extremely clear that Limerick Unit 2 is vitally needed to satisfy growing electricity demand and support the economic vitality of Southeastern Pennsylvania.

Limerick Unit 2 is now in full commercial operation. The rate request is designed only to recover the costs of owning and operating the unit. Despite four years of inflation since the company's last rate increase, the current request was held to an absolute minimum because PE has cut operating and financing costs, controlled wages, reduced employee levels and increased productivity.

Paquette said that "despite numerous challenges, Philadelphia Electric Company responsibly persevered in the construction of Limerick Unit 2 in fulfillment of its obligation to serve the needs of its customers. This required the investment of billions of dollars by PE shareholders, 130,000 of whom are Pennsylvania residents, many of them senior citizens. During Limerick's construction, our shareholders investment return did not keep pace with other utilities and it would be a miscarriage of justice if their investment were further eroded now that Limerick Unit 2 is actually

producing electricity and providing substantial benefits for PE's customers and for the region.

"When the PUC makes a final decision on this rate request in April," Paquette said, "I can't believe the commission will adopt the hearing officers' recommendation which severely penalizes the company by changing the rules after the game has been played. Therefore, fairness dictates that the commission reaffirm its earlier order which concluded that Limerick Unit 2 is needed, and recognize that the interests of our customers and our shareholders are mutual."

#90060p0283 03/01/1990 ~PR Newswire

ST. PETERSBURG, FL (MARCH 1) PR NEWSWIRE - Florida Progress Corporation's (NYSE: FPC) 1989 Annual Report to Shareholders was released today. The report uses a nautical theme of "Charting our Course" to emphasize the importance of an ongoing planning process to guide the Company in an ever changing business environment. The primary objective of the Company's planning is to maintain Florida Power Corporation's position as a high quality utility while building the diversified operations to achieve a higher total return for shareholders.

In the letter to shareholders, Andrew H. Hines, Jr., Florida Progress' Chairman of the Board, discussed his retirement as Chief Executive Officer and expressed confidence in the Company's future under Dr. Jack B. Critchfield's leadership. Critchfield emphasized that strategic and tactical planning is the Company's top priority.

"This planning process must be dynamic. Flexibility and responsiveness are critical if we are to adapt to changing circumstances while seizing the opportunity they present. To maximize our resources and our competitive advantages, we must be prepared to respond to change. In fact in our organization, leaders are encouraged to be agents of change. Stimulating positive change can continue to improve quality, productivity and service," Critchfield said.

The Proxy Statement, which was also mailed to shareholders, contains four management proposals and one shareholder proposal. Among the management proposals is a recommendation to establish a classified Board of Directors with initial terms of one, two and three years. Another management proposal recommended by the Board is a long-term incentive plan that provides performance awards to key employees for increasing long-term shareholder value.

The Proxy Statement also includes a shareholder proposal that would

request the Company make available to all shareholders a comprehensive report on the operation and safety of the Crystal River Nuclear Plant. Since the information requested in this report would be extremely technical, voluminous and costly (estimated cost is $650,000), the Board of Directors is recommending a vote "against" this proposal due to its questionable value to most shareholders.

Shareholders were notified that Florida Progress Corporation's annual meeting will be held at the St. Petersburg Hilton & Towers, 333 First Street South, St. Petersburg, Fla., on Thursday, April 19, 1990 at 10 a.m.

CONTACT: William C. Johnson of Florida Progress Corporation, 813-894-7957

#90060p0288 03/01/1990 ~PR Newswire

TRENTON, NJ (MARCH 1) PR NEWSWIRE - The New Jersey Department of Banking has approved the charter application filed by Somerset Valley Bank to establish a new commercial bank at 103 West End Avenue, Somerville (Somerset County).

The new bank expects to serve residents and businesses of the boroughs of Somerville and Raritan, as well as portions of Manville Borough and Bridgewater and Hillsborough Townships. It will be located in an area close to the central business district of Somerville which features many renovated Victorian houses which have been converted to professional office space in recent years. The new bank will open its doors with $5 million in capitalization.

The Somerville-Bridgewater-Hillsborough area is heavily developed and has experienced rapid gains in population and households over the past decade. At the time of the 1980 census, the area reported approximately 13,500 households. By the end of 1989, the number of households was estimated at slightly more than 15,000, with a total population of nearly 40,000 people. Average household incomes in the area in 1980 were 12 percent higher than the comparable average in New Jersey. Census data taken over the succeeding five-year period show that personal incomes increased at an average rate of 8.76 percent.

The new bank's initial board of directors consists of 14 individuals who represent a variety of business and professional backgrounds. They are: Mark S. Gold, Far Hills; Raymond Hughes, Bedminster; John K. Kitchen, Bedminster; Frank J. Orlando, Warren; A. Carter Pottash, Summit; Frederick D. Quick, Neshanic; Jacob D. Quick, Neshanic Station; Thomas J. Rafferty, Hopewell; Anthony J. Santye, Jr., Skillman; G. Robert Santye, Skillman; Herman C. Simonse, Bernardsville; Donald R. Tourville, Lebanon; Frank P. Tourville, Bedminster, and Willem Kooyker, Far Hills.

Before opening for business, Somerset Valley Bank must satisfy the following conditions: (1) Become a member of the Federal Deposit Insurance Corporation; (2) issue and sell shares of its authorized but unissued stock sufficient to raise its minimum capital base of $5 million and submit for the department's approval, biographic and financial information on individuals purchasing more than 5 percent of the new bank's stock; (3) agree to not merge, consolidate or sell off its assets for five years, and (4) submit for departmental approval a list of officers who will be responsible for the day-to-day operation of the bank.

The decision became effective on Feb. 21, 1990.

CHICAGO (MARCH 1) PR NEWSWIRE - Gantos, Inc. (NASDAQ: GTOS), a women's specialty apparel retailer, will open its 141st store Friday, March 2, at Water Tower Place. The ribbon-cutting ceremony will be performed at noon by Chuck Rinehimer, senior vice president of store operations. This opening is part of Gantos' plans to open between 30-40 new stores in 1990.

Gantos, with 13 locations throughout metro Chicago, entered the Chicago market in 1979 with a location at Woodfield Mall in Schaumburg, Ill.

The Water Tower Place location is 5,284 square feet and is a new Gantos prototype design. Currently, there are 12 regular-price Gantos locations in the area as well as one discount Bargain Boutique at Countryside Plaza in Countryside, Ill.

Gantos, Inc. executive vice president of real estate and marketing Mark Bowman views Water Tower as an ideal location for a Gantos store. "We have been a part of the Chicago market for over 10 years and are very pleased about our expansion into downtown. We're confident that our unique merchandise mix and outstanding customer service will fit in perfectly with the attitude and lifestyle of the Water Tower Place shopper."

Gantos, Inc. is a specialty retailer of women's apparel and accessories, catering to active, career-oriented women of all ages. Supporting its focus on customer service, Gantos also offers its own credit card. Charge customers receive fashion catalogs and special mailings throughout the year.

Gantos, Inc. common stock is traded on NASDAQ under the ticker symbol GTOS. The company has been named to Forbes magazine's list of the "Best 200 Small Companies in America" for three consecutive years.

FLAT ROCK, MI (MARCH. 1) PR NEWSWIRE - Mazda Motor Manufacturing (USA) Corp. (MMUC) announced appointment of Osamu Nobuto to chairman, Masahiro Uchida, president, and creation of two new executive offices at its vehicle manufacturing plant here. The appointments are effective immediately.

Nobuto, president of MMUC since its establishment in 1985, and a senior managing director of Mazda Motor Corporation (MC), its parent company, has been appointed chairman of MMUC. He will be stationed at MC headquarters in Japan.

Uchida, formerly executive vice president of MMUC, has been promoted to president. As president, Uchida, will be responsible for all production operations, personnel, purchasing and corporate planning functions of the company.

Mamoru Takebayashi, formerly general manager of Mazda's Hofu, Japan, manufacturing plant, becomes executive vice president, operations, reporting to Uchida. He continues to be a director of Mazda Motor Corporation. Takebayashi's responsibilities include manufacturing, operations planning and purchasing. Ray Hedding, general manager, manufacturing, Toshihide Saeki, vice president, operations planning, and Mutsumi Fujiwara, vice president, purchasing, will report to Takebayashi.

Henry Schultz, who had been assistant to the executive vice president, has been promoted to general manager, human resources, in a move that re-established this office. His appointment fulfills a pledge made by MMUC last fall to appoint qualified Americans to top-level positions. He will report directly to Uchida.

Hiroshi Hosaka, formerly an assistant general manager in MC's office of overseas affiliates, has been appointed general manager, corporate planning, covering finance, general affairs, public relations and information systems. He replaces Kazuo Sonoguchi, who is moving to a senior executive position at Mazda Motor of America, in Irvine, Calif., Mazda's sales and marketing arm in the United States.

Tom DeFrain, who was responsible for the company's stamping operation, becomes manager, employee relations. He will report to Schultz.

Don Harris, who was an area leader in Body Assembly, has been named manager, stamping, replacing DeFrain. He will report to Hedding.

MMUC is responsible for Mazda's vehicle production in North America. The company produces the Mazda MX-6 sports coupe, the Mazda 626 four- door sedan and the Ford Probe. MMUC employs some 3,500 people on two shifts.

CHARLOTTE, NC (MARCH 1) PR NEWSWIRE - Nucor Fastener, this country's largest producer of standard fasteners, announced a new line of mechanically galvanizing structural nuts, bolts and washers.

According to Peter Kasper, Nucor's engineering manager, mechanically galvanizing offers five significant advantages over traditional hot dipped galvanizing including:

-- Part-to-part uniformity
-- Better corrosion protection
-- No hydrogen embrittlement or detempling
-- Fewer rejects
-- More attractive appearance

Mechanically galvanized products offered include A325 structural bolts, A563 heavy hex nuts and F436 washers. Nucor uses 100 percent domestically melted and rolled steel, which provides complete traceability of its fastness. All products meet or exceed ASTM B-695, AASHTO M298 and MIL-C-81562 standards.

Since Nucor manufactures both the bolts and nuts (one of only a few companies that do) the products fit well together. Rotational capacity testing done by Nucor's accredited laboratory guarantees this fit. Additionally, the nuts are coated with a blue dyed lubricant to meet ASTM, FHWA and state DOT standards for optimal torque and tension.

Nucor Fastener is a division of Nucor Corporation (NYSE: NUE), a Fortune 500 company specializing in steel and steel products.

CHICAGO (MARCH 1) PR NEWSWIRE - Sears, Roebuck and Co. (NYSE: S) has activated a $40 million syndicated revolving credit facility with a group of 63 minority banks led by Independence Bank of Chicago, it was announced today.

The 63 banks represent more than two-thirds of the total minority banks recognized in the United States and make up the largest used consortium of

minority owned banks ever assembled for a line of credit, according to Alvin J. Boutte, chairman and chief executive officer of Independence Bank. All of the minority banks in the credit facility are owned by Blacks, women, Hispanic-Americans, Asian Americans or American Indians, he said.

"This demonstrates the ability of a minority banking institution to develop and service a credit facility for a major corporation," Boutte stated. "It also stimulates growth for minority banks and the minority communities that they serve."

Noting that 25 states are represented in the syndicate, Sears vice president and corporate treasurer, Edward J. Condon, Jr., said, "The agreement represents part of a nationwide commitment by Sears in its continuous support of minority economic development including employment, purchase of goods and services, investments, and banking."

The $40 million borrowing, up from $30 million last year, represents the fifth such increase since the inception of the facility in 1983, according to Condon.

Sears will use the funds for general business purposes, he said.

TULSA, OK (MARCH 1) PR NEWSWIRE - Nordam, an aerospace manufacturing firm based in Tulsa, has received orders to produce hush kits to reduce noise in Boeing 737-200 aircraft.

The twinjets are powered by Pratt & Whitney JT8D engines.

Customers include International Aircraft Services and Cauff, Lippman & Co. Inc., aircraft leasing and holding companies, as well as an undisclosed international airline and an undisclosed aircraft leasing company. Nordam currently has firm orders to equip 60 aircraft with the kits, and options for an additional 51 shipsets.

Nordam and Pratt & Whitney entered into a formal agreement last month to develop the noise suppression system for the twinjets, which will bring the 737s into compliance with stringent Federal Aviation Administration (FAA) Stage 3 noise abatement standards.

The potential market for 737-200/JT8D hush kit systems includes approximately 1,000 aircraft.

Nordam will hold the Supplemental Type Certificate and related Parts Manufacturing Authority for the system. Pratt & Whitney is the program's technical director. A final hush kit design will be selected in May, 1990 with FAA certification expected in 1991.

PORT ARTHUR, TX (MARCH 1) PR NEWSWIRE - U.S. Intec Inc. (NASDAQ: INTK) today announced that it has signed a definitive agreement to purchase the assets of the Evanite Permaglas ("Permaglas") Division of Evanite Fiber Corporation for $6.25 million in cash and the assumption of certain current liabilities. Permaglas, headquartered in Corvallis, Ore., manufactures and sells a complete line of roll products used in built-up roofing applications.

"This acquisition represents an important first step in U.S. Intec's planned diversification effort into the built-up roofing segment of the total roofing market. We feel that we now will be able to more fully serve the product needs of our contractor base and distribution network," said Danny J. Adair, president.

U.S. Intec is a leader in the manufacture and sale of single-ply modified bitumen roofing membrane, primarily for the commercial re-roofing market. Headquartered in Port Arthur, the company has manufacturing facilities there as well as in North Branch, N.J., Stockton, Calif., and, with this acquisition, Corvallis.

HOUSTON (MARCH 1) PR NEWSWIRE - Wyoming-California Pipeline Company (WYCAL), a subsidiary of the Coastal Corporation (NYSE: CGP), and the California Public Utilities Commission (CPUC) have reached a settlement agreement on WYCAL's plans to build an interstate natural gas pipeline from Wyoming to California.

Under the terms of the agreement, the CPUC will drop its appeal filed in the U.S. Court of Appeals for the District of Columbia Circuit to review the optional certificate granted to WYCAL by the Federal Energy Regulatory Commission (FERC). The CPUC has also agreed to actively support WYCAL before all federal and state permitting agencies in seeking any necessary authorizations for the construction and operation of its pipeline project.

"This settlement acknowledges that WYCAL meets the CPUC's criteria for new interstate natural gas service to California," said James R. Paul, Coastal president and chief executive officer. "This is one of the final steps for the WYCAL project, and we look forward to starting construction later this year and expect the WYCAL system will be in service in late 1991."

Under the settlement agreement, WYCAL will file with FERC for such approvals as may be necessary to terminate its pipeline at Piute Junction, in San Bernardino County, Calif. Through interconnections at this point, the settlement provides for WYCAL shippers to transport gas on a firm basis within the state on the Southern California Gas Company and Pacific Gas and Electric Company systems for delivery to local distribution companies, utilities and end users.

"Making use of incremental expansions of these existing intrastate pipeline systems to move gas from Piute Junction to customers throughout California has the significant environmental advantage of minimizing construction within the state," said James F. Cordes, Coastal executive vice president.

The 700-mile, 30-inch pipeline has a planned initial capacity of 600 million cubic feet of gas a day.

The Coastal Corporation is a Houston-based energy holding company. It has consolidated assets of $8 billion and subsidiary operations in natural gas transmission and storage, oil and gas exploration and production, refining marketing, coal and chemicals and independent power production.

CONTACT: R.V. McCormick, 313-496-3748, or B.J. Johnson, 713-877-3293, both for the Coastal Corporation.

PRINCETON, NJ (MARCH 1) PR NEWSWIRE - Dow Jones News/Retrieval(R) announced today the online availability of Federal Filings, a newswire devoted to real-time news and analysis of filings with the Securities and Exchange Commission.

The newswire is provided by Washington-based Federal Filings, Inc., a wholly owned Dow Jones subsidiary. Federal Filings' staff of expert reporters provide accounts of SEC filings to subscribers within seconds of their release.

Coverage features Williams Act takeover-related filings, proxy statements and the registration of corporate securities. It also includes corporate disclosure of significant events (8K), plus quarterly (10Q) and annual (10K) reports.

"The SEC releases crucial filings such as tender offers and five percent ownership every hour," said Richard J. Levine, vice president and editorial director of Dow Jones Information Services. "Federal Filings provides these to our subscribers immediately. Their reporters follow up with detailed news stories on major filings."

The service is updated throughout the business day. Information is stored online for 90 days and is searchable by stock symbol, company name or code. The codes are listed online by industry group, news category or type of document filed.

Launched in 1974, Dow Jones News/Retrieval provided financial professionals with up-to-the-minute business and financial news. With the addition of more company news, profiles and more than 400 business publications, Dow Jones News/Retrieval has since become a leading provider of online business news and information. It serves corporate managers as well as financial professionals and personal investors.

Dow Jones News/Retrieval is the exclusive online provider of the full text of The Wall Street Journal, Barron's and all Dow Jones newswires, including the Dow Jones News Service (the "Broadtape").

In addition to News/Retrieval and The Wall Street Journal, Dow Jones publishes Barron's, domestic and international newswires, and the Ottaway group of community newspapers. The company also owns Telerate, Inc., a supplier of real-time financial information, decision support products and transaction services to the international business community.

NORFOLK, VA (MARCH 1) PR NEWSWIRE - Norfolk Southern (NYSE: NSC) has realigned its Marketing division to further strengthen the company's commitment to a commodity-based marketing program. The changes, announced by D. Henry Watts, executive vice president-Marketing, are all effective March 1, when Robert W. Coffey retires as vice president - Sales and Industrial Development after 42 years of service.

William E. Voltz, formerly vice president - Marketing, has been named vice president - Merchandise Marketing, and along with William B. Bales, currently vice president - Coal and Ore Traffic, will report to Watts. Reporting to Voltz will be Norman G. Heller, formerly assistant vice president - Marketing, who becomes assistant vice president - Sales; Walter B. Trollinger, formerly assistant vice president -Pricing, and now assistant vice president - Markets Management; Thomas L. Finkbiner, assistant vice president - International and Intermodal; and David A. Cox, assistant vice president - Industrial Development.

"This revised alignment of our marketing structure will include specific commodity orientation, under the supervision of Walt Trollinger, within which we will generate the expertise to be more useful and responsive to our customer base," Watts said in announcing the changes. Reporting to Trollinger will be five commodity group directors:

William A. Wiles, director for automotive traffic; John F. Danstrom for chemicals; James T. Brannon for the paper industry; Donald W. Seale for metals and construction; and Thomas J. Lindsey for grain, government and consumer products.

In addition, Watts said, "We will continue to emphasize, under Norm Heller's supervision, direct customer contact through strategically located district sales offices. Our customers have made it clear that they want and need this direct contact, and we plan to continue providing it." The local sales network will be managed by four regional sales directors reporting to Heller:

Robert J. Harkey at St. Louis, Mo.; J. Lee Waller at Chicago; David A. Julian at Alexandria, Va.; and Bob N. Terry in Atlanta.

TAMPA, FL (MARCH 1) PR NEWSWIRE - Kimmins Environmental Service Corp. (NASDAQ: KEVN) today announced its 1989 gross revenue and earnings.

Gross revenue for the year ended Dec. 31, 1989 was $107,226,000, compared to $79,410,000 for 1988, which represents a 35 percent increase year to year. Net income increased to $3,860,000 or 34 cents per share, compared with $2,458,000 or 27 cents per share in 1988.

Gross revenue for the quarter ended Dec. 31, 1989 was $31,163,000, compared to $25,229,000 for the same period in 1988. Net income was $1,457,000 or 12 cents per share, compared to $657,000 or 7 cents per share for the same period a year earlier.

Earnings per share are restated to reflect the one for two stock dividend, effected in the form of a split, paid on Feb. 19.

Stated on a pro forma basis, giving effect to the merger of Kimmins Corp. and K Management Corp. with and into Kimmins Environmental Service Corp. during November 1988, would result in the following:

Kimmins Environmental Service Corp.
Income Statement
(Unaudited)

Year ended Dec. 31	1989	1988	Pro Forma Pct. Change
Revenue	$107,226,000	$ 79,410,000	35

Weighted avg. shares outstanding	12,326,000	10,359,000	19

Francis M. Williams, president of Kimmins Environmental Service Corp., commenting on the record year and quarter stated, "This represents our 20th consecutive quarter of sales and earnings increases over the prior period. We are extremely pleased with our consistent growth." Williams went on to say: "These results reflect the continued development of our environmental businesses. In 1990, we will start to receive earnings

contributions from Kimmins Recycling Corp., our solid waste transportation and recycling subsidiary and Kimmins Thermal Corp., our hazardous waste remediation and mobile incineration company, which were both started during 1989. We enter 1990 with backlog of $127 million, including new contracts with Bethlehem Steel and Shell Oil. We are extremely positive about 1990 with our revenue goal of between $135-140 million and earnings per share growth of approximately 20-30 percent."

Kimmins Environmental Service Corp. and its subsidiaries provide hazardous and non-hazardous waste remediation and incineration; demolition and dismantling of industrial facilities; asbestos abatement and containment services; environmental surety bonds; and environmental contracting services.

Kimmins Environmental Service Corp. is headquartered in Tampa, Fla.; and has regional offices in Niagara Falls, N.Y.; and Houston.

Kimmins Environmental Service Corp.'s common stock is trade over the counter under the NASDAQ symbol KEVN.

#90060p0321 03/01/1990 ~PR Newswire

TROY, MI (MARCH 1) PR NEWSWIRE - Inacomp Computer Centers, Inc. (NASDAQ: INAC) ended second quarter fiscal 1990 on Jan. 27 with revenues up 48 percent, at $124,774,000 vs. $84,577,000 for second quarter fiscal 1989. Net income for the quarter also increased to $2,175,000, up from

$2,086,000 for second quarter fiscal 1989. Earnings per share rose to $.30 for second quarter fiscal 1990, up from $.29 for second quarter fiscal 1989.

Rick Inatome, chairman of the board, president and chief executive officer stated, "Our six-month earning comparisons are extremely impressive." He reported that for the two quarters ended Jan. 27, 1990, the company's revenues were $231,823,000, an increase of $73,353,000, or 46 percent over the same six-month period of fiscal 1989. Net income for the two quarters is up 15 percent from $3,176,000 in 1989 to $3,647,000 in 1990. Earnings per share are up from $.44 for the six months ending in January 1989 to $.50 for the same period ending January 1990.

Inatome said, "The company is very pleased with our second-quarter performance. Exceptionally strong revenues coupled with sound asset management continue to contribute to our success. The company's performance represents the 16th consecutive quarter of year-to-year improvements in both revenues and profitability."

Inatome explained, "Although competitive industry pressures and some one-time charges impacted the company's profitability for the quarter, the results are solid." The company recognized expenses associated with the shutdown of its software pilot, Computibles. "Shifting industry conditions have the dominant software-only competitors struggling. We made the decision to close Computibles late in the quarter because we determined that the strategy was no longer a viable profit opportunity," Inatome stated. The company realized approximately $300,000 in quarterly costs associated with the Computibles venture.

In addition, Inatome noted that substantial returns occurred in January on a "try and buy" program offered by a major microcomputer vendor, resulting in additional charges.

Inatome further stated, "Our strong second-quarter results indicate Inacomp's continuing ability to gain market share using our value-added strategy. Further, we have offset industry-wide margin decline through improvements in the areas of asset turns and expense control. We are presently encouraged by positive signs of margin recovery and are optimistic about the future."

Inacomp Computer Centers, Inc. markets microcomputer systems and related products and services through 49 company-owned and 60 franchise centers in 23 states. The company provides system consultation, installation, classroom training, system maintenance and repair to its customers. Inacomp also provides for short-term rental and long-term leasing of micrcomputer systems. Corporate offices are in Troy.

#90060p0325 03/01/1990 ~PR Newswire

MONTREAL (MARCH 1) PR NEWSWIRE - The Chairman and Chief Executive Officer of United Westburne Inc., Sam Abramovitch announced today the company's results for fiscal year 1989.

United Westburne is North America's largest integrated wholesaler of plumbing, heating, electrical, electronics, refrigeration and telecommunication supplies.

Sales reached $2,654,790,000 as compared with $2,265,503,000 for the previous year, an increase of 17.2 percent. Net earnings amounted to $40,139,000 as compared to $38,795,000 for 1988, an increase of 3.5 percent. On a per share basis this is equivalent to $1.28 per common share (average number of shares outstanding: 31,299,074) against $1.87 last year (average number of shares outstanding: 20,723,341). The number of outstanding shares increased as a result of a public offering of $97,625,000 during the month of June 1989 and a conversion of convertible debentures for the same period.

For the three months ended Dec. 31, 1989 revenues were $689,920,000 compared with $642,865,000 for the same period the previous year, an increase of 7.3 percent. Net earnings amounted to $11,981,000 as compared to $10,859,000 for the same period in 1988, an increase of 10.3 percent. On a per share basis this is equivalent to $0.32 per common share against $0.46 last year.

One factor that contributed to the corporation's performance were the acquisitions made in 1988 and 1989. The company continued its policy of acquisitions in 1989, to note in Ontario, Forsco Inc. and Dofax Limited; in Quebec, Turgeon & Jobin Lte; and in the United States: in Minnesota,

Graybow Daniels & Co., and in California, Continental Pipe and Supply of Palm Springs, Inc. There 1989 acquisitions added 31 sales locations and brought in additional annual sales of $144,000,000. They not only solidified Westburne's position in major markets but also increased its list of products and customers.

Abramovitch concluded: "We believe that the 1989 results are excellent at all levels in view of the 1989 business environment. The acquisitions completed during the year should contribute to long term growth. Westburne intends to continue its acquisition program in 1990 and looks forward to another year of increased sales and increased profits."

BOSTON (MARCH 1) PR NEWSWIRE - Bank of New England Corporation (NYSE: NEB) has announced that it has signed consent cease and desist orders with the Federal Reserve Board and that Bank of New England, N.A. has signed a cease and desist order with the Office of the Comptroller of the Currency. The corporation's four other affiliate banks expect to sign similar orders shortly. As announced early this year, BNEC has been in discussions for some time with the regulators concerning the terms of such orders.

The orders deal comprehensively with the development and implementation of plans, policies, and procedures and detail improvements in the operations and condition of the company and its subsidiary banks, particularly in the areas of management, asset quality, capital, and loan and administration.

Under the terms of the corporation's orders, dividends to stockholders, including dividends on preferred stock, require Federal Reserve approval. Accordingly, the company will not pay the March 1, 1990 dividend on its adjustable rate cumulative preferred stock, 1984 series, and does not expect to be in a position to pay dividends on its common stock or preferred stock for some time.

BNEC Chairman H. Ridgely Bullock commented, "We regard these orders as cooperative plans we undertake in partnership with federal regulators to restore our competitive position and earning power. We are convinced that we will emerge from this process a much stronger and more successful banking instituion."

Bank of New England Corporation is a Boston-based interstate bank holding company with assets of $26 billion and banking offices in four New England states. The company's common stock is listed on the New York Stock Exchange and is traded under the symbol NEB.

CONTACT: Marcia J. Ryan, 617-573-7731 (media contact), or Susan E. Montgomery, 617-573-2658 (investor contact), both of Bank of New England.

TORONTO (MARCH 1) PR NEWSWIRE - Fahnestock Viner Holdings Inc. today reported the following results:

FAHNESTOCK VINER HOLDINGS INC.
(Expressed in U.S. dollars)

Periods ended	Year		Fourth Quarter	
Dec. 31;	1989	1988	1989	1988
Revenue	$83,145,000	$79,582,000	$19,642,000	$18,359,000
Net profit (loss)	4,730,000	1,224,000	840,000	(544,000)
Net profit (loss) per share	$ .42	$ .11	$ .07	$(.05)
Book value per share	$2.90	$2.48		

Net profit for the year ended Dec. 31, 1989 was US$4,730,000 or 42 cents per share on revenues of $83,145,000 compared to $1,224,000 or 11 cents per share on revenues of $79,582,000 in 1988.

Net profit in the fourth quarter of 1989 was U.S. $840,000 or 7 cents per share compared to a net loss in 1988 of $544,000 or 5 cents per share.

The results reflect an overall growth in the company's business which, when combined with significant reductions in the fixed cost components of operating expenses, has improved the bottom line.

Fahnestock Viner Holdings Inc. is the parent of Fahnestock & Co. Inc., a U.S. broker dealer, operating 28 branches primarily in the north eastern United States.

MORRISTOWN, NJ (MARCH 1) PR NEWSWIRE - Heldor Industries, Inc. (AMEX: HDR), Morristown, N.J., announced today that, on Feb. 27, 1990, in furtherance of its previously announced action plan, Heldor's board of directors elected George Zabrycki as president and chief executive officer. Zabrycki was also appointed to the board of directors.

Zabrycki has more than 20 years of extensive management experience in major corporations. Zabrycki was formerly president of Amerchol

Corporation, a specialty chemical company, and was most recently employed as director-strategic development of Union Carbide Corporation.

Robert A. Ellington, chairman of the board of directors stated: "The selection of Mr. Zabrycki culminates an extensive search for a chief executive officer who will have day-to-day operating responsibility for the company." Ellington also stated: "Mr. Zabrycki's prior experience in the specialty chemical industry and in managing multi-production facility companies will be particularly valuable in managing Heldor's diverse manufacturing and distribution operations."

In other matters, Ellington announced that on Feb. 20, 1990 the board of directors accepted the resignation of James A. Miller as a director. Additionally, on Feb. 27, 1990 the board of directors accepted the resignations of John H. McDonald and Stephen Bassett as directors.

Heldor Industries, Inc. is a leading manufacturer and distributor of swimming pool equipment, chemicals and supplies.

#90060p0338 03/01/1990 ~PR Newswire

NEW YORK, (MARCH 1) PR NEWSWIRE - Orion Capital Corporation (NYSE: OC) announced today that, for the year ended Dec. 31, 1989, net income increased to $30,346,000, or $3.47 per share (after preferred dividends) on 6,510,000 weighted average primary common shares outstanding, from $25,392,000, or $2.91 per common share (after preferred dividends) on 6,497,000 weighted average primary common shares outstanding, in the 1988 year. Included in net income were realized investment gains after taxes of $872,000, or $.14 per primary common share, and $2,072,000, or $.32 per primary common share, in 1989 and 1988, respectively. Also, for 1988, net income included the cumulative effect of a change in accounting made in the first quarter of that year relating to the company's early adoption of a new accounting regulation, which had the one-time effect of reducing 1988 earnings by $491,000, or $.08 per share on a primary basis. Excluding after-tax realized investment gains and the impact of the change in accounting, earnings from insurance operations increased to a record $29,474,000, or $3.33 per primary common share, for the year ended Dec. 31 1989, from $23,811,000, or $2.67 per primary common share, for the 1988 year.

Results for the year and for the fourth quarter of 1989 were negatively impacted by approximately $1,000,000 in reserves for losses from the earthquake that struck Northern California in October. These losses were principally from business written by the company's reinsurance operations.

Operating results were also impacted by the establishment of a $368,000 reserve for possible refunds which may be required under a Nevada auto insurance rate roll-back statute that became effective Oct. 1, 1989. The constitutionality of the statute is being contested by the company and by other insurance companies, and a decision by the Ninth Circuit Court of Appeals is expected during the first half of 1990. The earthquake losses and the Nevada reserve reduced earnings for both the year and the fourth quarter by approximately $.17 per primary common share.

For the quarter ended Dec. 31, 1989, net income amounted to $6,064,000, or $.64 per share (after preferred dividends) based upon 6,540,000 weighted average primary common shares outstanding, compared with $7,300,000 for the last quarter of 1988, or $.80 per share (after preferred dividends) based upon 6,519,000 weighted average primary common shares outstanding. For the quarters ended Dec. 31, 1989 and 1988, realized investment losses after taxes were $1,427,000, or $.22 per primary common share, and $1,626,000, or $.25 per primary common share, respectively. Thus, excluding after-tax realized investment losses, earnings from insurance operations for the fourth quarter of 1989 were $7,491,000, or $.86 per primary share, and $8,926,000, or $1.05 per primary common share, in 1988's fourth quarter.

WOODBRIDGE, NJ (MARCH 1) PR NEWSWIRE - International Proteins Corporation (AMEX: PRO) announced today the sale of Petrou Fisheries, Inc., its fish meal and fish oil business located in Louisiana, to Daybrook Fisheries, Inc.

International Proteins expects to receive in excess of $30 million as a result of both this sale and the sale of its cottonseed business, which was announced earlier this week. The proceeds will be used to repay bank indebtedness, which will significantly strengthen International Proteins' balance sheet.

David H. Clarke, chairman of International Proteins, stated, "We are very pleased to complete these two disposals, which are part of our strategy to educe involvement in commodity-based operations and to focus on building our Ground Round restaurant business." In May 1989 the company sold its commodity trading operations.

IPC further advised that it expects to have increased operating income and increased net income for 1990. Due to the removal of income from the divisions being sold and an increase in number of shares outstanding, net income per share is expected to be reduced in 1990 compared to 1989.

IPC is a diversified food company with businesses in restaurants and food products.

MORTON GROVE, IL (MARCH 1) PR NEWSWIRE - The Middleby Corporation (AMEX: MBY) today reported sales and earnings for the year ended Dec. 30, 1989.

"Through the acquisition of our foodservice equipment group in July of 1989, we substantially broadened our product base, furthering our goal to become a worldwide leader in the foodservice equipment industry. Full-year sales of the combined company are currently running at the rate of $125 million, with no single customer accounting for more than 10 percent of

sales at the current annual rate of sales," David P. Riley, president, said.

"While sales for 1989 rose $72 million from $34 million the previous year, our net income declined. The decline in profits, occurring mostly in the fourth quarter, was a result of lower sales volume throughout the industry an overall economic slowdown, and negative results for the acquired operations," Riley added.

For the year ended Dec. 30, 1989, Middleby's sales were $72,223,000, compared to $34,213,000 for the previous year ended Dec. 31, 1988. Net earnings were $573,000 or 7 cents a share fully diluted, against $4,160,000, or 54 cents a share fully diluted, for the prior year.

"As we enter the 1990s, Middleby is in its strongest market position ever. With our dominating position in the conveyor oven market, international distribution and aftermarket service systems, excellent relationships with major fast food chains and a full range of food service equipment, we have a solid base on which to build for the future," Riley concluded.

Middleby designs, develops, manufactures and markets equipment used in the preparation, cooking, serving and storage of food in commercial and institutional kitchens and commissaries in the United States and internationally.

POMPANO, FL (MARCH 1) PR NEWSWIRE - Niagara Corp. (NASDAQ: NIAG), a 40-year-old company engaged in the manufacture, marketing and distribution of therapeutic health care products, which is listed on the National Association of Securities Dealers Automated Quotation system (NASDAQ), announced today that it is building the first direct sales program, aimed at marketing medical and therapeutic equipment to people over 50 years of age.

This segment of the population will recall with clarity the Arthur Godfrey radio advertisements for Niagara. The company spent millions of dollars on such ads during the 1950's. Niagara has a proven product line that spans a 40 year period; with a high recognition factor in the market that they are targeting (over 50 years of age). This corporate longevity adds to Niagara's credibility for people in this target population.

Ken Dychwald (one of America's top authorities on "the graying of America") had the following comments in an article published in Inc. magazine in June 1988. People over 50 represent one of the fastest growing segments of our population. Their household wealth is nearly double that of the average household in America. Contrary to public opinion members of this market segment do spend money if they perceive that they will gain comfort, security or convenience. People over 45 have the greatest resources. For the aforementioned reasons Niagara believes that it is properly positioned in the market place to sell directly to this demographic segment.

As part of this marketing program Niagara intends to put a revolving line of credit into place that will enable customers, through the use of a Niagara credit card, to purchase any and all products produced and marketed through Niagara. This program will also include extensive direct mail marketing of all new product information to Niagara's many existing clients.

Niagara Signs One Of America's Top Direct Sales Organizations Niagara is pleased to announce the signing of Mark Ostrov to a 10-year Nationwide Master Distributor Agreement. The Ostrov organization is the leading distributor in California for Niagara's largest competitor, Craftmatic Beds. If the Ostrov organization can meet the minimum performance standards under this contract, of which there can be no assurance, Niagara would increase its sales by 50 percent this year.

Ostrov was formerly a senior vice president and lead distributor for Craftmatic Beds. Craftmatic did $51 million in revenue last year.

This agreement was implemented on Feb. 19, 1990 with television promotions in selected target markets. As a result there were over 1,100 responses to this advertising in the first six days. This advertising ran in a small test market. The advertising was directed at the portion of the population over the age of 50. Niagara president Michael Riley was quoted as saying that "this is an excellent beginning to our national campaign."

Niagara is one of the largest direct sales organization in its industry with current sales of $9 million annually.

Private Placement Completed Niagara successfully completed the sale of $1,415,250 of its common stock with private investors. This resulted in a direct increase in shareholder equity, as well as total assets. The use of proceeds were to increase working capital; including but not limited to certain start-up costs for the new distributorship agreement.

NEW YORK (MARCH 1) PR NEWSWIRE - Primerica Corporation (NYSE: PA) and Barclays Bank PLC jointly announced today that Commercial Credit Company has completed the acquisition of BarclaysAmerican/Financial according to terms previously disclosed. BarclaysAmerican/Financial is the consumer lending unit of BarclaysAmericanCorporation, a U.S. subsidiary of Barclays Bank.

The acquisition includes BarclaysAmerican/Financial consumer finance receivables of approximately $1.3 billion. Total consideration in the transaction was approximately $1.35 billion in cash.

Separately, the companies announced an agreement for the acquisition of BarclaysAmericanCorporation's credit-related insurance subsidiary, the Citadel Life Insurance Company, by a wholly owned Primerica insurance subsidiary for approximately $21 in cash. The closing of the transaction, which is subject to customary conditions including regulatory approvals, is expected to occur in the second quarter of 1990.

BarclaysAmerican/Financial specializes in consumer lending with an emphasis on direct installment loans and home equity loans. It has branch operations in 29 states, including seven in which Commercial Credit is not represented. The Citadel Life Insurance Company, based in Charlotte, N.C. specializes in credit-related life and accident and health insurance.

Commercial Credit Company, a subsidiary of Primerica Corporation, provides personal and home equity loans to nearly 700,000 consumers through 490 branch offices in 29 states, and had net receivables of approximately $3.5

billion as of Dec. 31, 1989. This transaction brings Commercial Credit's receivables to more than $4.5 billion.

Primerica Corporation is a diversified financial services company principally engaged in life, credit, accident and health, and property and casualty insurance, investment banking and securities brokerage, mortgage banking, mutual funds, asset management, consumer lending, credit cards, and direct marketing. As of Dec. 31, 1989, the company had assets of approximately $18 billion, stockholders' equity of approximately $2.6 billion, and book value of approximately $23.50 per share.

Headquartered in London, the Barclays Group, with $205 billion in assets and capital in excess of $15 billion at year-end 1989, is one of the world's largest banking and financial services institutions and one of the few banking groups to receive Triple-A ratings by both Standard & Poor's and Moody's Investor Services.

Based in Charlotte, BarclaysAmericanCorporation, a diversified finance company, operates the eighth largest factoring business in the United States, and provides leasing, mortgage banking, private label credit card services, and commercial banking.

PASADENA, CA (MARCH 1) PR NEWSWIRE - Conversion Industries Inc. (AMEX: CVD) today reported that its Colin Energy subsidiary (Toronto: CN.) has achieved a 100 percent increase in oil production in the Eaglesham area of Northern Alberta since late November.

According to John P. McGrain, chairman of Conversion, Colin has achieved net daily oil production of approximately 975 barrels, up from the daily rate of 465 barrels reported on Nov. 30, 1989. Colin has drilled 21 wells to date in the Eaglesham area during the past five months. Ten wells have been completed, nine oil and one shut-in gas, with an average productivity of 200 barrels per day and Colin maintaining an average 41 percent working interest. Of the remaining 11 wells, three wells are awaiting completion, one well is currently being drilled and an additional seven wells have been abandoned.

"Our objective with Colin was to reach a production level of 1,000 barrels per day by the end of June," stated McGrain. "It appears we will achieve our target well in advance of our original plan. This benchmark is exceptionally important in the development of Colin Energy as it is now approaching a production rate which will generate enough cash flow to fund current exploration activities without seeking additional financing."

Conversion Industries is a fully integrated independent power producer. The company holds a 52 percent interest in Calgary-based Colin Energy.

NEW ORLEANS, LA (MARCH 1) PR NEWSWIRE - Avondale Industries Inc. (NASDAQ: AVDL) participated in the ceremonies this week at which the U.S. Department of Energy (DOE) and Westinghouse Electric Corp. (NYSE: WX) signed a contract to continue the development of the AP600, an advanced, simplified nuclear power plant.

The contract is part of DOE's Simplified Passive Advanced Light Water Reactor Program and calls for submittal of the AP600 design for certification as a standardized nuclear plant that achieves safety through natural or passive systems.

Avondale is a subcontrator to Westinghouse and will continue their role of supplying modular construction techniques to the Westinghouse team allowing factory built modules to be site assembled with a much shortened construction time. The team's goal is to have the plant design certified and the first plant completed during the late 1990's.

Avondale Industries Inc., headquartered in metro New Orleans, is one of the nation's leading marine fabricators. In addition to its shipbuilding operations, the company specializes in boat and LCAC construction and is a major repair contractor for commercial and Navy ships. It is also involved in the modular construction of plants and components for a variety of land-based industries.

RIDGEFIELD, NJ (MARCH 1) PR NEWSWIRE - Sentex Sensing Technology, Inc (NASDAQ: SENS) announced today the audited results of operation for the fiscal year ended Nov. 30, 1989.

Net income remained relatively stable at $178,153 for the 1989 fiscal year as compared to $211,682 for the prior fiscal year. Due to the timing of purchase orders received but not delivered at fiscal year end, total revenue declined to $1,589,878 as compared to $1,759,217 for the prior fiscal year. with approximately 74,000,000 shares outstanding, per share income is insignificant.

Dr. Linenberg, president of Sentex, confirmed that management- instituted cost cutting has been effective in maintaining net income despite sluggish sales. He noted, however, that the company has a backlog, at year end, of approximately $700,000, the highest in its ten year history.

Sentex Sensing Technology, Inc. develops, manufactures, and markets a line of vapor detection instrumentation used in the security, industrial hygiene, and safety area. Total company assets stand at $2,918,958 with approximately $2,500,000 in cash and short-term investments. Total current liabilities, as of Nov. 30, 1989, are $159,306 with no long term debt.

MOORESTOWN, NJ (MARCH 1) PR NEWSWIRE - Regal Communications Corp. (OTC) today announced profits of $924,388 for the quarter ended Dec. 31, 1989.

The company also reported record revenues of $2,965,334 for the quarter. Regal is the publisher of Lottery Players Magazine and through its newly acquired wholly owned subsidiary, Regalfone, operates 900 audiotex telephone services.

"The increases in revenue and profits are directly related to the company's acquisition of Regalfone," stated S.W. Valenza Jr., president of Regal. Regalfone was acquired on Oct. 1, 1989, and accordingly this is the first quarter that includes the earnings of both companies. The first quarter results included a tax benefit of $330,775, also a result of the acquisition.

Regal, which has approximately 10,800,000 shares outstanding, recorded earnings of 9-1/2 cents per share for the quarter.

BOISE, ID (MARCH 1) PR NEWSWIRE - Morrison Knudsen Corp. (NYSE: MRN) and American Energy, Washington, D.C., have announced an agreement to cooperate in developing waste-to-energy projects in the United States and Canada.

Under a long-term plan, American Energy will provide the Steinmuller and Laurent Bouillet mass burn technologies and its skills in project development, operations and maintenance. Morrison Knudsen Corp. will be responsible for construction activities and has been accorded rights to equity participation in privately owned projects.

The two firms have been selected to build and operate a 300-ton-per-day waste-to-energy project in Monroe County, Penn., and are currently negotiating with Monroe County General Authority for the contract. The same team recently submitted a proposal for a 1,500-ton-per-day large municipal solid waste facility serving south central Connecticut.

Morrison Knudsen Chairman and Chief Executive Officer William M. Agee is looking forward to working with American Energy.

"This association with American Energy strengthens our commitment to the environmental and municipal solid waste markets. Their operating, financial and project management skills are a strong complement to our broad engineering and construction background and makes for a formidable team to participate in this growing and much-needed industry," Agee said.

American Energy President William M. Sim added, "Our two companies' business philosophies and approaches to project management, construction and partnering are very similar. By combining our collective skills, we will produce the best product for our customers and an advantageous return for each of our companies."

American Energy is a division of Potomac Capital Investment Corp. (PCI), Washington, D.C. PCI is a subsidiary of Potomac Electric Power Co. (PEPCO), the electric utility serving Washington, D.C., and suburban Maryland.

Morrison Knudsen, one of the world's premier engineering, design, construction and mass transportation companies, has a primary commitment to environmental restoration, municipal and hazardous waste management.

Year-to-date	$789,334,754	$662,036,397	19.2
(8 weeks) Number of Stores	668	574	

As of February 24, 1990, Food Lion, Inc. was operating in ten states, with principal locations in the southeast. Same store sales increased 5.2 percent for the four weeks and 6.0 percent year-to-date.

Comparisons to last year are difficult because last year's sales were extremely strong, having been influenced by snow two out of the four weeks. Last year's increases for the four weeks and year-to-date were 32.8 percent and 29.5 percent, respectively, with same store sales increases of 15.0 percent and 12.6 percent, respectively.

ATLANTA (MARCH 1) PR NEWSWIRE - BMR Financial Group Inc., Atlanta (NYADAQ: BMRG), and First Chattanooga Financial Corp., Chattanooga, Tenn. (NASDAQ: FCHT), jointly announced today that they have signed a definitive agreement providing for the merger of FCHT with BMRG, as previously announced.

Terms of the definitive agreement call for holders of each share of FCHT common stock to receive $17 per share in cash plus 1.07195 shares (or an aggregate of 3 million shares) of BMR common stock at closing. The transaction is subject to receipt of required regulatory approvals, approval by the shareholders of each company, financing by BMRG of the cash portion of the purchase price, and certain other conditions.

The parties anticipate closing the transaction in the third or fourth

quarters of 1990.

The board of directors of FCHT has previously announced its intention to declare and pay a special $2.00 cash dividend per share before the closing of the transaction. Based upon the $7.25 closing price of BMRG common stock on Feb. 28, the merger, including the special dividend, has an indicated value of approximately $75 million.

#90060p0412 03/01/1990 ~PR Newswire

ATLANTA (MARCH 1) PR NEWSWIRE - Southern Bell has proposed an Incentive Sharing Plan to the Georgia Public Service Commission (PSC) that would expand and improve telephone service for Georgia consumers.

The company's plan freezes basic local rates for a minimum of three years, offers county-wide calling, reduces its long distance charges, and shares earnings above 14 percent equally with ratepayers.

The company also proposes to make contributions to an Economic Development Fund to help those telephone companies that might experience a financial hardship by implementing county-wide calling. It is also asking the PSC to establish and administer the fund.

This plan is part of Southern Bell's response to the PSC's Rule Nisi Order issued on Dec. 19, 1989. The company made the proposal to address the commission's concern for improving and expanding telecommunications services in Georgia.

Southern Bell will not seek to increase the current basic flat rates for residence or business customers for a minimum of three years from the effective date of the plan.

The company also proposes to share any earnings above 14 percent equally between ratepayers and shareholders. Southern Bell's current authorized rate of return is 15 percent. According to Swearingen, this new regulatory initiative gives the company additional incentive to strive for greater productivity improvements, cost savings, and the faster delivery of new services.

Other benefits of the plan include the implementation of county-wide calling and a reduction in Southern Bell's long distance charges.

The company has proposed that optional county-wide calling be phased-in over a two to three-year period throughout Georgia. The plan offers

customers who desire to expand their flat rate calling area virtually unlimited calling in the expanded area for a small additional monthly charge. In addition, the plan provides an option that allows customers to retain their existing local flat rates and calling area while realizing a 60 to 70 percent savings over existing toll rates for all calls to points in the expanded local calling area.

Generally, the plan would allow customers to expand their local calling area to include all exchanges within their county. Additionally, the plan would provide customers with the convenience of being able to make calls within the plan area by just dialing the seven-digit phone number.

SAN DIEGO (MARCH 1) PR NEWSWIRE - Humphrey Inc. (NASDAQ: HUPH) today announced it has received a new contract from Rockwell International (NYSE: ROK) amounting to just under $1 million for directional gyroscopes and free gyroscopes. The gyros are for the GBU-15 Guided Weapon System produced by Rockwell International's Missile Systems Division for the U.S. Air Force's Ogden Air Logistics Center, Ogden, Utah. Gyro delivery is scheduled to start mid-year and be completed by mid-1991.

This is the sixth production contract from Rockwell for these gyros in the past nine years and it increases the company's backlog to approximately $16.4 million.

Humphrey Inc. is a leading supplier of gyroscopes and electromechanical devices to the aerospace and defense industries with sales and representation worldwide.

MARKHAM, Ontario (MARCH 1) PR NEWSWIRE - Magna International Inc. (NASDAQ/NMS: MAGAF) announced today that its second quarter results, which will be released by mid-March, are expected to show operating losses and significant write-downs of non-profitable production facilities. Magna is in the process of eliminating its interest in certain of these operations and expects to complete this action by year- end. The write-downs are estimated to be between $100 and $150 million.

This will result in certain of the company's financial tests not being met in respect of a number of its loans. Magna has initiated discussions with its lenders with a view to resolving this situation. The company remains current in respect of all payments of principal and interest on its

outstanding debt.

Magna is following its previously announced plan to reduce debt by divesting of its non-profitable operations as well as selling non-strategic assets and real estate and selectively joint venturing certain operations. A number of asset sales now entered into are expected to close in the third and fourth quarters. Management is confident that the company's actions with respect to the write-downs and its debt reduction program will result in a much streamlined core business, significantly reduce debt levels and improve cash flows over calendar 1990.

SEATTLE (MARCH 1) PR NEWSWIRE - Boeing Commercial Airplane Group's Everett Division set an all-time high delivery record for one month when it turned over 19 widebody airplanes to customers in February, the company said today. The previous record of 14 deliveries was set in May 1970 and matched again last September.

Last month's deliveries included seven 767s, two 747-200 freighters and 10 747-400s. The airplanes were delivered to 13 separate customers.

British Airways topped the list by receiving five jets -- two 747-400s and three 767s. Other customers receiving multiple deliveries of airplanes were Japan Airlines, with two 747-400s, and Cathay Pacific, with a 747-400 and a 747-200 freighter.

William L. Shineman, Everett Division vice president-general manager, said it took a tremendous effort to deliver 19 airplanes in one month. "We surpassed our own high expectations. I want to thank everyone in the Everett Division personally for making February such a successful month," he said.

COLORADO SPRINGS, COL (MARCH 1) PR NEWSWIRE - Cray Computer Corp. (NASDAQ: CRAY) announced today that is board of directors has approved the acquisition of certain machinery and equipment and process technology from GigaBit Logic Inc. in exchange for 1,625,000 shares of Cray Computer's common stock and the surrender of its 200,000 shares of Class A Preferred Stock of GigaBit Logic.

Neil Davenport, president and chief executive officer, stated that successful negotiations have been completed and that Cray Computer will commence with the operation of a foundry at GigaBit's present facility in Newbury Park, Calif. effective immediately. "We will be sub-leasing a portion of GigaBit's facility in California until our facility in Colorado Springs is complete at which time we will relocate the equipment, process and some employees to Colorado." Davenport added that he expects Cray Computer's gallium arsenide foundry to be completed in June 1990 and ready for operation early in 1991.

Cray Computer is engaged in the design and development of the Cray-3 computer system.

MINNEAPOLIS (MARCH 1) PR NEWSWIRE - Mac Lewis, president and chief executive officer of Computer Network Technology Corporation (CNT) (NASDAQ: CMNT) today announced changes in executive responsibilities and a new "flatter" organizational structure. These changes result in fewer levels of management. The intent of these changes is to enhance CNT's focus on customer support and improve information sharing between CNT employees, customers, and suppliers.

These changes include the formation of a new customer support organization headed by Jack Beagan who will assume the title of vice president of customer support services. Beagan's support organization includes CNT's systems consultants, technical support staff and training departments. This new support organization provides additional focus on CNT's continuing emphasis on 100 percent customer satisfaction.

Gene Misukanis, one of CNT's founders, assumes new responsibilities as vice president of engineering. Ken Shindeldecker, with over eight years of management experience at Cray Research Inc., joins CNT's engineering management team reporting to Misukanis as director of engineering services.

As part of the new organizational structure, the position of vice president of sales and marketing has been eliminated. Accordingly, Terry Banbury will be leaving CNT and the directors of domestic sales, marketing and international operations will report directly to the president. The company is extremely grateful to Terry for all of his contributions.

Other executive positions are unchanged. These include John Brintnall, vice president of finance and administration and chief financial officer;

Jack Beagan, in addition to his new responsibilities will also continue as acting vice president of manufacturing.

CNT is a growing company in a rapidly changing business environment. The company will continue to adapt its organization to provide 100 percent customer satisfaction while remaining flexible to new opportunities.

Computer Network Technology Corp. develops, manufactures and markets high speed channel attached networking products for mainframe computers. The company's common stock is traded on the national over-the-counter market under the NASDAQ symbol CMNT.

CLARENDON HILLS, IL (MARCH 1) PR NEWSWIRE - MAF Bancorp (NASDAQ: MAFB) announced today that Jerry Weberling has been named chief financial officer and treasurer of the company and its wholly owned subsidiary, Mid America Federal Savings Bank, effective Mar. 1, 1990.

Weberling, 38, has been with the bank since 1984 and presently serves as senior vice president and controller. Prior to joining Mid America, he worked for 10 years at the accounting firm of KPMG Peat Marwick in Chicago specializing in audits of savings and loans, real estate and mortgage banking companies. Weberling replaces Noa W. Horner who announced earlier this month his intention to resign his position effective today, in order to pursue other business interests.

Mid America Federal Savings Bank is a federally chartered stock savings bank with total assets of $1.6 billion. The bank operates a network of 13 retail banking offices primarily in the western suburbs of Chicago. The stock of MAF Bancorp Inc., the holding company of America Federal Savings Bank, is quoted on the NASDAQ National Market System under the symbol MAFB.

#90060p0462 03/01/1990 ~PR Newswire

MILWAUKEE (MARCH 1) PR NEWSWIRE - Harley-Davidson Inc. (NYSE: HDI) announced today that a federal court ruled that Harley-Davidson has demonstrated "a likelihood of success on the merits" of its federal securities law claims against Malcolm Glazer. Although the court denied Harley-Davidson's request for a preliminary injunction and Malcolm Glazer's request for summary judgment, the court said that "it was in the public interest" to see that Harley-Davidson's claims are decided and ordered the parties to prepare for trial.

Harley-Davidson had filed an action against Malcolm Glazer and certain related parties last October, claiming that they had made false and misleading statements in filings with the Securities and Exchange Commission and the Federal Trade Commission as well as in announcements and comments to the press.

Judge Terence T. Evans, United States District Judge for the Eastern District of Wisconsin, denied Harley-Davidson's request for a preliminary injunction on the technical ground that the company would not suffer any irreparable harm from the Glazers' actions that could not be remedied after a full trial on the merits. As to the merits of Harley-Davidson's claim, Judge Evans wrote that "it seems almost undisputed that some inaccuracies have existed in the Glazers' 13D filings" and that "Harley-Davidson has made a convincing argument that the Glazers are engaging in nonproductive speculation."

Richard F. Teerlink, chief executive officer of Harley-Davidson, said, "We

look forward to trying this case in court and are confident that we will prevail."

Notwithstanding the denial of the preliminary injunction, Harley- Davidson is seeking at trial to enjoin Glazer from acquiring or attempting to acquire any additional shares of Harley-Davidson stock, voting in person or by proxy any Harley-Davidson securities, soliciting proxies as a means of controlling or affecting the management of Harley-Davidson for the purpose of advancing his interests, and filing any false or misleading Schedule 13D statements or other documents related to purchases or sales of Harley-Davidson securities.

BRANCHBURG, NJ (MARCH 1) PR NEWSWIRE - Air & Water Technologies Corp. (AMEX: AWT) today filed with the Securities and Exchange Commission an amended Registration Statement relating to a proposed sale of $125,000,000 of subordinated exchangeable debentures due 2015. The debentures will be exchangeable (unless previously redeemed) for shares of common stock of Metcalf & Eddy Companies Inc. (NASDAQ: METC) owned or acquired by AWT. AWT currently owns approximately 83 percent of Metcalf & Eddy. The proceeds of the proposed offering will be used solely to refund or refinance the company's outstanding senior extendible notes and/or senior subordinated debentures. The underwriting is being led by Allen & Company Inc., with Alex, Brown & Co. Inc. and Kidder Peabody & Co. Inc. as co-managers.

Air & Water Technologies Corp. provides a comprehensive range of services and technologies for controlling air pollution, protecting the integrity of the nation's water resources, and disposing or reusing certain waste by-products through development of inert and environmentally sound products. Those services are provided through the company's Research-Cottrell, Metcalf & Eddy, and Residuals Management units, respectively.

A registration statement relating to these securities has been filed with the Securities and Exchange Commission but has not yet become effective. These securities may not be sold nor may offers to buy be accepted prior to the time the registration statement becomes effective. This (communication) shall not constitute an offer to sell or the solicitation to buy, nor shall there be any sale of these securities in any state in which such offer, solicitation, or sale would be unlawful, prior to registration or qualification under the securities laws of any such state.

SAN DIEGO (MARCH 1) PR NEWSWIRE - Wahlco Environmental Systems Inc. announces the filing of an initial public offering today of 3,100,000 shares of common stock to be sold by the company. The company has granted the underwriters an option to purchase up to an additional 465,000 shares to cover over-allotments. It is currently anticipated that the offering price will be between $10.50 and $13.50 per share. The company intends to list the common stock on the New York Stock Exchange.

The company, headquartered in San Diego, is currently a wholly- owned subsidiary of Pacific Diversified Capital Co. and an indirect subsidiary of San Diego Gas & Electric Co. (NYSE: SDO). After completion of the public offering, Pacific Diversified Capital will own approximately 80 percent of the company's outstanding common stock.

Proceeds from the offering will be used principally for repayment of debt, potential acquisitions and general corporate purposes.

Wahlco is the leading provider of flue gas conditioning systems, which are used principally by coal-fired electric utilities to reduce and control air pollution.

The co-managers of the offering will be Prudential-Bache Capital Funding and Salomon Brothers, Inc., from whom a written prospectus may be obtained.

A registration statement relating to these securities has been filed with the Securities and Exchange Commission but has not yet become effective. These securities may not be sold nor may offers to buy be accepted prior to the time the registration statement becomes effective. This communication shall not constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sale of these securities in any state in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state.

#90060p0468 03/01/1990 ~PR Newswire

SAN DIEGO (MARCH 1) PR NEWSWIRE - Henry N. Huta has been promoted to president and chief executive officer of Pacific Diversified Capital, according to Tom Page, chairman of the board.

In addition, Huta has been named president and chief executive officer of a new Pacific Diversified Capital subsidiary: Wahlco Environmental Systems Inc., a San Diego-based holding company for existing and future acquisitions in the pollution control industry.

Huta has served as executive vice president and chief operating officer of Pacific Diversified Capital, the wholly owned subsidiary of San Diego Gas & Electric, since March 1989. Previously, he was vice president and chief financial officer for Pacific Diversified Capital from 1986 to 1989.

Huta will oversee operational duties for Pacific Diversified Capital as well as operations at each of the company's three subsidiaries, which have combined annual revenues of over $450 million: Wahlco Environmental Systems Inc., the holding company for Santa Ana-based Wahlco Inc., which owns Wahlco Power Products; Mock Resources Inc., an Irvine-based marketer and distributor of petroleum and natural gas products; and Phase One Development Inc., a developer and marketer of commercial and industrial buildings in San Diego and in Colorado Springs, Colo.

Huta was formerly with Los Angeles-based Ducommun Inc., where he held several senior management positions, including group vice president and chief financial officer for their electronic and aerospace groups. Prior to leaving Ducommun, Huta was assistant to the chairman of the board, helping the company formulate its strategic plan.

A certified public accountant, Huta received his undergraduate degree in accounting from C.W. Post College, Long Island University in New York and graduate degrees in computer science and business management from West

Coast University and Peter F. Drucker Graduate School of Management at Claremont, respectively.

He is a member of the San Diego chapters of National Association of Corporate Directors, American Management Association's Presidents Association, and The Executive Committee. In addition, he belongs to American Institue of CPAs and California State Society of CPAs.

Pacific Diversified Capital, which became operational in 1986, is the nonutility subsidiary of SDG&E. While the company has several other subsidiaries, Pacific Diversified Capital will focus its future acquisition efforts on the pollution control industry.

SAN DIEGO (MARCH 1) PR NEWSWIRE - The Titan Corp. (NYSE: TTN) announced today that revenues for 1989 were $97,669,000, compared to 1988 revenues of $96,695,000. Income from continuing operations were $2,171,000, or $.13 per common share compared to a 1988 loss from continuing operations of $7,291,000, or $.65 per common share.

Net income, which includes discontinued operations in both years, was $2,263,000, or $.14 per share in 1989, compared to a net loss in 1988 of $11,162,000, or $.95 per share.

The improvement in 1989 performance is primarily attributable to the restructuring put in place in 1988, the sale of unprofitable operations and significant cost reductions across all elements of the organization.

Fourth quarter 1989 revenues totaled $27,312,000, up 12 percent over $24,321,000 in 1988. Income from continuing operations was $714,000, or $.05 per share in 1989 versus a loss from continuing operations of $7,301,000 or $.59 per share for the same period a year ago. Net income for the 1989 fourth quarter was $.08 per share, compared with a loss of $.87 per share for the fourth quarter of 1988.

"The strong performance in 1989 reflects the success of our long-term strategy," stated Gene Ray, president and CEO. "Our cost cutting has made us more competitive in today's defense environment. At the same time, we have been able to increase our backlog to record levels."

The Titan Corp. specializes in providing complete solutions to the high technology needs of the U.S. Government, U.S. industry, and international customers. Titan does this through its systems development and

integration expertise, its advanced technology base and its manufactured products. For further information, please contact Stephen Meyer, chief financial officer, The Titan Corporation, 5910 Pacific Center Blvd., San Diego, Calif., 92121. Telephone 619-453-9500.

CHICAGO (MARCH 1) PR NEWSWIRE - Larry Green, the Los Angeles Times' Midwest Bureau chief and a veteran Chicago journalist, has been named deputy managing editor/projects for the Chicago Sun-Times.

Green, 48, will take charge of investigations and special news projects, beginning March 12.

A 10-year veteran of the Chicago Daily News, which folded in 1978, Green covered a variety of assignments, including local government and wars in the Middle East and Vietnam. Since joining the Los Angeles Times in 1977, Green and his bureau in Chicago have produced award-winni ng stories while covering politics, courts, the environment and the economy.

''Larry brings to us the hard-hitting reporting and wonderful writing that made him a standout at the Daily News and at the Times,'' said Dennis A. Britton, editor and senior vice president of the Sun-Times, who announced Green's hiring Wednesday. ''He has lived in and reported on Chicago for nearly the last quarter of a century. Many...who have worked with him and against him know he is a tough competitor. Our competition is about to find out just how tough.''

Managing Editor Mary Dedinsky said Green's arrival will be ''exciting and inspiring for the Sun-Times staff. He is aggressive and competitive and will help keep the Sun-Times on the cutting edge of investigations for our readers.'' A native of Detroit and graduate of Wayne State University there, Green began his career as a copyboy for the Detroit News.

At the Chicago Daily News, Green co-authored several award-winning stories including one of the first to critically examine conditions at the Marion federal penitentiary and a 1975 series documenting wide-spread spying activities by the Chicago Police Department's ''Red squad.''

His assignments included coverage of Cook County government and its court system. In 1971, he was named chief of the paper's Saigon bureau; four years later he took over as chief of the Springfield bureau. While at the Los Angeles Times, Green wrote a prize-winning series that chronicled an Illinois farmer's year of working the land.

The Times' Midwest bureau has been the most honored of that paper's seven regional bureaus during the time Green served as its chief. Since 1977, correspondents assigned to the bureau won 13 prizes for writing and reporting; Green's work was cited eight times.

LOS ANGELES (MARCH 1) UPI - A lawyer sued rock singer Tom Petty for copyright infringement Wednesday, claiming a song he wrote 14 years ago was misppropriated for a tune on Petty's latest album.

In the lawsuit filed in U.S. District Court, Martin Allen Fine, an attorney with the Beverly Hills firm, Leon Schneider Professional Corp., seeks profits from the Petty's song, ''Runnin' Down a Dream,'' released last year on his ''Full Moon Fever'' album.

''Full Moon Fever'' was nominated for a 1989 Grammy as best album, but did not win.

In his lawsuit, Fine claims ''Runnin' Down a Dream'' has ''music identical'' to a song the lawyer wrote in 1976 called ''Ascending,'' and released on an album called ''For God's Sake.''

Fine claims in the suit that he gave a copy of his album to Jeff Lynne - formerly of The Byrds and the Electric Light Orchestra - who co-wrote ''Runnin' Down a Dream'' with Petty and Mike Campbell.

Lynne, Campbell, MCA Records and Warner Bros. Music Corp. are listed as defendants in the suit, which seeks to stop Petty from earning future profits on the song.

Neither Fine nor a representative for Petty could be reached for comment. Employees at Fine's law firm said he practiced personal injury law.

In the lawsuit, Fine claims he copyrighted ''Ascending'' in 1976 and registered the song with Broadcast Music Inc., the music licensing organization. The suit claims ''For God's Sake'' has been on the market

since October 1976.

#90060u0174 03/01/1990 ~United Press International
MOSCOW (MARCH 1) UPI - Curators of museums across the Soviet Union and Europe that honor Vladimir Lenin are trying to fight flagging attendance and overhaul the image of the communist founding father.

A two-day conference, ''Lenin's Ideological Heritage and its Popularization by Museums,'' brought together the heads of Lenin museums in numerous Soviet cities and in Poland, Czechoslovakia, France, Finland, Yugoslavia and other nations, the official Tass news agency said.

''In a number of speeches at the conference, the hope was expressed that during the changes in East European countries Lenin's themes will not disappear from museum displays in those countries,'' Tass said Wednesday.

One East bloc nation after another has replaced or weakened communist rule following mass uprisings over the past nine months. Even the Soviet Communist Party has undergone dramatic changes.

The Soviet conference participants said the ideological revolt was hurting their business.

''Lenin museum workers from Kiev, Lvov, Tbilisi, Baku ... noted that the interest of visitors in traditional displays is decreasing,'' Tass said. ''The attendance at Lenin museums dropped in a number of regions last year.''

But the curators vowed ''to get rid of all ostentation and ritual'' in a bid to win back a larger following.

''The activity of museums devoted to Lenin, the founder of the Soviet state, is undergoing considerable transformation during perestroika,'' Tass said. ''Stereotyped images of Lenin that have been established over decades are being discarded.''

Mikhail Gorbachev has frequently framed his ''perestroika'' reform drive as a return to Leninist principles distorted by Josef Stalin, Leonid Brezhnev and other subsequent Soviet leaders.

#90060u0278 03/01/1990 ~United Press International
(MARCH 1) UPI - Four southern California cities where most of Wednesday's earthquake damage was concentrated have declared local states of emergency. One of the cities in the foothills of the San Gabriel

Mountains... Upland... is three miles from the epicenter of the quake, which measured five-point-five on the Richter scale. Authorities report at least three people injured. 35 miles to the southwest, tall buildings in downtown Los Angeles swayed for 15 to 20 seconds as the quake rolled through the area.

In Anchorage, Alaska... Ash Wednesday was marked by two eruptions from Redoubt Volcano, 110 miles to the southwest. The mountain's latest violent explosion blotted out the bright midday light and covered the state's largest city with a fine grit of ash. Air traffic was disrupted.

Scientists at the University of Washington are keeping an eye on Oregon's Mount Hood following two swarms of tiny earthquakes earlier this month. They say, however, the tremors do NOT mean renewed life for the dormant volcano.

The latest in a series of violent storms is bearing down on Europe. And meteorologists say they don't know when it'll all end. Warnings of new storms came as civil defense and rescue services scrambled to repair damages from the earlier storms that left at least 63 people dead, scores hurt and several thousand forced from their homes.

Continuing violence stemming from Tuesday's state assembly by-elections has left 97 people dead and forced a troop deployment to stop further bloodshed. State-run television reports Thursday that former Prime Minister Rajiv Gandhi's Congress-I Party has lost in five states and probably in a sixth.

Authorities in Port Canaveral, Florida, announced Wednesday the confiscation of more than six tons of hashish from an oceangoing tugboat on fire off the coast. It's the sixth-largest hashish bust in U-S history. The drugs had an estimated street value of 50-Million to 75-Million dollars. Federal drug agents had been tracking the hashish for three weeks but it was a fire in the ship's smokestack that finally brought in the Coast Guard Tuesday.

#90060u0286 03/01/1990 ~United Press International

BEIRUT, Lebanon (MARCH 1) UPI - One of the eight U.S. hostages kidnapped in Lebanon could be freed this month as a result of recent secret direct talks involving U.S. and Iranian officials, Moslem sources said.

''It is quite possible that one of the American hostages would be set free in March,'' a Moslem militia source, who requested anonymity, told United Press International Wednesday.

The source said the release would be because of recent clandestine, direct discussions between the United States and Iran.

A Moslem fundamentalist source close to Iranian circles echoed the militia source's information. ''The atmosphere is ripe and positive to solve the hostages issue,'' the fundamentalist source told UPI. ''We should wait and see what the coming month might bring.''

In Washington, a senior State Department official denied any high-level U.S.-Iranian contacts. ''There have been no authorized meetings,'' he said.

Syrian officials told Peggy Say, whose brother, reporter Terry Anderson, has been held longer than any other U.S. captive, that they ''have greater hopes'' of releasing the hostages. Say received the word during a five-day visit to Damascus that ended Sunday.

''I think that this is the beginning of the end,'' Say told the British Broadcasting Corp. before a meeting Wednesday in London with the archbishop of Canterbury, Robert Runcie. ''There was almost, if not 100 percent, agreement among everybody whom I talked to, that the time seems to be right.''

Anderson, 43, chief Middle East correspondent of The Associated Press, was kidnapped March 16, 1985, in Moslem west Beirut.

The militia source said two rounds of talks were held in December and January in Geneva and New York to find a compromise to the hostages' plight. Mahmoud Rafsanjani, the brother of Iranian President Hashemi Rafsanjani, and a State Department official were involved in the talks, the source said.

The eight U.S. captives and nine Western other hostages, including four Britons and two Germans, have been held in secret hideouts in Lebanon.

During the dicussions, the Iranians demanded the release of Anis Nakkash, imprisoned in France, the unfreezing of about $2 billion in Iranian assets in the United States and the freeing of 17 convicted Shiite Moslems jailed in Kuwait for 1983 bombings, the source said.

Nakkash, who is serving a life term in Paris for attempting to assassinate former Iranian Prime Minister Shahpour Bakhtiar, ended a hunger strike shortly after the talks, the militia source said.

Some French media organizations have recently reported that French President Francois Mitterrand intends to pardon Nakkash.

And the militia source said, ''The Americans have already begun exerting pressures on the Kuwaitis to free the Shiite prisoners.''

Coinciding with the reported U.S.-Iranian contacts, an envoy from the Church of England visited Tehran in January and discussed the possibility of freeing Terry Waite, Runcie's personal representative, the source said.

''When the Iranians asked for direct talks with the British government, the envoy just smiled,'' the militia source said.

Tehran Times Editor Irfan Parvis, in an edition published last Thursday, quoted Hashemi Rafsanjani as saying he opposed the holding of hostages and he would do his best to free them.

The next day, Sheikh Mohammed Hussein Fadlallah, a Shiite fundamentalist spiritual leader, called for ''closing the file of the hostages'' during a Friday prayers' sermon.

In Washington Tuesday, a White House spokesman denied a Lebanese newspaper report that secret talks were held in Switzerland.

The newspaper Al-Hayat had reported that Washington and Tehran held secret talks in Geneva aimed at normalizing relations and freeing the hostages.

#90060u0406 03/01/1990 ~United Press International

(MARCH 1) UPI - Canadian officials say firefighters have nearly doused a massive fire in a mountain of 12-Million tires burning for three weeks in Hagersville, Ontario... 70 miles south of Toronto. In fact, provincial government officials plan an announcement Thursday to officially declare the blaze extinguished. The more than 500 people evacuated from their homes because of fears of toxic gases have been allowed to return.

A political soap opera, Soviet style. The government newspaper, Izvestia, reports a slur campaign by local officials in a Ural Mountains city against an police inspector probing for graft among ''town fathers'' has backfired. The paper says residents of Yemanzhelinsk are so furious over the whole thing, they are demanding the resignations of the city's party bureau and government council.

-30- 973

#90060u0427 03/01/1990 ~United Press International

(MARCH 1) UPI - For the first time in 36 years, there are tiger tracks on Tobacco Road.

Elden Campbell had 22 points and scored a key basket off a missed free throw in the final 1:14 Wednesday night, giving the Clemson Tigers a 97-93 victory over No. 4 Duke and at least a share of their first Atlantic Coast

Conference regular-season title since the league was founded in 1954.

''This is a big win for our program,'' said Clemson Coach Cliff Ellis. ''I thought we played hard. I thought we played inspired, and I think we played with a lot of confidence.''

A football power in a basketball conference, Clemson has long been a doormat in the conference. The Tigers had two regular-season second-place finishes in the ACC, the last in 1987. They have never won the ACC Tournament, finishing runnerup only once, 1962. During the same period, North Carolina has won 20 regular season titles and has claimed 11 tournament titles.

Clemson, 23-5 overall, is 10-3 in the ACC, one game up on the Blue Devils, who dropped to 9-4 and 23-6. Both teams have a game left - Clemson is at Georgia Tech and Duke is home against North Carolina. Duke could still share first place with a win and a Clemson loss.

If they tie, the two would flip for the first seed in the ACC Tournament since they split their two games.

Campbell's rebound and follow put the Tigers ahead 91-86 with 52 seconds left. Duke was forced to foul and the Tigers put the game away with six straight free throws.

Dale Davis scored 20 points, David Young 16, Derrick Forrest 12, and Sean Tyson and Kirkland Howling each had 10 for Clemson, which shot 65.5 percent and extended its winning streak to 24 straight at Littlejohn Coliseum.

Christian Laettner, led the Blue Devils with 25 points but missed an open layup with 1:24 left. The shot would have given Duke a one-point lead.

Duke's Phil Henderson scored 22, including 14 on free throws. Henderson was 6 of 6 the second half from the line, while his teammates made only one of seven.

Billy McCaffrey scored 14, Robert Brickey 11 and Bobby Hurley 10 for the Blue Devils.

--- AROUND THE COLLEGE SCENE ---

Elsewhere in Top Twenty action, No. 2 Missouri downed Kansas St. 65-60, No. 5 Georgetown pounded No. 6 Connecticut 84-64, No. 9 Syracuse nipped Seton Hall 71-69, No. 10 Purdue was upended by Iowa 64-63, and No. 11 Georgia Tech was bounced by North Carolina 81-79.

At Columbia, Mo., Doug Smith scored 28 points and grabbed 17 rebounds to

spark the Tigers to their seventh Big Eight Conference title. Missouri, 26-3 overall and 12-2 in the conference, took a 34-25 halftime lead and led the rest of the way. Kansas State, 16-13 overall and 6-7 in the conference, were led by Steve Henson's 22 points but never got closer than four points in the second half.

At Landover, Md., Alonzo Mourning had 20 points and 12 rebounds to lead the Hoyas in a rout that forges a three-way tie for first place in the Big East. Georgetown, Connecticut and Syracuse are tied atop the Big East at 11-4. Connecticut took an early lead, but Georgetown used a 14-3 run to take command and was never challenged. Dwayne Bryant added 20 and Dikembe Mutombo collected 15 points, 14 rebounds and four blocked shot for the Hoyas, 22-4. Chris Smith led Connecticut, 24-4 with 21 points. The Huskies end the regular season Saturday against Boston College while Georgetown finishes at Syracuse on Sunday.

At East Rutherford, N.J., Derrick Coleman tipped in a missed shot at the buzzer to lift the Orangemen to their 20th straight win against the Pirates. The Pirates rallied from a six-point deficit in the final 2:14 to tie the score 69-69 on Oliver Taylor's basket with 9.2 seconds remaining. Billy Owens then took the inbounds pass for Syracuse dribbled the length of the court and missed an off-balance shot, but Coleman tipped in the miss. The Orangemen, 21-4 overall, were led by Billy Owens' 21 points and Coleman added 15 and 10 rebounds. Taylor led Seton Hall, 11-15 and 4-11, with 16 points and Frantz Volcy and Michael Cooper added 15 each.

At Iowa City, Iowa, Matt Bullard's short jumper with eight seconds left, gave the Hawkeyes the upset over the Boilermakers. After Bullard's shot, Purdue's Tony Jones hurried down the floor but missed a jumper from the left side. Jimmy Oliver's follow shot from the right corner went in, but the officials ruled that time had expired. The loss dropped Purdue to 20-6 overall and 12-4 in the Big 10. Iowa, 12-14 and 4-12, snapped a six-game losing streak. Bullard and James Moses paced Iowa with 15 points each. Woody Austin led Purdue with 13.

At Chapel Hill, N.C., Rick Fox made two free throws with four seconds remaining to help the Tar Heels snap a three-game losing streak. North Carolina improved to 18-11 overall and 7-6 in the ACC, while Georgia Tech fell to 20-6 and 7-6. Scott Williams led North Carolina with 26 points and Fox had 16. Dennis Scott scored 24 of his game-high 33 in the first half for Georgia Tech. Oliver had 19 points and Kenny Anderson added 16 for the Yellow Jackets.

(MARCH 1) UPI - Based on past performance and their current condition, Boston was the last place that the Dallas Mavericks wanted to be Wednesday night.

Larry Bird scored a game-high 31 points to lead the Celtics to a 111-98 victory over Dallas, the Maverick's 10th consecutive loss without a victory at Boston Garden.

''They just wore us down tonight,'' said Mavericks forward Sam Perkins after his team ended a six-game, 10-day road journey. ''We couldn't get anything going in the second half.''

The Mavericks, coming off a 110-87 loss in New York Tuesday in which they were outrebounded 62-29, made only 39 percent of their field goal attempts in the final three quarters.

''At the end of a road trip, if you play New York and Boston, you're going to get a little weary and you're not going to execute,'' said Dallas Coach Richie Adubato, whose club was outrebounded 53-37.

Rookie Michael Smith, making his first start in Boston Garden and his third in a row, scored 21 points. The Celtics returned home after an eight-game, 13-day road swing in which they finished 4-4.

''They were on the last leg of a road trip and we know how that is,'' said Boston forward Kevin McHale, who added 15 points and 11 rebounds. The Celtics led 53-49 at halftime and started the third quarter with a 16-3 run that sealed Boston's third consecutive victory.

Derrick Harper paced the Mavericks with 30 points and Rolando Blackman added 18.

Bird missed a free throw with 6:41 left in the game, snapping a personal string of 71 in a row at Boston Garden.

--- AROUND THE NHL ---

Elsewhere in the NBA, Atlanta edged Indiana 102-99, Miami crushed Sacramento 113-92, the Los Angeles Lakers defeated Seattle 112-107, and Golden State defeated San Antonio 144-135 in overtime.

Hawks 102, Pacers 99

At Atlanta, Kevin Willis scored 19 points and grabbed 18 rebounds and Dominique Wilkins added 19 points to spark Atlanta to its fourth straight victory. Moses Malone scored 17 points and pulled down 12 rebounds for Atlanta. Reggie Miller led Indiana with 24 points.

Heat 113, Kings 92

At Miami, Kevin Edwards scored Miami's first eight points and finished with 32 to lead the Heat. Edwards' 16 first-quarter points set a club record. Antoine Carr scored 20 points for Sacramento, which suffered its fourth straight loss.

Lakers 112, Sonics 107

At Seattle, Magic Johnson scored eight of his game-high 25 points during an 18-0 third-quarter run. The Lakers outscored Seattle 31-14 in the third quarter to take an 84-77 lead. Rookie Dana Barros scored 20 points for the Sonics, who have lost eight straight to the Lakers.

Warriors 144, Spurs 135, OT

At Oakland, Calif., Chris Mullin scored 36 points and Rod Higgins scored nine points in overtime to help Golden State snap a six-game losing streak. Higgins, who was held to just four points through three quarters, scored 13 in the final 17 minutes. Mullin set a team-record, sinking 6 3-pointers. San Antonio rookie David Robinson scored a season-high 38 points, and Terry Cummings added 28 points and 24 rebounds.

#90060u0458 03/01/1990 ~United Press International

LOS ANGELES (MARCH 1) UPI - President Bush is back in California for the second time in three weeks to sound a law-and-order Republican campaign theme where crime could be a major issue in one of the nation's costliest political races.

Officially, his attendance Thursday at the dedication of a new maximum-security jail was not political. However, it came against a backdrop of debate over crime-fighting credentials in a hard-fought race to succeed Republican Gov. George Deukmejian.

With Attorney General John Van de Kamp and former San Francisco Mayor Dianne Feinstein trading in their race for the Democratic nomination, Bush asserted Wednesday night that California ''needs to continue a crime-fighting tradition.''

At a $1,000-a-person San Francisco fund-raising dinner for Sen. Pete Wilson, the GOP gubernatorial hopeful, Bush said California ''needs a governor who shares our philosophy about crime'' and will support prison sentences ''at least as tough as the criminals we convict.''

''And if the kingpins who deal drugs are dealing death, then let's judge them for what they are: murderers,'' Bush said. ''And it's time we took the shackles off the cops, the courts and the law. I'm convinced we must be tougher on these drug criminals.''

Ironically, that was not all that different from some of the anti-crime rhetoric heard on the Democratic side of the high-stakes, big-bucks race for governor, where Feinstein has challenged Van de Kamp on the death penalty in comparing their law enforcement records.

The theme was one Bush found to be effective in 1988, when his use of Willie Horton to fault the Massachusetts prison furlough program and paint Michael Dukakis as soft on crime sparked cries of latent racism.

Bush's appearance Thursday at the new North Los Angeles County Correctional Facility, a yet-to-be-occupied 2,064-inmate maximum-security jail built with $134 million in state and local funds, served to dramatize both his call for tougher sentences and the difficult consequences state and local governments face as a result.

The nation's correctional system is burdened by serious overcrowding compounded by the rise in drug-related crimes and violence. Though Bush included a substantial amount in the federal anti-drug budget this year for prison construction, he has acknowledged the limitations on federal support.

Reaping the benefits of good news from abroad, Bush is lavishing attention on California this week to a degree unseen since the 1988 campaign, when its 47 electoral votes provided the biggest single contribution to his victory over Dukakis.

Earlier talk of ill will between the White House and some influential members of the state GOP establishment - attributed to different geographical orientations - has dissipated, due in part to some behind-the-scenes peacemaking by GOP National Chairman Lee Atwater, White House chief of staff John Sununu and former Bush adviser Craig Fuller.

With authoritarian regimes collapsing around the world and the economy sputtering along a path of slowed but sustained growth, Bush has been blessed with relative peace abroad and prosperity at home as he has gotten an early start on Campaign '90 with his approval rating at a record high.

Wednesday night in San Francisco, he marveled at all that had happened - ''from Moscow to Managua'' - in the three weeks since his last visit, when protesters lined his motorcade route and hecklers interrupted his speech.

Savoring success in Panama and the triumph of democratic forces in Nicaragua, Bush declared that the ''Revolution of '89,'' which saw communist rule break down in Eastern Europe, ''has continued into a new decade, a decade of democracy.''

That assessment was to provide an upbeat backdrop Thursday night for Bush to tout the state of the economy before a California Chamber of Commerce dinner before tackling some of the thornier issues affecting the nation's economic future at a desert resort summit in the Palm Springs area with Japanese Prime Minister Toshiki Kaifu.

TOKYO (MARCH 1) UPI - Instability reigned on the Tokyo Stock Exchange Thursday with the key Nikkei average falling by more than 2 percent following two days of similarly sharp rises.

Investors sold stocks because of speculation interest rates will rise and the U.S. dollar's increasing strength against the Japanese yen, which makes oil and other imported goods more expensive in Japan. Both factors increase the cost of doing business in Japan.

The Nikkei fell 762.41 points, losing 2.2 percent of its value, to close at 33,829.58 points.

The drop was the seventh worst one-day decline for the Nikkei, which fell precipitously last week and Monday but recovered Tuesday and Wednesday.

The Nikkei was up 694.04 points Wednesday and 576.08 points Tuesday on strong bargain hunting, but the rally died because of the strong dollar and increasing prospects for interest rates to climb.

The broader Tokyo Stock Exchange Index, or TOPIX, which was up 65.50 points Wednesday, lost 29.53 points to close at 2,536.01.

Trading was moderate with an estimated 600 million shares exchanged, compared with 728.22 million the day before.

''We expect the stock market to remain unstable for a while, but when the dollar goes down the market should recover,'' said a spokesman for Daiwa Securities Co., one of Japan's Big Four securities companies, who asked not to be identified.

The U.S. dollar gained 1.26 yen to close at 149.78 yen in Tokyo.

The Bank of Japan intervened in the market, selling more than $1.2 billion to support the yen but was unable to stop the dollar.

The Bank of Japan, which has intervened in the past three sessions, has been trying to calm the stock market by keeping the dollar down and assuring investors that interest rates will not rise.

But as the dollar rises, the pressure grows to increase interest rates.

''The future direction of interest rates is unclear and that is causing uncertainty in the market,'' said Yu Yoshida, a dealer with Yamaichi Securities Co.

The Bank of Japan can hold down the dollar through direct intervention or by increasing the discount rate, the interest rate the central bank charges its most creditworthy customers, which in turn pushes up other interest rates.

Higher interest rates makes investments outside the stock market more attractive and discourages companies from borrowing money.

If the interventions fail to restrain the dollar, as they did Thursday, analysts expect the bank to turn to interest rate increases.

#90060u0563 03/01/1990 ~United Press International

NEW DELHI, India (MARCH 1) UPI - Former Prime Minister Rajiv Gandhi's Congress (I) Party suffered stunning election defeats in five states and possibly a sixth, it was reported Thursday. Election violence left 97 people dead.

''A vote for change dominates the assembly elections,'' state-run television said of the toppling of the five Congress (I) Party governments only three months after the party was ousted from national power.

Prime Minister V.P. Singh's Janata Dal - the main component of the National Front government - wrested coastal Orissa state, securing a more than two-thirds majority, the news agency Press Trust of India reported.

The biggest winner in Tuesday's violence-marred polls was the right-wing Hindu Bharatiya Janata Party, which stormed to a two-thirds majority in Madhya Pradesh and ousted the Congress (I) Party in northern Himachal Pradesh in its first state election victories ever.

The Bharatiya Janata is riding a wave of Hindu revivalism sweeping northern India. In Nov. 22-26 general elections that ousted Gandhi as prime minister, the party extended from two seats in the lower house of Parliament to more than 80 and provided the support Singh needed to form his minority government.

The Bharatiya Janata and the Janata Dal combined to topple Congress (I) Party governments in northwestern Gujarat and Rajasthan states and were likely to form coalition administrations, returns and newspaper reports

said.

Gandhi's party was heading for defeat in northeastern Bihar, with the Bharatiya Janata and Janata Dal outpacing it in available returns.

Results trickled in from the far-flung eastern Himalayan state of Arunachal Pradesh, where Gandhi's party was declared the winner in four of 60 seats.

The tabulation of returns in the western state of Maharashtra began Thursday and first results were expected later in the day.

In a loss affecting prestige more than national politics, the Congress (I) Party and an ally were defeated by a one-seat margin by the Janata Dal and an electoral partner in the tiny southeastern coastal territory of Pondicherry, a former French colony administered directly by New Delhi, results said.

As many as 70 percent of the 215 million registered voters cast ballots Tuesday in more than 1,600 races.

Many experts blame Gandhi for the party's setbacks, pointing to his image as a member of India's tiny westernized elite out of touch with the realities of poverty, unemployment, inflation and other hardships suffered by the bulk of its 820 million people.

He also could not end deep divisions within the party that hurt its campaign efforts or counter perceptions of his guilt in several major arms deals, which fueled popular dissatisfaction with endemic official corruption.

V.N. Gadgil, a Congress (I) Party general secretary, appeared to concede defeat, saying he was ''not surprised'' by the results he called ''a continuation'' of the party's loss of the national parliamentary polls.

Party spokesman K.N. Singh rejected possible moves to oust Gandhi as leader of the one-time political juggernaut that kept the Gandhi-Nehru dynasty in power for all but about four of India's almost 43 years of independence.

''The whole party stands solidly behind Mr. Gandhi,'' Singh said.

Bihar witnessed the worst violence and vote-rigging attempts that accounted for 80 of the 85 deaths reported Tuesday.

Unrest broke out again Wednesday in the state capital of Patna, 530 miles southeast of New Delhi, with two people wounded in a clash between Congress (I) Party and Janata Dal activists, officials said.

In the communally sensitive Gujarat capital of Ahmedabad, 500 miles southwest of New Delhi, police fired bullets and tear gas to end a Hindu-Moslem clash that left at least one person dead and four wounded, police said.

The clash erupted after the funeral of a victim of Tuesday's poll violence.

The federal Election Commission ordered a suspension in unrest-forced repolling in an assembly by-election in northern Haryana state after police opened fire to prevent ''miscreants'' from storming voting booths in the village of Bhansi, police sources said.

At least 11 people were killed and 25 wounded, stoking tensions that prompted officials to deploy 400 troops to avert more bloodshed, the sources said.

The trends in returns paralleled the Congress (I) Party's performance in November's elections, in which it did well in southern India, but was crushed in its traditional northern Hindi-speaking heartland stronghold.

#90060u0568 03/01/1990 ~United Press International

MANILA, Philippines (MARCH 1) UPI - The Supreme Court Thursday agreed to hear opposition Sen. Juan Ponce Enrile's petition questioning the validity of the rebellion and murder charges against him and appealing for his release.

A terse resolution issued by the 15-member tribunal directed President Corazon Aquino's government to respond by Monday to Enrile's challenge and allow the senator to appear and argue his case Tuesday.

Enrile, 66, a former defense minister who helped oust former dictator Ferdinand Marcos and install Aquino in the 1986 people power revolution, was indicted Tuesday and detained at a police stockade.

Lawyers for the lone opposition in the 23-member Senate Wednesday filed the petition before the tribunal, contending the complex crime of rebellion with murder leveled against Enrile in connection with the Dec. 1-9 coup attempt no longer exists on the statute books.

The lawyers argued that the Supreme Court in a landmark decision in 1956 ruled that murder is absorbed in the crime of rebellion. Rebellion carries a penalty of six years to 12 years imprisonment. In the charge of rebellion with murder, the higher penalty of life imprisonment for murder is imposed and the offense does not allow for bail.

Legal observers said Aquino obviously was hoping that the Supreme Court would reverse the 1956 ruling and now recognize the crime of rebellion with murder. The high tribunal has often reversed earlier rulings on significant cases.

Aquino said Thursday that if the Supreme Court upholds the government position, Enrile ''will continue to be detained for a non-bailable offense. If the Supreme Court rules otherwise, then he may be allowed to post bail during the pendency of the case.''

Defense Secretary Fidel Ramos has urged Congress to impose a higher penalty for rebellion so it could become an offense that does not allow for bail and help the military in its campaign against communist guerrillas, Moslem separatists and right-wing dissidents.

A Supreme Court ruling on the Enrile case upholding the charges would set a precedent and make such legislation unnecessary.

Prosecutor George Dee said the solicitor general was preparing his reply to Enrile's petition. ''We feel that the crime charged is existing, it is constitutionally defensible and legally sound,'' Dee said.

Six others were charged with Enrile. One of them, former police Maj. Billy Bibit, is under detention. The others remained at large, including army Col. Gregorio ''Gringo'' Honasan, the alleged mastermind behind the December uprising, and Cagayan province Gov. Rodolfo Aguinaldo.

At least 119 people were killed and more than 500 wounded in the December insurrection, the sixth and most threatening in Aquino's four years as president.

Aquino fired Enrile nine months after she took power, claiming his aides were trying to oust her. Enrile's arrest is regarded by political commentators as a move by Aquino to head off another coup attempt by some 150 mutineers still at large.

Aquino denied the arrest of Enrile signaled the start of a crackdown against her political enemies. But she said all those implicated in the uprising would be prosecuted.

#90060u0584 03/01/1990 ~United Press International

NEW YORK (MAR. 1) UPI - Negligence by doctors and hospital workers is responsible each year for the deaths and injuries of thousands of New Yorkers, many of whom could but do not file medical malpractice claims, a landmark study shows.

The $3.1 million study conducted by researchers from Harvard University found an estimated 6,895 deaths among hospital patients across New York state in a single year were caused by medical negligence. An additional 27,179 patients - 1 percent of the 2.7 million people hospitalized in 1984 - were injured through negligence, the report showed.

''We believe our findings support the view that medical intervention is a risky enterprise,'' wrote the authors of the five-year study, commissioned by the New York state Health Department and released Wednesday.

The study was the most comprehensive assessment of medical malpractice ever conducted in the United States and its results were considered to be useful to other states where malpractice insurance rates have been skyrocketing.

The Harvard team investigated the cases of more than 30,000 patients admitted to 51 New York hospitals during 1984 and found that only a fraction of the people injured through negligence ever filed malpractice claims.

From the sampling, the team extrapolated the number of deaths and injuries that could be attributed to negligence throughout the state's entire hospitals system.

The results drew immediate praise from Stop Hospital and Medical Errors, a Brooklyn organization that represents victims of medical malpractice.

''The numbers uncovered in the Harvard study are outrageous,'' SHAME president Elaine O'Rourke said in a statement. ''Nearly 20 people a day are being murdered at the hands of negligent doctors.''

A spokesman for the American Medical Association said the group concurred with the study and was gratified to find only 1 percent of cases involved negligence.

Consumer activist Ralph Nader said the study shows state medical licensing boards must tighten their discipline of doctors.

''State boards should be taking the lead in medical discipline, not medical associations, whose central purpose is to represent the interests of doctors,'' Nader said.

As many as 3.7 percent of all hospital patients, or 98,609, suffered some sort of injury due to negligence, the study said. About half of the injuries occured during surgery.

While most of the injuries were minor, just 10 percent of those patients later filed malpractice claims, suggesting the present malpractice system

is in need of a total overhaul, the study said.

The study showed that 13,000 patients who were injured while under medical care eventually died. While many of those were very sick to begin with, 6,895 patient deaths were directly attributed to medical negligence, the study said.

CORTLAND, NY (MARCH 1) UPI - The daily New York state ski report compiled by Ski Areas of New York Inc.:

Legend: New, new snow; GM, grooming; SM, snowmaking; NS, night skiing.

Surface condition codes: P, powder; PP, packed powder; WP, wet powder; WBP wind blown powder; MGS, machine groomed surface; FG, frozen granular; LG, loose granular; ICY, icy; WG, wet granular; CRN, corn snow; VAR, variable; SPR, spring conditions. The final two numbers refer respectively to number of day slopes open and number of night slopes open.

Key to Cross-Country: TS, track setting in last 24 hours; SM, snowmaking; KM TRAX SET, distance of groomed trail available in system; KM TRAILS, total trail distance open in system; NS, area offers night cross-country facility.

Note: The absence of a ski center listing in the daily report indicates that no report was received from that ski center or that it may be a weekend facility.

#90060u0618 03/01/1990 ~United Press International

(MARCH 1) UPI - Showers and thundershowers generated by a cold front pounded the Gulf Coast Thursday, while light rain trickled through the deep South and frigid air chilled even the heartiest New Englanders, dropping the mercury below zero.

The cold front galloped through Texas and Louisiana, triggering heavy rain and thundershowers along the coast and into the gulf. Meanwhile, in western Texas, residents of Valentine mopped up from a tornado that touched down Wednesday.

The National Weather Service issued a winter weather advisory for northern Arkansas, where some areas received as much as 2 inches of snow. Brisk northerly winds brought more cold air into Oklahoma and Arkansas.

Clouds covered much of the South, and light rain fell in portions of Mississippi, Tennessee and Georgia. Temperatures were mild for late winter ranging from 43 in Knoxville, Tenn., to 50 in Charleston, S.C., 51 in Atlanta and 68 in Miami.

A winter cold spell gripped New England as temperatures dropped below zero in the far Northeast. Skies were clear over most of Maine, where the mercury dropped to 3 below zero northern parts of the state. Partly cloudy skies covered New Hampshire and Vermont, where temperatures hovered in the single digits and teens.

Clear skies and cold temperatures prevailed along the Atlantic Coast, although light rain was reported in parts of West Virginia. Temperatures ranged from the teens in mountain areas to the mid-20s elsewhere.

The weather was clear and dry throughout most of the Midwest early Thursday morning, but snow from the past two weeks was still on the ground because of freezing temperatures.

In Michigan and Minnesota, temperatures hovered in the teens and 20s, while the mercury reached into the 30s in Missouri. Southern Illinois was reporting scattered snowfall, and a snow advisory was in effect overnight for a portion of southeast Missouri.

Sunshine and above-normal warm temperatures prevailed Thursday on the West Coast, except for some fog and cloudiness along the Pacfic Ocean shore. Drought-stricken California held hope for some showers Friday.

(MARCH 1) UPI - Around the world... around the clock... the latest news from U-P-I.

Protesters chanted ''Wake up and smell the flag'' as they set fire to a 25-foot-long American flag in San Francisco last night outside the hotel where President Bush was speaking. Demonstrators denounced the president's proposed constitutional amendment against flag-burning. Police arrested four people.

The shuttle Atlantis was launched on a trajectory carrying it closer to the East Coast than ever before, allowing it to fly over more of the Soviet Union. But NASA officials say the public was NEVER in any danger. The crew of the shuttle Atlantis is working in secret today... presumably preparing to launch a spy satellite.

Four cities in Southern California have declared local states of emergency. Upland, Pomona, Claremont and LaVerne were the hardest-hit during an earthquake yesterday. Officials say total damage could top 10-Million dollars. The quake was felt over 13-thousand square miles. Three injuries are reported.

The National Right to Life Committee says some environmental groups are trying to overturn major federal anti-abortion policies. The nation's largest anti-abortion group urges a financial boycott of such groups... including the Sierra Club, the National Wildlife Federation and the National Audubon Society.

Officials in Colombia have a 14th cocaine cartel suspect in custody, awaiting extradition to the United States. 14 other Colombians have already been transferred to the United States on drug charges since August. The latest suspect arrested is an alleged member of the Cali cartel.

#90060u0661 03/01/1990 ~United Press International

WASHINGTON (MARCH 1) UPI - One of the final chapters of Seabrook Station's 18-year struggle to produce nuclear energy will be written Thursday when the Nuclear Regulatory Commission votes on whether to grant a full-power operating license.

Seabrook's saga began in February 1972, when the now-bankrupt Public Service Co. of New Hampshire first applied to the state for permission to build the power plant.

Along the way, Seabrook's survival was challenged on every possible front by anti-nuclear activists and Massachusetts Gov. Michael Dukakis, who have persistently alleged that problems of plant safety and inadequate evacuation plans could harm residents of southern New Hampshire and northern Massachusetts in the event of an emergency.

The NRC appears poised to support its staff recommendation to grant Seabrook its long-sought operating license, according to predictions by New Hampshire Yankee, the plant's owner, and other supporters as well as detractors.

If the commission votes to grant the license, opponents have said they will seek to block the decision in the U.S. Court of Appeals in Washington.

''The real significance of the decision (to grant the license) is that new electrical capacity comes on line in a region that desperately needs electrical capacity,'' said Harold Finger, president of the U.S. Council on Energy Awareness, a Washington trade association of electrical utilities.

Fewer nuclear power plants are being built across the country - largely due to the efforts of anti-nuclear protesters - and Finger said a decision to approve Seabrook signifies a ''return to rationality.''

Under NRC procedures, separate permits must be sought for construction and actual operation. In Seabrook's case, the commission's vote on an operating license comes 13 1/2 years and many court battles after reactor construction began.

Finger said the experience has reinforced his contention that construction and licensing decisions ought to be made simultaneously.

But Seabrook opponents reject that, pointing to a recent study by the Employees Legal Project that concluded there are numerous safety concerns warranting a full-scale independent investigation.

The report said it identified many problems involving quality assurance and quality control, inaccuracies in operating procedures, equipment problems and inspection falsifications.

#90060u0662 03/01/1990 ~United Press International

CAPE CANAVERAL, Fla. (MARCH 1) UPI - The military crew of the shuttle

Atlantis presumably launched a 19-ton picture-taking satellite Thursday to spy on the Soviet Union, clearing the way for landing Sunday in California's Mojave Desert.

NASA has imposed a news blackout in effect to keep the Russians in the dark about the secret mission and the expected deployment of the shuttle's top-secret payload, reportedly set for around 6 a.m. EST, could not be confirmed immediately.

But the Air Force allowed NASA to lift the secrecy surrounding the 34th shuttle mission somewhat Thursday by announcing that Atlantis and its five-man crew are scheduled to land Sunday at Edwards Air Force Base, Calif.

''We're going to land on March 4 at Edwards,'' said NASA spokesman Jeff Carr. ''The crew is doing well and the space shuttle Atlantis is continuing to perform satisfactorily.''

While the exact landing time will not be announced until 24 hours before re-entry, the flight is expected to last about four days, 10 hours and 43 minutes, which would result in a landing shortly before 2 p.m. EST Sunday.

Otherwise, NASA officials have had nothing to say about the progress of the 34th shuttle mission since an hour and 50 minutes after takeoff, when a brief statement was released saying Atlantis and its crew had been given a ''go'' for routine orbital operations.

Navy Capt. John ''J.O.'' Creighton, 46, the commander, Air Force Col. John Casper, 46, the co-pilot, Marine Lt. Col. David Hilmers, 40, Air Force Col. Richard ''Mike'' Mullane, 44, and Navy Lt. Cmdr. Pierre Thuot, 34, began their first full day in orbit Wednesday evening.

Although the goal of the sixth military space shuttle mission is classified, Aviation Week & Space Technology magazine reported last month the shuttle team planned to launch a state-of-the-art $500 million satellite Thursday during Atlantis's 18th 90-minute orbit, or some 27 hours after launch.

The magazine reported the 37,000-pound satellite is equipped with a high-tech photographic system capable of beaming back super-sharp digital pictures of ground targets around the world to help monitor arms control treaties.

The spacecraft also is believed to be equipped with electronics gear to eavesdrop on supposedly secure Soviet military communications. It is thought to be the fourth military satellite - the second capable of high-resolution photography - to be launched by a shuttle in the post-Challenger era.

With the costly satellite on its way, the astronauts were scheduled to conduct military and unclassified experiments for the remainder of the mission, along with the usual slate of medical studies to learn more about the effects of weightlessness on human physiology.

Creighton and company were launched Wednesday at 2:50 a.m. on a trajectory carrying Atlantis northeast up the Eastern Seaboard and into an orbit inclined a record 62 degrees to the equator.

From such an orbit, the shuttle and its satellite payload can fly over every point on the globe between 62 degrees north and south latitude, which includes virtually every major population and industrial center in the Soviet Union and Asia.

Since Atlantis was launched on a trajectory carrying it closer to the East Coast than ever before, spectators up the East Coast were treated to a rare show as the 4.5-million-pound space freighter streaked safely into orbit.

The $2 billion shuttle passed slightly more than 86 miles east of Cape Hatteras, N.C., and Cape Cod, Mass., on its fiery ascent.

''It was fantastic,'' said aerospace writer Craig Couvalt in Washington. ''It appeared to be half an inch to three quarters of an inch wide and moving like a bat out of hell. The first thing I thought when I saw that was 'God, that must be fun.'''

#90060u0676 03/01/1990 ~United Press International

BEIJING (MARCH 1) UPI - China intensified Thursday its threats of retaliation for Britain's decision to grant citizenship to 225,000 Hong Kong residents, hinting it may not honor foreign passports given colony dwellers since 1984.

Foreign Ministry spokesman Li Zhaoxing repeated China's condemnation of Britain's decision to gradually grant full citizenship, including the right to live in Britain, to as many as 225,000 of Hong Kong's nearly 6 million people.

''This course of action by the British government is a gross violation of its own solemn commitment'' in the agreement under which Hong Kong will revert to Chinese sovereignty in 1997, Li said at a weekly news briefing.

China's latest attack on the decision came in response to vows Wednesday by British Prime Minister Margaret Thatcher and Foreign Secretary Douglas Hurd to uphold the measure despite a domestic backlash.

But Li took China's earlier threat to ''take corresponding measures'' one step further by hinting that British passports held by Hong Kong residents will be invalid when the territory reverts to Chinese rule.

''Under the nationality law of the People's Republic of China, any Chinese citizen residing in China who wishes to acquire foreign citizenship must first apply for and obtain permission and approval to forfeit their Chinese citizenship,'' he said.

Residents of Hong Kong are considered Chinese citizens under a memoranda attached to the 1984 Sino-British joint declaration on returning the territory to China.

Li refused to elaborate on his statement, which implied that foreign passports held by Hong Kong citizens who do not go through the proper channels will not be honored under Chinese law.

The latest warning could provoke new fear and suspicion in Hong Kong over the resumption of Chinese sovereignty, heightened since China's brutal suppression of the pro-democracy movement on the mainland last June.

The agreement ignited an exodus of skilled professionals and wealthy middle class residents.

#90060u0682 03/01/1990 ~United Press International

NEW DELHI, INDIA (MARCH 1) UPI - A bomb exploded on a passenger train Thursday northeast of New Delhi, killing five people and wounding 16 others, the Press Trust of India news agency reported.

The bomb exploded in a sleeper car on the Chattisgarh Express as it made a scheduled stop in Meerut, 30 miles northeast of New Delhi, the news agency said. There was no immediate claim of responsibility and police have no suspects.

The train was delayed for four hours while the five bodies and 16 wounded were removed and the damaged car separated from the train.

The train originated in the Sikh holy city of Amritsar in the northern state of Punjab, where Sikh militants since 1983 have been waging a bloody campaign for an independent state.

Some 6,000 people have died in violence stemming from the independence drive.

Sikh militants insist on a separate state because they claim that members

of their faith are discriminated against by the Hindu-dominated New Delhi government.

Siks make up 2 percent of India's more than 820 million people, who are mostly Hindus.

#90060u0697 03/01/1990 ~United Press International

WELLINGTON, NEW ZEALAND (MARCH 1) UPI - Prime Minister Geoffrey Palmer expressed delight Thursday with the apparent move toward restoration of high-level contacts between New Zealand and the United States following a three-year estrangement over nuclear weapons policy.

Palmer's comments came after Secretary of State James Baker told the U.S. Senate on Wednesday he thought it unwise to continue a ban on such contacts on matters other than military or intelligence.

High-level political and security contacts were suspended in 1986 by the United States, a year after New Zealand's Prime Minister David Lange imposed his Labor government's anti-nuclear stance denying port access to U.S. warships unless they were declared free of nuclear weapons.

The United States neither confirms nor denies the nuclear capability of its warships.

Palmer said in a statement the New Zealand government has taken a consistent position that its anti-nuclear policy is not negotiable, but that political dialogue could and should continue.

''As Secretary of State Baker has mentioned, the difference between New Zealand and the United States in respect to ship visits still exists,'' he said. ''No policy changes on this question have been made by either side.

''It is very pleasing and welcome to see that the relationship between the two countries is robust and mature enough to accept such differences.''

#90060u0719 03/01/1990 ~United Press International

LUSAKA, Zambia (MARCH 1) UPI - The African National Congress' administrative body convened Thursday for two days of key talks with black leader Nelson Mandela on his role in the movement, negotiations with Pretoria and rebuilding the ANC within South Africa.

The meeting of the ANC's National Executive Committee opened at a convention center on the outskirts of Lusaka, the movement's headquarters in exile, on the third day of Mandela's visit and amid evidence Mandela

emerged from 27 years imprisonment with tremendous influence over the ANC's future.

''The NEC will have to grapple with the issue,'' said senior committee member Steve Tshwete. ''It will have to be decided. There is no way the ANC can keep a man of that force outside the structures.''

Joe Slovo, the Lithuanian-born secretary-general of the South African Communist Party and an NEC member, said Mandela's weight adds ''strength and glamor'' to the ANC and the issue of his formal position in the movement would be a key item on the agenda.

''He's obviously the most impressive leader around and for us this is a remarkable addition of strength,'' said the white exile. ''It would be naive for me to say otherwise.''

During a noon break in the ANC meeting Thursday, Mandela was to meet with a 10-member U.S. delegation led by Rep. William Gray, D-Pa., and composed of the key architects of U.S. sanctions against South Africa's white minority rulers. The congressmen will meet President Kenneth Kaunda of Zambia before traveling to South Africa Friday morning.

President Frederik de Klerk's office confirmed he would meet the U.S. delegation during their stay in South Africa.

Mandela, 71, held various top positions within the ANC before his arrest in 1962 and was a driving force behind the movement's military wing, Spear of the Nation, which launched limited guerrilla warfare in December 1961 to topple white rule. He was released from 27 years imprisonment on Feb. 11.

Wednesday, leaders of the frontline states that border South Africa who gathered in Lusaka to welcome Mandela affirmed their ''blind faith'' in him and reiterated economic sanctions against Pretoria must be maintained until the course toward the abolition of apartheid becomes ''irreversible.''

A final communique by the presidents of Zambia, Botswana, Angola, Tanzania Zimbabwe and Uganda and representatives from Namibia and the Organization of African Unity said they were ''convinced that international pressure on the Pretoria regime must be maintained.''

They also regretted Britain's decision to unilaterally lift sanctions on individual investments and tourist traffic to South Africa, in what the government of Prime Minister Margaret Thatcher defended as a reward for de Klerk's Feb. 2 racial reform initiative.

The formal ANC post Mandela would be given remained unclear Thursday, but

senior officials said it was doubtful he would formally assume the presidency.

ANC President Oliver Tambo suffered a stroke last year and is hospitalized in a Stockholm clinic. Mandela is expected to meet Tambo later in his 17-day tour abroad that also will take him to ANC training bases in Tanzania.

According to senior officials, the ANC's administrative body also is expected to consider demands to suspend its armed struggle as a gesture of good faith to de Klerk. But they said the ANC is unlikely to reverse a Feb. 16 decision by the executive committee that no such move is possible until talks with the white minority government began.

Tshwete, former political commissar of the military wing, told reporters a suspension of the armed struggle before Pretoria met ANC conditions for talks would be ''tantamount to capitulation.''

He said ''people grow militant because of the inspiration they draw'' from ANC's military wing and he added they ''sing'' about it.

''They don't sing about sanctions,'' Tshwete said. ''It (the military wing) has invigorated people, raised their morale.''

The executive committee meeting takes place against the backdrop of de Klerk's legalization of the ANC and his call for talks with the movement on ending the country's protracted racial conflict.

Although de Klerk has not met several demands of the anti-apartheid community, including lifting a 44-month-old state of emergency and releasing all political prisoners, the ANC announced two weeks ago it would send a delegation to meet de Klerk for preliminary talks on hurdles standing in the way of formal negotiations.

The composition of the ANC delegation also is expected to be addressed at Thursday's meeting of the ANC, as are efforts to rebuild the movement inside South Africa.

#90060u0757 03/01/1990 ~United Press International

(MARCH 1) UPI - Another day on the west coast for President Bush... the Air Force announces shuttle landing plans... an earthquake rocks Southern California... and heavy fighting breaks out in Beirut. Those stories and more, next from U-P-I.

President Bush has made NO public acknowledgement of a series of protests marking his visit to San Francisco.

Bush was speaking to a one-thousand-dollar a plate fund-raiser for Senator Pete Wilson, a Republican candidate for California governor, when the protests began.

Foes of the president's proposed constitutional amendment to outlaw flag-burning set fire to two American flags outside the hotel where Bush was speaking.

An estimated two-thousand protesters and curious onlookers attended the boisterous demonstration. Police reported four arrests, including one for assault on a fireman.

About 200 police officers cordoned off the streets around the Westin St. Francis hotel where Bush was speaking and kept the demonstration confined to the streets surrounding Union Square.

Later, a group that booked a room at the hotel unfurled two banners from windows and dropped flyers... protesting U-S involvement in El Salvador.

After the dinner Bush went to Los Angeles, where he plans to attend the dedication of a new maximum-security jail today. Bush is expected to expand on a law-and-order Republican campaign theme. Last night at the dinner for Pete Wilson, Bush said California ''needs to continue a crime-fighting tradition.''

NASA plans to hold a news conference today, presumably to say when the shuttle Atlantis will land.

Other than that, the space agency has kept quiet about the progress of its latest secret military mission.

Navy Captain John Creighton, the craft's commander, and Air Force Colonel John Casper, its co-pilot, guided Atlantis into orbit yesterday after five failed launch attempts.

NASA has NOT revealed what the five-member crew is doing in space, but it's reported that Atlantis will fire into orbit a 500-Million-dollar spy satellite.

The 37-thousand-pound satellite is said to be equipped with a high-tech photographic system capable of beaming to Earth super-sharp digital pictures of ground targets around the world.

Sources say the two-BILLION-dollar shuttle is scheduled to touch down at California's Edwards Air Force Base Sunday.

-30- 2547
#90060u0773 03/01/1990 ~United Press International
(MARCH 1) UPI - A 10-day old truce between rival Christian forces in Lebanon was shattered today. Troops of military leader General Michel Aoun unleashed a wide-scale offensive against strongholds of Samir Geagea's militiamen in east Beirut.

Police sources say Aoun's gunners used Howitzers and mortars to blast militia-patrolled residential areas, starting fires and inflicting heavy damage. There was NO immediate word on casualties.

The tank-led troops attempted to advance into the gunmen's regions, but were faced with stiff resistance.

A Christian mediation team has failed to find a political settlement between Aoun and Geagea to stop the month-old bloody fight for control of Christian east Beirut. At least 710 people have been killed and more than 25-hundred wounded in the fighting.

U-P-I has learned from Moslem sources that Islamic fundamentalists might release one of the eight U-S hostages kidnapped in Lebanon.

A Moslem militia source, who requested anonymity, says the potential release stems from recent secret meetings between the United States and Iran.

His assessment was echoed by a Moslem fundamentalist source connected to Iranian circles who told U-P-I... in his words... ''The atmosphere is ripe and positive to solve the hostages issue.''

Peggie Say, the sister of Terry Anderson, the American held captive longer than any other U-S hostage, said yesterday that she thinks... ''this is the beginning of the end.''

She bases her belief on a recent five-day trip to Syria in which Syrian officials told her that they ''have greater hopes'' of releasing the hostages.

Other indications of a potential release of the Western hostages come from Iran where President Hashemi Rafsanjani is quoted saying he opposes the holding of hostages and will seek their release.

Washington denies any authorized contacts with Iran to gain the release of hostages.

-30- 2084
#90060u0781 03/01/1990 ~United Press International

(MARCH 1) UPI - Yesterday was Ash Wednesday in more ways than one in parts of Alaska.

Redoubt Volcano, 110 miles southwest of Anchorage, erupted twice. The Federal Aviation Administration says the activity resulted in a plume of ash reaching 40-thousand feet.

Winds swept the fine grit northeast, where it produced a dusty cover over all things in its path. Many residents in Anchorage donned surgical masks to keep from inhaling the ash, and the mayor's office warned people with breathing problems to remain indoors.

The ashfall stopped by mid-afternoon, but NOT before disrupting air traffic at Anchorage International Airport and turning falling snow a subtle shade of brown.

Geologists say this may be the precursor of more violent eruptions. Scientists watching the 10-thousandfoot volcano say seismic activity did NOT diminish as quickly as normal after yesterday's two eruptions.

The nation's largest anti-abortion group is making allegations against some of the nation's top environmental groups.

The National Right to Life Committee says some environmental groups are working to overturn major federal anti-abortion policies.

The right-to-life group urges people to stop financial support of the Sierra Club, the National Wildlife Federation and the National Audubon Society.

Douglas Johnson, the National Right to Life Committee's legislative director, says the three environmental groups support a repeal of a ban on federal funds from organizations that support abortion. One such organization is the United Nations Population Fund.

Nancy Wallace of the Sierra Club says the boycott is ''unfortunate.'' She says the real pro-life position would guarantee all women a full range of choices to control their reproduction voluntarily.

Patricia Baldi of the National Audubon Society says it is NOT the first time the abortion opponents have attacked the group. She says the Audubon Society has NO position on abortion, but supports greater access to family planning.

#90060u0828 03/01/1990 ~United Press International

BALTIMORE (MAR. 1) UPI - Fire swept through a row house Thursday, killing

four people believed to be transients trying to get out of the cold, authorities said. Two people were injured.

The fire was reported about 3:30 a.m. and may have started on the second floor of the building and spread to the third floor, trapping the victims, authorities said.

The cause of the fire remains under investigation but authorities believe it may have been caused by careless smoking.

Officials said they believe the victims, whose names have not been released, were transients who went into the three-story brick building, which had been unoccupied, to get warm.

#90060u0882 03/01/1990 ~United Press International

WASHINGTON (MARCH 1) UPI - The number of initial claims for state unemployment insurance benefits decreased by 14,000 to 361,000 in the week ending Feb. 17, the Labor Department reported Thursday.

The revised figure for the previous week was 375,000 initial claims, the department's Employment and Training Administration announced.

The government also reported that during the week of Feb. 10 the unadjusted rate of insured unemployment decreased to 2.3 percent from 2.4 percent, with 2,330,000 workers claiming state benefits, 107,000 fewer than the week before.

#90060u0912 03/01/1990 ~United Press International

(MARCH 1) UPI - Instability returned to the Tokyo Stock Exchange Thursday with the key Nikkei average falling more than 2 percent following two days of sharp gains.

The key Nikkei Average of 225 selected issues, which surged 694.04 points Wednesday, fell 762.41 points, or 2.2 percent, to 33,829.58 points.

The drop was the seventh worst one-day decline in terms of points for the Nikkei, which fell precipitously last week and Monday but recovered Tuesday and Wednesday.

The broader-based Tokyo Stock Exchange Index, which gained 65.50 points Wednesday, fell 29.53 points to 2,536.01.

Trading was moderate with an estimated 600 million shares changing hands, compared with 728 million Wednesday.

Declines whipped advances 649 to 343, while 126 issues were unchanged.

Elsewhere in Asia, stock prices closed lower in moderate trading on the Hong Kong Stock Exchange following the decline in Tokyo.

The Hang Seng Index, which added 19.36 points Wednesday, lost 18.85 points to 2933.13. Utilities slipped 10.03 points, financials fell 17.92 and industrials closed down 14.36 points. Properties were the worst-performing sector, closing down 46.66 points.

Turnover amounted to 1.014 billion shares, just below the 1.22 billion shares traded Wednesday.

Prices closed slightly lower in featureless trading on the Singapore Stock Exchange.

The Straits Times Industrial Index, which gained 14.97 points Wednesday, dipped 4.01 points to 1546.05. The narrower All Singapore Index eased 1.59 points to 427.70.

Turnover amounted to 111.5 million shares, compared with 162 million shares Wednesday.

In Australia, stock prices closed lower in lackluster trading on the Sydney Sharemarket following the loss on the Tokyo market and a disapointing January current account figure.

The All Ordinaries Index, which added 4.8 points Wednesday, eased 2.0 points to 1570.9.

Turnover amounted to only 69 million shares, compared with 105.6 million shares Wednesday.

#90060u1040 03/01/1990 ~United Press International
(MARCH 1) UPI - The Philippine Supreme Court has decided to hear opposition Senator Juan Ponce Enrile's appeal for his release from what he claims are invalid rebellion and murder charges against him. The 15-member tribunal told President Aquino she has until Monday to respond to Enrile's challenge. The panel granted Enrile the chance to argue his case Tuesday.

Census officials say this year's census will be the most comprehensive in U-S history- which may be bad news for the Northeast and Midwest. The head of Policy Studies at the Population Reference Bureau says the count will lead to a re-apportionment of congressional districts. As a result, the nation's so-called ''Rust Belt'' will lose House seats, mainly to California, Texas and Florida.

Czechoslovak President Vaclav Havel says the time is right to develop a European alliance that is NOT affiliated with either the East or West. Under the terms of Havel's suggested ''Helsinki Zone,'' European nations would join the Soviet Union, Canada and the United States in meeting on a common ground to ensure stability. The new pact would have a say in German re-unification.

Scientists at the University of Miami Medical School say they've come up with a way to keep people cool beneath the sun's rays. Doctors Oscar Hevia and Paul Weber have found a compound they think can be added to cosmetics to reflect some of the damaging heat of the sun. They say their ''I-R reflector'' cuts down about 20 percent of the sun's infra-red light rays, while keeping people's body temperatures from heating up.

#90060u1077 03/01/1990 ~United Press International
WASHINGTON (MARCH 1) UPI - American workers earned 0.8 percent more money in January, increased their rate of savings and saw their spending increase by 0.6 percent, the Commerce Department said Thursday.

The $35.9 billion surge in personal income, adjusted to reflect seasonal factors, compares to an increase of $22.7 billion, or 0.5 percent, in December and equals an annual rate of $4.6 trillion, the department said. In November, personal income jumped by 0.9 percent.

Disposable personal income - after taxes and other non-tax payments - also jumped by 0.9 percent in January, or $36.6 billion compared to December's $17.4 billion increase, the department said.

Private wages and salaries increased $11.3 billion in January compared to an increase of $14.7 billion in December. Government pay increased by $4.9 billion in January compared to a hike of $2.1 billion in December.

"A 3.6 percent pay raise for federal civilian and military personnel added $3.5 billion at an annual rate to government payrolls in January," the department's Bureau of Economic Analysis said its monthly report. Elsewhere:

- Factory payrolls decreased by $1.2 billion in January, compared to a small increase of $200 million in December.
- January payrolls in the services sector increased by $5.2 billion versus a leap of $8.3 billion the month before.

The Commerce Department also said personal spending was up by 0.6 percent, or $19.9 billion last month, while the personal savings rate stood at 5.9 percent in January compared to 5.8 percent in December.

Americans bought more durable goods in January - an increase of $19.2 billion versus $200 million - while non-durable goods sales were off. Durable goods are products made to last three or more years and the January increase apparently stemmed from rebates auto dealers offered to clear their lots of a backlog cars and trucks.

#90060u1081 03/01/1990 ~United Press International

(MARCH 1) UPI - Another day on the west coast for President Bush... the Air Force announces shuttle landing plans... an earthquake rocks Southern California... and heavy fighting breaks out in Beirut. Those stories and more, next from U-P-I.

President Bush has made NO public acknowledgement of a series of protests marking his visit to San Francisco.

Bush was speaking to a one-thousand-dollar a plate fund-raiser for Senator Pete Wilson, a Republican candidate for California governor, when the protests began.

Foes of the president's proposed constitutional amendment to outlaw flag-burning set fire to two American flags outside the hotel where Bush was speaking.

An estimated two-thousand protesters and curious onlookers attended the boisterous demonstration. Police reported four arrests, including one for assault on a fireman.

About 200 police officers cordoned off the streets around the Westin St. Francis hotel where Bush was speaking and kept the demonstration confined to the streets surrounding Union Square.

Later, a group that booked a room at the hotel unfurled two banners from windows and dropped flyers... protesting U-S involvement in El Salvador.

After the dinner Bush went to Los Angeles, where he plans to attend the dedication of a new maximum-security jail today. Bush is expected to expand on a law-and-order Republican campaign theme. Last night at the dinner for Pete Wilson, Bush said California ''needs to continue a crime-fighting tradition.''

NASA plans to hold a news conference today, presumably to say when the shuttle Atlantis will land.

Other than that, the space agency has kept quiet about the progress of its latest secret military mission.

Navy Captain John Creighton, the craft's commander, and Air Force Colonel John Casper, its co-pilot, guided Atlantis into orbit yesterday after five failed launch attempts.

NASA has NOT revealed what the five-member crew is doing in space, but it's reported that Atlantis will fire into orbit a 500-Million-dollar spy satellite.

The 37-thousand-pound satellite is said to be equipped with a high-tech photographic system capable of beaming to Earth super-sharp digital pictures of ground targets around the world.

Sources say the two-BILLION-dollar shuttle is scheduled to touch down at California's Edwards Air Force Base Sunday.

#90060u1084 03/01/1990 ~United Press International
(MARCH 1) UPI - The strongest California earthquake since the October disaster did NOT cause any fatalities, but did cause Millions of dollars in damage.

A quake measuring five-point-five on the Richter scale shook about 13-thousand square miles of Southern California yesterday afternoon. One aftershock last night measured four-point-eight.

Scientists warn that more quakes could occur during the next three days, with some tremors as strong, or stronger than the five-point-five shaker.

At least three people were hurt seriously. But 70 people escaped injury when an 80-foot wall of an auto parts warehouse in La Verne collapsed. Supervisor Stan Sokoloski says ''It's amazing nobody got seriously hurt.''

The quake was centered three miles northwest of Upland, about 35 miles northeast of downtown Los Angeles. Officials in Upland and the three other cities most severely damaged... LaVerne, Pomona and Claremont... have declared local states of emergency. The declarations will help release funds to pay for repairs and keep bystanders out of unsafe areas.

Firm damage figures are NOT available yet. But officials say the total could easily top 10-Million dollars.

The quake caused a series of rockslides. On the Angeles Crest Highway north of Los Angeles, a car-sized boulder missed a school bus carrying about 20 children by about 100 feet.

Residents in some mountain towns reported hearing coyotes howling an hour before the quake.

It was the strongest quake in California since a seven-point-one tremor ravaged the San Francisco area October 17th... killing 67 people, injuring nearly three-thousand others and causing seven-BILLION dollars in damage.

#90060u1087 03/01/1990 ~United Press International

(MARCH 1) UPI - A 10-day old truce between rival Christian forces in Lebanon was shattered today. Troops of military leader General Michel Aoun unleashed a wide-scale offensive against strongholds of Samir Geagea's militiamen in east Beirut.

Police sources say Aoun's gunners used Howitzers and mortars to blast militia-patrolled residential areas, starting fires and inflicting heavy damage. There was NO immediate word on casualties.

The tank-led troops attempted to advance into the gunmen's regions, but were faced with stiff resistance.

A Christian mediation team has failed to find a political settlement between Aoun and Geagea to stop the month-old bloody fight for control of Christian east Beirut. At least 710 people have been killed and more than 25-hundred wounded in the fighting.

U-P-I has learned from Moslem sources that Islamic fundamentalists might release one of the eight U-S hostages kidnapped in Lebanon.

A Moslem militia source, who requested anonymity, says the potential release stems from recent secret meetings between the United States and Iran.

His assessment was echoed by a Moslem fundamentalist source connected to Iranian circles who told U-P-I... in his words... ''The atmosphere is ripe and positive to solve the hostages issue.''

Peggie Say, the sister of Terry Anderson, the American held captive longer than any other U-S hostage, said yesterday that she thinks... ''this is the beginning of the end.''

She bases her belief on a recent five-day trip to Syria in which Syrian officials told her that they ''have greater hopes'' of releasing the hostages.

Other indications of a potential release of the Western hostages come from Iran where President Hashemi Rafsanjani is quoted saying he opposes the holding of hostages and will seek their release.

Washington denies any authorized contacts with Iran to gain the release of hostages.

#90060u1092 03/01/1990 ~United Press International

(MARCH 1) UPI - Yesterday was Ash Wednesday in more ways than one in parts of Alaska.

Redoubt Volcano, 110 miles southwest of Anchorage, erupted twice. The Federal Aviation Administration says the activity resulted in a plume of ash reaching 40-thousand feet.

Winds swept the fine grit northeast, where it produced a dusty cover over all things in its path. Many residents in Anchorage donned surgical masks to keep from inhaling the ash, and the mayor's office warned people with breathing problems to remain indoors.

The ashfall stopped by mid-afternoon, but NOT before disrupting air traffic at Anchorage International Airport and turning falling snow a subtle shade of brown.

Geologists say this may be the precursor of more violent eruptions. Scientists watching the 10-thousandfoot volcano say seismic activity did NOT diminish as quickly as normal after yesterday's two eruptions.

The nation's largest anti-abortion group is making allegations against some of the nation's top environmental groups.

The National Right to Life Committee says some environmental groups are working to overturn major federal anti-abortion policies.

The right-to-life group urges people to stop financial support of the Sierra Club, the National Wildlife Federation and the National Audubon Society.

Douglas Johnson, the National Right to Life Committee's legislative director, says the three environmental groups support a repeal of a ban on federal funds from organizations that support abortion. One such organization is the United Nations Population Fund.

Nancy Wallace of the Sierra Club says the boycott is ''unfortunate.'' She says the real pro-life position would guarantee all women a full range of choices to control their reproduction voluntarily.

Patricia Baldi of the National Audubon Society says it is NOT the first time the abortion opponents have attacked the group. She says the Audubon Society has NO position on abortion, but supports greater access to family planning.

#90060u1134 03/01/1990 ~United Press International

MOSCOW (MARCH 1) UPI - Coal miners in the Ukrainian city of Donetsk staged a warning strike at 21 mines Thursday to demand the resignation of the entire regional Communist Party leadership, participants and news reports said.

Seven miners were also in the third day of a hunger strike in front of the party headquarters in the city of 1.1 million people to back demands the party bosses quit en masse, Radio Moscow's Interfax news service said.

But the party brass refused to consider resigning until a regional party conference scheduled for April 6-7, Interfax said.

''The party is supposed to deal with ideology but it is ruining the economy,'' said Nikolai Volynko, co-chairman of the Donetsk strike committee.

The Ukraine's entire Donbass coal belt was shut down for more than a week last summer as part of a nationwide coal strike by miners demanding better pay and improved working and living conditions.

But the warning strike Thursday was presented as an overtly political action to force the entire regional leadership to quit.

Volynko said two mines in the center of the country's richest coal field staged a warning strike during the first shift and the city's remaining 19 mines struck on the second shift.

''Tomorrow, all the 21 mines in Donestsk are going to have a full-day strike,'' Volynko said.

Miners in the city of Makeyevka and ''some other towns'' planned to join the strike, he said.

Volynko said the strike protests were ignited by a recent television expose on a special store with $9.6 million worth of imported boots for party and government leaders.

Donetsk became the latest in a score of cities across the Soviet Union, including seven in the Ukraine alone, where party bosses have been forced from power by grass-roots uprisings of people fed up with their privileges such as imported food and other fancy goods.

The wave of rebellions began in the Ukrainian city of Chernigov last month when an automobile of the city's first secretary was in an accident.

Residents rushing to the site discovered liquor, sausages and hams in the trunk and towed the car to the party headquarters, forcing the party leader to quit.

(MARCH 1) UPI - Shots were fired near the San Francisco Airport last night about the time President Bush was flying out of San Francisco. The driver of an allegedly stolen car and a passenger were arrested near the airport, after an airport police officer disabled the car with three shots. Officials say the arrest had NO connection with the president. Bush flew to Los Angeles withOUT incident.

President Bush will participate in the dedication of a new

maximum-security jail in Los Angeles today. Bush is expected to push his law-and-order theme in a speech at the dedication of jail.

Seismologists warn that more earthquakes can occur in Southern California in the next couple of days. A quake measuring five-point-five on the Richter scale shook the area from Santa Barbara to Tiajuana and from the Pacific to the Mojave Desert yesterday. Three people have serious injuries.

The death toll is up to at least 72 in a series of winter storms bashing Europe. Heavy flooding hit Britain, Denmark, Holland and Norway. Prince Charles cut short a ski trip in Switzerland to visit storm victims forced from their homes in Wales.

10 congressmen, including architects of U-S sanctions legislation against South Africa, arrived in Zambia today. They will meet with black leader Nelson Mandela. Last night, Mandela said he is optimistic about a peaceful end to apartheid .

Uruguay's new president, Luis Alberto Lacalle, will take office today. The moderate lawyer has named four leaders of a rival political party to his cabinet to form what he considers a government of national conciliation.

Nicaraguan President-elect Violeta Chamorro's first trip outside Nicaragua since her election probably will be to Houston next week. She'll have follow-up treatment for knee surgery. She fractured her knee in a fall New Year's Eve.

-30- 2007

#90060u1181 03/01/1990 ~United Press International

NEW YORK (MARCH 1) UPI - U.S. economic growth remained sluggish in February for the tenth straight month, but recorded its lowest rate of decline since June 1989, the National Association of Purchasing Management said Thursday. The Purchasing Managers' Index rose at a rate of 48.3 percent in February, compared with 45.2 percent in January, the association said.

A reading below 50 generally indicates the manufacturing segment of the economy is experiencing a decline in growth. A reading above 50 usually indicates that the manufacturing portion of the economy is expanding.

"The manufacturing economy declined in February. However, the rate of decline was the lowest in eight months," said Robert Bretz, chairman of the association's business survey committee.

"Although the first increases registered in production and new orders since mid-1989 are encouraging, the continued improvement in suppliers deliveries and a significant decline in prices suggests a lack of any

underlying strength in the economy," said Bretz, director of materials management at Pitney Bowes Inc.

Bretz said the purchasing index, which is compiled from a monthly survey of purchasing executives at more than 300 industrial companies, was the best performance since June 1989 when the index rose by 48.8 percent. The index has not been above the 50 percent level since April 1989. The purchasing managers index is based on five indicators monitoring new orders, production, suppliers deliveries, inventories, and employment.

The Production index rose to 51.1 percent in February, up sharply from 45.4 percent in January and its best performance since June 1989. The New Orders index also showed signs of strength, and was up 51.8 percent compared with 45.8 percent in January, the index's first reading above 50 since June 1989. The Suppliers Deliveries index fell to 43.3 percent, compared with 47.2 percent in January.

Inventories declined for the 15th consecutive month to 40.8 percent compared with 41.8 percent in January. Prices declined for the nine consecutive month, down to 42.2 percent compared with 49.7 percent in January.

Bretz said February marked a small rebound in the economy compared with January, when production was negatively affected by harsh weather conditions and a decline in the automotive sector.

The Employment Index was down for the 12th consecutive month. "The Employment Index rose to 46.7 percent in February, up from 44.1 percent in January, and the highest since June 1989's 47.7 percent," the association said.

"A number of members continued to report layoffs, hiring freezes and early retirement programs," Bretz said. About 69 percent of the managers reported that employment levels remained stable, while 20 percent said it went down, and 11 percent mentioned an increase.

New Export Orders showed continued strength at 53 percent, but was down from 55.5 percent in January. About 71 percent of the managers said their companies were exporting products and services. Imports were unchanged in February at 50.5 percent. About 77 percent of the managers reported that their companies imported goods.

Regarding the purchase policy, 85 percent of the managers reported lead times of 60 days, up from 83 percent in January. For capital expenditures, 34 percent of the managers reported lead times of 60 days, compared with 32 percent in January. For the key six-month category, 51 percent of the managers reported lead times, unchanged from January. For repairs and maintenance, 89 percent of the managers reported 30-day lead times, up from

86 percent in January.

#90060u1190 03/01/1990 ~United Press International
SAN FRANCISCO (MARCH 1) UPI - A raucous all-male sea lion party is going full-blast on a $2 million section of dock near Fisherman's Wharf that's been virtually abandoned to the barking and playful - albeit rude, smelly and destructive - mammals.

With 20 expensive boat slips crowded with some 250 sea lions at Pier 39, both tourists and locals have flocked to see the phenomenon, delighting shop and restaurant owners whose businesses have floundered since the Oct. 17 earthquake.

But off by himself, the first California Sea Lion to show up, ''Old Flea Collar,'' is sick and losing weight because of plastic or nylon junk wrapped around his neck.

Marine Mammal Center experts have tried without success to remove the debris and hope to fashion a special tool to snip it.

''He's lying apart from the herd and he's getting weak,'' said Larry Goodson, who runs a marina patrol boat and helps maintain the slips that are sagging and breaking under the weight of the mammals.

''Old Flea Collar'' arrived three months ago, followed by a few, then a flood, of sea lions who quickly staked out space on four 50-foot boat slips left empty because of buffeting winter waves. As other boats abandoned their berths, the sea lions took over and now occupy 20 slips.

Sacramento Symphony Director Carter Nice, one of the last boat owners to be chased off, used a garbage can on rollers for protection to walk out the ramp and move his 65-foot yacht from its $50,000 berth to a new spot.

''They've got the highest-priced squatters rights in the city right now,'' Nice said of the mammals weighing 200 to 700 pounds. ''I think they're great animals, but not on my dock. A herd of 50 is cute, but 250 is a problem.''

Tourists, however, are ecstatic.

''I can't believe they've actually taken over the piers,'' said Tracy Cawthorn of North Chicago, in town for a conference. ''I won't forget this sight. It's better than going the zoo.''

Pier 39 Marina manager Sheila Chandon called the sea lion invasion a ''mixed blessing.''

''The feedback from pier shops and restaurants is that the crowds have been phenomenal. They're a natural attraction and a great local draw, but they're also noisy, smelly and are damaging the docks,'' she said.

Marine biologist Bud Hanson, of the National Marine Fisheries Service in Los Angeles, traveled to San Francisco to view the uproar and was surprised when one sea lion chased him down the pier.

However, he said the trait of males defending their territory is an indication they may be getting ready for the breeding season, for which they must migrate southward to where the females reside around the Channel Islands.

''They're normally found on beaches or places that are isolated from humans,'' he said. ''To see them show up on Pier 39 in San Francisco, smack in the middle of a tourist area and unnatural man-made surroundings, is very unusual.''

He said the sea lions, which cannot be harmed or unduly disturbed under the Marine Mammals Protection Act, apparently were lured to the area by schools of herring that spawn in San Francisco Bay this time of year. The spawning should end in March, he said, at which time the sea lions may leave.

''When the herring leave, the anchovies move in, so they have another potential source of food,'' said Hanson. ''However, their biological clocks are ticking and telling them it's time to go to their breeding territory, so I would expect them to begin trickling away.''

For fisherman Skip Anderson, their departure won't be too soon. Anderson freed one sea lion from a net only to be chased around his boat.

''It was pretty scary,'' he said. ''It's like living in a big dog kennel.''

SOFIA, BULGARIA (MARCH 1) UPI - A team of doctors led by an American neurologist has given ousted President Todor Zhivkov a clean bill of health, apparently clearing the way for his trial on corruption charges, a communist newspaper said Thursday.

Zhivkov, 79, who is under heavy guard in a Sofia hospital, is in ''absolutely normal'' physical and psychological condition for his age, the Communist Party newspaper Rabotnichesko Delo quoted the state prosecutor's office as saying.

The prosecutor's comments were based on an examination of the hard-line communist by a team of specialists led by Dr. William Fields, head of the neuorology department at the University of Texas Health Science Center, the newspaper said.

It said Zhivkov's memory and central nervous system were in good condition and there was ''no evidence of the administration of mind-altering drugs.''

The report comes a month after Zhivkov was admitted to the hospital for treatment of various age-related ailments.

Doctors told the official BTA news agency last month that Zhivkov's health was poor and he appeared at times to lose touch with reality. The BTA report raised doubts that Zhivkov would be well enough to stand trial.

Zhivkov, the neo-Stalinist leader of the Bulgarian Communist Party since 1954, was arrested in January on charges of gross malfeasance, misappropriation of public funds and inciting ethnic hatred.

He was driven from office Nov. 10 and replaced by more moderate communists who have initiated sweeping political and econmic reforms.

NEW YORK (MARCH 1) UPI - Latest metal market prices as quoted Thursday by the American Metal Market, authoritative metals publication:

Aluminum, New York Merchants, 99.7 percent pure ingots 65.00-66.00 c-lb.

Antimony, domestic, refined in alloy, $2.00 lb.

Copper, electrolytic wirebars, delivered U.S. (Warrenton Refining Co.) 126.80 c-lb.

Lead, common, U.S. primary producers 44.00-45.00 c-lb.; U.S. non-primary (secondary) producers 44.00-45.00 c-lb.

Magnesium, 99.8 percent, ingot 163.00 c-lb.

Manganese, 99.9 percent, boxed regular 91.00-95.00 c-lb.

Mercury, $285.00-$300.00 76-lb. flask.

Nickel, briquettes delivered to customers, merchant, N.Y., $2.99-$3.25 per pound.

Palladium, N.Y. Am. Met. Mkt. dealer $133.00-133.75 per troy ounce.

Platinum, soft, 99.5 fine, producer - $507.00-$508.00; dealer-approx., $525.00-$530.00 per troy ounce.

Steel, No. 1 heavy melt scrap - Pittsburgh $100.00-$102.00 per gross ton (consumer buying price); Am. Met. Mkt. composite scrap price $103.17 per ton.

Tin, N.Y. Am. Met. Mkt. ex-dock - 297.25 c lb.

Titanium, aircraft quality, 8 1/8 inch round rotating billet, f.o.b. shipping point $8.87-12.96 lbs., domestic sponge 99.3 percent, domestic and imported duty-paid $5.35-5.50 lb.

Tungsten powder (H-Red), 99.9 percent minimum pure $10.00 per lb.

Zinc, prime western, U.S. 65.00-68.00 c-lb.

#90060u1212 03/01/1990 ~United Press International

JOHANNESBURG, SOUTH AFRICA (MARCH 1) UPI - Inmates on an indefinite hunger strike demanded their immediate freedom and the unconditional release of all political prisoners in a document released Thursday and reportedly smuggled out of Robben Island Prison.

''Bearing in mind the spirit, purpose and principles fundamental to the broad liberation struggle, we scoff at the criminalization of all activities conducted by the oppressed and exploited in their persistent struggle against the apartheid system,'' the prisoners said in the 16-page document released through the National Union of Mineworkers.

The union said Robben Island prisoners smuggled out the document before the nearly 350 inmates began an indefinite hunger strike Monday to protest their continued detention despite a pledge by South African President Frederik de Klerk to release political prisoners.

The prisoners and their attorneys believe de Klerk's definition, excluding prisoners convicted of violent crimes even if they were political motivated, is too narrow.

Robben Island, regarded as South Africa's Alcatraz, sits in the middle of Table Bay opposite Cape Town and has been home to most of the country's political prisoners. Nelson Mandela, sentenced to life imprisonment in 1964 but freed unconditionally Feb. 11, spent 18 of his 27 years in prison on Robben Island.

In their document, the Robben Island prisoners noted the ''positive course'' chartered by de Klerk and his racial reforms that included lifting the 30-year ban on the African National Congress and unbanning other political organizations. They said they were convinced there was no justification for their further incarceration since their organizations were now legal.

''Our further confinement does not create a climate for the process of negotiations to begin,'' the prisoners' statement said.

The inmates demanded the release of all political prisoners in South Africa, defining political prisoners as ''all incarcerated people who have engaged themselves in various ways in the struggle against the system of apartheid.'' The inmates said there was a ''deliberate and tacit obfuscation of our status as political prisoners.''

They also called for a total lifting of the 44-month-old state of emergency. The African National Congress also has demanded a lifting of the state of emergency before power-sharing can negotiations begin.

Eleven pages of the prisoners' document were reserved for demands for improved conditions at the maximum security prison, including better food and medical care, greater access to higher quality education and improved avenues of communication with lawyers and relatives.

The prisoners said they would dedicate themselves to ensure that ''the de Klerk regime does not succeed in hoodwinking the international community'' and South African blacks into believing that the ''piecemeal refinement of racist capitalist principles by means of a so-called reform policy ... is sufficient to believe that apartheid no longer exists.''

The white minority government must allow a greater base for the political development of South Africa's black majority, the prisoners' statement said.

Incarceration in the ''racist dungeons,'' political trials and convictions of opponents of the government and ''other nerfarious activities represent an orchestrated attempt and strategy of the Pretoria regime to thwart the ultimate realization of our peoples' demands and aspirations,'' the statement said.

''Until the de Klerk government accedes to our demands, we, the political prisoners in South Africa, are embarking upon a hunger strike action,'' the prisoners said.

#90060u1216 03/01/1990 ~United Press International

BELGRADE, YUGOSLAVIA (MARCH 1) UPI - Communist authorities this week permitted limited trading in treasury notes for the first time in almost 60 years in the first step toward restoring financial markets in Yugoslavia, stock market officers said Thursday.

A small amount of government bonds changed hands in the first transaction of securities when the stock exchange of treasury notes opened for business Tuesday.

Private businessmen and state-owned companies, however, were not permitted to trade when the stock exchange held its first session, attended only by representatives of Yugoslavia's four major commercial banks.

"This is the beginning of our work and I expect in coming months Yugoslav companies and factories will sell and buy their shares," said Branislav Cosic, the acting Manager of the Belgrade Stock Exchange.

"Neither foreign nor Yugoslav companies would be allowed to appear directly on the stock exchange, but instead they will have to trade through authorized dealers," Cosic said.

At present only dealers for the four Yugoslav banks - Beogradska Banka, Jugobanka, Zagrebacka Banka and Rijecka Banka - are authorized to trade on the stock exchange, which is to be open only once a week on Tuesday.

Yugoslav banking sources said they expected brokerages to be established in Yugoslavia soon to represent foreign and domestic companies that may be interested in trading on the stock market.

On its first working day Tuesday, Beogradska Banka sold Serbian government bonds from 1985 and 1986 to Jugobanka. Six lots of the Serbian government public loan of 1985 were offered at 0.320711 dinars and sold at 0.304993 dinars, and 19 lots of 1986 bonds had the opening price of 0.293850 dinars and were sold at 0.279448 dinars. The minimum price of a lot was fixed at 10,000 dinars, the equivalent of $834.

#90060u1219 03/01/1990 ~United Press International
HAGERSVILLE, Ontario (UPI) - Firefighters extinguished a massive fire in a mountain of 12 million tires that spewed toxic gases and oily sludge for more than two weeks, officials said Thursday.

Officials initially feared it might take months and millions of dollars to douse the flames, but had said Wednesday night the blaze was nearly out.

''Similar fires in other regions have burned for months,'' Ontario Solicitor General Steven Offer said Thursday. ''This fire was extinguished in just 17 days.

Offer said residents would be compensated for costs and losses incurred by the fire.

More than 500 people evacuated from their homes have been allowed to return.

The fire at the Tyre King recycling plant, about 70 miles south of Toronto began Feb. 12 and is believed to have been set.

Environmentalists had warned heavy oil from the melted tires and combustion toxins would contaminate ground and well water.

About 158,000 gallons of oil run-off were skimmed from a retention pond established at the fire site, while monitoring stations detected only low levels of air contamination.

Trace contamination was found in some of the 107 local wells tested by environment ministry chemists.

Regional health officer Douglas Kittle called the test results reassuring, but area residents were concerned about the fire's long-term effects.

More than 100 volunteers and 40 professional firefighters in protective suits and gas masks battled the blaze, which spewed acrid, toxin-laden smoke.

Airplanes dropped water and flame-retardant foam on the fire, while ground crews used front-end loaders to pull apart smoldering piles of tires and then douse the resulting fireballs.

Environmentalist Jay Palter earlier called the fire an ''environmental disaster of criminal proportions'' and faulted the Environment Ministry for failing to enforce cleanup orders it leveled three years ago on Tyre King owner Ed Straza.

A similar tire fire in Winchester, Va., burned for nine months in 1983 and consumed 7 million tires, he said.

WASHINGTON (MARCH 1) UPI - New construction jumped by 1.8 percent during an unseasonably warm January to an annual rate of $424 billion - the biggest increase in 13 months, the Commerce Department said Thursday.

Housing starts were up and non-residential construction, which accounts for everything from offices to motels and churches, surged to $100.8 billion in January from $95.2 billion in December for an increase of 5.8 percent.

Chief economist John Tuccillo, of the National Association of Realtors in Washington, cited the weather for the healthy housing numbers after a decline during December's cold wave.

''We had a terrible December and a very nice January,'' Tuccillo said. ''The houses that were not started in December were started in January.''

Factory and industrial contruction jumped to $19.9 billion in January from $17.3 billion in December, or a little more than 15 percent, while contruction of hospitals and medical facilities leaped to $7.2 billion from $6.7 billion, or nearly 7.5 percent, it said.

All the figures are seasonally adjusted to account for the weather and other critical factors, and are calculated at an annual rate.

The overall January rate of new construction compares to $416.6 billion in December, the best showing since a 2.3 percent climb recorded in December 1988, the department's Census Bureau said in its monthly report.

Private construction also increased in January, to $333.1 billion from $321.7 billion in December, a jump of 3.5 percent, with the contruction of new single-family homes leading the way, the Commerce Department said.

Construction of private apartment buildings, meanwhile, held steady last month at $20.4 billion, it said.

But construction of public buildings fell in January to $90.9 billion from December's $94.4 billion, a difference of 3.7 percent, the government said.

In the public category, spending on streets and highways showed the biggest drop, to $28.9 billion in January from $33.2 billion in December, or nearly 13 percent, while construction of school buildings increased slightly.

#90060u1271 03/01/1990 ~United Press International
ROCKVILLE, MD (MARCH 1) UPI - In a victory for the struggling nuclear power industry, the Nuclear Regulatory Commission voted Thursday to grant a full-power operating license to the Seabrook Nuclear Power Plant in southern New Hampshire. NRC Chairman Kenneth Carr said that because he anticipated judicial review of the decision, the effective date of the commission's order would be March 8.

Since the utility first requested permission to build a nuclear plant 18 years ago, there have been numerous court battles and thousands of arrests of nuclear activists.

The controversy continued into the commission hearing room Thursday when a protester was hustled out of the room after he yelled out, "You can silence the public; you cannot silence the truth."

Carr said that after much review of the case, the commission "was not pursuaded the plant cannot be operated safely." One of the chief complaints of the plant's opponents has been that the communities surrounding the plant could not be evacuated adequately in an emergency. Carr said that "there are reasonable, adequate protection measures" if an emergency arises.

Rob Williams, a spokesman for the plant's owner, New Hampshire Yankee, said that after all the appeals are concluded, the plant could begin generating electricity by late spring to one million New England homes.

Seabrook's saga began in February 1972, when the now-bankrupt Public Service Co. of New Hampshire first applied to the state for permission to build the power plant.

Along the way, Seabrook's survival was challenged on every possible front by anti-nuclear activists and Massachusetts Gov. Michael Dukakis, who have persistently alleged that problems of plant safety and inadequate evacuation plans could harm residents of southern New Hampshire and northern Massachusetts in the event of an emergency. Opponents have said that they would seek to block the NRC's decision in the U.S. Court of Appeals in Washington.

"The real significance of the decision (to grant the license) is that new electrical capacity comes on line in a region that desperately needs electrical capacity," said Harold Finger, president of the U.S. Council on Energy Awareness, a Washington trade association of electrical utilities.

Fewer nuclear power plants are being built across the country, largely due

to the efforts of anti-nuclear protesters, and Finger said a decision to approve Seabrook signifies a "return to rationality."

Under NRC procedures, separate permits must be sought for construction and actual operation. In Seabrook's case, the commission's vote on an operating license comes 13 1/2 years after reactor construction began.

Finger said the experience has reinforced his contention that construction and licensing decisions ought to be made simultaneously. But Seabrook opponents reject that, pointing to a recent study by the Employees Legal Project that concluded there are numerous safety concerns warranting a full-scale independent investigation.

The report said it identified many problems involving quality assurance and quality control, inaccuracies in operating procedures, equipment problems and inspection falsifications.

#90060u1282 03/01/1990 ~United Press International

WASHINGTON (MARCH 1) UPI - New construction jumped by 1.8 percent during an unseasonably warm January to an annual rate of $424 billion for the biggest increase in 13 months, the Commerce Department said Thursday.

Housing starts were up and non-residential construction, which accounts for everything from offices to motels and churches, surged to $100.8 billion in January from $95.2 billion in December for an increase of 5.8 percent.

Chief economist John Tuccillo, of the National Association of Realtors in Washington, cited the weather for the healthy housing numbers after a decline during December's cold wave. "We had a terrible December and a very nice January," Tuccillo said. "The houses that were not started in December were started in January."

Factory and industrial contruction jumped to $19.9 billion in January from $17.3 billion in December, or a little more than 15 percent, while contruction of hospitals and medical facilities leaped to $7.2 billion from $6.7 billion, or nearly 7.5 percent, it said. All the figures are seasonally adjusted to account for the weather and other critical factors, and are calculated at an annual rate.

The overall January rate of new construction compares to $416.6 billion in December, the best showing since a 2.3 percent climb recorded in December 1988, the department's Census Bureau said in its monthly report.

Private construction also increased in January, to $333.1 billion from $321.7 billion in December, a jump of 3.5 percent, with the contruction of new single-family homes leading the way, the Commerce Department said.

Construction of private apartment buildings, meanwhile, held steady last month at $20.4 billion, it said. But construction of public buildings fell in January to $90.9 billion from December's $94.4 billion, a difference of 3.7 percent, the government said.

In the public category, spending on streets and highways showed the biggest drop, to $28.9 billion in January from $33.2 billion in December, or nearly 13 percent, while construction of school buildings increased slightly.

BURBANK, CA (MAR. 1) UPI - Nelson Mandela, the recently released South African nationalist leader, taped a satellite appearance on ''Donahue'' Wednesday night and said he was optimistic about a peaceful end to apartheid.

Mandela, speaking via satellite from Lusaka, Zambia, to the Phil Donahue show's audience at the NBC Studios, answered questions from the host and audience on everything from his political ambitions to Israel and blacks in America.

Donahue pressed Mandela on whether the African National Congress is prepared to renounce its support of violence in the struggle against apartheid.

Mandela, who was released just over two weeks ago after 27 years in prison said the South African government must meet ANC preconditions before the opposition group can renounce violence.

''There is no doubt that if the government normalizes the political climate, there are a number of actions we could take to respond to what the government has done,'' he said. ''Until then, we are not prepared to

call off the armed struggle.''

Mandela, in Lusaka to confer with exiled ANC leaders, said the South African government must free all political prisoners and lift a state of emergency before the ANC will renounce violence.

But he said several times that he is optimistic that apartheid can be ended without violence.

''I think the time is rapidly approaching for us to settle matters peacefully,'' he said.

Mandela would not predict when negotiations between the ANC and the Pretoria government would take place but said it was possible the two sides could meet this year.

Mandela sought to play down his own role in the hoped-for political transformation of South Africa, deferring often to the ANC leadership.

''It is not for me to express who the future president of South Africa should be,'' he said, in response to a question from Donahue. ''That is a question the masses of people will decide.''

The 71-year-old opposition leader said whites have nothing to fear from the implementation of a ''one man, one vote'' democracy in South Africa.

''We are prepared to address the fears of the white people,'' he said.

''There is nothing as disruptive as intolerance in political activity,'' he added. ''We will get the support of many people if we are tolerant.''

Mandela was received with a standing ovation and a half-dozen raised fists by the audience of about 250, about one-third black Americans, and the rest divided between other ethnic groups. More than a dozen black South Africans attended, inluding two ANC members who addressed Mandela.

Mandela declined to directly criticize Israel in response to a question on whether the ANC should push for reparations from that country for its support of the apartheid government. However, he did say he supported the Palestinian quest for self-determination.

''The enemies of Israel are not our enemies,'' Mandela said. ''And the struggle of the Palestinians for independence and their own home is a struggle we fully support.''

Mandela denied that the ANC's stated desire to nationalize parts of the South African economy is communist.

''Many sectors here in this country have been nationalized, but nobody can suggest that a government that has undertaken nationalization is communist '' he said.

Mandela said he is happy that President Bush support sanctions against South Africa, and said he plans to accept an invitation to visit him, pending approval of the ANC leadership.

#90060u1342 03/01/1990 ~United Press International

BUCHAREST, ROMANIA (MARCH 1) UPI - Timisoara, the city where Romania's revolution was born, returned to the national spotlight Thursday as prosecutors prepared for the largest trial yet of leaders of the Securitate, dictator Nicolae Ceausescu's dreaded secret police.

Military trials were to begin Friday for 22 Securitate officers charged with complicity to genocide in the massacre of anti-Ceausescu demonstrators Dec. 17 when at least 80 people were killed. Another 150 people are still missing.

Some defendants face charges of ordering troops to fire on protesters and

others are accused of destroying evidence by burying bodies in secret graves or smuggling them to the capital to be burned.

The trial, the largest roundup of Securitate officers since the revolution comes amid growing public pressure on the new government to publicly identify Securitate members and to punish those who committed human rights crimes.

The 22 men facing trial Friday formed the high command of the Securitate in western Timis County, where the first battles of Romania's pro-democracy uprising were fought.

Among them are Maj. Gen. Emil Macri, regional intelligence chief, Col. Ion Popescu, head of the county branch of the Interior Ministry inspectorate, Col. Traian Sima, commander of the Securitate troops in Timis, and Col. Ion Deheleanu, county militia leader.

Chief Prosecutor and Gen. Georghe Robu has accused Macri and Deheleanu of personally moving 40 protesters' bodies to Bucharest, where they were destroyed in an incinerator.

Thousands of Timisoara residents took to the streets Dec. 17 to protest Ceausescu's hard-line regime and were brutally surpressed by security forces. The dictator was later captured and executed with his wife, Elena, on Christmas Day.

In a related development, the official Rompres news agency said Ceausescu's brother, Nicolae Andruta Ceausescu, has been ordered to appear before the Romanian Supreme Court in Bucharest to face a charge of instigating genocide.

He is accused of firing 30 times into a crowd with a pistol, killing seven people, during a protest demonstration Dec. 21.

The date of his trial was not announced but it was believed he would be tried jointly with Ceausescu's son, Nicu, who faces similar charges.

On Wednesday, the interim government announced stiff penalties for anyone convicted of breaking into government property, 10 days after a humiliating ransacking of its headquarters.

Rompres said those who violated the new order would face up to seven years imprisonment.

''The decree is meant to prevent any act of violence which hinders the country's advance toward democracy and to establish a climate of certainty and free expression,'' Rompres said.

NEW YORK (MARCH 1) UPI - The court-appointed examiner in the Eastern Airlines bankruptcy case recommended Thursday that its Texas Air Corp. parent pay Eastern more than $280 million, saying several transactions between the two companies left Eastern with less than fair market value.

Texas Air has agreed to the settlement, which includes $133 million in cash, said court examiner David Shapiro in a summary of his report to the federal bankruptcy court. The settlement must be approved by the U.S. Bankruptcy Court of the Southern District of New York.

The summary said 12 transactions between Eastern and Texas Air before the bankruptcy filing last March "provided Eastern with less than fair consideration or reasonably equivalent value." The 12 transactions would have had an aggregate value of $285 million to $403 million, the report summary said.

The examiner was appointed to study pre-bankruptcy dealings between the two companies as well as to help resolve Eastern's labor problems. Eastern filed for bankruptcy protection March 9, five days after its unions launched crippling strikes.

"The examiner's effort to resolve the labor disputes ... was unsuccessful because it was not humanly possible to overcome the unions' and Mr. Lorenzo's intransigence based on a long history of mutual hostility," the report said. Frank Lorenzo is chairman and chief executive officer of Texas Air.

The examiner recommended certain safeguards be established to prevent "any future sacrifice of Eastern's interests to those of Texas Air and its other affiliates." He proposed an independent committee to monitor all transactions between Eastern and Texas Air of more than $500,000, as well as any plan for merger or amalgamation.

Shapiro said he could support Eastern's plan of reorganization to emerge from bankruptcy protection if such safeguards were installed. In the proposed plan, Eastern would have $459 million in cash, which could allow it to be a "viable airline," the examiner's report summary said.

#90060u1365 03/01/1990 ~United Press International

TOKYO (MARCH 1) UPI - Prime Minister Toshiki Kaifu leaves Friday for a two-day summit in the sun with President Bush in Palm Springs, Calif., officially described by both sides as a relaxed shirt-sleeve get-together to review world events and perhaps play a round of golf.

The cheery scenario, however, belies the rapidly deteriorating trade relations between the world's top economic powers, which some analysts say could erupt into a full-scale trade war in the coming year.

The United States, reeling from a $49 billion trade deficit with Japan, has threatened economic retaliation against Tokyo unless it opens its markets to U.S. imports of supercomputers, satellites and forestry products.

On a broader scale, Washington is demanding Tokyo come up with concrete proposals by April to eliminate institutional barriers hampering U.S. trade and investment.

For the first time in the history of U.S.-Japanese relations, Bush last week bypassed time-honored diplomatic channels by calling Kaifu in the middle of the night to invite the Japanese leader to a California summit within a week.

''It has never happened before,'' a senior foreign ministry official said. ''But I would like to interpret it as the friendship Mr. Bush has for the prime minister and Japan.

''There is no direct link between the trade talks and the president's call. The summit is not a D-day for the process,'' the official said, asking not to be named.

A U.S. official, also requesting anonymity, concurred.

''The president is known for his personal touch. He just picks up the phone and calls leaders around the world to get together and talk.

''I don't know who's taking whose golf clubs, but it will be an informal setting focusing on 'where do we want this relationship to go' in the 1990s,'' the American official said.

Japanese officials said Kaifu and Bush will meet for at least three hours on a sweeping range of issues, including bilateral issues, East-West relations, pro-democracy movements in Eastern Europe, developments in Central America, China, Cambodia and security in Asia.

The officials ruled out any concrete proposals from either side on the thorny trade issues and said discussions on the ''global partnership'' between Japan and the United States are expected to dominate.

''We are not a country on the moon,'' one official said. ''We have a relationship with the world and there is a need for continuing talks between Japan and the United States.

''I'm not downgrading the importance of the trade issues,'' he said. ''These are serious questions that are currently being negotiated by senior officials from both sides. But you would be completely wrong to assume that trade will be the focus of the summit.''

Japan, however, is sending its top three trade negotiators to accompany Kaifu. U.S. Commerce Secretary Robert Mosbacher and U.S. Trade Representative Carla Hills are also expected to be on hand.

A senior State Department official in Washington said last week, ''We will now want Kaifu to put his money where his mouth is and to demonstrate that he is prepared to use the power of his office to remove some of the unfair trading barriers in the Japanese system.''

Kaifu, first elected prime minister last August, was re-elected this week following the ruling Liberal Democratic Party's victory in the Feb. 18 general election.

-30- 3624

#90060u1379 03/01/1990 ~United Press International

WASHINGTON (MARCH 1) UPI - Even if Kremlin hardliners ousted President Mikhail Gorbachev, the Soviet Union would still be driven to seek arms control accords and allow reform in Eastern Europe to continue, CIA Director William Webster said Thursday.

Webster, testifying before the House Armed Services Committee, said the dire domestic challenges confronting the Soviet leadership make it unlikely the dramatic changes underway both in the Soviet Union and its Warsaw Pact satellites can be reversed in any case.

''It's almost as if you're saying we're in a win-win situation,'' said committee Chairman Rep. Les Aspin, D-Wis., before the panel questioned Webster privately.

In public, Webster told the committee, ''In the Soviet Union, a major reversal of President Gorbachev's policies could only come after his removal. This does not seem likely now. In fact, the party plenum early last month strengthened his position, while also advancing the reform process and signalling the end of the communists' monopoly of power.''

However, he said the long-term outlook for the current Soviet leadership - and of the nation intself - ''is uncertain.''

Citing persistent economic problems and ethnic conflicts among the diverse Soviet population, Webster said there is no middle course for the Kremlin's leaders, only an increasing trend to polarization between those seeking retrenchment and others who seek more radical reforms.

But he said, ''Even if a hard-line regime were able to retain power in Moscow, it would have little incentive to engage in major confrontations with the United States. New leaders would be largely preoccupied with the country's urgent domestic problems, and would be unlikely to indulge in a major military buildup.''

''A successor regime would face the same types of economic and political pressures that President Gorbachev has, and would probably continue to pursue arms control agreements with the West,'' the CIA chief said. ''It would be unlikely, in addition, to seek a broad reversal of the changes that have occurred in Eastern Europe, or to try to revive the Warsaw Pact.''

Among the other major points made by Webster:

-Moscow hardliners would be hard pressed to restore Soviet dominance in Eastern Europe without a highly unpopular return to traditional military doctrine and procurement priorities. Such a move could provoke a popular backlash because of its economic consequences.

-Reactionary forces are probably too weak to regain power in Czechoslovakia, East Germany, Hungary and Poland. Those nations will need large amounts of Western economic assistance.

-There is a good chance the Baltic states - Estonia, Latvia and Lithuania - will be able to work out a peaceful separation from the Soviet Union in the next few years.

-Democratic pluralism and market models of economic development have replaced Marxist-Leninist ideology. However, while the institutions created by Lenin, Stalin and Brezhnev are being discarded, new ones are still not capable of managing the country's enormous problems and citizens are becoming increasingly impatient.

-Soviet strategic nuclear modernization continues, but the Warsaw Pact threat to the United States and its NATO allies has been significantly reduced. Moscow continues to make promised military reductions in Eastern Europe.

-Moscow may again have to use military force to maintain order and uphold central authority in the Caucasus and Central Asia.

#90060u1390 03/01/1990 ~United Press International

MONTEVIDEO, URUGUAY (MARCH 1) UPI - Luis Alberto Lacalle took the presidential oath Thursday, inheriting an economic and political crisis that has already prompted him to make political concessions to his rival party.

Lacalle named four members of the Colorado Party, the leading opposition, to Cabinet posts, calling it a ''Cabinet of coalition'' that he hopes will give him the political clout to pass tough economic austerity measures to rein in high inflation.

In his inaugural speech Lacalle exorted Latin American leaders to make their voices felt in the international community.

''The industrialized world only listens when concern points to such disturbing subjects as drugs and the destruction of the enviroment,'' Lacalle said.

Lacalle held an ecumenical service in the Montevideo Catholic cathedral to celebrate his inauguration, the first time a religious ceremony has been included on an inauguration day since 1894.

The ceremony, celebrated before 600 onlookers in the early 19th century colonial cathedral, featured Biblical readings by the Catholic archbishop of Montevideo, the Most Rev. Jose Gotardi; Rabbi Daniel Kripper, Evangelical pastor Ilde Vence, and Anglican Bishop William Godfrey.

With the rival party in his Cabinet, Lacalle has sought further support in Congress and managed to get a pledge from the left-wing parties to practice ''responsible opposition.''

Lacalle has vowed to raise taxes, hike social security contributions, and privatize money-losing companies in an effort to attack a fiscal deficit that in 1989 consumed nearly 11 percent of the gross domestic product.

He has also pledged to cut inflation to 40 percent for his first year in office, less than half the 1989 rate of 89 percent.

Lacalle is the second civilian president to take office since Uruguay ended 12 years of military rule in 1985.

His presidency marks only the third time this century that his Blanco Party, one of the two middle of the road parties that dominate Uruguayan politics, has controlled the executive branch.

Six Latin American presidents or soon-to-be presidents attended the ceremonies, including presidents Carlos Menem of Argentina, Virgilo Barco of Colombia, Jaime Paz Zamora of Bolivia, and Andres Rodriquez of Paraguay.

The presidents-elect were Fernando Collor de Mello of Brazil and Patricio Aylwin of Chile.

The Blanco Party ruled Uruguay from 1958 to 1966, when the country had a Swiss-style collegiate executive.

Other elected administrations in this century belonged to the rival Colorado Party.

#90060u1403 03/01/1990 ~United Press International

WASHINGTON (MARCH 1) UPI - Federal regulators directed the Bank of New England Corp. Thursday to comply with banking laws, review loan policies and study management needs at the financial giant rattled by real estate problems.

The cease-and-desist order, issued by the Office of the Comptroller of the Currency, which oversees national banks, sets guidelines for the struggling company's efforts to return to sound financial health.

The huge bank, ''without admitting or denying any unsafe or unsound banking practices or violations of law, rule or regulation,'' agreed to comply with the directive, according to legal documents.

Another order by the Federal Reserve Board, which oversees bank holding companies, was expected later in the day.

The Bank of New England, until recently the region's second biggest bank holding company with subsidiaries in four states, has foundered on enormous losses in the region's faltering real estate market.

In 1989, it reported more than $1.1 billion in losses.

Since the bank disclosed such big losses were expected, it has purged top management, faced a liquidity crunch prompted by a rapid outflow of

deposits and launched a $6 billion asset sale to raise cash.

Among other things, the order issued Thursday directed the bank to:

-Improve loan administration and real estate appraisal procedures.

-Review liquidity needs.

-Not pay dividends or ''sell, or otherwise transfer or exchange'' assets.

-Appoint a compliance committee to monitor the bank's ''adherence'' to the order and ''analyze the bank's management needs.''

-Achieve an equity capital to total assets ratio of at least 3 percent no later than May 31.

Meanwhile, Lawrence Fish, a veteran New England bank executive regarded as the company's choice to take over as chairman, Thursday told United Press International, ''There are still things that need to be worked out'' between him and the bank.

Fish, widely reported to have accepted an offer, said, ''The world's a little bit in front on this.''

Fish, 45, spent 17 years at the Bank of Boston Corp., the region's biggest banking company, including a period as head of its New England group, overseeing all operations in the region.

As chairman, Fish would succeed H. Ridgley Bullock, a company director who has been interim chairman since the dismissal of Walter J. Connolly Jr. as chairman in January.

#90060u1404 03/01/1990 ~United Press International

EAST BERLIN (MARCH 1) UPI - An invitation to former President Reagan to speak at a political rally caused a quarrel Thursday in a small East German political party.

Wulf Eckart Oehme, spokesman of the the Liberal Democratic Party, which is expected to get only a small percentage of the votes in East Germany's March 18 election, announced Wednesday it had invited Reagan to speak in East Berlin at its final rally March 16.

He said Reagan, supposedly contacted in California by an East German businessman, had accepted.

Little credence was placed in the announcement in Germany and The New York

Times reported Thursday that a spokeswoman for Reagan said the trip was not on his schedule.

But the invitation caused a row in the party, which for 40 years collaborated with the East German Communist Party in the communist-run National Front.

Martin Schnittler, deputy chairman of the party, in a statement he gave the official East German news service ADN, threatened to resign from the party if the invitation is not revoked.

He said he was not present at the meeting of the party's governing board when the invitation was issued.

''The appearance of a man whose remark that the bombing of Moscow would begin in five minutes is irreconcilable with my liberal mentality,'' Schnittler said.

He was referring to a jest Reagan as president made when he thought the microphones were turned off.

Schnittler said the invitation caused dissension in the party, especially among young members.

The Liberal Democrats have united with the Free Democratic Party of East Germany and the German Forum Party to run a single slate of candidates in the election.

#90060u1407 03/01/1990 ~United Press International

LONDON (MARCH 1) UPI - An enterprising farmer's wife has put her four daughters up for marriage by advertising them among the livestock for sale in an agricultural journal.

''Man-eating daughters of Zelophehad seek strong partners for life-safari '' said the ad in Farmer's Weekly.

Janet Cross, of Bath, said in The Daily Telegraph Thursday she placed the ad after despairing that her four daughters, aged 27 to 32, would find suitable husbands.

''I just want to see them married and happy,'' Cross said. ''They are all lovely girls, holding down responsible jobs and have had many boyfriends, but none so far have really come up to scratch.

''I think I am as particular as they are; we all want Mr. Right,'' said Cross, who weeded out unsuitable respondents to the ad before forwarding a

list of finalists to daughter Sally, 31, a psychiatric nurse.

The ad drew a strong response from Farmer's Weekly readers who recognized the significance of its Old Testament reference to Zelophehad, but has embarrassed the daughters.

''It was a joke and it has been blown out of all proportion and we'd just like to forget it now,'' hospital adminstrator Trudy Cross, 29, told United Press International.

In the Book of Numbers, a leader of the Manasseh tribe died in the wilderness, leaving five daughters but no sons. The daughters petitioned Moses, who, with God's approval, broke with custom and allowed the daughters to keep their father's estate. To preserve the family inheritance, the women were expected to marry within the tribe.

Trudy Cross said her sisters Joanna, 32, a language school administrator, Sally, and Rachel, 27, a medical secretary, are also embarrassed by the publicity. ''I'm sure they've all unplugged their phones by now.''

''It's just Mum's bit of fun,'' Trudy Cross told The Telegraph in a story accompanied by a picture of the four smiling sisters. ''I didn't know she had done it until the ad appeared in the magazine. I must admit I do feel a bit daft.''

Their father, retired farmer Jock Cross, was not amused, the newspaper said.

''Jock is hopping mad,'' Janet Cross told The Telegraph. ''But if there are any successful applications it will have been worth it.''

-30- 2419

#90060u1412 03/01/1990 ~United Press International

LONDON (MARCH 1) UPI - A howling storm that killed at least 80 people in Europe and flooded coastal towns abated Thursday and Prince Charles cut short his ski trip in Switzerland to visit residents forced from their homes in Wales.

British meteorologist Chris Lakeland said the storm that has plagued northern Europe since Monday had weakened as it drifted over Finland and the Soviet Union.

''You can go to bed and rest easy tonight,'' he said. ''It's lost most of its sting.''

Civil defense and rescue services scrambled to repair demolished dikes, flooded farms and harbor fronts, to clear mudslides and avalanches in

alpine areas and remove felled trees from roads and railways.

Latest reports said at least 80 people had been killed, scores hurt and several thousand forced from their homes. Heavy flooding damaged property in Denmark, Britain, Holland and Norway and fires ravaged Corsica.

Since Monday, 17 deaths have been reported in Britain, 18 in West Germany, 17 in France, nine in Belgium, seven in Italy, three in East Germany, four in Switzerland, two in Denmark, one in Ireland, one in Austria and one in Greece.

The latest reported death in Britain came when wind blew a tree onto a woman's car, crushing her. Also, six people were injured when a train hit a tree that had fallen on a railway line in south London.

In Towyn, Wales, rising tides broke through hasty repairs made to a seawall, worsening the floodwaters that have moved 2 1/2 miles inland, covering hundreds of thousands of acres.

Charles, the prince of Wales, interrupted his ski holiday in Switzerland to go with his wife, Princess Diana, to northern Wales to visit some of the 2,000 evacuees whose homes were under 5 feet of water.

In northern France, two firefighters were killed by a falling tree, a 56-year-old man was swept out to sea and a 60-year-old man was killed when a tree fell on him in his garden, bringing the death figure to 17, authorities said.

In Belgium, winds topped 90 mph Wednesday night, and four more people died in weather-related incidents, bringing the death toll to nine.

Two river barges sank in the port of Antwerp, but all aboard escaped. The canal between the ports of Ghent and Terneuzen, in the Netherlands, was closed to large vessels after a draw bridge collapsed.

The storm forced a ferry company to change its schedule of sailings to England from Belgium and Holland, officials said. The storm damaged a lock at the port of Hull, on the northeast coast of England, so ships of the North Sea ferries can enter the port only at high tide.

A West German firefighter was killed by an uprooted tree and a motorist died in a storm-related accident. Schools were closed in Bavaria, and about 100 travelers were stalled for six hours near Homburg by trees that blocked the railway from Frankfurt to Paris.

In Switzerland, insurance companies faced heavy claims estimated at several hundred million dollars. Authorities estimated that about 18 million cubic feet of trees were destroyed by stiff winds.

A 26-year-old man was killed in Austria and two others seriously injured when a tree fell on their car in Voecklabruck, 35 miles northeast of Salzburg. Motorists on the main east-west autobahn were restricted to speeds under 45 mph.

A father and son were killed in Denmark when their boat capsized. West coast dikes, weakened by continued battering from heavy gales and the North Sea, gave way and sent floodwaters gushing into low-lying farmland.

Denmark's coastal directorate estimated that damage to dikes and low-lying areas alone ran to $28 million, not including flood damage to homes.

The Netherlands was cleaning up after the highest seas in 35 years whipped the Dutch coast and record high tides swept away sections of Holland's coastline, damaging protective dikes and inundating urban and residential areas. Rotterdam waterways overflowed their banks and left entire neighborhoods knee-deep in water.

The European Community Wednesday pledged $2 million in emergency aid to victims of the storm. Most of the aid, $600,000, was to go to Britain, with smaller amounts tagged for West Germany, France, Belgium, Holland and Ireland.

CAIRO, EGYPT (MARCH 1) UPI - Fire swept through a five-star hotel near Cairo's international airport Thursday, killing 19 tourists and sending people jumping out windows and tying bed sheets together to escape the flames.

Seventy people were injured in the early morning blaze at the 650-room, six-story Heliopolis Sheraton, rescue officials said.

Witnesses said sparks from an oven in an Arabic-style display tent in the hotel lobby started the blaze. Witnesses and hotel officials said the oven was used to make Arabic dishes for guests.

Winds rapidly fanned the fire toward the reception area and disco before engulfing the entire building.

Police and the Interior Ministry said 19 people were killed, including one from Britain, eight from France and two from Finland, and the remaining dead had not yet been identified.

Col. Taher Ebeid, head of the fire department's rescue effort, told United Press International in an interview that a young girl was among the dead,

and that workers continued searching the rubble for bodies.

''About 70 people were injured and they are in hospitals around Cairo,'' including an unknown number of Americans, he said.

A young British disc jockey who caught fire while guests danced to his tunes also was among the injured, the witnesses said.

Ebeid said the fire broke out at about 1:30 a.m. and his men managed to put out the flames four hours later. But they were still searching the rubble of the hotel for more bodies.

''We are continuing to search for more bodies but I think we have recovered most,'' he said.

Police, who stationed baton-wielding officers around the hotel to prevent looting and control onlookers, said they believed most of the dead were tourists asleep in rooms above where the blaze ignited.

Survivors, mostly tourists and businessmen, stood wrapped in blankets near the hotel waiting for their belongings to be recovered.

Ebeid accused the hotel of ignoring demands by fire officials to remove the highly flammable tent.

''We asked, pleaded and even forbade the Sheraton hotel from having a tent in the lobby, because this was a grave fire risk,'' he said.

Ebeid said his department had informed other luxury hotels in the capital to remove similar tents, but they too ignored the warnings.

''The others also have not listened to our warnings ... it makes me very, very angry,'' he said. ''My men risk their lives because the managements of these hotels do not obey our instructions.''

The hotel is managed by the Boston-based Sheraton company, and the building itself is owned by Gulf Egypt, a multinational corporation with an office in Cairo, officials said.

Jim Latham, a legal counsellor for the Sheraton company, and Sami Zoghbi, the company's Cairo-based director of operations, declined to comment on Ebeid's charges.

Many survivors praised Egyptian rescue efforts but said the luxury Sheraton hotel, situated some 10 miles north of Cairo and near the city's international airport, lacked water sprinklers and an audible alarm system.

''We were on the sixth floor when the tent caught fire,'' Fred Pirkey, 57,

a real estate investor from Atlanta told United Press International.

''There were no fire alarms, doors were locked and we had difficulty getting out,'' said Pirkey, who was on the first day of a 14-day vacation. ''My wife and I made it by tying bed sheets together and climbing out. We're lucky to be alive.''

An Italian engineer said he heard no alarms.

''If an alarm had gone off, probably these people would not have died,'' said Francesco Sacconi, 50, from Ascolipiceno in central Italy.

''Guests escaping the blaze were very kind to knock on my door,'' he said. ''I was on the fourth floor and managed to get out through the fire escape. There was smoke everywhere ... children were screaming and someone was shouting 'fire, fire' in French.''

Sacconi said he saw no signs of a water-sprinkler system in the hotel.

WASHINGTON (MARCH 1) UPI - The Agriculture Department is unlikely to support a proposed expansion in anti-hunger programs - named in honor of the late Rep. Mickey Leland - because it would cost too much, a top official said Thursday.

The Leland memorial bill would make it easier for families with high housing costs to obtain larger food stamp benefits and it would provide more money for a program that distributes food to the needy.

Assistant Agriculture Secretary Catherine Bertini also rejected arguments that the administration is trying to manipulate the statehood referendum in Puerto Rico with its proposals on food stamp funding.

A bipartisan group of congressmen filed the Leland bill Tuesday, saying it would help people ''on the brink of homelessness.'' It would let people deduct more of their housing bills when applying for food stamp benefits and eventually remove the cap, now set at $177 a month, of how much can be deducted.

Proponents said the bill would have a first-year cost of $600 million.

Bertini, who said the administration is committed to helping the poor, said ''we do not believe we would be in a position to support proposals that would increase the program'' as much as the Leland bill would.

The food stamp program is the government's largest anti-hunger program.

About 19.4 million people receive benefits each month. The program was alloted $14.7 billion this year but officials already have said up to $550 million more will be needed.

Puerto Rico Gov. Rafael Hernandez Colon, during Capitol Hill testimony, accused the administration of unfair dealing on nutrition assistance. The administration would reduce funding by $112 million to $825 million and remove the program from the Agriculture Department.

The governor said the prospect of reduced assistance was ''a transparent attempt to manipulate the referendum'' by building sentiment for statehood. Legislation being considered by the Senate would increase food stamp benefits if statehood is approved, he said.

(MARCH 1) UPI - VIDEO REVIEWS:

MOVIES

''Romero'' - A powerful drama of one man's struggle against brutal oppression. It tells the story of Oscar Romero, a soft-spoken man whose voice rose like thunder against the insanity that gripped his nation. Raul Julia gives a masterful performance as Romero, named archbishop of El Salvador in 1977 on the assumption that this mild-mannered priest wouldn't rock the boat, keep the church a stabilizing influence - and in no way challenge the government. But, those who openly sought free elections or better living conditions were being kidnapped and slaughtered by a military regime dedicated to protecting a wealthy minority. When an activist priest, a close friend, is killed, a shattered Romero ignores advice from fellow clergymen and begins boldly speaking out against the tyranny. ''Someone has to have the courage to say 'enough,''' he tells his people. His voice is now the one everyone is hearing, even his enemies who decide they, too, must say ''enough'' after he urges the U.S. to stop sending arms to El Salvador. While saying mass on a March day in 1980, Archbishop Romero is assassinated. 1989. 105 minutes. Vidmark Entertainment. Rated PG-13. $89.95.

''Halloween 5: The Revenge Of Michael Myers'' - Here it is another Halloween and not much has changed over the years at Haddonville. Not much has changed in this indeterminate series either. The indestructible fiend Michael Myers has escaped from his mineshaft tomb and has returned to further trim back the population while the police, as usual, pay no mind to the frantic, doomsday ramblings of Dr. Loomis (Donald Pleasance) until the body count soars. Michael is after his young niece Jamie (Danielle Harris), a traumatized survivor from the previous episode who, in between numerous screaming fits, helps Loomis set a trap for her unearthly uncle.

Spooky at times, but generally, just more variations on a well-worn theme. 1989. 96 minutes. CBS/Fox Video. Rated R. $89.98.

''The Phantom Of The Opera'' - Robert Englund, best known as Freddy Kruger plays the mad, disfigured composer in the fifth filmed remake of Gaston Leroux's grand guignol drama. At times, the two characters seem to overlap a sort of ''A Nightmare At The Opera.'' A broad and brutal departure from the novel, this version, set in London instead of Paris, tells the familiar tale of the deranged ''phantom'' obsessed with a young soprano (Jill Schoelen), whom he tutors to stardom and goes to murderous lengths to protect, determined to make her his bride. On its own, an atmospheric monster fantasy. 1989. 93 minutes. RCA/Columbia Pictures Home Video. Rated R. $89.95.

''Good-Bye, My Lady'' - A poignant, easy-going story about a boy and a remarkable dog. Originally released in 1956 and making its home video debut, the film tells of a Mississippi swamp boy named Skeeter (Brandon DeWilde) who finds and trains a lost dog, which in turn brings joy to the lives of Skeeter and his crusty uncle (Walter Brennan). The real star is a wide-eyed Basenji pup, an African hunting dog who doesn't bark but can cry - with tears. 1956. 95 minutes. Warner Home Video. No MPAA rating. $59.95.

VIDBITS

''Indiana Jones And The Last Crusade'' and ''Lethal Weapon II'' have forged ahead among the nation's video movie lovers, according to Billboard Magazine. ''Indy'' and ''Lethal'' are running 1-2 in videocassette rentals with the order reversed in sales ... The much-discussed ''sex, lies and videotape'' is due on home video Apr. 25, from RCA/Columbia. Look for ''My Left Foot'' (HBO) and ''Music Box'' (RCA/Columbia) in June ...

Criticized for colorizing such classics as ''Casablanca,'' Ted Turner can only be commended for keeping alive many of the old classics like ''Top Hat'' (1936), quite possibly the best thing Fred Astaire and Ginger Rogers ever did. Now being re-issued along with 16 other vintage RKO films by Turner Home Entertainment, ''Top Hat'' is still top notch, a bright, knockout musical collaboration of Irving Berlin tunes and Astaire-Rogers magic. Other re-issues include three more Astaire-Rogers hits, a couple of early Frank Sinatra films and ''A Damsel In Distress'' (1937) teaming Astaire, George Burns, Gracie Allen and Gershwin. New releases in the group: ''Four Jacks And A Jill'' (1942), ''Around The World'' (1943), ''That Girl From Paris'' (1936) and ''Playmates'' (1941), a Kay Kyser musical notable as John Barrymore's last movie.

And, speaking of colorizing, ''Sante Fe Trail,'' the 1940 adventure epic starring Errol Flynn and Olivia DeHaviland with Ronald Reagan as George Custer, is being re-issued in color by VidAmerica, priced $9.98.

(MARCH 1) UPI - The federal government reports a slight down-turn in the number of people seeking UNemployment benefits. The Labor Department says the number of initial claims for state unemployment insurance benefits decreased by 14-thousand in the week ending February 17th. The number seeking claims for the first time was 361-thousand. The revised figure for the previous week was 375-thousand initial claims.

The government says that during the week of February 10th, the unadjusted rate of insured unemployment decreased to two-point-three percent from two-point-four percent... with two-Million 330-thousand workers claiming state unemployment benefits.

NASA gave an indirect progress report this morning on the secret mission of the shuttle Atlantis. The space agency announced that Atlantis will return to earth Sunday. The announcement presumably means the shuttle has deployed a 19-ton spy satellite. But other than the landing date, all NASA had to say is that the Atlantis crew is doing well and the shuttle is continuing to perform satisfactorily.

A London newspaper says Pan American World Airways eliminated a key safety check nine months before a jet blew up over Scotland. The newspaper says investigators believe the relaxation of security gave terrorists an opportunity to smuggle a bomb onto the plane without fear of detection. The explosion December 21st, 1988, killed 270 people.

A Peoria, Illinois, woman wants to form a club to stop what she considers ''vicious'' jokes about Vice President Quayle. He likes the idea. Quayle met Dorothy Ballosio yesterday while he was in Peoria. She says the group will be named the ''Hit the Trail for Quayle Club''... and will have both Democratic and Republican members.

(MARCH 1) UPI - A chaplain was called to the scene of a fire in Lansing, Michigan, to help the searchers who recovered seven bodies. Officials say a number of people collapsed emotionally during the search of the charred house. A family of six along with one house-guest died in the blaze yesterday. This morning, two people died in a fire in Paw Paw, Michigan... bringing Michigan's two-day fire death total to 13.

Four people died this morning in a fire in a row-house in Baltimore. Officials say they believe the four victims were transients trying to get out of the cold. Two other people were injured. Officials say the house was vacant, and the victims apparently took shelter to get warm. The cause

of the fire has NOT been determined, but officials suspect careless smoking.

Researchers say new findings DON'T support a widely held belief that potassium supplements can help lower high blood pressure. A team from the University of Minnesota found NO significant difference in blood pressure levels in a study group given extra potassium chloride for more than two years. A report on the study is in the current issue of the New England Journal of Medicine.

New York City Council President Andrew Stein denies that he and his wife had a violent quarrel with the crew on an American Airlines flight to Puerto Rico. A report says the quarrel arose from a disagreement about whether Mrs. Stein's economy class ticket had been upgraded to first class. The report says Stein and his wife cursed stewardesses, threw things at them and knocked one down. Stein calls the report ''100 percent UNtrue.''

#90060u1462 03/01/1990 ~United Press International

JOHANNESBURG, SOUTH AFRICA (MARCH 1) UPI - President Frederik de Klerk defended his embattled defense minister Thursday but expanded a probe into political slayings to include the controversial 1989 death of SWAPO activist Anton Lubowski.

Defense Minister Magnus Malan had been under intense pressure to prove his surprise disclosure Monday in Parliament that Anton Lubowski, assassinated in Namibia last year, was a paid military informant who had done ''good work'' for the South African Defense Force.

Lubowski's relatives and colleagues denounced the claim, accusing Malan of trying to salvage his political future following allegations of high-level military involvement in a secret unit linked to political assassinations.

The secret unit, known as the Civil Cooperation Bureau, was blamed for shooting Lubowski outside his home Sept. 12.

In 1984, Lubowski became the first white to announce his membership in the South West Africa People's Organization, which was fighting a guerrilla war against South Africa.

''In future, I want to assure honorable members that there will be no protection of ministers when there is evidence of malpractices or crime,'' de Klerk said during his 25-minute speech to South Africa's segregated Parliament Thursday. ''The reverse is also true. I have confidence in the ministers that I have appointed. I am not prepared to see that ministers are attacked and criticized in an unfair manner.''

But de Klerk expanded the scope of the Harms Commission he appointed in January to investigate unsolved political slayings to include Lubowski's death.

Malan said in a statement Wednesday he ''naturally has at his disposal proof'' to support his allegations and had asked de Klerk to ''make the necessary arrangements'' so he can present the evidence to the Harms Commission.

Belfast-born Donald Acheson has been charged in Lubowski's murder and is scheduled to be tried in April, but Namibian police also have issued arrest warrants for three former South African police officers they say were involved in the secret South African unit.

In another development Thursday, inmates on an indefinite hunger strike demanded their immediate freedom and the unconditional release of all political prisoners in a statement reportedly smuggled out of Robben Island Prison.

''Bearing in mind the spirit, purpose and principles fundamental to the broad liberation struggle, we scoff at the criminalization of all activities conducted by the oppressed and exploited in their persistent struggle against the apartheid system,'' the prisoners said in a 16-page document released through the National Union of Mineworkers.

The union said the Robben Island prisoners smuggled out the document before the nearly 350 inmates began an indefinite hunger strike Monday to protest their continued detention despite a pledge by de Klerk to release all political prisoners.

The inmates and their attorneys believe de Klerk's definition of a political prisoner is too narrow because it excludes anyone convicted of a violent crime that was politically motivated.

In Brussels, Belgium, a senior European Community official called on South Africa to release all political prisoners and lift a state of emergency, promising European support for the dismantling of apartheid.

EC Commissioner Manuel Marin said reform measures by de Klerk ''constitute an important contribution'' but ''remained insufficient with respect to the immense task posed by the dismantling of apartheid.''

#90060u1468 03/01/1990 ~United Press International

MILWAUKEE (MARCH 1) UPI - Harley-Davidson Inc. should sell its recreational vehicle division and pay shareholders a special dividend,

said Malcolm I. Glazer, the Florida businessman who considered taking over the motorcycle manufacturer.

A letter filed with the Securities and Exchange Commission Wednesday suggested a meeting be held Monday between Glazer and Richard F. Teerlink, Harley-Davidson's president and chief executive officer.

Teerlink, however, rejected Glazer's suggestions in a letter sent later in the day.

Glazer and affiliates own 7.26 percent of Harley-Davidson. Glazer said in October he was considering several options, including seeking control of the company or a seat on its board.

If the company does not sell its Holiday Rambler Division, Glazer said it should consider spinning the division off in a distribution to Harley-Davidsonshareholders.

''We are prepared to assist Harley-Davidson in arranging such a transaction,'' Glazer said in the letter.

But Teerlink replied in his letter that the ''future growth of Holiday Rambler offers a significant long-term opportunity for our shareholders. Therefore, we believe that Holiday Rambler should remain a part of the company.''

#90060u1473 03/01/1990 ~United Press International

MULHOUSE, FRANCE (MARCH 1) UPI - Armed robbers blocked two armored security vans on an eastern highway Thursday, forced the drivers and guards to open the vehicles and escaped with $5.5 million, police said.

Up to seven men brandishing machine pistols took part in the daylight ambush on the Swiss-registered trucks on the A-36 motorway northeast of the city of Mulhouse.

The gunmen clambered into a white car and sped away with the equivalent of $5.5 million in French francs after the 15 minute robbery, police sources said.

First reports put the booty as high as $7 million but police said later the raiders had not taken all the money in the vans.

Police threw up roadblocks in the Upper Rhine region around Mulhouse and closed local frontiers between France, Switzerland and West Germany to try and nab the robbers.

At one point during the hunt, officers found the white getaway car in front of a discotheque at the nearby town of Sausheim minutes after the gang changed cars, police sources said.

The Basel-based security firm MAT Securitas Express AG said it ''will hand over 10 percent of the sum recovered to any person who permits the arrest of the gangsters.''

#90060u1492 03/01/1990 ~United Press International

BOGOTA, COLOMBIA (MARCH 1) UPI - Six bombs, apparently planted by leftist rebels to protest upcoming elections, knocked out electrical and telephone service in Medellin, police said Thursday.

The blasts occurred as the leftist National Liberation Army threatened presidential primary candidates if the ''dirty war'' against the left continued.

In Medellin, the six simultaneous explosions took out several telephone operation centers and electrical towers Wednesday night, a National Police spokesman in Bogota said.

Although authorities had not captured any suspects, they speculated that leftist guerrillas waging a nationwide campaign to disrupt elections were responsible for the attacks, which caused considerable material damage but no casualties.

The rebels, especially the National Liberation Army and the Popular Liberation Army, have stepped up attacks on power lines and army patrols to thwart congressional elections scheduled for March 11, and have raided several small towns in recent weeks to pursuade peasants to boycott the vote.

Presidential elections are scheduled for May.

In further moves to sabotage elections, National Liberation rebels sent a communique to presidential candidates threatening to ''execute actions'' against them as revenge for recent killings of leftist politicians.

The threatened presidential candidates, all Liberal Party members seeking nomination, received the guerrilla communique Tuesday and called on the government and security police to adopt preventive measures.

The leftist Patriotic Union party, which says it has lost more than 60 members to right-wing death squads so far this year, accused the government and army this week of ''negligence and complicity'' in a ''dirty war'' against the party.

Interior Minister Carlos Lemos Simmonds countered Wednesday night by blaming the Liberation rebels for the recent killing spree against the Patriotic Union.

In the past five years, rightist death squads linked to drug traffickers and wealthy landowners have assassinated more than 900 members of the Patriotic Union, formed by ex-guerrillas and leftist politicians in the mid-1980s.

#90060u1498 03/01/1990 ~United Press International

NEW ORLEANS (MAR. 1) UPI - One of three white men attacked by a gang of about 20 black youths returning from Mardi Gras celebrations in the French Quarter died from a severe blow to the head, said police who were reluctant Thursday to classify it as a racial assault.

David Laws, 29, Baton Rouge, died in Charity Hospital at 11:50 a.m. Wednesday, the same day city officials were claiming the most successful and trouble-free Carnival celebration in memory with 25 percent fewer arrests than last year.

An autopsy was being performed Thursday. Funeral arrangements were incomplete.

No arrests have been made and police had no suspects in the unprovoked attack witnessed by a large number of people.

''We have not determined whether this is a racial incident or not,'' police Lt. Yvonne Bechet said. ''The fact that all the witnesses who have come forth at this point are white does not indicate to us one way or another. We know that there are other witnesses. We know there were blacks out there.''

Laws was the third fatality of the two-week Carnival season and the 45th homicide victim in New Orleans this year.

John Folkenberg, 45, died Wednesday from head injuries suffered in a fall from a parade float last Friday. City law requires float riders to wear safety harnesses but Folkenberg was not wearing his when he fell.

Walter Andrews, 17, was shot to death last Thursday as he watched a Carnival parade in the eastern part of the city with his girlfriend. Police arrested a 16-year-old former boyfriend of the girl.

Officials sensitive to public perception of the tourism-dependent city said the deaths of Laws and Andrews could have happened in other

situations and were not necessarily Carnival-related.

''This was an isolated incident and it could have happened at any time,'' Bechet said of the attack on Laws and his companions. ''It probably was a roving band of discontents. That can happen at any time, in any place, in any city.

Laws, Michael Dixon of Baton Rouge, and Ivan Mancuso of Denham Springs were about five blocks from their car parked near the northern boundary of the French Quarter when the assault occurred.

The three went to the French Quarter after getting off work, arriving about 7 p.m. and leaving several hours later, said Dixon.

''We were cutting across Rampart Street and when we saw a group of about 20 black kids came across. I'd say they were teen-agers,'' Dixon said Thursday.

''And immediately after they crosssed, they ran and pushed Ivan against a building and he went down, and when he came back up he was bleeding real bad. We went back to the median and somebody came back with something and hit David from behind and he went down into the street. We tried to drag him from the street and then the cops pulled up.''

There were no words between his friends and the gang, Dixon said.

''There was no motive. I don't know why they were doing it in the first place,'' he said.

''This gang just accosted them and they broke and ran,'' said J.B. Kleinpeter, Laws' stepfather reached by phone in Gonzales. ''They found an empty wine magnum bottle at the scene. The detective told me there was no motive.

''One of the fellows with them (Mancuso) got beat up pretty bad. He got hit with an iron pipe. They found some yellow paint in his wound.''

Kleinpeter said Laws, a truck driver, was an easy going person who avoided trouble.

''He'd run before he'd fight you,'' he said.

#90060u1504 03/01/1990 ~United Press International

LONDON (MARCH 1) UPI - Stock prices closed broadly lower Thursday in sluggish trading on the London International stock exchange.

The key Financial Times 100-stock index, which managed an 0.6 point gain on Wednesday, fell 17.0 points to 2,238.4. The narrower top 30 industrial average lost 16.5 points to 1,764.9.

Volume was around 376 million shares, compared with 363 million shares Wednesday.

Analysts said trading activity was light as many large institutional investors remained sidelined by worries over inflationary pressures in West Germany and Japan.

Also, analysts said inflation worries, gloomy trade deficit figures and the escalating political controversy over Britain's poll tax undermined prices.

Among the most widely traded stocks, insurance stocks plunged following analysts' downgradings after several major insurance companies reported poor financial results.

Analysts said insurance stocks also fell as speculation continued to grow that many of the companies would suffer from heavy claims as a result of mounting storm damage across parts of Britain and the European continent in the second major weather calamity this year.

General Accident tumbled 45 cents to $16.59, Royal Insurance fell 21 cents to $7.72 and Sun Life fell 67 cents to $19.01.

In the electricals, Thorn EMI dropped 27 cents to $10.88 on speculation that a revived deal with Geffen Records in the United States could produce a large cash problem.

Among the day's other highlights, Barclays Bank PLC gained 10 cents to $9.20 after the clearing bank boosted its dividend.

Stanley Miller tumbled 34 cents to $1.08, FKB Group lost 24 cents to $1.92 and T. Cowie eased 12 cents to 72 cents a share.

Elsewhere in Europe, prices on the Frankfurt Stock Exchange closed lower in moderate trading.

The German Stock Index, which gained 5.60 points Wednesday, closed off 22.05 points or 1.2 percent to 1,787.87.

Traders said weak bond and futures prices on West German markets had a negative impact on stocks, offsetting perhaps what should have been some upbeat news about declining value of imports in January.

The Federal Statistical Office reported the value of West German imports

eased 0.6 percent in January from December and 1.7 percent from January 1989.

A surprising 11 percent drop in the cost of imported heating oil into West Germany led the general imports value decline, the government said.

-30- 2646

#90060u1506 03/01/1990 ~United Press International

GENEVA (MARCH 1) UPI - Cuban President Fidel Castro should relinquish power and go into voluntary exile to spare his country a violent revolution like the one that toppled Romanian dictator Nicolae Ceausescu last year, U.S. human rights delegate Armando Valladares said Thursday.

''No one wants something like Romania to happen again,'' Valladares, a former political prisoner in Cuba, told a news conference. ''We want Castro to leave Cuba peacefully.''

The remarks came just two days after Valladares, the head of the U.S. delegation to the U.N. Commission on Human Right, referred to Castro during a formal speech as ''the Ceausescu of the Caribbean.''

The chief of the U.S. human rights delegation told the news conference that despite his experiences in prison he would be prepared to ''facilitate'' the peaceful departure of Castro.

''He could go to China or Libya - or even to Switzerland if they would have him,'' Valladares said. ''I can guarantee that there would be no bloodshed.''

Castro is stubborn and claims that communism will last forever, he said. But only two weeks before the Berlin Wall began coming down, East German leader Erich Honnecker was also claiming there was enough Wall to last for centuries, Valladares pointed out.

Valladares said a human rights commission report on Cuba cited flagrant violations, including torture and repression of basic freedoms.

The United States, Valladares said, has deliberately presented a ''moderate and soft'' draft resolution on Cuba that avoids condemnation and seeks only to have the U.N. body continue to monitor the Cuban situation.

American officials said there is a great deal of support for the resolution because of its mild tone and they believe it will be adopted.

-30- 1967

#90060u1520 03/01/1990 ~United Press International

WASHINGTON (MARCH 1) UPI - Efforts to reduce cigarette advertising targeted at young people and minorities should be expanded to include beer and other alcoholic beverages, consumer groups told Congress Thursday.

In his panel's ninth hearing in three years on cigarette advertising, Rep. Thomas Luken, D-Ohio, chairman of a House subcomittee on hazardous materials, criticized tobacco firms for ''zeroing in on women, blacks, youth and Hispanics.''

''Even though we prohibit other advertisers from false advertising, we have immunized the tobacco industry,'' Luken said. ''We allow cigarette companies to mock the law, circumvent and destroy its effectiveness.''

The Ohio Democrat rallied behind Health and Human Services Secretary Louis Sullivan's recent stand against R.J. Reynolds Co.'s attempt to aim two new cigarette brands at blacks and blue-collar women, and his opposition to a women's professional tennis tournament supported by Virginia Slims cigarettes.

The Protect Our Children from Cigarettes Act of 1989, introduced by Luken and Rep. Bob Whittaker, R-Kan., would limit cigarette advertising to words-only ads in magazines and would prohibit cigarette billboards in sports facilities. In addition, Luken said the act would ban sports events like the Virginia Slims tournament that link athleticism ''with death-dealing cigarettes.''

Rep. Alex McMillan, R-N.C., whose state is a leading tobacco producer, said he is weary of the long debate about whether to ban tobacco advertising. He said targeting key groups is a basic principle of advertising - a practice followed in almost every political campaign.

McMillan said he thinks opponents of tobacco ads are not really concerned with advertisements, but are just taking a back door approach to banning smoking. ''It would be more honest to hold hearings on whether tobacco should remain a legal product,'' he said.

Citizen groups, including the March of Dimes, Americans for Nonsmokers Rights and the National Coalition of Hispanic Health and Human Services Organizations, praised efforts to reduce the targeting of ''vulnerable'' groups by cigarette ads.

But some organizations called on lawmakers to go a step further and tighten advertising rules for alcohol as well as tobacco.

Alcohol use in the United States is responsible for at least 98,000 deaths and $130 billion in economic costs each year, the National Council on Alcoholism said. Health and Human Services officials estimate smoking is

related to 390,000 deaths each year and costs the U.S. economy $52 billion annually.

Patricia Taylor of the Center for Science in the Public Interest said ''both industries selectively target certain segments of our population,'' claiming malt liquor advertisements are clearly directed at blacks and Hispanics.

In contrast to cigarettes, which are barred from broadcast advertising, more than $1 billion was spent last year in advertising alcoholic beverages on radio and television, Taylor said.

Two weeks ago, former Surgeon General C. Everett Koop called for a complete ban on all broadcast advertising of alcoholic beverages. At the very least, Taylor said her group would like to see equal time for health and safety messages to balance broadcast advertisements of alcoholic beverages.

Hamilton Beazley, president of the National Council on Alcoholism and Drug Dependence Inc., agreed steps should be taken to curtail alcohol promotions, especially those aimed at teenagers.

''Unlike their tobacco colleagues, alcohol advertisers continue to have easy access to the public airwaves to promote drinking. Even the distillers who have historically refrained from advertising liquor on radio and television have now revised their code to allow television marketing of spirits-based coolers,'' Beazley said.

#90060u1546 03/01/1990 ~United Press International

COPENHAGEN, DENMARK (MARCH 1) UPI - East European governments and the World Health Organization announced plans Thursday for a campaign to stem the spread of AIDS in the region.

The 12-point plan, which is to receive an immediate WHO injection of $1.5 million, includes moves to set up organizations for homosexuals, introduce family planning and educate the populations and medical staffs of East Europe.

''It is an ambitious plan but with the breakdown of the Berlin Wall and what it stood for there is an urgent need for action,'' Dr. Jo Asvall, WHO regional director for Europe, said Thursday.

Asvall was speaking at the end of a two-day conference of all East European nations excet Albania on the spread of AIDS in Eastern Europe and ways to ''prevent a rapid spread as travel increases between East and West.''

The conference, attended by the Soviet Union, Hungary, Poland, Czechoslovakia, Bulgaria, Romania, Yugoslavia and East Germany, heard that Albania is the only Eastern European country without AIDS cases.

''We have had very close relations with Albania and, to date, the country has no HIV virus or AIDS patients,'' Asvall said, adding Albania had declined an invitation to attend the meeting in order not to be grouped with the rest of East Europe.

''Our meeting here has been historic. We had a fully open discussion on the AIDS epidemic, which is at a crossroads in East Europe,'' Asvall said.

''AIDS in the region is at a low level, but increased communion with the West in coming years may cause an explosion in the numbers of those infected with the HIV virus, unless mass education on all fronts is carried out,'' he said.

WHO says the nine countries of eastern Europe have 315 confirmed AIDS patients and 4,754 people confirmed as having the HIV-virus. The organization says that half of all AIDS cases reported in the past decade have resulted in death.

WHO estimates that 16,000 people in Eastern Europe are probably HIV positive but have not been diagnosed.

''The danger of an increase means spread sexual education and family planning information to be distributed to large parts of the population,'' Asvall said.

Asvall said that in particular ''two worrisome'' epidemics of the HIV-virus had higlighted the need for the education of medical and hospital staff in East Europe.

''There was an epidemic in a Soviet hospital in 1988 in which 30 children were infected with the virus by one source through inefficiency and lack of disposable equipment,'' Asvall said.

He said that even more troubling was the discovery in Romania that 600 children, ''mainly orphans,'' contracted the virus through blood transfusions intended to help cure malnutrition.

''These two incidents show the problem with regard to a general lack of disposable medical equipment and the testing of blood. It is here that we hope the WHO funds will help in the short term,'' Asvall said.

Asvall said nations participating in the conference supported the 12-point plan, which included both a direct and indirect campaign against the

disease.

The plan included information campaigns on non-discrimination of AIDS and HIV patients, self-injecting drug abusers and homosexuals and increased control of sexually transmitted diseases.

''We will also try to get homosexuals to organize themselves,'' Asvall said,adding there would also be an extensive information program for prostitutes.

WASHINGTON (MARCH 1) UPI - The median U.S. age has risen to 32.3 years and aging baby boomers have made the 25-34 age group the largest segment of the population, the Census Bureau said Thursday.

''Since the early 1970s, the population of the United States has seen major shifts in its distribution by age, race and Hispanic origin,'' the bureau said in a a wide-ranging report looking at population estimates over the past decade. The report brings together figures from a number of different surveys taken at slightly different times.

The new report put the total U.S. population as of Jan. 1, 1989, at 247,635,000, an increase of 2,404,000, or just under 1 percent over the previous Jan. 1 and 20.5 million - or 9.1 more - than on April 1, 1980, when the last decennial census was taken.

In the report, Census said that the 32.3 years median age as of July 1, 1989, was up from 30 years in 1980 and 27.9 years in 1970 and reflected the aging of the vast number of people born between 1946 and 1964, the so-called Baby Boom.

More than 79 million people are considered between 25 and 44 years old, the Baby Boom years. In particular, Census said the group between 35 and 44 years old increased four times faster than the total population between midyear 1980 and midyear 1988, with the number of people in this age group increasing by 9.5 million during the period, a 3.9 percent average annual growth.

But the largest population group consisted of those born near the end of the boom, who are now between 25 and 34 years old. There were 43,886,000 people in that age group, Census said, an increase of 6,260,000 people, or 16.6 percent.

However, Census added, the trend in the rate of growth for this group will be downward over the next decade as the much smaller population of young adults aged 18-24 ages - 26,888 people in 1988 - and the baby boomers move

into the middle years of between 45 and 54 years old.

At the same time, the population aged 14 to 24 years old dropped by 5.6 million, as the last of the Baby Boomers reached aged 25.

But in what has been termed the Baby Boom Echo, the number of children aged 5 to 13 began to grow in the latter part of the decade as many of the ''thirtysomething'' generation began to have children.

Those aged 14 to 17 were in the most rapidly declining age group, with just 13,983,000 people falling into that group in 1988, compared with 16,142,000 in 1980.

Among other highlights of the report:

-The nation's black population, 12.3 percent of the total population, has surpassed 30 million people, hitting the 30.6 million mark on Jan. 1, 1989 a growth of 1.5 percent during the year and nearly double the white increase of 0.8 percent. The annual growth rate of blacks has been larger than that of whites since 1950.

-Hispanics, who make up 8 percent of the total population, have added nearly as many people - 2.5 million - to their population count through immigration as through natural increase, 2.6 million, since 1980. The Hispanic population was estimated at 19.9 million people on July 1, 1988, compared with 14.8 million on July 1, 1980.

-Asian or Pacific Islander people grew by 70 percent - 2.7 million people - from 1980 to 1988 and the American Indian, Eskimo or Aleut population grew 19 percent, an estimated 270,000 people in the same eight-year period.

The report also said another important aspect of the aging of the U.S. population has been the increase in the proportion of elderly persons. It said the population over age 65 increased by 4,663,000 from July 1, 1980, to July 1, 1988, an increase of 2.1 percent per year and slightly more than double the overall rate of population growth.

The proportion of the total population in the age group 65 and over was 12.3 percent in 1988, up from 11.3 percent in 1980.

#90060u1562 03/01/1990 ~United Press International

LOS ANGELES (MAR. 1) UPI - President Bush restored lowest-possible tariff treatment Thursday for imports from Panama in a bid to aid its economic recovery and to reward the U.S.-installed government's commitment to fight drug trafficking.

Seeking to rebuild trade relations all but severed while Gen. Manuel Noriega was in power, Bush ordered Panama placed back on the list of countries that receive preferential treatment for their exports to the United States under the Generalized System of Preferences, or GSP.

In a separate action, administration officials said Bush has certified that Panama, which until the Dec. 20 U.S. invasion suffered under harsh economic sanctions because of Noriega's alleged narcotics connections, is now cooperating in anti-drug efforts and therefore is eligible for U.S. aid.

That certification, required by Congress on an annual basis for all major narcotics producing and transiting countries, removes any potential obstacles to the more than $1 billion in direct and indirect economic assistance Bush has proposed for Panama.

President Reagan withdrew GSP benefits for Panama on Mar. 23, 1988, saying the Noriega regime had not ''cooperated fully'' and ''had not taken adequate steps on its own'' to prevent the sale, production, processing or shipment of illegal drugs. The original Reagan order also accused the government of not doing enough to prevent or punish ''the laundering in that country of drug-related profits or drug-related monies.''

With Noriega in U.S. custody, awaiting trial in federal court in Florida on drug and racketeering charges in connection with alleged money-laundering activities, Bush ordered Panama to once again be eligible for the lowest possible tariffs on its exports under the GSP rules and the Caribbean Basin Initiative.

Panama's exports include bananas, pineapples and sugar.

Despite the general stamp of approval for Panama's cooperation on the drug front, U.S. officials have pressed - with little success to date - for closure of banking law loopholes that have permitted money laundering in the past. International banking is one of Panama's major business enterprises.

The GSP program eliminates duties on a broad range of products in order to stimulate exports from designated developing countries. It covered roughly 4 percent of all U.S. imports in 1988.

#90060u1570 03/01/1990 ~United Press International

ABIDJAN, IVORY COAST (MARCH 1) UPI - President Felix Houphouet-Boigny transferred Education Minister Bala Keita after 10 days of demonstrations by students demanding political reforms and improved conditions, official sources said Thursday.

Keita was made a minister of state delegate to the president on Wednesday. Alassane Salif N'Diaye, formerly minister for scientific research and culture, replaced Keita as education minister of the west African nation.

Houphouet-Boigny is under pressure to end the social unrest. On Friday he is expected to announce details of severe austerity measures, including public sector wage cuts and tax increases, for the economy.

The student protests reflect the deteriorating economic situation in the country, as many have not been paid their scholarships for up to four months. The government said Wednesday that unpaid scholarships would be paid Friday.

Cuts in the cost of student living accommodation and meals also were announced this week but many students see the measures as not going far enough.

Demands for a multi-party state have been increasing and Ivory Coast watchers say there are signs suggesting that student demands for a better standard of living will spread to the working poor at a time when austerity measures are about to force living standards down further.

The protests in Ivory Coast have been echoed recently by opposition parties and movements in other countries of French-speaking West Africa, including Gabon, Senegal and Benin.

French Prime Minister Michel Rocard said Wednesday that Paris supports demands for political reforms in its former colonies, where French influence remains strong.

''Africa is seeing its political structures put into question again,'' said Rocard, a socialist.

''We see demonstrations in favor of change by students, civil servants and disadvantaged classes of the population who have been hard hit by brutal economic and financial adjustment,'' he said.

''However, numerous African countries already have started political renovation. They must continue along that path,'' he said.

''France will not spare them its support to help them surmount economic crisis and favor progress toward democracy,'' Rocard said.

Michel Camdessus, director of the International Monetary Fund, defended his agency's policies Thursday after Gabonese President Omar Bongo blamed them for unrest in Gabon.

''We are going to continue to invite governments to apply with constancy policies that are good and that are the only veritable solution to social problems from which these countries suffer,'' Camdessus told Europe 1 Radio.

#90060u1575 03/01/1990 ~United Press International

MIAMI BEACH, FL (MARCH 1) UPI - Eastern Airlines Inc. President Phil Bakes said Thursday that a plan signed by principals in the company's bankruptcy proceedings should allow the carrier to emerge from Chapter 11 protection by early summer. Bakes would not reveal many details of the agreement, signed Wednesday night, but said the plan would enable Eastern to continue its restructuring program.

"We've rebuilt an airline at Eastern and I must say we've built a damn good one," Bakes said in remarks to the Association of Corporate Travel Executives' annual conference and trade show. "It is the rebuilding of a great airline one customer at a time." Eastern has targeted business travelers in seeking to add to its market share.

Later, Bakes told reporters the plan signed by Eastern and parent Texas Air Corp., Eastern's creditors and bankruptcy court officials calls for Texas Air to buy Eastern several new Boeing airplanes, which would be delivered in the mid-1990s. He said some of the planes would go for expansion of service and others for replacement of older aircraft.

The agreement provided Eastern with "sufficient cash resources to weather the competitive storms that will not go away because of bankruptcy protection," he said.

He said that Eastern was still losing money but that he expected the carrier to turn the corner later this year. "We are losing money, and we are losing money as we projected we would lose money. We are on our plan," he said. "We said earlier we should break even by the second half of the year, and I would say we are on that projection almost to the penny."

Eastern was forced into bankruptcy when machinists went on strike last March and the company's pilots and flight attendants joined the walkout, crippling the airline.

The pilots and flight attendants have since returned to work, and Bakes said Eastern is attempting to renegotiate their contracts. He said the company has requested temporary salary cuts for 1990 and more efficient work rules.

During his speech, Bakes criticized the notion that an airline in financial trouble would cut corners in a manner that could affect safety. He said

that Eastern spent about $15 million to inspect all of its aircraft in the late 1980s and that its maintenance record was second to none.

He said the Federal Aviation Administration should devise a way to check and publish maintenance records, similar to the way on-time schedules are reported, so travelers could see for themselves which carriers serviced their equipment best. He noted that whenever jets make emergency stops, it triggers waves of negative publicity about air travel.

"The low level of confidence in our industry is due to high visibility," Bakes said. "An unscheduled landing becomes damn good fodder for the evening news." He told conventioneers that new non-smoking regulations permitted Eastern to refigure its seating to allow for what essentially is a business class in the center of coach seating.

#90060u1580 03/01/1990 ~United Press International

NEW DELHI, INDIA (MARCH 1) UPI - An Indian Air Force plane crashed Thursday on a busy highway in northern Uttar Pradesh state, hitting two tankers and igniting a massive fire that left about 50 people dead and several others injured, witnesses said.

A photographer who stopped at the scene while en route to New Delhi quoted a police official as saying a Soviet-built MiG plane hit two tankers and exploded on the busy Meerut-New Delhi highway, 45 miles northwest of New Delhi.

The photographer said the tankers contained explosive materials that ignited, blanketing the highway with fire and smoke and killing about 50 people. An undetermined number were injured, he said.

Several passing vehicles were destroyed due to fire, said the photographer who works for an international picture agency.

''The highway looked like as if it was bombed,'' he said.

The Press Trust of India news agency said the plane's pilot ejected before it crashed onto the highway. The agency said at least four people had been confirmed dead and eight others injured. It said an undetermined number of vehicles were destroyed.

The Indian Air Force has an accident rate of 1.4 crashes per 10,000 flying hours, compared with the U.S. Air Force's rate of 0.65 percent. The military claims Indian pilots spend more than twice the time in the air than their American counterparts.

#90060u1582 03/01/1990 ~United Press International
MONTREAL (MARCH 1) UPI - Air Canada, the country's largest air carrier, Thursday reported earnings of $123.7 million, or $1.71 a share, for 1989, up from $73.9 million, or $1.54 a year, in 1988. Revenues in 1989 increased to $3.05 billion from $2.8 billion in 1988, the airline said.

Air Canada said its earnings were enhanced by $71.4 million from the sale of its interest in GPA Group plc, a commercial aircraft leasing and trading company based in Ireland.

Pierre J. Jeanniot, president and chief executive officer, said Air Canada "made substantial progress during 1989, its first year as a completely publicly-traded company, as it continued to strengthen and realign its operations."

Despite the fact Air Canada's revenues grew, Jeanniot said its operating margin was inadequate and actions would be taken to ensure improved earnings in 1990.

Jeanniot was reported to have told analysts in Toronto last week that the airline would consider laying off some of its 23,000 employees as part of efforts to cut operating costs.

Air Canada, with 55 percent of Canada's domestic market, offers passenger service throughout Canada and to destinations in the United States, Europe the Caribbean, and Asia.

#90060u1588 03/01/1990 ~United Press International
WASHINGTON (MARCH 1) UPI - Bestselling author Tom Clancy said Thursday it was ''ecumenical'' of the Soviets to virtually endorse his novel ''The Hunt for Red October'' by confirming it was based on a real case of mutiny but said his opinion of Moscow had not changed.

Clancy also questioned the Soviet contention that only the person leading the mutiny was hurt when, according to the government newspaper Izvestia, ''arms were used'' to end the uprising aboard the submarine-destroyer Storozhevoi off the Swedish coast in 1975.

''The ship Storozhevoi was subjected to air attack and another ship was accidentally damaged, according to the official U.S. version,'' Clancy said, noting that at least part of the full U.S. report remained secret.

The author, whose fictional account was about a mutiny aboard a Soviet submarine, said his information was that a fighter bomber attacked the Storozhevoi and hit it with at least one rocket. The second ship was

attacked by accident, he said.

''If you use force to stop a ship, ask yourself, does that make logical sense ... that only one person would be hurt,'' Clancy said in a telephone interview from his Maryland home south of Annapolis.

''You have to take the information they released and apply the idiot test - ask yourself: 'Does this make sense?''' Clancy said.

Izvestia, in its report Tuesday, said the ship was not bombed, and that the only mutineer wounded was chief officer Valeri Sablin when he was shot by the ship's commander. Sablin later was the only mutineer executed after being convicted of treason, Izvestia said.

Clancy said his book referred to ''20 some'' mutineers being executed - but he noted it ''is a work of fiction.''

The author knew of the Izvestia report ahead of time because a friend wrote him a few days ago saying the newspaper wanted an interview and Clancy contacted an Izvestia correspondent in the United States.

''I called him and he gave me the story, which I thought was kind of odd, but then there are lots of odd things these days.''

The author said he knew Moscow had been interested in his book because ''embassy officials bought a whole lot of copies'' after it came out.

Clancy also said he learned of the original case ''in the open media - and the jacket of the book says he got the initial idea from ''a newspaper article about a mutiny on a Soviet frigate.''

As for having a virtual Soviet endorsement of his book, he said, ''That's very ecumenical of them.''

But asked if the endorsement had changed his opinion of the Soviets, Clancy - known as a staunch supporter of the U.S. military - said, ''Anyone who's read my books knows my opinion. My opinion of the Soviets is pretty clear. They haven't changed very much.''

As for the timing of the report - the movie version of the book starring Sean Connery debuted Monday night in Washington - Clancy said, ''There is a certain coincidence there.''

He said it appeared Izvestia decided to release the story now because of the movie's opening, but added, ''That's supposition on my part.

#90060u1631 03/01/1990 ~United Press International

SRINAGAR, INDIA (MARCH 1) UPI - Troops fired on Moslem protesters Thursday in Srinagar, killing at least 60 people and wounding scores of others in the worst bloodshed in Kashmir since a secession movement began two years ago, official sources said.

A Moslem separatist also shot to death a senior government information officer, police said.

The violence came as more than 800,000 Moslems from Srinagar and surrounding towns of the Kashmir Valley flooded the city, 400 miles north of New Delhi, in the largest outpouring of pro-independence fervor since massive protests began Feb. 22. It was also the largest anti-Indian demonstration in Kashmir since India achieved independence in 1947.

The demonstrators marched or rode vehicles in a number of processions to the headquarters of a U.N. military observers group that monitors the 1949 cease-fire line of the first Indo-Pakistan war. The processions stopped briefly for rallies in front of the building and then moved on.

At about 2 p.m., some 2,000 protesters shouting anti-Indian slogans began marching from a suburb of Srinagar toward the U.N. office. They were confronted by an army patrol, part of a massive contingent deployed to control the pro-independence uprising, witnesses said.

Witnesses said the soldiers seized from the demonstrators a green and saffron flag of the Jammu and Kashmir Liberation Front, the most popular underground Moslem separatist group. The move provoked an argument that erupted into a clash in which the troops fired shots.

At least five people were killed immediately, police said. Twenty others were wounded and rushed to a hospital, where 13 died, police said. State-run radio confirmed 18 dead.

About an hour later, a rock barrage by slogan-shouting protesters prompted security forces to open fire in the Hyder Pora area of Srinagar, killing at least 12 and wounding 45 others, the radio said.

A senior police official said at least 30 other people were killed in the ensuing violence.

The firing was by members of a paramilitary contingent, but several senior police sources said troops were responsible, the radio said.

Scores of dead and injured were taken to Bones and Joint Hospital where a dozen surgeons operated on so many victims that they lost count, a hospital source said.

The source said chaos reigned in the hospital as some 5,000 grieving Moslems poured into the facility searching for missing, wounded or dead relatives.

The blood-letting was the worst in the two-year history of the militant-led independence drive and the highest number of dead since 35 demonstrators were shot to death Jan. 20-21 by security forces, sparking the movement into a popular insurrection.

More than 160 people have died since Jan. 20, most of them demonstrators shot by security forces.

The move to secede from India is supported by virtually all of the region's 3 million Moslems, who share a perception that their interests have been ignored by the Hindu-dominated central government.

Earlier Thursday, the Srinagar-based assistant director of the state Information Department, P.N. Hando, 56, was killed by a gunman who invaded Hando's chauffeur-driven car.

Police speculated he was shot by a Moslem militant to create panic and uncertainty in his office, which disseminates the official line on the Kashmir crisis. Some 50 workers in the department said they would go on extended leave unless they got more security.

In the largest procession of the day, an estimated 500,000 protesters from Srinagar and its suburbs rode in buses and cars, chanting pro-independence slogans and waving Liberation Front flags.

Another 200,000 protesters from nearby towns converged and marched to the U.N. military observers office.

Some 100,000 more protesters - packed into 500 buses and 500 trucks - arrived from Anatnag, 25 miles to the south, and inched their way through the traffic-jammed streets to the U.N. office.

In yet another demonstration organized by the Kashmir Taxi Operators Union, about 25,000 people riding in 5,000 taxis also protested at the U.N. office.

The protesters main complaint is New Delhi never fulfilled a 1949 promise to hold a plebiscite so Kashmiris could decide if they want to remain a part of India, join neighboring Islamic Pakistan or become independent.

#90060u1664 03/01/1990 ~United Press International

ROCKVILLE, MD (MARCH 1) UPI - The Nuclear Regulatory Commission granted

Thursday a full-power operating license to New Hampshire's Seabrook Station, writing one of the final chapters in an 18-year saga pitting anti-nuclear forces against a shrinking nuclear power industry.

''If you wait long enough, you have justice,'' Ted Feigenbaum, senior vice president of New Hampshire Yankee, Seabrook's owner-operator, said after the 3-0 vote.

NRC Chairman Kenneth Carr said that because he anticipates the decision to be appealed, the effective date of the commission's order is March 8.

Bob Backus, an attorney for the Seacoast Anti-Pollution League, said Seabrook opponents will seek a stay of the commission's action in the U.S. Court of Appeals in Washington. Carr said if that is the case and the court rules in favor of the NRC, the commission's action would become effective one week after the motions are filed, but no later than March 15.

Since the utility first requested permission to build a nuclear plant in February 1972, there have been numerous court battles and thousands of arrests of nuclear activists.

The controversy continued into the commission hearing room Thursday when a protester was hustled out of the room after he yelled out, ''You can silence the public; you cannot silence the truth.''

Carr said that after much review of the case, the commission ''was not persuaded the plant cannot be operated safely. We believe that the emergency plans will provide adequate protection for the public in the event of an accident.''

One of the chief complaints of the plant's opponents has been that the southern New Hampshire and northeast Massachusetts communities surrounding the plant could not be evacuated adequately in an emergency.

Carr said that ''there are reasonable, adequate protection measures'' if an emergency arises and that people living or visiting the nearby beaches ''don't have to worry about it.''

Robert Pollard, a former NRC official who is now a nuclear safety engineer with the Union for Concerned Scientists, charged the commission with changing its regulations to justify license approval.

''Every time the safety regulations got in the way, they changed them. Every time someone raised a valid concern early, the NRC postponed the decision,'' he said, adding credible questions about the evacuation plan were initially raised during the construction stage.

Sen. Edward Kennedy, D-Mass., agreed, contending the agency is more

concerned with the nuclear industry's economic interests than the public's health and safety.

''This action is the culmination of a long line of irresponsible 'public be damned' decisions by the NRC. This is a rogue agency that lives by its own set of pro-industry rules,'' Kennedy said.

Rob Williams, a spokesman for New Hampshire Yankee, said that without legal delays, the plant could begin generating electricity by late spring to 1 million New England homes.

Seabrook's saga began in February 1972, when the now-bankrupt Public Service Co. of New Hampshire first applied to the state for permission to build the power plant.

Along the way, Seabrook's survival was challenged on every possible front by anti-nuclear activists and Massachusetts Gov. Michael Dukakis, who have persistently alleged that problems of plant safety and inadequate evacuation plans could harm residents of southern New Hampshire and northern Massachusetts in the event of an emergency.

''The real significance of the decision (to grant the license) is that new electrical capacity comes on line in a region that desperately needs electrical capacity,'' said Harold Finger, president of the U.S. Council on Energy Awareness, a Washington trade association of electrical utilities.

Fewer nuclear power plants are being built across the country - largely due to the efforts of anti-nuclear protesters - and Finger said a decision to approve Seabrook signifies a ''return to rationality.''

Carr said there are no pending applications before the NRC for new nuclear power plants, blaming negative public opinion and monumental costs.

Seabrook has invested $6.45 billion to date, Williams said.

#90060u1672 03/01/1990 ~United Press International

WASHINGTON (MARCH 1) UPI - Higher mortgage interest rates and an increase in the median home price dampened home buyers' purchasing ability in January, the National Association of Realtors said Thursday.

NAR's housing affordability index, which tracks changes in home buyers' purchasing power, measured 104.2 in January, down from 108.2 in December. At 104.2, the index shows that a family earning the national median income of $33,708 for January had 104.2 percent of the income needed to qualify for conventional financing covering 80 percent of a home priced at $96,200

the median existing-home price for that month.

"Despite the January decline in overall affordability conditions, the index is over 100, which is considered to be a good range," said NAR President Norman D. Flynn.

The mortgage interest rate rose to 9.98 percent in January from 9.96 percent in December, and the median home price rose to $96,200 from $92,500. The median family income rose $108, from $33,600 to $33,708, while the income needed to qualify for a loan on the typical home rose $1,298, from $31,066 to $32,364.

Half the families in the United States earn more than the median income and half earn less. Similarly, half the existing single-family homes sell for more than the median price and half sell for less.

The changes in the national median home price, mortgage rate and median income from December resulted in a $27 increase in the monthly mortgage payment, which was $674 in January, the NAR said.

#90060u1687 03/01/1990 ~United Press International

NEW YORK (MARCH 1) UPI - A bankruptcy judge Thursday adjourned a hearing on a request by the Securities and Exchange Commission to be named to Drexel Burnham Lambert Group Inc.'s creditor's committee and a motion to appoint an examiner in the case.

U.S. Bankruptcy Court Judge Howard Buschman III set a hearing on the SEC request for March 13 to give the fallen investment house and its creditors time to resolve the issue.

The judge also adjourned a hearing on a motion by one of Drexel's major creditors, First City Bancorp Inc. of Houston, to appoint a court examiner and a motion by Drexel to appoint an oversight committee of three outside directors to monitor the firm's activities while operating under bankruptcy protection. The hearing on the oversight committee and examiner was scheduled for March 6.

The SEC asked to be named to the creditor's committee, saying it is Drexel's largest creditor, according to court papers filed by SEC attorney Richard Kirby.

Drexel still owes the SEC $150 million of the $350 million it was ordered to pay to the agency last year to settle civil securities law violations as part of the federal government's investigation into insider trading at the firm.

Drexel filed for Chapter 11 protection from creditors Feb. 13 in U.S. Bankruptcy Court in Manhattan in the largest bankruptcy filing in Wall Street's history.

The SEC was not named to the 17-member Drexel creditor's committee earlier this week. The SEC claims a right to be represented on the committee because the money it is owed by Drexel is earmarked to pay compensatory damages to victims of the securities fraud committed by the investment firm.

To avoid a racketerring indictment, Drexel reached an agreement with the U.S. Attorney's Office in Manhattan in December 1988 to plead guilty to six felony counts of securities fraud violations and to pay a penalty of $650 million, including the $350 million to the SEC.

In its motion, First City Bancorp said it was seeking the appointment of a court examiner to study the investment firm's pre-bankruptcy transactions. The bank expressed concern about the liquidation of assets at Drexel's broker-dealer arm and the $260 million in bonuses paid to top executives in December and January prior to the filing.

The motion by Drexel to establish an oversight committee was proposed as an alternative to the appointment of a court examiner. Drexel's three proposed members of the oversight committee: are John Shad, former SEC chairman; Roderick Hills, another former SEC chairman; and Ralph Saul, former president of the American Stock Exchange. All were brought in an as independent directors of Drexel following its settlement with the SEC in April.

Drexel and its creditor's committee have not had a chance to meet, said Drexel bankruptcy attorney Alan Miller. In response to concerns voiced by one creditor's attorney, Miller said Drexel "is not disposing of any assets" except as permitted by the Bankruptcy Code. "To my knowledge, cash is not moving out of that debtor," he said. "Funds are not being upstreamed."

Only the parent, Drexel Burnham Lambert Group, and not its broker-dealer or other subsidiaries filed for bankruptcy protection. Drexel and its subsidiaries "are being advised to operate at arms' length," Miller said.

(MARCH 1) UPI - Violence rocked parts of India's Kashmir region as troops fired into groups of Moslem protesters in two locations in Srinigar , killing at least 30 people. It was the worst bloodshed in strife-torn Kashmir since mid-January. About 800-thousand Moslems from towns in the predominantly Moslem Kashmir Valley flooded the city 400 miles north of

New Delhi in the largest display of pro-independence fervor since protests began last month.

The shuttle Atlantis continues to orbit the Earth on a secret military voyage as its five-man crew presumably launched a 19-ton satellite to spy on the Soviet Union. NASA imposed a news blackout, but the shuttle's top-secret payload reportedly was to be deployed this morning. The Air Force allowed NASA to lift some of the secrecy today by announcing that the shuttle is due to land on Sunday at Edwards Air Force Base in the California desert.

President Bush is sounding a law-and-order theme today in California, where crime could be an issue in the state's governor race. Bush will be on hand this afternoon at the dedication of a new maximum-security prison in north Los Angeles. Officially, Bush's attendance is NOT political, but he did raise the issue during a fund-raiser for the G-O-P gubernatorial candidate last night.

#90060u1721 03/01/1990 ~United Press International
RALEIGH, N.C. (MARCH 1) UPI - North Carolina State faculty members called Thursday for the dismissal of basketball coach Jim Valvano as allegations of point shaving by players rocked the school where basketball long has been king.

Earlier this year the NCAA imposed sanctions against the basketball program for allowing players to sell athletic shoes and game tickets.

Valvano, who had held the twin titles of athletic director and coach, was forced to resign as athletic director over that scandal but was allowed to stay on as coach.

Thursday, Ray Camp, chairman of the Faculty Assembly which is comprised of senior faculty members, said the group wants Valvano fired as coach as well. He said the group finds it hard to believe Valvano knew nothing of the alleged point-shaving by players on the 1987 team, including Charles Shackleford, who now plays for the New Jersey Nets.

Camp said the Faculty Assembly will present a resolution to NC State

interim Chancellor Larry Montieth calling for the dismissal of Valvano.

''There is a number of senior faculty who want Mr. Montieth to remove Jim Valvano,'' Camp said. ''The only question is whether he should be removed at the end of the year or if he should be removed immediately.

''Mr. Valvano's answer that he did not know anything about the situation is inadequate,'' Camp said. ''We need to know why he didn't know. This is analogous to the Watergate situation. Mr. Valvano seems to not be asking the the right kind of questions.''

The allegations came to light last week when an ABC News reporter asked Valvano about them during a news conference. NC State officials contacted the State Bureau of Investigation and the NCAA.

On Wednesday three people, including one of Shackleford's Wolfpack teammates, told ABC News that the star center on the 1987-88 squad and three teammates conspired to fix a game between NC State and Wake Forest.

The player alleged points were shaved in three other games during the 1987-88 season.

''You're gonna throw the ball away and make sure they get a layup out of it, you do whatever necessary at that particular moment,'' said the teammate, his identity disguised.

''It was just basically for the money because you didn't have the money to eat when the cafeteria was closed,'' the teammate said. ''It was justice in a sense, that here we are, kids playing for a big-time college team, and they are bringing in thousands of dollars a year by playing on TV.''

Gamblers can make big money by betting that an underdog team will beat the point spread set by bookmakers. In the game between NC State and Wake Forest, the Wolfpack was favored by 16 points but won by only four.

Valvano insisted he never suspected his players of point-shaving.

''Obviously, I'm angry and bitterly disappointed ,'' Valvano said after the Wolfpack suffered a 96-95 loss to Maryland Wednesday night. ''I also feel helpless in terms of being a spectator, because I have no knowledge or idea of what happened or transpired.''

ABC reported 32-year-old Robert Kramer masterminded the conspiracy. The three sources said Kramer paid four players as much as $1,000 each per game, using Shackleford to distribute the cash.

Kramer admitted giving about $6,000 in cash to Shackleford during the 1987-88 season but he insists it was to help him resist an unscrupulous

agent, who was pressuring Shackleford to leave school and turn professional.

''He did not engage in point-shaving,'' said Gerrard Hanlon, Kramer's lawyer. ''He did not conspire with anyone to engage in point-shaving.''

Several sources, including a former roommate, said Kramer has a history of heavy sports betting. Kramer's home phone records, obtained by ABC News, revealed more than 330 calls to his bookmaker and sports update lines in a one-month period.

Shackleford has admitted he accepted almost $65,000 from Kramer and another man with North Carolina connections during the 1987-88 season. He said he took the cash because he needed money, and his agent, Salvatore DiFazio, said he has since repaid the two men the money plus interest.

The possibility of point-shaving stunned Wake Forest center Ralph Kitley, who for the past two years has believed the March 6, 1988 game was his best performance ever.

In that game, Kitley scored a career-high 22 points, made 11 of 13 shots and had 12 rebounds at a time when he was averaging only seven points a game.

''It doesn't feel good that in your best game, he let you score points,'' Kitley said after learning of the point-shaving allegations. ''We really worked hard in that game, and I felt good afterwards.

''I've tried to think whether or not he let me score. I remember thinking it was kind of funny. In the beginning of the game, there were a lot of layups I shot. Later on, I hit some shots with him directly on me.

''But that was the way Shack played against us,'' Kitley said. ''I can't really attribute anything to him playing soft.''

BONN, WEST GERMANY (MARCH 1) UPI - Leaders of East Germany's three conservative parties joined West German Chancellor Helmut Kohl Thursday in advocating NATO membership for a unified Germany.

The leaders, whose parties have united to run a single slate of candidates in the March 18 East German election under the name Alliance for Germany, called for unification of the divided country as soon as possible following the election.

The alliance - with a campaign slogan ''Freedom and prosperity, never

again socialism'' - said in a declaration released Thursday that ''new socialist experiments must not be allowed to creep in through the back door.''

Wolfgang Schnur, head of the Democratic Revival party, Pastor Hans-Wilhelm Ebeling, head of the German Social Union, and Lothar de Maiziere, head of the East German Christian Democratic Union, said at a Bonn news conference they held with Kohl that they backed Kohl's views on NATO, unity and Poland's western border.

East German Prime Minister Hans Modrow had said last month he advocated a neutral unified Germany that belonged to neither the western alliance of NATO or the Soviet-dominated Warsaw Pact.

Later at an evening election rally of the alliance in the East German city of Karl Marx Stadt, 100,000 people greeted Kohl with shouts of ''Helmut, Helmut'' and ''Germany, Germany,'' West German television reported.

In his rally speech, Schnur called Kohl ''our great friend'' who planned to unite East and West German economies and currencies as fast as possible.

At the Bonn news conference, the East German political leaders said they agreed with Kohl that it would be better for Europe if a unified Germany was aligned with NATO.

Schnur said he thought Soviet President Mikhail Gorbachev would drop his reservations about a united Germany in the western alliance.

''This is the direction history is going and I think Gorbachev, too,'' said Schnur, a Rostock lawyer.

Kohl repeated his opinion that membership in an alliance will have a different meaning as both NATO and the Warsaw Pact change their structures and all countries move toward disarmament.

Kohl also reiterated his belief that only the government of a unified Germany can give Polish Prime Minister Tadeusz Mazowiecki the assurances he wants that present borders will be respected.

Poland is concerned about its western border, which includes former German territory incorporated into Poland at the end of World War II.

''No one is coupling the issue of the unity of Germany with a shift in borders,'' Kohl said.

In West Berlin, French Foreign Minister Roland Dumas said in a statement Thursday that Poland's present western border must be recognized as the permanent border with Germany.

He called the border, formed by the Oder and Neisse Rivers, inviolable.

ATLANTA (MAR. 1) UPI - At least a dozen states have joined the federal government's war on smoking with plans to restrict or outlaw the habit in public places and devote tax dollars to anti-smoking campaigns, officials said Thursday.

Colorado, Massachusetts, Michigan, Minnesota, Nebraska, New Jersey, North Dakota, Oregon, Pennsylvania, Utah, Vermont and Virginia have newly published plans to implement tobacco prevention programs, the federal Centers for Disease Control reported.

Alabama, Connecticut, Idaho, Illinois, Indiana and Rhode Island include smoking prevention as part of general plans for health service in the 1990s, the CDC said.

The list appears in a survey conducted by the health agency as part of its crusade to encourage states in the 1990s to follow the lead of the federal government, which recently outlawared smoking on most commercial airline flights and banned TV and radio cigarette ads in the early 1970s.

''Our reason for performing this survey is that states and local jurisdictions represent the battle front for the war against smoking,'' said Dr. Ronald Davis, director of the CDC's Office on Smoking and Health.

''Developing a plan is the first step toward fighting tobacco-related disease. It's critical to know what states are doing and what they are not doing so that their efforts can be enhanced and envigorated.''

Nine of the states include in their plans campaigns to persuade legislators to fund health education programs and advertising to publicize the dangers of smoking.

''Part of all the plans would be banning or restricting smoking in public places and the workplace,'' Davis said.

In Massachusetts, the state health department has convinced a local billboard company to donate free space for anti-smoking messages, Davis said.

Other proposals among the states include banning cigarette vending machines, better enforcement of laws already in effect in 44 states banning cigarette sales to minors and requiring a license to sell tobacco.

Minnesota, which enacted the nation's first laws prohibiting smoking in public facilities, has led the nation in the tobacco control effort, Davis said.

''The Minnesota law was one of the first to make non-smoking the norm by banning smoking everywhere except in designated smoking areas,'' he said.

Since the Minnesota bans have gone into affect, about 300 cities and counties have adopted bans on smoking in various places, including hospitals and airports.

Minnesota also pioneered using cigarette excise taxes to fund anti-smoking health education campaigns, including the purchase of air time on television and radio for the project.

California, in 1988, also raised its cigarette excise tax from 10 cents to 35 cents to fund smoking education programs.

#90060u1728 03/01/1990 ~United Press International

(MARCH 1) UPI - Authorities in southern California say they are worried about scores of homes and other buildings that may NOT be structurally sound after yesterday's earthquake. Pomona was one of four cities that bore the brunt of the shaker, which injured at least three people. More than 100 homes have been declared temporarily uninhabitable in Pomona, pending inspection by building officials.

A London newspaper reports that Pan American World Airway eliminated a key safety check just nine months before a Pan Am jet was blown up over Scotland, killing 270 people. The paper says airline officials did NOT check to make sure all the baggage on Flight 103 belonged to passengers, so that the owner of the bag holding the bomb might NOT have boarded the jet. The 1988 crash killed all 259 people aboard the jet plus 11 people on the ground.

Police in New Orleans now say two people were killed in the Mardi Gras celebrations, with a man dying after being assaulted by about 20 youths. David Laws suffered a fatal blow to the head in last night's attack in the French Quarter. NO arrests were made in the attack... which came on the same day as the death of another man who fell from float and hit his head.

#90060u1732 03/01/1990 ~United Press International

SEABROOK, NH (MAR. 1) UPI - Guards at the Seabrook nuclear power plant unfurled an orange banner proclaiming ''License Approved!!!'' Thursday, minutes after the Nuclear Regulatory Commission granted the reactor a full-power license.

Nearby, about 50 anti-nuclear demonstrators, some weeping, gathered in a circle for a moment of silence.

The full-power license for the $6.45 billion plant follows 18 years of efforts to bring the controversial electric generating reactor on line and passionate attempts to block it.

NRC Chairman Kenneth Carr acknowleged efforts to keep the plant from operating are likely to continue. The license will not become effective until Mar. 8, to allow for court review.

Massachusetts Attorney General James Shannon and spokesmen for the Seacoast Anti-Pollution League and the New England Coalition on Nuclear Pollution immediately said they would challenge the license.

''I think that this decision is a very vulnerable decision legally. We have already begun preparing our appeal to go to the court of appeals in Washington,'' Shannon said, citing ''the fundamental safety question ... that in the event of an emergency - particularly in the summertime - that the area around the plant could never be evacuated.''

The plant is in New Hampshire's Seacoast region, where thousands visit beaches in warm weather, often clogging roads with slow-moving traffic.

Sen. Edward Kennedy, D-Mass., long a Seabrook opponents, said the decision reflects the ''public-be-damned'' attitude of the NRC.

''This is a rogue agency that lives by its own set of pro-industry rules '' Kennedy said. ''When the safety regulations don't fit into the licensing scheme, change them. When workers at the plant say there are serious safety problems, dismiss them.''

Kennedy and three other members of the Massachusetts congressional delegation had asked Carr to postpone Thursday's NRC vote until questions about emergency plans for communities within a 10-mile radius of the plant were answered.

But Seabrook spokesman Ron Sher said the charges by plant opponents were nothing new. The emergency plans for Seabrook are the best of any nuclear power plant in the country,'' he said.

''The fact is, Seabrook Station is safe. It is needed,'' Sher said. ''The opponents have lost in court before. The fact is we've got the facts on our side. There wouldn't be any technical reason not to operate Seabrook station.''

New Hampshire Gov. Judd Gregg, who has given only qualified backing to Seabrook, called the licensing decision ''appropriate'' and if the license is upheld in court, ''The plant should be turned on.''

Unlike his predecessor, John Sununu, now White House chief of staff and a strong backer of Seabrook and nuclear power, Gregg has said the plant should be licensed only if it is safe and the power it produces is economical.

A spokesman for the Clamshell Alliance, the anti-nuclear group that has organized mass demonstrations in the past that have led to thousands of arrests, vowed to renew non-violent protests immediately.

#90060u1740 03/01/1990 ~United Press International

CHICAGO (MARCH 1) UPI - Aggressive selling late Thursday forced grain and soybean futures from session highs on the Chicago Board of Trade.

Grain futures were mostly lower and soybeans were steady to slightly higher at the final bell.

Soybeans faltered on commercial selling and the late weakness in soybean oil and meal. Beans had traded higher most of the day, triggering buy-stops on the rally, although closing prices were well below the highs.

Professional buying and the sale of 188,000 tons of corn to Mexico supported corn, but the gains were eroded when the buying dried up.

Wheat traded lower all day and closed at or near session lows. Several contract lows were established in wheat on the lack of export business and the prospect of rain or snow next week in the Wheat Belt.

At the close, corn was off 1/4 to 3/4, soybeans up 3 to down 1/2, wheat off 4 to 5 and oats unchanged to up 2 1/4.

#90060u1756 03/01/1990 ~United Press International

JERUSALEM (MARCH 1) UPI - Prime Minister Yitzhak Shamir and senior cabinet

ministers planned to meet over the weekend to discuss a response to U.S. proposals on advancing the peace process, Israel Radio reported Thursday.

The ''forum of four,'' made up of Shamir, Foreign Minister Moshe Arens, Finance Minister Shimon Peres and Defense Minister Yitzhak Rabin, will meet Sunday to debate a U.S. compromise intended to resolve differences on the makeup of a Palestinian delegation.

The U.S. proposal reportedly calls for selected Palestinian deportees and East Jerusalem Arabs with a second residence in the West Bank to join a Palestinian delegation for talks with Israel.

Shamir's divided right-wing Likud Party opposes Palestinian deportees or East Jerusalem residents participating in the talks in Cairo on elections in the occupied West Bank and Gaza Strip.

The announcement of the meeting came as U.N. Secretary-General Javier Perez de Cuellar appealed from New York for Israel to curb its use of force in the occupied territories and to reopen colleges and universities in Palestinian areas.

In the occupied Gaza Strip, at least eight Palestinians, including two children, were wounded by army gunfire during clashes with Israeli soldiers, Palestinian sources said.

After the ''forum of four'' meets Sunday to consider U.S. peace proposals, the 12-member Inner Cabinet will consider the plan and make a decision by Wednesday, the day the center-left Labor Party has set as a deadline for progress in the peace process.

U.S. Secretary of State James Baker has said the United States has done all it can and is waiting for a response from Israel.

Meanwhile, the crisis within Shamir's right-wing Likud Party continued. Economics Minister Yitzhak Moda'i refused to meet with Shamir and accused the prime minister of destroying the party. Moda'i and four other Likud ministers have formed a separate faction within the party to oppose Shamir.

The political developments came as Perez de Cueller issued an appeal from New York Thursday for Israel to lift harsh measures in the occupied territories, including the closure of Palestinian universities.

Perez de Cueller said he ''particularly deplores'' the high number of casualties resulting from recent clashes in the Rafah area of Gaza, which peaked on Monday. Israeli troops fired on Palestinians, wounding 17 with live ammunition and 51 with plastic bullets, he said.

The secretary-general urged Israel to allow some 18,000 Palestinian

university students to return to classes. Israel closed all colleges and universities in the West Bank and Gaza Strip in the fall of 1987 to quell student unrest.

The secretary-general said he ''once again appeals to the Israeli occupying authorities to abide by their obligations under the Fourth Geneva Convention.'' The convention was established to protect civilian populations living under military occupation.

In the Gaza Strip Thursday, six residents of Beit Hanun village were wounded during a clash with soldiers, Palestinian sources said. A 3-year-old boy, Ahmed Al Kafarna, was wounded in the head by a bullet. He was in serious condition at Ahli Hospital in Gaza City, hospital officials said.

An 8-year-old girl was wounded in the shoulder by a plastic-covered metal bullet, they said.

Rafah town and refugee camp remained under curfew for a fourth day following violent clashes that were caused by the shooting death of resident on Sunday.

The army spokesman said he had no reports of Arab casualties in the Gaza Strip. He said five soldiers and one border policeman were lightly injured by stones.

In Gaza City Thursday, members of the Lawyers Assocation elected a new board that was pro-PLO, Palestinian sources said. The election was seen as a test of the Palestine Liberation Organization's strength in the Gaza Strip, where Islamic fundamentalists have become increasingly politically active.

Six members of the new board were supporters of the Fatah, Yasser Arafat's mainstream faction of the PLO, and one backed the PLO offshoot, the Democratic Front for the Liberation of Palestine.

Earlier this year, the Gaza Doctors Assocation elected eight PLO backers and one supporter of outlawed fundamentalist Islamic Resistance Movement, whose acronym is Hamas. The Engineers Association selected five Hamas supporters and four PLO backers.

#90060u1760 03/01/1990 ~United Press International

DANBURY, Conn. (MARCH 1) UPI - Union Carbide Corp. reported 1989 fourth-quarter net income of $47 million, or 33 cents a share, down 71 percent from $161 million, or $1.17 a share, in the fourth quarter of 1988.

Sales for the period for the multinational chemical corporation, which this week announced it had rejected some restructuring proposals, were $2.08 billion, down from $2.13 billion in the previous year.

Net income for the full year was $573 million, or $4.07 a share, down 13 percent, from $662 million, or $4.88 a share, in full year 1988. Sales for the full year were $8.7 billion, up from $8.3 billion in 1988.

Union Carbide blamed the earnings decline on an after-tax charge in the fourth quarter of $56 million, or 40 cents a share, associated with restructuring the bulk and packaged gas businesses of the corporation's industrial gas subsidiary.

The 1988 earnings reflected an after-tax charge in the fourth quarter of $58 million, or 43 cents a share, to settle litigation stemming from the 1984 gas leak disaster in Bhopal, India.

On Wednesday, Carbide said it had considered a number of restructuring options but had decided against implementing any of them.

''We believe that Carbide should at this time continue on its present course under its present structure,'' said Robert Kennedy, Carbide's chairman and chief executive officer.

Analysts had speculated Carbide was contemplating restructuring to head off possible takeover attempts and might spin off one of its subsidiaries to raise capital.

Kennedy said the company had studied a number of alternatives, but had rejected them.

''Our criteria have been enhancement of both shareholder value and the strength of our core business,'' Kennedy said. ''At this time there is no restructuring alternative that meets both criteria.''

Kennedy told the Wall Street Journal the company had weighed a management-led leveraged buyout of its unit UCAR Carbon Co., which manufactures graphite electrodes and other carbon products, but said that possibility was discarded because of weakening in the junk-bond market.

Kennedy added the company also examined spinoffs or mergers of its units, but not divestitures.

It was believed Carbide was exploring these options with the assistance of Morgan Stanley & Co. and Blackstone Group. Kennedy indicated, however, Carbide's decision did not mean the company would rule out considering any joint ventures or acquisitions.

Earlier this year, the new prime minister of India, V.P. Singh, said his government planned to scrap a $470 million settlement with Carbide in connection with the Bhopal disaster.

Carbide maintains the pact remains binding and that there was no basis for overturning the settlement.

NEW YORK (MARCH 1) UPI - Thousands of business and political leaders, employees and friends celebrated Thursday the colorful life of publisher Malcolm Forbes at a memorial service held to skirl of bagpipes, the blare of French horns and the roar of motorcycles.

The nearly two-hour Episcopal service at St. Bartholemew's Church drew a standing-room only crowd of 2,500 including former President Richard Nixon and actress Elizabeth Taylor into the vast Byzantine-style sanctuary on Park Avenue. Hundreds of others were held behind police barricades on the steps and sidewalk outside.

Traffic on the avenue was diverted for four blocks to accommodate the mourners' limousines. Onlookers cheered such figures as Mrs. Douglas MacArthur, former Defense Secretary Caspar Weinberger, former Mayor Edward Koch and Lee Iacocca with his fiancee, Darrien Earle, as they entered the church.

Some 25 leather-clad motorcyclists riding Harley-Davidsons, Forbes's favorite mount, blasted up Park Avenue just as the memorial service started.

The 70-year-old publisher-sportsman who died of a heart attack last Saturday was remembered as ''the happiest millionaire'' in remarks made by his five children. They said life with father was a matter of ''him bringing us up, and we bringing him up because there was always something of the child in Pop.''

''One of Pop's favorite epigrams was 'He who dies with the most toys wins' '' said son Christopher Forbes. ''I think Pop gets the blue ribbon there.''

Malcolm Forbes Jr., who inherited 51 percent of Forbes Inc., recalled that his father had a simple philosophy.

''He believed things come out for the best in the end,'' Forbes Jr. said. ''Being around him was always uplifting. He loved life, and once told me, 'I'll be the saddest person at my funeral'.''

The eulogy delivered by St. Bartholomew's rector Thomas D. Bowers dealt with the resurrection and ended with the promise that ''Death does not triumph and if we follow the better angels of our nature as Malcolm did, it never will.''

More than 500 Forbes magazine employes, including the uniformed crews of the publisher's private jet and yacht, joined Forbes' divorced wife, Roberta, their four sons and a daughter, and eight granddaughters an infant-in-arms grandson, Malcolm III.

The tiny heir apparent to the Forbes empire protested loudly when his sleep was interrupted by the Forbes family bagpiper, Glenn Ellison, and a choir of eight red-jacketed French hunting horn players flown to the service from the family chateau at Balleroy in Normandy, center for Forbes ballooning activies.

Taylor, swathed in mink and adorned with pearls and diamonds, sat next to Nixon in front left pews opposite the large Forbes family. She had often been escorted by Forbes since he was amicably divorced from his wife four years ago.

Others in the celebrity section were Brown University President Vartan Gregorian, Happy Rockefeller, business tycoons Leonard Lauder, David Mahoney and Leonard Stern, fashion designers Diane von Furstenberg and Calvin Klein, novelists Fran Leibowitz and Dominick Dunne, interior designer Mario Buatta, boulevardier Jerry Zipkin, and society columnist Aileen Mehle.

Forbes body will be cremated and his ashes interred on the Fijian island of Laucala, a copra plantation he purchased in 1970.

#90060u1775 03/01/1990 ~United Press International

NEW YORK (MARCH 1) UPI - Commentator Andy Rooney, suspended for alleged racist comments, will return to ''60 Minutes'' Sunday after serving less than one month of a three-month suspension, CBS announced Thursday.

''It is time Andy returned to his proper place on '60 Minutes,''' CBS News President David Burke said.

Burke yanked Rooney off the air Feb. 8 for three months after he allegedly made racist remarks to a newspaper with a homosexual readership. A CBS spokesman said Rooney would discuss the situation on Sunday's show.

During his absence, ''60 Minutes'' slipped in its overall ratings. It had held the ratings for its time period, but last Sunday evening lost those to ABC's ''America's Funniest Home Videos.''

The crusty essayist was suspended without pay for remarks about blacks he was quoted as making during a telephone interview with Chris Bull, a reporter for the Advocate, a biweekly homosexual newspaper published in Los Angeles. Rooney denied making the remarks and Bull said he did not tape the interview.

''Andy Rooney and I have discussed at length the events that led to his suspension as well as the debate that has ensued over the past month,'' Burke said in a statement.

''Andy has consistently stated publicly over this time that he is not a man who holds prejudice in his heart and mind toward any group in our society.

''Those of us who know him and work with him know two things - first, that is true, and second, it is time Andy returned to his proper placed on '60 Minutes,''' Burke said.

Last week, a militant gay organization expressed anger at reports that Rooney might be reinstated before the three months were up and accused the news media of ignoring Rooney's earlier blast at homosexuals and focusing only on the anti-black allegations.

Homosexual activists had targeted Rooney following a statement he made in a Dec. 28 commentary in which he said ''homosexual unions'' cause premature death.

Later, in a letter to the Advocate before his interview with the paper, he explained, somewhat graphically, why he thought homosexuality ''was in bad taste.''

Thursday, the Gay & Lesbian Alliance Against Defamation issued a statement saying it felt it ''has achieved its goals of creating a positive dialogue with CBS through which we can work to prevent homophobic remarks such as those made in December by Andy Rooney from slipping through the network's existing standards of broadcast acceptability.''

However, the group said it has not heard from Rooney.

''We hope to find a new sensitivity to these issues evident in his broadcast this Sunday,'' the statement said.

Burke, in his statement, said, ''Painful though these events have been, we have all learned a great deal about how sensitive and fragile our society is - how thoughts and words can be misunderstood, how deeply people and groups can be hurt if great care is not taken in conducting public discourse.

''While I have not spoken publicly on the matter, I have listened to the opinions and comments of various gay and lesbian organizations, the NAACP, as well as many individuals whose judgments I also respect.

''I am concerned that the balance between the needs of a news organization to maintain its reputation for fairness and objectivity, free of an inference of bias, and the ability of commentators to speak without undue constraint be maintained,'' he said. ''I believe that balance has been maintained.''

In the interview in the Advocate, Rooney was quoted as saying, ''I've believed all along that most people are born with equal intelligence, but blacks have watered down their genes because the less intelligent ones are the ones that have the most children.''

Rooney hotly denied having made the statement after its publication.

''I not only deny the quote atrtributed to me, I say the quotation was made up by a young reporter who couldn't take notes,'' Rooney said after his suspension.

#90060u1781 03/01/1990 ~United Press International

WASHINGTON (MARCH 1) UPI - Rep. Frank Annunzio, D-Ill., chairman of a House panel overseeing financial institutions, asked the House Intelligence

Committee Thursday to investigate alleged links between the CIA and several failed thrifts.

Annunzio said a former Justice Department prosecutor told a House Banking subcommittee staff member that while looking into a thrift failure ''he was told by FBI agents to drop the investigation of one of the individuals connected with the bank failure because that individual had 'CIA connections.'''

''The prosecutor was also told that the individual involved had a 'get out of jail free card,''' Annunzio said in a letter to Rep. Anthony Beilenson, D-Calif., chairman of the House Permanent Select Committee on Intelligence.

''If these charges are true, then appropriate action must be taken against the CIA,'' Annunzio said in the letter released by his office. ''I know of no 'get out of jail free card' that applies to the CIA. No agency is above the law.''

Annunzio also said that during his panel's preliminary inquiry, staff members interviewed an FBI agent who said the former prosecutor's comments were correct and that statements about CIA connections were made in his presence.

In his letter to Beilenson, Annunzio said his panel began its inquiry after recent news reports, including a series in The Houston Post, about CIA connections to failed thrift institutions.

Annunzio said he was at first skeptical but has become convinced ''that at least some of the allegations have validity.''

A spokesman for the House Intelligence Committee could not be reached for immediate comment on whether the panel would conduct an inquiry.

CIA spokesman Mark Mansfield said the agency ''will fully cooperate with the House Permanent Select Committee on Intelligence in any invesitgation the committee might choose to conduct concerning The Houston Post allegations.''

He said the newspaper series, which ran last month, alleged that the CIA was involved in fraud to help fund its covert operations.

The Houston Post claimed its investigation uncovered numerous links between organized crime figures and CIA operatives, including some involved in gun running, drug smuggling, money laundering and covert aid to the Nicaragua Contra rebels.

The newspaper reported the CIA effort to raise money for covert operations involved a number of schemes to siphon funds from 22 failed thrifts at the

expense of the federal deposit insurance program. The newspaper also reported that the CIA has intervened in criminal investigations of the S&L crisis.

''We will repond in a way that we believe will satisfy the committee that the allegations that CIA was involved in S&L fraud to help covert operations are without foundation,'' Mansfield said.

Mansfield would neither confirm or deny the allegation that FBI agents stopped a Justice Department prosecutor from investigating one individual linked to a failed thrift because that person allegedly had CIA connections.

''We will be happy to respond to the House Permanent Select Committee on Intelligence if they pose that question,'' Mansfield said.

Annunzio said his subcommittee was blocked from conducting its own full-scale investigation because the CIA refused to appear before his panel in a private session to answer questions.

The CIA declined, Annunzio said, on grounds that the House Intelligence panel is the only panel with oversight authority for the spy agency.

''In that regard, I am writing to ask that your committee undertake a complete investigation of the allegations that the CIA was involved in the collapse of some financial institutions around the country,'' Annunzio wrote to Beilenson. ''I am asking that the committee conduct a thorough investigation so that there can be no unsettled questions in this extremely troubling area.''

The allegations of possible CIA involvement with several failed thrifts first appeared in recent news reports, including a lengthy series in The Houston Post, Annunzio said.

Annunzio said that in light of the billions of dollars Congress voted to spend last year to bail out the savings and loan industry and protect depositors, ''We cannot allow any suggestion that the Central Intelligence Agency was behind the failure of any financial institution not to be investigated.''

#90060u1782 03/01/1990 ~United Press International

WASHINGTON (MARCH 1) UPI - House Democratic leader Richard Gephardt called on President Bush Thursday to press the prime minister of Japan to eliminate a $50 billion trade imbalance within five years.

Gephardt, D-Mo., who made fair trade a key issue of his failed campaign

for the Democratic presidential nomination in 1988, said the talks starting Friday between Bush and Prime Minister Toshiki Kaifu will accomplish virtually nothing if they do not focus on specific goals.

''American workers want a results-oriented trade policy,'' Gephardt told reporters. ''The Japanese government should join and honor an agreement that would boost American exports to Japan with an eye toward eliminating our bilateral trade deficit within five years.

''Without a goal, we will wind up with inconclusive negotiations, press releases about what everybody should do, and in two years nothing will have happened about our $50 billion trade deficit.''

Gephardt, as a congressional Democratic leader, is considered a key player in the effort to pressure Japan to expand its markets to U.S. products.

There is widespread criticism in Congress - and growing concern in the Bush administration - that Japan is stalling in talks to expand its markets to U.S. goods. Congress may respond by pressing for retaliatory action.

One agreement with Japan calls for American companies being able to sell to 20 percent of Japan's semiconductor market by 1991, but that this goal likely cannot be reached, Gephardt said.

''The president should tell the prime minister that America will enforce its rights under the agreement if we fail to achieve the agreed-upon level of market access,'' Gephardt said.

''American exporters want on-going negotiations to produce results,'' Gephardt said.

#90060u1829 03/01/1990 ~United Press International

WASHINGTON (MARCH 1) UPI - Defense Secretary Dick Cheney and Gen. Colin Powell, chairman of the Joint Chiefs of Staff, appealed to Congress Thursday to allow them to use a budgeting tool to avoid tens of thousands of troop cuts.

''Damage is already being done to our military capability,'' Powell warned the House Foreign Affairs Committee. ''Because troops read newspapers. They don't understand ... why there's stories out there saying 60,000 to 80,000 may be tossed out sometime this year.

''They thought they had a contract with this government,'' Powell said of the soldiers. ''If we start to break that trust ... then we'll have done grevious harm to our force structure, our armed forces.''

House Armed Services Committee Chairman Les Aspin, D-Wis., is blocking the Pentagon's attempt to shift $850 million from other accounts into payroll to protect military personnel from across-the-board budget cuts this year.

Aspin contends the Bush administration agreed to the across-the-board cuts in a budget deal last year with Congress, arguing at the time it was prepared to take deep defense cuts but now trying to avoid ''pain'' associated with them.

Pentagon spokesman Pete Williams has said that, without the shift being approved, up to 68,200 U.S. troops could be laid off this year. Tens of thousands of others would be denied promotion or transfers, he said.

Cheney telephoned Aspin Wednesday night from Chicago, where he had a speaking engagement, but said he was unable to change Aspin's mind. Cheney smiled, however, when asked by a reporter afterward if his request was

doomed.

''We'll see what happens next,'' he said.

At the hearing, Cheney told the panel, ''If I had to take that cut in the military personnel account ... I'm going to do enormous damage to our current arrangements with the uniformed military.

''We're currently working on the problem,'' Cheney said. ''We hope to be able to solve it. But it's a classic example of how Congress, if we make the wrong decision, can do serious damage to our military capability, long-term damage.''

Few expressed sympathy, however. And Rep. Howard Berman, D-Calif., said, ''I think the chairman of the Armed Services Committee deserves a medal.''

Berman complained of the administration's ''hypocrisy of last November and December'' in seeking the deep cuts and added, ''I'm sorry we have to go through this.

''But the administration has to be held accountable in some fashion for the political decisions that it has taken ... now the price is being paid for that decision,'' Berman said.

''The people who will pay the price isn't the administration,'' Cheney replied. ''The people who will pay the price are the men and women who wear the uniform.''

''You had a unilateral ability to protect personnel accounts in the (budget-cutting) sequestration,'' Berman told Cheney ''You wanted to protect your other accounts. Now you want to have the cake and eat it too.''

-30- 3207

#90060u1856 03/01/1990 ~United Press International

LONDON (MARCH 1) UPI - Prime Minister Margaret Thatcher moved Thursday to quell a mounting rebellion within her party against a controversial tax on people that has been a key factor in her plunging popularity and has a precedent of inspiring revolt.

Pound sterling dropped 2 1/2 cents to $1.6655 in what financial analysts attributed to the government's low standing, which is also linked to high interest rates and wider signs of economic stagnation.

Thatcher's poll tax replaces property tax rates with a tax on people living in each household at a level stipulated by local councils.

She maintains that property rates are inefficient, expensive to collect and unfair because landlords are made to bankroll the costs of the community.

A poll tax will increase government revenue and is in keeping with her philosophy that all citizens should fund essential services.

However, critics say the poll tax is kinder to the rich at the expense of the poor, citing instances of childless aristocrats residing in palatial houses who will pay less than low-income parents of several children. Charges can sometimes be higher in poorer areas because of greater community costs.

Poll taxes have already been ordered in Northern Ireland and Scotland, but thousands of people are refusing to pay because they say they cannot afford the increased sum. The scheme is be extended to England and Wales in April, but has been come up against sharp resistance.

Opinion polls have shown a steady slide in Thatcher's popularity with one of the main factors being the poll tax. A major survey last Sunday placed the opposition Labor Party of Neil Kinnock 17 points ahead of the Conservatives, its strongest standing since Thatcher took power in 1980.

Many conservatives also oppose the poll tax, and 18 members of the West Oxfordshire county council resigned on Monday to protest against the measure being imposed in the area, a stronghold of Thatcher's party.

Public ire had been inflamed by Conservative member Ian Bruce registering to pay the charge for his flat in central London, an area where the poll tax will be about half of that of his constituency of South Dorset.

Enviornment Secretary Christopher Patten added to the furor by admitting that average poll tax bills will average about $630 per head, some $166 more than what the government had previously predicted.

Thatcher fought back during a raucous question time in Parliament, blaming local councils for ''gross overspending'' that led to inflated tax estimates.

She also said education costs would not be shifted from local councils to the central government, a move that would shave billions of dollars from poll tax bills, because this would mean an income tax increase.

However, some Conservative members broke ranks and publicly scorned the scheme, many out of concern for their party's chances in elections that must be held before mid-1992.

''It is now getting to the point where the government will have to look

for an alternative,'' Local Government Minister Sir Rhodes Boyson was quoted as saying in the Evening Standard.

If history always repeats itself, Thatcher should take heed.

Rural laborers and poor craftsmen in 1381 revolted against a poll tax levied by Richard II and plundered Kent and Sussex counties before marching on London, where an accomplice lowered a drawbridge and let the rebels in to pillage the city.

The rebels captured and decapitated the archbishop of Canterbury and the king's treasurer, and the 14-year-old monarch almost conceded to all of their demands for greater social equality.

However, Sir William Walworth, the mayor of London, killed rebel leader Wat Tyler during negotiations with the king, and the revolt dissipated.

#90060u1874 03/01/1990 ~United Press International

WASHINGTON (MARCH 1) UPI - The Pentagon, although it already has scaled back its spending plans by $74 billion, still needs to chop another $138 billion from budgets for 1992 through 1994, congressional auditors said Thursday.

Testifying before the Senate Armed Services Committee, senior officials of the General Accounting Office said the Pentagon should update its five-year defense plans to give Congress a better idea of the long-term implications of budget decisions.

The administration is proposing that defense spending after inflation fall by 2 percent a year each year, which translates to reductions of $212 billion from spending anticipated the last time a five-year plan was written - in 1989, before the radical changes in Eastern Europe and decisions to scale back defense programs.

The Pentagon is working on revising its spending plans to identify what programs might be cut, but GAO head Charles Bowsher told the committee the Pentagon told his organization that rapidly changing events ''make it difficult, if not impossible, to make decisions at this time on where and how these reductions will be made.''

''While we do not think that the Defense Department should make hasty and premature decisions, it is important that these decisions be made soon,'' Bowsher said.

Under questioning from Committee Chairman Sam Nunn, D-Ga., Bowsher said it would be wiser for Congress to order the Pentagon to slow production of

major weapons such as the B-2 stealth bomber so that testing is completed before the program is too far into production. That, he said, would avoid the pitfall of finding out later that a weapon needed expensive fixes, as was the case with the B-1 bomber.

He acknowledged, however, that under a go-slow approach unit costs would rise over the long term.

Bowsher also argued against stretching out production of a number of weapons just to keep all the programs alive.

He told Sen. Timothy Wirth, D-Colo., that any benefits from a ''peace dividend'' - which is lower-than-anticipated spending rather than cash in hand - probably would not show up for several years because of the costs of reducing the size of U.S. forces.

''You don't get the savings in the first year or two,'' he said.

Wirth suggested that once the Pentagon gets the size of the military down, it should seek to stabilize defense spending at about $200 billion. He said that is roughly equal to the level of U.S. spending during the Cold War period, except during the Korean and Vietnam wars.

Bowsher also said that the administration, by using surpluses in funds such as the Social Security account to cover some of the deficit and thus make it appear smaller, is creating ''the illusion that the deficit problem is being solved when in actuality it is getting worse.''

''If we continue along this same path, we can expect the national debt to increase to $4.5 trillion by fiscal 1995. A debt of this magnitude would require annual interst payments of over $335 billion and would represent the largest single item in the federal budget,'' he said.

The fiscal 1991 budget request is for $295 billion for Pentagon and military construction programs, and another $11 billion for nuclear weapons programs at the Energy Department.

#90060u1901 03/01/1990 ~United Press International

UPLAND, CA (MARCH 1) UPI - Ignoring the grumblings of aftershocks, Southern Californians Thursday began assessing the damage inflicted by an earthquake that left the structural integrity of scores of buildings uncertain.

The losses were expected to easily climb to $10 million or more.

At least four people were injured in Wednesday afternoon's quake, which

measured 5.5 on the Richter scale and was felt over thousands of square miles. The heaviest damage occurred in the foothills of the San Gabriel Mountains on the Los Angeles and San Bernardino county line.

About 40 fire and building safety officials were deployed Thursday morning to begin inspecting homes and buildings in Pomona and La Verne, two cities near the epicenter that were among the hardest hit.

Pomona's 20-year-old City Hall, where massive window panes were shattered and cracks developed in stairwells, was among the buildings closed for repairs, fire inspector Ron Gomez said.

A number of inspectors with the state Office of Emergency Services were also working to tabulate damage estimates and offer state assistance to communities.

In addition, about 30 members of the California Conservation Corps were deployed to help with chimney removal and general cleanup efforts.

The four cities where most of the damage was concentrated - Upland, Pomona Claremont and La Verne - declared local states of emergency to help release funds to pay for repairs and to keep bystanders out of unsafe areas.

Police in Pomona said damage in the city totaled an estimated $7 million, mostly to City Hall and a Methodist church.

Wednesday's 3:43 p.m. temblor tossed boulders onto mountain roads, disrupted phone service, toppled power lines, ruptured water and gas mains and cracked roofs. However, Southern California's major buildings and infrastructure fared well.

Scientists said at least 30 ''significant'' aftershocks measuring 2.3 or stronger have been recorded since the temblor. Two 2.5 aftershocks struck early Thursday, one at 1:02 a.m. and the other at 4:11 a.m.

The strongest aftershock hit at 7:24 p.m. Wednesday and measured 4.8 on the open-ended Richter scale.

Seismologists said there was a slight chance of an even larger quake striking the region in the next few days.

''These aftershocks can continue for weeks, months and even years,'' said Bob Finn, a spokesman for the Caltech Lab Seismology Laboratory in Pasadena.

The quake struck near the juncture of two faults, the Cucamonga and the Sierra Madre, but seismologists remained uncertain Thursday which fault

was actually responsible.

A number of roads blocked by minor rockslides were closed for a time but most were at least partially reopened Thursday morning. Mount Baldy Road in the San Gabriel Mountains above La Verne was opened to residents only.

Fifty homes and other buildings in La Verne received minor damage, primarily crumbling chimneys and broken glass, assistant city manager Jeff Allred said. A Stater Bros. supermarket was closed after an overhead beam was damaged.

The most severe damage in La Verne occurred at an auto parts warehouse, where a brick wall collapsed and the roof caved in. In Claremont, 18 buildings sustained damage, including one at Pitzer College. In Upland itself, an apartment complex was partially evacuated due to damage.

The quake, striking in rocky, hilly terrain that is highly fractured by various faults, was centered 3 miles northwest of Upland, about 35 miles northeast of downtown Los Angeles. Described by seismologists as a ''textbook earthquake,'' it was felt over an area of 13,000 square miles, a region larger than the state of Vermont.

The quake, state transportation officials said, underscores the need to move ahead with strengthening of highway overpasses that are vulnerable to seismic damage.

Lasting 15 to 20 seconds, the quake was felt as a rolling motion rather than a jolt. Seismologists said it was a ''slip-strike quake'' with horizontal rather than vertical ground motion.

It was preceded by a smaller foreshock that struck the same area at 12:37 p.m. and registered 3.6 on the Richter scale. Hall Daily of Caltech said it was believed to be along a frontal fault system along the northern edge of the San Gabriel Valley.

It was the strongest quake in California since a 7.1 jolt ravaged the San Francisco Bay Area Oct. 17, 1989, killing 67 people, injuring nearly 3,000 and causing $7 billion damage. A 7.1 quake is 100 times stronger than a 5.1 temblor, so Wednesday's quake was far less powerful than the Bay Area quake.

#90060u1928 03/01/1990 ~United Press International

(MARCH 1) UPI - Workers are searching for more victims in the rubble of a hotel fire that killed at least 14 tourists and injured about 70 others in Cairo, Egypt. Witnesses say sparks from an oven in an Arabic-style display tent started the early morning blaze, which had people jumping out of

windows to escape.

Officials say an earthquake that hit southern California caused Millions of dollars in damage and left many buildings structurally unsound. About 100 homes in Pomona were declared temporarily uninhabitable pending inspection by building officials. Yesterday's quake was measured at five-point-five on the Richter scale and was felt from Santa Barbara south to the Mexican border.

President Bush is expected to sound a law-and-order Republican theme with crime as the major issue in the state's gubernatorial race. Bush visits the new North Los Angeles County Jail to dramatize his call for tougher sentences. The visit comes against a backdrop of debate over crime-fighting credentials in the race to succeed California Governor Deukmejian.

Leaders of East Germany's three conservative parties are joining West German Chancellor Helmut Kohl in advocating NATO membership for a unified Germany. The politicians also are calling for unification of East and West Germany to take place as soon as possible after this month's East German election.

NASA lifted the veil of secrecy on the shuttle Atlantis mission to say the craft comes back to Earth on Sunday, landing in the California desert. Atlantis is on a secret military voyage, presumably to deploy a spy satellite. NASA officials at Cape Canaveral, Florida, say the five-man crew is doing fine and the shuttle is performing satisfactorily.

#90060u1945 03/01/1990 ~United Press International

WASHINGTON (MARCH 1) UPI - The nation's mayors Thursday lined up behind proposed legislation aimed at reversing a series of Supreme Court decisions last year that sharply narrowed the nation's civil rights laws.

Indianapolis Mayor William Hudnut, testifying on behalf of the U.S. Conference of Mayors, told the Senate Committee on Labor and Human Resources that ''affirmative action plans are working well in the city governments'' but last year's rulings by the Supreme Court ''departed radically'' from the consensus on civil rights built up over the past 20 years.

''If we don't have polices in both the public and private sectors which provide opportunities for women and minorities, the unfortunate fact of the matter is that the 'good ol' boy' network will prevail and most of the (employment) decisions will favor white males,'' Hudnut said.

Congress is considering the proposed Civil Rights Act of 1990, which would

overturn Supreme Court rulings in five cases. The rulings shift the burden of proof in bias cases to those claiming they were victims of discrimination and allows whites to file reverse discrimination suits long after an affirmative action plan is in place.

The Bush administration, which first labeled the rulings ''technical'' and said it saw no need for remedial legislation, has more recently indicated it would support overturning two of the five cases.

But it remains opposed to repealing the Wards Cove decision, which said employers no longer had to show that hiring practices having a ''disparate impact on women and minorities were caused by legitimate business needs.

Wards Cove shifts the burden of that proof to the victims who must prove the employer has no legal justification for exclusionary practices.

Hudnut told the committee that the U.S. Conference of Mayors had unanimously adopted a resolution calling for the overturning of the Wards Cove decision, citing a conference survey in which city officials said the ruling would make it much more difficult to end discriminatory hiring practices.

The mayor quoted city officials from Denton, Texas, and Salt Lake City, Utah, as examples.

''It is our view that the Wards Cove decision represents a regression in progress toward equal employment opportunity,'' the Denton officials wrote.'' Salt Lake City, Utah officials said shifting the burden of proof ''may require proving 'intent,' which is almost impossible to prove.''

A second High Court ruling addressed by Hudnut, Martin Vs. Wilks, allows white employees to challenge affirmative action plans as reverse discrimination years after they have been implemented.

''The effect of Martin vs. Wilks has been to increase uncertainty among many employers, particularly public employers, about the legality of their affirmative action programs and to encourage needless, time-consuming and expensive litigation,'' Hudnut said.

Hudnut, who tangled bitterly with the Reagan administration Justice Department in the mid-1980s when it sought to challenge Indianapolis' affirmative action plan, said such programs ''are working well in city governments.''

But he said since the Wilks decision, plans have been challenged as reverse discrimination in a number of cities, including Birmingham, Ala., Omaha, Neb., Boston and Memphis, Tenn.

In addition, the Lawyers Committee for Civil Rights Under Law has identified cases in San Francisco, Albany, Ga., Toledo, Ohio, Cincinnati, Ohio, and Gadsen, Ala.

#90060u1946 03/01/1990 ~United Press International

BOSTON (MARCH 1) UPI - A comparison of twins who served in the military during the Vietnam War shows men who saw intense combat were far more likely to suffer post-traumatic stress disorder than their brothers who did not, researchers said Thursday.

A study of 2,092 pairs of identical male twins uncovered a strong link between the intensity of combat a man experienced and chances he would suffer some symptoms of the disorder, said Jack Goldberg, a co-author of the report.

Goldberg's team examined the prevalence of the syndrome when both twin brothers served in Southeast Asia, when neither one served in the area and when one brother was assigned to the war zone and one was not.

The greatest differences were found among the 715 twin pairs who had the experience of one brother serving in Southeast Asia and one who was posted elsewhere, said Goldberg, of the University of Illinois School of Public Health in Chicago.

Most dramatic was the contrast between men who served at the highest levels of combat and brothers who were assigned outside of the war zone, he said.

Those twins who experienced ''high combat'' were 12 times more likely than non-combatant brothers to have persistent dreams about what happened and 10 times more likely to have frequent painful memories, said Goldberg, whose study appeared in the Journal of the American Medical Association.

Using twins solved a problem that plagued earlier investigations of post-traumatic stress and combat - namely the difficulty of finding two well-matched groups for comparison purposes.

''Before this study, there were questions about whether men who were in Vietnam were somehow more predisposed to developing the disorder - even before they went - than other people,'' Goldberg said.

The fact that one twin could develop the syndrome while ''his brother, who is 100 percent like him genetically and grew up in the same household did not, blows apart the predisposition argument,'' he said.

In their study, the researchers defined post-traumatic stress in terms of

three sets of symptoms. The first involved reliving traumatic experiences through nightmares, flashbacks and painful memories.

The second set of symptoms involved ''stimuli avoidance'' such as losing interest in daily activities and feeling that life is not meaningful. The third included states of ''increased arousal'' such as insomnia, irritability and jumpiness.

Although the study turned up a clear association between combat and all types of symptoms, Goldberg said the link was the most pronounced in respect to dreams and recurring bad memories.

In order to identify the twin pairs, all of whom served in the military sometime during the period 1965 through 1975, Goldberg said the researchers had to set up their own computerized registry by sorting through 70 million government documents.

He stressed most study participants are ''not people in hospitals, not people suffering from massive psychiatric problems. These are average Joes with families and jobs who are generally doing OK but may suffer some degree of impairment.''

Goldberg said his results generally conform to several previous studies which showed post-traumatic stress is prevalent among Vietnam veterans and is persistent even 15 years after the end of the war.

He said the findings underscore the importance of maintaining the treatment centers that the Veterans Administration, which funded the study has established at scores of sites around the country.

''Just because these guys are getting older doesn't mean that the problem has disappeared,'' Goldberg said.

#90060u1962 03/01/1990 ~United Press International
BOISE, ID (MARCH 1) UPI - The Idaho House will consider an anti-aborton measure its sponsor said Thursday may give the Gem State the most restrictive law in the nation - depending on action in other states.

The bill, sponsored by Rep. L. Ed Brown, would prohibit abortion as a means of birth control. The House will consider it Monday on General Orders, which means it could be amended in a multitude of ways.

''I believe it would be the most restrictive, (in the nation),'' Brown said.

The bill would make all abortions illegal except in cases of rape, incest, profound fetal physical or mental disability, or a threat to the life or

the health of the mother.

Supporters believe it would halt up to 93 percent of abortions in Idaho, but opponents cited a wide range of constitutional questions.

Linda White, executive director of Planned Parenthood of Idaho, said two-thirds of all women have unwanted pregnancies during their lifetime.

''If you pass this law, you will be saying to the women of Idaho that the punishment for contraceptive failure is forced child birth,'' White said.

The bill would also allow county prosecutors, women subject to abortions, the parents of minor children and prospective fathers to seek injuctions to prevent abortions.

It would impose civil penalties for those who violate injunctions, and would allow parties to seek damages against those who performed or tried to perform abortions.

Rep. Pam Bengson, chairman of the House State Affairs Committee - where 10 abortion proposals where initiated this session - said she believes the bill would likely clear the House.

However, Bengson said she had doubts as to whether it would clear the Senate.

The House will also consider a bill, sponsored by Rep. Gary Robbins, that would repeal Idaho's abortion ''trigger law.'' Leadership will decide when that bill will be considered, Bengson said.

The trigger law calls for mandatory prison terms of one to five years for women who have abortions and mandatory prison terms of two to five years for doctors who perform them.

The trigger law would take effect only if the Supreme Court's decision in Roe vs. Wade is overturned.

The committee voted 16-4 Thursday to hold in committee a bill sponsored by Sen. Karl Brooks that would prevent the state from interfering with a woman's decision to have an abortion prior to ''fetal viability.''

The commmitte also voted to hold, on a voice vote, a joint resolution that would place on the ballot a constitutional amendment to ban governmental intrusion into a person's private life.

#90060u1963 03/01/1990 ~United Press International

NEW YORK (MARCH 1) UPI - A stockholder in Harcourt Brace Jovanovich Inc. has filed a class action lawsuit accusing the company and five executives of misrepresenting Harcourt's financial condition to inflate its stock price.

In a suit filed Wednesday in U.S. District Court, Violet Klein said the defendants issued materially misleading statements in the company's annual and quarterly reports.

The result was investors were led to believe Harcourt, through its cash flow alone, could handle debts it took on in recapitalizations undertaken in 1987 and 1988 to thwart a hostile takeover attempt, the suit said.

The lawsuit said the statements were made last year between March 30 and Nov. 28, during which time the company's stock traded as high as $18.625 a share on the New York Stock Exchange. "Had the truth been known, the stock would not have been trading that high," said Stephen P. Hoffman, an attorney representing Klein. In afternoon trading Thursday, Harcourt's stock was up 12.5 cents to $2.875 a share.

The suit claimed Orlando-based Harcourt, which has interests in publishing, insurance and amusement parks, and key executives made statements to the effect that the company could bear the debt it took on withhout selling any major assets.

Last November, however, the company sold six theme parks, including four Sea World parks to Anheuser-Busch Cos. for $1.1 billion. A spokesman for Harcourt said the company had no comment on the suit.

Named as individual defendants were John Berardi, senior vice president and treasurer; Ralph Caulo, president and chief executive officer and chief operating officer; William Jovanovich, chairman and former CEO,; Randall Krizek, controller and Margaret Mary McQuillan, senior vice president and secretary.

#90060u1982 03/01/1990 ~United Press International

SEATTLE (MARCH 1) UPI - Several hundred Nordstrom Inc. employees rallied in front of the flagship store Thursday to show their support for the company, which has been hammered with bad publicity and two suits accusing it of labor and securities law violations.

Between 300 and 400 workers gathered on the Westlake Mall plaza adjacent to the downtown Nordstrom store to say they work for an excellent company and that a union pressing labor law accusations against Nordstrom represents only a small number of employees.

"I've been a Nordstrom employee for 11 years, and I'm proud to say I work

for the best retail company in the world," said Joe Dover, a rally organizer whose speech was greeted with shouts and cheers.

The rally was organized in response to two lawsuits filed this week as well as a lengthy front-page article in The Wall Street Journal that portrayed the upscale clothing chain - a darling of Wall Street investors - as hellish on employees who frequently do chores without pay and compete in a pressure-cooker environment.

The United Food and Commercial Workers union, which represents about 2,000 Nordstrom workers in the Puget Sound area, filed a class-action suit Wednesday on behalf of 50,000 current and former company employees nationwide.

The suit seeks reimbursement of back pay and penalties against Nordstrom for violating wage statutes. The union claims Nordstrom has unwritten policies that pressure employees into working off the clock.

Another lawsuit was filed Tuesday by three Nordstrom shareholders, who said management knew for up to a year that its pay policies could have a potential adverse effect on the company's earnings, but hushed up that information to artificially inflate the price of Nordstrom stock.

Greg Helean, head of a workers group called Nordstrom Employees for Accurate Representation, said he had been gathering signatures to get the union decertified as the representative of employees at six Puget Sound area stores.

"The vast majority of employees we have approached are happy to sign," he said. "We're confident we won't have any problem getting at least 50 percent of the membership to sign."

He said no action can be taken, however, until the National Labor Relations Board completes an investigation into the union's back pay claims and a second charge that the company changed its vacation and benefit packages without first informing the union.

Pepper Armstrong, a salesman with 20 years at Nordstrom who currently works in the Bellevue, Wash., store, said while many employees do perform company chores on their own time, they do it on their own initiative.

"I work at Nordstrom because they let me generate my own business," he said. "I have never once been pressured into doing these extra things. This is how you build business."

Tamara Soreano, who has been with Nordstrom for ten years, said the "union has done an extremely poor job." "Nordstrom is just a fabulous company," she said. "What the union has done is totally sad. It's amazing what five

or ten people have done against 30,000 employees (around the country)."

She said when employees do company work off the clock, they do it voluntarily and are not pressured into doing unpaid work. "The union is making it sound like they are putting knives to our throats," she said. "Whatever I do outside on my own time comes back to me tenfold in terms of business."

PARIS (MARCH 1) UPI - A Shiite Moslem clergyman said Thursday the government of former Prime Minister Jacques Chirac had pledged to pay $3 million for the release of French hostages and urged France to settle the debt or face ''electricity'' from Iran's Lebanese allies.

Sheikh Abdul Monem Zein, the Senegal-based spiritual leader of the large Lebanese Shiite community in West Africa, said in an interview with the Arabic magazine Al Hayat that he was a key intermediary in negotiations that led to the release of the last French hostages in Lebanon.

The hostages - journalist Jean-Paul Kauffmann and diplomats Marcel Carton and Marcel Fontaine - were released by the pro-Iranian Islamic Jihad organization in May 1988.

''In 1988, it was I who handed back the hostages at the Summerland Hotel in west Beirut, it being understood that I should subsequently go to Paris where all the conditions would be satisfied, including the payment by France of a sum of $3 million,'' Zain told the magazine.

Zein told the magazine, which was released simultaneously in Paris and London, that he had repeatedly asked France to pay the $3 million in messages transmitted through the French Embassy in Senegal and Senegalese President Abdou Diouf.

''A great part of the conditions for release (of the hostages) have been fulfilled with the improvement of Franco-Iranian relations,'' Zein said. He said he hoped ''the French will turn the page definitively by satisfying all the conditions.

''We will continue to demand this and there will continue to be electricity in the air,'' he said.

Zein did not elaborate on his comment about ''electricity in the air'' and said he had ''not the least idea'' why a French DC-10 airliner was bombed over Niger Sept. 19, 1989, with the loss of 171 lives.

But Liberation newspaper Wednesday ran an investigative report suggesting the terrorist attack on the Union of Air Transport DC-10 may have been ordered in revenge for the non-payment of a ransom that former Interior Minister Charles Pasqua allegedly promised France would pay.

Chirac, now the mayor of Paris, again denied Wednesday his government promised money to the pro-Iranian Hezbollah that ran the kidnappings under the code name Islamic Jihad.

But Socialist Interior Minister Pierre Joxe said Thursday the Chirac administration had never explained all the strands of the hostage affair to the government of Socialist President Francois Mitterrand, who defeated Chirac in presidential elections in 1988 days after the French captives were freed.

''The government never received from the preceding authorities and government a detailed and complete report either on the transactions or the undertakings made, for France, by Monsieur Chirac, Monsieur Pasqua and their emissaries. This leads to there being suspicion,'' Joxe said.

#90060u1994 03/01/1990 ~United Press International

WASHINGTON (MARCH 1) UPI - Members of Congress encouraged Defense Secretary Dick Cheney Thursday to look for alternatives to the U.S. naval and air bases in the Philippines, with one taking a critical jab at President Corazon Aquino.

''I really do not know what Mrs. Aquino was up to,'' Rep. William Broomfield, R-Mich., told Cheney in an obvious expression of irritation.

''She not only snubbed you,'' Broomfield said, ''but she snubbed the entire (bloc of) members of Congress who have been strong supporters of the Philippines.''

Broomfield, the ranking Republican member of the House Foreign Affairs Committee, was referring to Aquino's refusal to meet with Cheney during his visit to the Philippines last month. Cheney was testifying before the panel on his 1991 budget request.

Aquino said at the time that she would not meet with Cheney because of U.S. news reports that other Bush administration officials who had visited her had told her to get her government in order.

Cheney did not respond directly to Broomfield's criticism of Aquino.

Joining Broomfield, Rep. Doug Bereuter, R-Neb., encouraged Cheney to continue to look for alternatives to the two major U.S. bases on the Philippines - Subic Bay Naval Base and Clark Air Base.

''They are important to us but are not essential at all costs,'' Bereuter said. ''If we go, it's their (the Philippines') loss. But we ought to be able (to be in the position) to go.''

Cheney said Subic and Clark are important U.S. military facilities, ''but there's a limit.''

''There's a limit to what we're able to pay to retain those facilities,'' he added. ''There are options. We can go elsewhere. ... I think it would be a tragedy for the Philippines.''

The leases on the U.S. bases expire in 1991 and Cheney said he expects the ''very difficult'' negotiations with the Philippine government to begin shortly.

Formal U.S. talks with Singapore began Monday on the possibility of using bases there to replace the ones in the Philippines.

BRUSSELS, BELGIUM (MARCH 1) UPI - Austria, which has prized its neutrality since World War II, must accept the idea that future European Community policy will include positions on security and defense, a senior EC official said Thursday.

Sir Leon Brittan, EC Commission vice president, welcomed Vienna's application for membership in the community last July but warned that ''a long path of negotiation lies ahead'' before Austria can become a member nation.

''I do not believe that there is anyone who can doubt the European vocation of Austria, nor underestimate the political, economic and cultural gains which Austrian membership would give to an enlarged community,'' Brittan told a banking forum in Vienna. A text of the speech was released in Brussels.

''Austria for its part must be prepared to accept explicitly that future developments of the community in the security and defense spheres cannot be ruled out, nor vetoed in advance by an applicant,'' Brittan said.

''But I do not believe that such problems are insuperable, and I personally consider that the prize of ultimate membership would be good

not only for Austria but for Europe as a whole,'' Brittan said.

In its letter of application, the Austrian government said the country wanted to continue its policy of permanent neutrality as an EC member.

EC officials have often pointed out the ultimate community aim is not only to achieve economic and monetary union but also political union, which would inevitably include security aspects. Currently, EC ministers discuss only economic aspects of security matters.

ADDIS ABABA, ETHIOPIA (MARCH 1) UPI - Ethiopia said Thursday that a major famine was possible in the northern part of the country unless money is found for emergency transport of food into areas cut off by civil war.

Relief and Rehabilitation Commissioner Yilma Kassaye asked donor governments and international agencies for $14 million a month to fund airlifts and trucking from southern Ethiopia to feed 3.4 million people at risk.

The government has no direct access to the north by road, because the central province of Tigre is in rebel hands. In the past three weeks, it also lost its access from the Red Sea, after Eritrean secessionist rebels launched a fierce attack on the key port of Massawa, 470 miles north of Addis Ababa.

The attack scuttled provisional plans to distribute donated food brought in through Massawa.

As an alternative, Yilma said, ''a minimum of 583 long-haul trucks and 14 Hercules-type aircraft will be needed for the immediate delivery of relief if a repeat of the 1984-85 tragedy is to be avoided.''

In 1984-85, the north was swept by a drought- and war-induced famine that killed up to 1 million people in Ethiopia and neighboring Sudan.

The government said Wednesday it planned to fly urgent supplies from the southern port of Assab, and was working on an arrangement to truck more through rebel lines in Tigre.

Yilma rejected the notion of moving food into northern Ethiopia from neighboring Sudan.

''It is a violation of the sovereign rights of the country,'' he said.

The Ethiopian government has fought a long-standing war of words with rebel groups who say they are as capable as Addis Ababa of supplying relief food - for example, from Sudan.

The Eritrean People's Liberation Front, the group fighting for control of Massawa, has in recent months repeatedly accused the government of demanding control of famine relief for political ends.

NEW DELHI, INDIA (MARCH 1) UPI - Former Prime Minister Rajiv Gandhi's Congress (I) Party, trounced in five state assembly elections just months after losing national power, was poised to retain Maharashtra and salvage one of the last bastions of its crumbling political empire, results showed Thursday.

The Congress (I) Party had captured 82 seats in the 288-member legislature of Maharashtra, the most industrially developed state in the impoverished nation of 820 million and the home of Bombay, India's financial capital on the Arabian Sea coast.

The party was leading in incomplete returns for more than 30 other races for the assembly.

''We are on victory trail in Maharashtra,'' Congress (I) Party spokesman M.J. Akbar told correspondents in New Delhi.

Electoral returns showed the Congress (I) Party's rivals garnering at least 82 seats. The organization running second in Maharashtra was the right-wing Hindu alliance of Shiv Sena and the Bharatiya Janata Party, which captured 53 seats.

Prime Minister V.P. Singh's Janata Dal trailed with 16 seats. Janata Dal is the main component of the National Front minority coalition government, which took power when Gandhi failed to retain a majority in the lower house of Parliament during Nov. 22-26 general elections.

Eight states, all ruled by the Congress (I) Party, and the tiny southeastern coastal territory of Pondicherry held assembly elections Tuesday, but ballot counting in Maharashtra began a day after the rest.

Between 60 percent and 70 percent of more than 215 million registered voters cast ballots in a total of 1,610 races. Poll-related violence Tuesday and Wednesday claimed at least 97 lives, 80 of them in

northeastern Bihar.

Results from the other polls showed the Congress (I) Party suffering major losses just five years after Gandhi the organization to record parliamentary majorities and control of 14 states.

Since its massive electoral victory five years ago, the Congress (I) Party has seen a crumbling of the political empire built by Gandhi's late mother and predecessor, Indira.

Barring an unlikely reversal in trends from Bihar, the Congress (I) Party will not control a single state in the northern Hindi-speaking ''Cow Belt '' its traditional stronghold and India's most influential political region by virtue of its huge population and economic power.

Outside Maharashtra, the only states of any national political influence controlled by the party are southern Karnataka and Andhra Pradesh. But neither of those rivel the strength of northern India, and even with a victory in Maharashtra, the party's power will be greatly diminished.

In a major boost to the Janata Dal, which was forged by Singh around Congress (I) Party dissidents, voters in eastern Orissa gave it a crushing majority of more than three-fourths of the assembly's 147 seats. Gandhi's party garnered only 10 seats, final results showed.

The major benefactor of Tuesday's elections was the BJP, which rode a resurgence of Hindu nationalism to its first ever state election victories storming to a more than two-thirds majority in Madhya Pradesh and ousting the Congress (I) Party in northern Himachal Pradesh.

The BJP and the Janata Dal combined to topple the Congress (I) Party in northwestern Gujarat and western Rajasthan states and were widely expected to form coalition governments, returns and major dailies said.

Jaipal Reddy, a spokesman for the Janata Dal, said a leadership committee would meet Friday to discuss the formation of state governments, including possible coalitions with the BJP.

''We are happy with the outcome,'' he told a news conference.

The wins consolidated the gains made by the BJP in the general elections in November, when it expanded its power in the lower house of Parliament from two seats to 88. That allowed the BJP to provide the support on the floor of the chamber that Singh required to form his minority administration.

It declined, however, to join the ruling coalition.

In other results, the Congress (I) Party headed for defeat in Bihar, outpaced by a four-party alliance led by the Janata Dal.

Results were slow in coming from the far-flung northeastern Himalayan state of Arunachal Pradesh, where Gandhi's party was declared the winner in four seats, three of them unopposed. The party was projected to retain power there.

In a victory affecting prestige more than power, the Janata Dal and an electoral partner won a one-seat victory over the ruling Congress (I) Party and an ally in Pondicherry, results showed.

WASHINGTON (MARCH 1) UPI - Senate leaders and the Bush administration emerged from 22 days of private talks and announced Thursday a compromise on clean air legislation, but environmentalists immediately attacked the plan.

The bipartisan agreement on reducing acid rain, toxic emissions and urban smog was hailed by Senate Democratic leader George Mitchell of Maine as ''far more comprehensive and stringent'' than the current Clean Air Act.

''The compromise bill is sound and comprehensive legislation that dramatically expands and strengthens the clean air law and does it in the most cost-efficient manner possible,'' Mitchell told reporters.

''As in any negotiation, compromises were made,'' acknowledged Mitchell, who has been criticized by environmentalists for bowing to White House pressure to weaken the clean air bill now in the Senate.

But Mitchell maintained that, even with the compromises, ''There will be significant improvement in the quality of American air. The requirements are far more comprehensive and stringent than under current law.''

Roger Porter, head of the White House Domestic Policy Council and chief negotiator for the administration, said President Bush was ''extraordinarily pleased'' with the compromise.

''It is a milestone,'' Porter said. ''It is a tremendous step forward. We are pleased almost beyond expression by the product'' of the negotiations.

William Reilly, the first professional environmentalist to lead the Environmental Protection Agency, said, ''This is a truly historic moment for the environment. I consider it an excellent piece of legislation.''

Porter said the administration would back the compromise bill through Senate deliberations, but that the commitment did not extend to the expected House-Senate negotiations from which the final bill will emerge.

Still, Porter said the administration would not seek to ''undo'' the compromises reached with the Senate by lobbying the House, where clean air legislation is mired in committee.

Several lawmakers aligned with environmentalists criticized the Senate compromise, notably Sen. Frank Lautenberg, D-N.J., who charged that Bush's efforts to weaken the Senate clean air bill betrayed his campaign promises to protect the environment.

''The president said he wanted to be the environmental president, but what I saw in these recent days of negotiations was 'just say no' to the environmental measures needed to clean up our air,'' he said.

''We are still compromising America's health,'' said Lautenberg, who vowed to try to toughen auto emission limits and controls on toxic air pollution.

Environmentalists pronounced the compromise unacceptable and said they would lobby for stronger amendments.

"We think the deal needs major surgery," said Daniel Weiss, a lobbyist for the Sierra Club, who said the compromise would allow smog to persist in dozens of big cities.

The compromise appeared to clear the way for Senate action on clean air legislation, which has been held up since late January by opposition from Bush and senators unhappy with costly provisions to reduce acid rain and toxic, cancer-causing pollution.

Mitchell said he would introduce the compromise Monday on the Senate floor and that he expects extensive debate and many amendments but no deliberate efforts to block the bill. Senate Republican leader Robert Dole of Kansas agreed, saying, ''We are all on board. No one is going to hang back.''

Sen. Robert Byrd, D-W.Va., a leader of Midwest and Appalachian senators opposing the acid rain controls, said the compromise went far enough to meet his concerns and he will not try to block the bill.

''I'm still concerned about job losses and economic dislocation (but) I'm not going to engage in any filibuster,'' said Byrd, who added that we would seek ''improvements.''

The compromise includes substantial concessions to Byrd and Midwest senators who fear the acid rain controls will devastate the high-sulfur coal industry. The lawmakers also say their constituents face huge electricity rate increases because most of the 107 power plants targeted for acid rain cuts under the bill are in the Midwest and South.

Another breakthrough concerns limits on tailpipe emissions from automobiles, the major contributor to urban ozone smog, which now exceeds federal health standards in 101 cities. Car industry officials had said the emission limits in the original Senate bill were too costly.

#90060u2103 03/01/1990 ~United Press International

WASHINGTON (MARCH 1) UPI - The Justice Department filed a civil rights suit Thursday seeking to force an all-male military academy in Virginia to admit a woman who wanted to attend the state-supported college.

The lawsuit named the state of Virginia, the Virginia Military Institute and Gov. Douglas Wilder, the first elected black governor in American history.

Wilder, who was sworn into office in January and met privately earlier this week with Attorney General Dick Thornburgh, has not taken a public position over the military school controversy.

The suit, filed in federal court in Roanoke, Va., accused school officials of violating the Civil Rights Act of 1964 and the equal protection clause of the U.S. Constitution.

The college is located in Lexington, Va., and its all-male policy came under attack when a female high school senior in northern Virginia applied for admission. The young woman has not been publicly identified.

The all-male school had been anticipating the federal government's lawsuit and joined an alumni group in filing two previous actions against the United States. The Justice Department also asked that those suits be dismissed.

The academy, known as VMI, is one of two state-supported military schools in the nation that maintains a single-sex admissions policy. The Citadel in Charleston, S.C., has also come under Justice Department scrutiny.

The Citadel also has rejected an unidentified woman who wanted to become the first member of the school's Corps of Cadets.

The lawsuit, signed by Thornburgh, said, ''Defendants have engaged in discrimination on the basis of sex by maintaining a policy of limiting admission to the four-year undergraduate degree program of VMI to males only, and by refusing to consider qualified females for admission to the four-year undergraduate degree program of VMI.''

The suit said, ''This discrimination on the basis of sex constitutes a denial of equal protection of the laws of the United States.''

The suit also names the superintendent of the school, John W. Knapp, its president, Joseph M. Spivey III, and the politically influential members of ''the board of visitors.'' The board oversees policy at the institution.

While Wilder has avoided the controversy, Virginia's attorney general, Mary Sue Terry, filed a lawsuit against the Justice Department after the state was warned to end the all-male policy at VMI. That suit resulted in the irony of a female attorney general trying to keep women out of a state-financed institution.

Terry, a Democrat who is widely expected to run for governor in 1994, recently acknowledged the political liabilities inherent in defending the 150-year-old military school.

While she has the support of many old-line Virgina residents for defending the unique traditions of VMI, she has also alienated many women. Terry has refused to state her personal views, suggesting as the state's top legal officer she has an obligation to defend the institute.

A spokesman for Terry refused to comment on the federal government's lawsuit.

Shortly after Terry filed suit against the government, the Virginia Legislature considered a measure that would require all state-supported schools to refrain from any form of discrimination.

The proposal, by Virginia state Sen. Emilie Miller, was aimed at ending VMI's males-only policy.

But the bill met a quick death when it was assigned to a committee headed by state Sen. Elmon Gray - a former chairman of the VMI board of visitors.

#90060u2106 03/01/1990 ~United Press International

LUSAKA, Zambia (MARCH 1) UPI - Black nationalist leader Nelson Mandela told the architects of U.S. congressional sanctions against South Africa that they must push the white minority government to the negotiating table by maintaining punitive measures.

Mandela and leaders of the African National Congress also expressed concern over unconfirmed reports that Vice President Dan Quayle would visit South Africa when he attends Namibia's independence celebrations March 21.

ANC Foreign Affairs Secretary Thabo Mbeki said such a visit would be ''ill-timed and premature.''

In an hour-long session, 10 congressmen faced Mandela and the 35-member executive body of the ANC in a Lusaka convention center, asking the movement's leaders what course they believed U.S. policy should take in the wake of President Frederik de Klerk's bold racial reform measures -

announced last month and aimed at ending the country's protracted racial conflict.

Rep. William Gray of Pennsylvania, house majority whip and leader of the delegation, also extended a rare invitation to the 71-year-old Mandela to address a joint session of Congress when he is able to travel to the United States.

The ANC was in Lusaka, established as its headquarters during the 30 years it was banned in South Africa, to determine what role Mandela would assume in the organization and discuss growing demands it renounce its armed struggle against the white-minority South African government.

In an opening speech, Mandela declared the U.S. comprehensive anti-apartheid act of 1986 that imposed stinging sanctions against South Africa a ''tremendous achievement'' by ''the most powerful and influential legislative body in the world.''

The sanctions law, which cut direct flights to South Africa and sharply curbed bilateral trade and exchanges of technology, was approved by Congress over a veto by former President Reagan.

"Our message, which we hope you will accept in the spirit in which we make it, is that you must continue to maintain sanctions against the country," Mandela told the legislators, who will fly to South Africa Friday for talks with de Klerk.

In an editorial published Thursday, the Afrikaans South African newspaper Beeld, which has close ties to the Pretoria government, criticized ''these pious American friends.''

''Their motives are crystal clear,'' the Beeld editorial stated. ''After the elections in Nicaragua, which were a bonus for the Republicans, the Democrats have to come and polish their image a little for elections to the House of Representatives later this year in the U.S., and South Africa and sanctions are the polish of hypocracy for their little shoes on their home stages.''

Democratic Rep. Stephen Solarz of New York told the ANC in Lusaka there was general agreement in Congress ''that it would be inappropriate and counterproductive for us to lift sanctions at this point in time.''

But he indicated some members of Congress wanted to provide de Klerk with ''encouragement'' if he meets the ANC's preconditions for power sharing negotiations by lifting a 44-month state of emergency and freeing all political prisoners.

The delegation also included Rep. Ronald Dellums, D-Calif., Rep. Howard

Wolpe, D-Mich., Victor Fazio, D-Calif., Beverly Byron, D-Md, Michael Andrews, D-Texas, Dean Gallo, R-NJ and Jim McCrery, R-La.

Earlier in the day, officials of the ANC held their first formal talks with Mandela in a bid to define his role in the movement and hammer out plans for preliminary talks with Pretoria and rebuilding the ANC inside South Africa after 30 years underground.

Mandela, released from prison Feb. 11, held various top positions within the ANC before his arrest in 1962 and was a driving force behind the movement's military wing. Senior officials said it was doubtful he would formally assume the presidency, a post now held by Oliver Tambo who was hospitalized in Sweden following a stroke.

The ANC also was expected to debate calls by Zambian President Kenneth Kaunda and Anglican bishops in southern Africa to suspend its armed struggle, appeals coinciding with growing signs of moderation from hard-line military leaders in the movement.

ANC Secretary General Alfred Nzo emerged from the first day of the two-day meeting to say it had gone well but declined further comment pending a news conference Friday.

In London, organizers said Mandela will visit Britain next month to attend a massive charity concert by Tracey Chapman, Neil Young and other performers.

#90060u2121 03/01/1990 ~United Press International

ATLANTA (MARCH 2) UPI - Coca-Cola Co. said Thursday it has begun

nationwide distribution of caffeine-free Coke Classic, which was favorably received by the public in market tests last fall.

Ira C. Herbert, president of Coca-Cola USA, said the caffeine-free version should be available nationwide by April 1.

The new product will be launched with the advertising theme, ''It's the Real Thing ... Only Caffeine-Free!''

''The caffeine-free cola segment is one of the fastest-growing in the soft drink industry,'' said Herbert.

Coca-Cola Classic and its caffeine-free counterpart ''will work effectively in tandem,'' he added.

John C. Maxwell, a beverage industry analyst with Wheat, First Securities in Richmond, Va., said Coke wants to bolster its share of the caffeine-free cola segment because it is the fastest growing in the soft drink industry, up 14.2 percent last year.

''It's an excellent time to introduce an extension of the Classic product line,'' said Maxwell. ''It should add to Coke's share of the total caffeine-free market.''

When it was test-marketed in 10 cities in October, analysts said they viewed caffeine-free Coke Classic as riding to the rescue of caffeine-free New Coke, which has floundered since it was reformulated in 1985.

Coca-Cola introduced New Coke April 23, 1985, billing it as the new flagship product of the soft-drink giant. But less than three months later the company relented, under pressure from Coke fans who did not like the taste of the new product, and brought back the old flavor under the Coke Classic name.

Maxwell said caffeine-free New Coke has a 0.2 percent share of the beverage market and continues to slip.

But he said caffeine-free Diet Coke is doing well in the overall beverage market with a 3.5 percent share.

''People are moving away from caffeine and toward diet products, and this provides the best of both worlds,'' said Maxwell.

#90060u2133 03/01/1990 ~United Press International

FORT LAUDERDALE, FL (MARCH 1) UPI - A ton of cocaine hidden in a fruit shipment along with more than $500,000 was seized from a Broward County

home, and six Colombians were arrested on drug charges, federal agents said Thursday.

The cocaine was seized Wednesday night as it was delivered by rental truck to a home in the affluent Weston subdivision, said John Fernandez, spokesman for the Drug Enforcement Administration in Miami.

The six Colombian nationals were arrested and charged with drug smuggling and drug trafficking charges. Agents also seized the money and six vehicles, he said.

The arrests were the result of a three-week investigation and surveillance by the Florida Joint Task Group, which includes agents of the federal Drug Enforcement Administration and U.S. Customs Service.

U.S. Customs agents discovered the cocaine Feb. 8, hidden inside a shipment of 55-gallon drums containing guava pulp that had arrived aboard an Amerijet cargo flight from Caracas, Venezuela, officials said.

Each of 12 drums contained about 340 pounds of cocaine packaged by the kilogram and sealed in fiberglass boxes, agents said.

Task force agents began watching the shipment, and made the arrests after the delivery to the home, Fernandez said.

Arrested and charged with drug smuggling and trafficking were Noris Calle, 36, and Henry Cano, 33, both of Weston; Mauricio Calle, 27, of Fort Lauderdale; Gabriel Munoz, 22, and Ruben Dario Rosa, 33, both of Miami, and Juan Alvarez, 28, of Miami Beach.

Norris Calle and Cano, both of whom lived in the Weston home, arranged Wednesday for the transfer of the shipment from a cold storage facility in northwest Dade County to Euro Equipment Co. in Miami, officials said.

Agents observed as the drums were picked up by several suspects and transferred to a rental truck driven by Cano, Fernandez said.

Agents followed the truck to the Weston home, where they watched the defendants unload the drums and remove the cocaine, he said. Task force agents and Broward County Sheriff's officers executed a search warrant and arrested the suspects.

The home, which is worth an estimated $1 million, is subject to confiscation by the federal government, Fernandez said.

WASHINGTON (MARCH 1) UPI - Rep. Newt Gingrich of Georgia, self-styled leader of Republican conservatism, said Thursday that democratic reforms worldwide have ''vindicated the policies that the conservatives have advocated for decades.''

But the assistant GOP House leader told a gathering of the Conservative Political Action Conference that popular support for conservative ideals will depend on moving from ''opposition conservatism'' to ''governing conservatism.''

''We can beat the left,'' Gingrich declared. ''The question is, can we govern. Governing is incredibly harder than opposing.''

In a well-received speech opening a three-day conference, Gingrich delivered a familiar tirade against Democrats, branding them ''dumb, ''weird'' and wedded to the ''bureaucratic welfare state.''

While the conservatives are congratulating themselves on the recent ouster of communist leaders, from Poland to Nicaragua, they also are searching for ways to keep the conservative ''movement'' alive without the central issue of the Cold War.

David Keene, chairman of the conference, said in some respects the movement may have put itself out of business by achieving what it set out to do - riding the world of communist leaders.

''Anti-communism is the glue that kept disparate (conservative) points together,'' he said. ''If the suggestion is that it will make life difficult in other areas then the answer is yes.''

Gingrich seemed to agree conservatives must close ranks, admonishing his audience to to get involved in a ''holy war'' over such issues as abortion. However, he predicted the Republican Party platform will take the same anti-abortion stance in 1992 that it took in 1988.

Gingrich said conservatives should make a cut in the capital gains tax rate the cornerstone of the GOP's domestic agenda.

''I think you ought to call the capital gains cut a conservative jobs bill '' he said, echoing President Bush's argument that cutting taxes on profits from investments in stocks and real estate would boost the economy.

Gingrich accused Senate Democratic leader George Mitchell of Maine of trying to scuttle the capital gains cut, which he said was needed to ''avoid recession.''

Gingrich also accused Democrats of believing that ''weakness is good.'' He pointed to the Democrats' contention that Sunday's victory of Nicraraguan

opposition candidate Violeta Chamorro would have been made possible long ago if the United States had not supported the Contra rebels.

''You have on the left a goo-goo mentality that doesn't make much sense,'' he said. ''There really is a left and it's dumb.''

Gingrich also branded the Democrats ''weird'' for their position on safe sex. He said Gov. Richard Celeste of Ohio, a Democrat, has backed a safe sex campaign in which men dress up as pregnant women and approach people on the street to discuss safe sex.

''One thing about the left is that they are so weird that the truth is weird,'' he said.

#90060u2176 03/01/1990 ~United Press International

NEW YORK (MARCH 1) UPI - Cleanup crews Thursday mopped up 30,000 gallons of heavy oil that leaked from a barge at an Exxon dock, temporarily closing the main entrance to New Jersey's chief port area and washing sticky tar balls ashore at Sandy Hook.

The Coast Guard reopened the Kill van Kull waterway, between Staten Island and New Jersey, at 4 p.m. Thursday, about 36 hours after Wednesday's spill.

Little oil was left in the water, but tar balls had collected along the Staten Island shoreline and some beaches on the New Jersey side of the waterway, the Coast Guard said.

Six skimmer boats and several vacuum trucks along the shore were sucking up the gooey mess left on Atlantic beaches at Sandy Hook, N.J., off New York Harbor, said Coast Guard Petty Officer Gary Rives.

''When the oil mixes with water, it forms these little globs of tar,'' he said. ''They're from about the size of a pinhead to a lemon.''

Rives said the muck was first spotted at noon on Thursday, and a crew had been dispatched to Sandy Hook to begin a cleanup there. He said there was no evidence the tar balls had spread elsewhere.

''Earlier there had been a slight sheen spotted near Coney Island and Gravesend Bay, but that wasn't anything that could be cleaned up,'' he said. ''For the most part, the oil has been concentrated in Kill van Kull.''

Coast Guard officials were still surveying the scene on Thursday and were expected to make a report later in the day or on Friday, he said.

The Kill Van Kull waterway was closed Wednesday while workers tried to contain the thick industrial fuel oil, which leaked from a 12- by 6-inch hole in a ''damaged'' tank on the barge tied up at an Exxon dock.

The executive officer of Coast Guard Group New York, Commander Richard Softye, planned to inspect the spill area later Thursday and decide whether the waterway could be reopened.

Capt. Robert North, Coast Guard commander of the Port of New York, said two local companies hired for the cleanup were using six oil-skimming vessels and a boom, which was placed around Port Bayonne to prevent pollution of the opposite Staten Island shore. He said Eklof Corp., which owned the barge, had agreed to pay for the cleanup.

A spokewoman for New York State Attorney General Robert Abrams said Thursday a criminal investigation had been started to pinpoint responsibility for the leak.

''We are working with the Staten Island attorney general and the state Department of Environmental Conservation to determine whether Exxon, Eklof and the barge owners were in compliance with state laws,'' said Leslie Gersing.

She said it was too early to tell the extent of damage to the environment, but noted, ''You don't need a bird kill to know there's been damage.''

''As we said during the Exxon spill in January, this is an environmentally sensitive area, and any additional damage is not going to help,'' she said.

Informed Wednesday that Exxon disclaimed any liability because the oil was actually owned by an ''international customer'' once it was on the barge, Abrams said, ''To disclaim liability would not seem to be a responsible act at this time.''

Al Appleton, New York City Department of Environmental Protection commissioner, said in addition to two major spills in the New Jersey Terminal area since Jan. 1 there had been 20 small spills of 50 to 100 gallons each.

''This is a continuing pattern of failure on the part of the petroleum industry and it's time for this industry to be better,'' Appleton said. ''This is the kind of spill that hurts the water environment a great deal and is an insult to the land environment.''

Kill Van Kull, a narrow natural channel connecting New York's Upper Bay to Newark Bay, is one of the two principal entrances to the New Jersey Terminal area, which includes Port Elizabeth and Port Newark. The other entrance is the Arthur Kill waterway.

The Coast Guard closed the Kill Van Kull to all marine traffic from the Bayonne Bridge to Constable Hook Reach.

A spill of 567,000 gallons of home heating oil from Exxon pipelines connecting Bayonne and Linden, N.J., closed nearby Arthur Kill briefly Jan. 2 and polluted more than 5 miles of shoreline including several waterfowl rookeries. That spill took more than a month to clean up.

Both New Jersey and the city of Elizabeth have filed damage suits against Exxon. The city's suit charged that the company took care of ''obvious cleanup'' but did little to clean piers, boats and wharves in the area.

(MARCH 1) UPI - Rescue workers say they have found 16 bodies in the rubble of a blaze that engulfed a five-star hotel early today outside Cairo, Egypt. An Interior Ministry spokesman says eight of the dead are French and two are from Finland, with six bodies NOT yet identified. About 70 people were injured as the flames sent people jumping out windows and tying bed sheets together to escape.

The Nuclear Regulatory Commission voted today to grant a full-power operating license to New Hampshire's Seabrook Nuclear Power Plant. N-R-C chief Kenneth Carr says that because he expects judical review of the decision the panel's order becomes effective on March 8th. Since the utility first requested permission to build the plant 18 years ago, controversy has centered on whether it could be run safely.

President Bush goes to jail, making a stop today at the new North Los Angeles County Correctional Facility... a maximum-security jail built with

134-Million dollars in state and local funds. Bush is sounding a law-and-order Republican theme since crime is shaping up as a major issue in California's gubernatorial race. The president's stop at the yet-to-be-occupied jail serves to dramatize his call for tougher sentences for criminal offenders.

The nation's mayors are lining up behind proposed legislation aimed at reversing a series of Supreme Court rulings that restrict civil rights laws. Indianapolis Mayor Richard Hudnut says last year's high court decisions- in his words- ''departed radically'' from the consensus on civil rights built up during the past 20 years. Hudnut testified on behalf of the U-S Conference of Mayors before a Senate panel today.

WASHINGTON (MARCH 1) UPI - Defense Secretary Dick Cheney's 1991 budget took a beating on Capitol Hill Thursday - and he wasn't even appearing before a congressional committee whose job is to handle the spending proposal.

''It just seems to me that the drama and sense of change sweeping Europe has totally bypassed the Pentagon,'' Rep. Peter Kostmayer, D-Pa., a member of the House Foreign Affairs Committee, told Cheney.

The defense secretary was testifying before the committee about his national security strategy and $308.9 billion defense budget request for fiscal 1991.

''I think you've missed it entirely,'' Kostmayer said to Cheney of the changes in Eastern Europe and the Soviet Union. ''We need to cut the defense budget. We need a real cut in defense spending.''

In line with those comments, committee Chairman Rep. Dante Fascell, D-Fla. told Cheney the defense budget needs changes ''to be realistic,'' and Rep. Tom Lantos, D-Calif., called Cheney's moves to hold down spending only ''a modest gesture.''

''I do not sense in your statements the intensity of the sea change that is taking place'' in Europe, Lantos told Cheney and Gen. Colin Powell, chairman of the Joint Chiefs of Staff.

But it was Kostmayer's exchange with Cheney that became somewhat heated.

Cheney began to explain to the Pennsylvania Democrat that his proposed budget was a 2 percent reduction, adjusted for inflation, from this year's defense spending plan when Kostmayer sought to interrupt him.

''You had your chance, Congressman, now it's my turn,'' Cheney said.

''No sir! No sir!'' Cheney said loudly, refusing requests by Kostmayer for him to yield.

Cheney, a former member of the House Republican leadership, told Kostmayer he didn't ''recall'' his supporting the defense budget even when the Soviets ''were occupying Eastern Europe, invading Afghanistan.''

Kostmayer replied that he had supported defense increases in the past ''but I'm not going to do it this year. And neither is a majority of this committee and neither is a majority of Congress.''

''It's not what the American people want. You're not going to get $303 billion,'' Kostmayer told Cheney, ''and you don't deserve it!''

Cheney replied that the two of them had ''a fundamental disagreement'' unlikely to be resolved.

WASHINGTON (MARCH 1) UPI - The Air Force's report that it found no link between the health disorders of Vietnam veterans and exposure to herbicide Agent Orange is ''patently false'' and ''misleading,'' Sen. Tom Daschle, D-S.D., charged Thursday.

The Air Force announced last week that its third, updated study of Agent Orange, which was used as a defoliant to clear out jungles during the Vietnam War, found no link between veterans' exposure and health disorders.

''The statement that the study found 'no evidence' is patently false,'' Daschle said in a statement. ''Once again, to the detriment of the veteran the Air Force's rhetoric doesn't match their findings.''

He said the study found increases in cancers, certain neurological diseases and other health disorders in veterans exposed to Agent Orange, including a higher incidence of psychological and sleep disorders, pulse irregularities and, among blacks, a higher ratio of cell abnormalities.

''Although the report claims that there is not sufficient evidence at this time to link health problems with exposure, it also clearly states that the exposure index used to prepare the report 'is not a good measure of actual dioxin exposure.' So to assert flatly that health disorders cannot be associated with exposure is misleading,'' he said.

Daschle said the Air Force in 1985 prepared a draft study that showed a doubling of birth defects among children of veterans who sprayed Agent Orange, but that the Air Force has refused to make the draft public and still has not completed the final study.

WASHINGTON (MARCH 1) UPI - Housing and Urban Development Secretary Jack Kemp announced a new $78.8 million affordable housing program Thursday he said could produce as much as 20,000 new housing units for the poor.

Kemp, acting in his capacity as chairman of the Federal Housing Finance Board, said because the $78 million will be used as interest rate subsidies, the program will generate new housing valued at $2 billion.

''I strongly believe that it will be a benefit to our nation, particularly America's poor families who want and need affordable housing and opportunities for homeownership,'' Kemp said.

Kemp said the program regulations explaining the competition rules for the funds will be published in the March 2 Federal Register.

Under the program, each of the 12 Federal Home Loan Banks is to establish funds for very-low and low-and-moderate income rental and owner-occupied housing.

The $78 million is a percentage of the banks' income from the previous year.

Only financial institutions affiliated with the Federal Home Loan Banks are eligibile to apply for the Affordable Housing program funds.

Kemp said higher priority would be given to applications that encourage homeownership, expand the low income rental housing stock, make federal property available for low-income housing, promote nonprofit and community participation and empower the poor through resident management and homesteading, further fair housing and create permanent housing for the homeless.

#90060u2229 03/01/1990 ~United Press International
NEW YORK (MARCH 1) UPI - The dollar continued its upward surge Thursday in New York trading as traders turned their sights from Japan's yen, under

Federal Reserve protection, to the confidence-losing West German mark.

There was ''dollar-buying across the board,'' said Robert White, vice president for corporate trading with First Interstate Bank Corp., Los Angeles. He said trading was distinguished by the emergence of a clear ''dollar move'' as opposed to exchange shifts set off by other currencies.

But this didn't mean outright bullish sentiment on behalf of the dollar, White said. The U.S. currency's restored strength stems from market disappointment with the deutsche mark, shaken by the two Germanies' top-speed move towards reunification, and continued yen weakness.

The latest information to unnerve the market was a report by the West German daily Bild-Zeitung that the deutsche mark will be the only German currency by July 1, just four months away. ''I think the market may have read that and grown a bit concerned about the situation,'' White said.

Near the end of the New York trading day the dollar was fetching 1.7185 West German marks, up from 1.7050 Wednesday. The U.S. currency was quoted at 149.75 Japanese yen, also up from 149.02 the day before.

Many economists say German monetary unification, particularly if it provides for the conversion of East German marks to deutsche marks at a one-to-one rate of exchange, could prove economically dangerous. And national reunification is likely to fan the flames of inflation, they say.

Players, meanwhile, ''stopped selling the yen because they were bumping heads with the Fed,'' which has been selling dollars all week to protect the Japanese currency, said Barclays Bank corporate trader Robert Hatcher.

Instead they put the deutsche mark under selling pressure and ''ran it through some stops'' as high as 1.7230 before it fell off, he said.

But the yen will remain vulnerable as long as the Bank of Japan holds off on its long-awaited discount interest rate, he said. ''Until then people will stay long (net holders of) dollars against yen.''

In New York the British pound eased to $1.6635 from $1.6770.

Other dollar rates: 1.5090 Swiss francs, up from 1.4995; 5.8045 French francs, ahead from 5.7640; and 1,267.50 Italian lire, up from 1,259.50.

The dollar also gained in Europe, closing in Frankfurt at 1.7015 German marks compared with 1.6955 marks Wednesday.

It gained as well in Zurich, Paris, Brussels and Milan at 1.5005 Swiss francs against 1.4900, 5.7835 French francs compared with 5.7250, 35.47 Belgian francs against 35.31 and 1,263.30 lire against 1,250.05.

In London the pound slid to $1.6655 from $1.6905 amid heated controversy over a poll tax. The furor included the resignations of 18 Conservative Oxfordshire councillors and triggered heavy pound-selling.

Earlier, the dollar soared to a 37-week-high in Tokyo, closing at 149.78 yen against 148.52 the day before, shrugging off Bank of Japan intervention.

Republic National Bank in New York closed cash gold at $406.75 an ounce, up from $406.50 Wednesday. The New York Commodity Exchange settled gold at $406.20 an ounce, up from $406.10. In Zurich gold closed unchanged at $407.50 an ounce, but in London gold rose to $407.75 an ounce from $407.50.

Republic closed cash silver at $5.165 an ounce, up from $5.14. Comex spot silver moved up to $5.154 an ounce from $5.127. Zurich silver rose to $5.20 an ounce from $5.10. London silver was unchanged at $5.10.

(MARCH 1) UPI - Residents in some neighborhoods in southern California remain out of their homes after yesterday's earthquake, which was measured five-point-five on the Richter scale, caused Millions of dollars in damage. Officials say the quake left suspect the structural integrity of scores of homes and other buildings. In Pomona alone, more than 100 houses were declared temporarily unihabitable pending an inspection of the buildings. The cities of Pomona, La Verne, Calemont and Upland took the brunt of the quake's force. At least three people were hurt.

A party involving about 250 sea lions is going full-blast at San Francisco's Fisherman's Wharf, to the delight of some but to the annoyance of others. One boat owner forced to move his 65-foot yacht from its 50-thousand-dollar berth says the mammals have- ''the highest-priced squatters rights in the city.'' But one visitor from Chicago says the trip to the wharf is ''better than the zoo.''

#90060u2251 03/01/1990 ~United Press International

MOSCOW (MARCH 1) UPI - Mikhail Gorbachev turns 59 on Friday with some critics accusing him of allowing the Soviet Union slide into anarchy and others charging that he seeks near dictatorial powers.

A group of admirers in the United States, organized by a retired U.S. naval officer sent the Soviet leader a 59-foot-long birthday card signed by 2,000 Americans who are ''thankful for the changes in Eastern Europe and the Soviet Union.''

The Soviet leader, however, does not need more foreign fanfare. The

challenge for this concensus Man of the 1980s everywhere but at home is to win the hearts of his own countrymen.

Many Soviets acknowledge Gorbachev carries the weight of the world on his shoulders as he tries to undo an economic and cultural catastrophe wrought over more than five decades by his predecessors.

But few are willing to give him much credit for his performance nearly five years since he assumed power in March 1985.

Amid the course of discontent, several lawmakers recently offered rare words of compassion.

''I look at him with real sympathy,'' said Sergei Stankevich, one of the Parliament's brightest young stars who celebrated his 36th birthday Sunday.

''I do understand how tremendous his burden is,'' Stankevich said of Gorbachev. ''I have seen this burden close up. I've stood next to him and seen the dark circles under his eyes. I've seen him go a bit weak in the knees and lean on the table for support,'' Stankevich added.

''This burden is nearly unbearable for one man. He has already taken enormous risks. And now he will have to take on even more weight after five impossible years.'' he said.

But Gorbachev shows no signs of slowing down. He handles his massive responsibilities with the verve of a man half his age, hosting a stream of foreign leaders at the Kremlin and presiding over day after day of 12-hour sessions of the newly rambunctious Parliament.

''He is a very strong man.'' said Yuri Golik, a legislator from the Kuzbass coal region in western Siberia. ''Even physically he is very strong. He can meet with deputies from Russia and speak for four straight hours, then go to a Politburo meeting and talk for another three hours.''

Stankevich and Golik are hardly Gorbachev groupies. Stankevich is a leader of the Inter-Regional Deputies' Group that has sharply criticized Gorbachev for failing to take radical enough steps while Gorlik represents the militant Kuzbass coalminers who spearheaded a nationwide strike last summer.

But both men, and other politicians who see him close up express admiration for Gorbachev.

''I'm not a very emotional man, but when I was near Gorbachev for the first time, I felt an enormous energy and magnetism,'' Gorlik said.

''Someone once said that to stand next to Lenin was to stand next to an

engine. It's exactly the same with Gorbachev.''

Trying to explain Gorbachev's aura, Gorlik said: ''He commands respect by the force of his intellect. He goes up to the (parliamentary) tribune without notes and can broadly, intelligently and forcefully talk about the most complicated issues in great detail.''

Gorbachev's full persuasive powers were on display Tuesday when he convinced Parliament to approve a presidential system over the objections of lawmakers claiming the new post will vest too much power in his hands.

''Those who clamored for a presidency at the top of their lungs just three or four weeks ago now say the presidency will lead to a dictatorship - to the end of democracy and perestroika, to their burial,'' Gorbachev told the deputies.

''Only those who do not want to see a change for the better can argue for the postponement of solutions to major problems,'' he said.

Stankevich predicts that Gorbachev will give up his post as Communist Party general secretary by the end of the year.

Gorbachev will likely make the dramatic move, Stankevich says, once the strengthened presidency has gained final approval in two weeks by the Congress of People's Deputies, the Parliament's parent body, and after the 28th Party Congress in early summer when the Central Committee's remaining hard-liners will be removed.

''It's absolutely clear that if he wants to accelerate his reforms, he should drop his party post," Stankevich said. "I think he is quite ready to do this."

#90060u2255 03/01/1990 ~United Press International

ATLANTA (MARCH 2) UPI - Turner Broadcasting System Inc. said Thursday it lost $110.9 million in the fourth quarter, compared with a loss of $18.1 million in the same period of 1988.

Revenues rose to $292.8 million from $224.3 million in 1988.

For the year, the company lost $70.6 million, compared with a loss of $94.5 million in 1988. Revenues rose to $1 billion from $804.2 million.

Despite the loss, chairman and president R.E. ''Ted'' Turner called 1989 ''an exceptional year'' for Turner Broadcasting.

''All of our core business segments set record revenues and operating

profits,'' said Turner. ''Turner Network Television was established as a major new program service for cable television, and our long-term debt was successfully refinanced.''

In the latest quarter, the company recorded an extraordinary charge of $123.2 million in connection with the refinancing.

Excluding this charge, ''we would have had our first net profit since 1985 '' Turner said.

#90060u2263 03/01/1990 ~United Press International

WASHINGTON (MARCH 1) UPI - Suggestions to target farm program benefits at family farms or to deny benefits to large-scale farmers carry the hidden threat of destroying the farm program, members of Congressmen said Thursday.

''We are into uncharted waters and I think there are some sharks out there '' Rep. Pat Roberts, R-Kan., told colleagues on a House Agriculture subcommittee after two witnesses, including former Agriculture Secretary Bob Bergland, advocated targeting of benefits.

There are suggestions in Congress this year to limit eligibility for crop subsidy payments, either as the least painful way to meet budget limits or a belief payments to large farmers are wasteful.

The administration has listed eligibility limits as one of the areas where Congress could look in trying to cut $1.5 billion from crop subsidy spending. Other choices are lower crop subsidy rates or limiting the number of acres eligible for payments.

Roberts said any attempt to limit eligibility on the basis of a farmer's income could turn into a mean-spirited ''limbo game on the House floor'' to set the cut-off point as low as possible. That would mean welfare payments to poor farmers while the government lost any control on crop production by big farmers, who would drop out of the program, he said.

Rep. Ron Marlenee, R-Mont., said targeting amounted to a land reform policy that would bankrupt farmers because grain prices are too low now.

Some people are just trying to survive by having a little extra land,'' Marlenee said.

Since the 1970s, there has been a $50,000 limit on crop subsidy and land diversion payments to farmers. Rep. Dan Glickman, D-Kan., has raised the idea of cutting off payments to large-scale farmers as an alternative to reducing crop subsidy rates.

''Some targeting of benefits would make sense,'' Bergland said, after arguing that concentration in hog and chicken production had deprived small farms of the opportunity to supplement crop income by raising livestock.

''Unless there is a change in policy, the grain-growing regions will be ... depopulated.''

John Schnittker, agriculture undersecretary during the Johnson administration, outlined two possible ways to limit payments. One was to gradually reduce the maximum payment to $25,000. The other was to reduce the number of acres eligible for crop supports but make income-boosting payments to low-income farmers.

''Savings generated by limiting payments represent a more equitable way to help reduce the budget deficit than across the board budget cuts, loan fees ... and other means,'' he said.

Private economist Martin Abel warned there would be many headaches in trying to apply an eligility limit or targeting benefits, such as how to judge a farmer's wealth or even defining who should be considered a farmer.

Farmers might try to circumvent standards based on size of farm or level of income, former assistant agriculture secretary Ewen Wilson said, noting ''the great creativity'' displayed in reorganizing farms affected by payment limits.

The debate over payment limitations overshadowed the purpose of the hearing, which was to gather ideas for the new farm policy law. Bergland warned against a policy based on the belief the United States could under-sell other nations and profit from export volume.

About one-third of U.S. grain production is exported. Wilson warned against crop support prices that would destroy U.S. competitiveness.

#90060u2264 03/01/1990 ~United Press International

BEIRUT, LEBANON (MARCH 1) UPI - Troops loyal to Christian strongman Gen. Michel Aoun launched a wide-scale offensive Thursday against strongholds of Samir Geagea's militia in east Beirut that left at least 70 people dead, sources said.

The fighting, which broke out at dawn and raged throughout the day, shattered a 10-day-old fragile truce between the rival Christian forces, which have been locked in a power struggle for the Christian enclave since Jan. 31.

Sources said at least 70 people, most of them soldiers, were killed and 150 others wounded in fierce fighting in residential areas, bringing to 780 the number killed in the ongoing conflict.

Heavy rocket fire prevented rescue workers from retrieving the dead and wounded lying in the streets and firefighters were unable to douse dozens of fires that burned throughout the embattled sector. Overhead, billowing black smoke mixed with heavy rain that followed a pre-dawn thunderstorm.

Aoun, 54, has ruled the Christian enclave for years but he has recently frustrated other Christian leaders by refusing to accept an Arab League-brokered peace accord approved by Lebanese legislators last year.

Geagea, 39, whose 10,000 strong Lebanese Forces militia is outnumbered by Aoun's 15,000-strong force, apparently has accepted the power-sharing peace plan, which calls for a Christian president and greater Moslem representation in government.

Aoun's forces scored limited advances in the three-pronged attack against Geagea's Lebanese Forces positions in Ashrafiyeh, Dora and Karantina, the remaining militia strongholds in east Beirut, sources said.

They said Aoun's tank-led troops gained territory in Sin El Fil and captured a militia barracks overlooking Karantina, where the militia headquarters is located.

''They (Aoun's troops) were faced by a stiff resistance from the militiamen on the remaining two axis,'' one source said.

A militia statement said all the attacks were repulsed. ''Aoun is playing with fire again and setting properties ablaze,'' the statement said.

Security sources said Geagea's militiamen launched counter-attacks backed by heavy artillery fire from their positions in the northern region of Kesrouwane.

Although the war-battered city was engulfed with heavy rain, palls of black smoke billowed into the sky from the confrontation spots.

''Ashrafiyeh and Karantina are being targeted with a hail of artillery fire,'' said a resident living near the ''green line'' that divides the city. ''Shells are falling at the rate of 10 every one minute.''

Late Wednesday, Syrian-backed President Elias Hrawi accused France and the Vatican of backing the defiant general.

Hrawi said he was making public a stand he had taken during a recent

private session with French ambassador Rene Ala.

''I told the ambassador that both France and the Vatican were responsible for what happened in the eastern (Christian) region,'' Hrawi said in an interview with the Druze-operated Voice of the Mountain radio station.

The president said he also addressed the French diplomat, saying, ''We had given you the chance to mediate and persuade (Aoun) to leave and relinquish powers, but you were not frank.''

''When we intended to intervene to put an end to the defiant (general), you all opposed that and your stand has resulted in a disaster,'' said Hrawi, referring to the inter-Christian warfare that erupted when Aoun intended to wipe out Samir Geagea's 10,000-strong milita.

Aoun has appeared bent on tightening his grip on the Christian enclave to reinstate himself as the sole leader.

It was yet the strongest charge by a pro-Syrian official indicating that the Vatican and Paris had implicitly backed Aoun and encouraged him to hold power.

The statement came following reports that Hrawi, in coordination with the Syrians, was weighing the possibility of launching a military operation to oust Aoun.

Moslem political sources reported that Syria, which has some 35,000 troops on two thirds of the country, would not hesitate to launch a military offensive to force out Aoun.

But Damascus, the sources said, was awaiting for clear-cut backing for such an operation from all Western powers, notably France and the Vatican.

#90060u2298 03/01/1990 ~United Press International

NEW YORK (MARCH 1) UPI - Stocks closed higher in moderate trading Thursday, but the blue chips lost about half of the afternoon's gains to a decline in Treasury bonds.

The Dow Jones industrial average, which rose 10.13 Wednesday, gained 8.34 to close at 2635.59.

Among broader market gauges, the New York Stock Exchange composite index rose 0.45 to 183.52 and Standard & Poor's 500-stock index rose 0.85 to close at 332.74. The price of an average share tacked on eight cents.

Advances led declines 837-637 among the 1,956 issues crossing the NYSE tape. Big Board volume totaled 157,930,000 shares, compared with 184,410,000 shares traded Wednesday.

Treasury bonds were down 5/8 point in late trading after a stronger-than-expected economic report early Thursday from the nation's purchasing managers, along with government data showing increases in January personal income and spending, dampened hopes that the Federal Reserve would have to lower interest rates anytime soon to pump up the economy.

The reports came on the heels of Wednesday's news of a higher-than-expected

rate of growth in fourth-quarter gross national product. The drop in bonds dragged stocks off their highs, but Wall Street managed to finish the day with a gain.

Stocks drifted down in early trading after the National Association of Purchasing Management released its February economic survey, showing that its index of economic activity rose to 48.3 percent from 45.2 percent in January.

The index was expected to be unchanged and the rise initially sparked new worries in the stock market as well about higher interest rates. But while stocks managed to shrug off those concerns and focus on the economy's strength, bonds could not.

Analysts said the news had different implications for stocks and bonds. "The data showed that the economy may be picking up, which would be good for earnings (and the stock market) but bad for bonds, and sure enough bonds traded down," said Jerry Hinkle, a trader with Sanford C. Bernstein & Co. In late trading, the 30-year bond was down 5/8 point.

On the trading floor, the blue chips dominated the most-actives list. Union Carbide was the most heavily traded, tumbling two to 22 1/4. The company announced Wednesday after the market had closed that it would not pursue a restructuring. The company also reported Thursday a sharp drop in fourth-quarter earnings.

Philip Morris followed, falling one to 36. Philadelphia Electric, was third, sinking 2 1/8 to 18. Reports said the utility may have to cut its dividend if the recommendation of a panel of judges that the company be given only about 20 percent of a requested rate hike is accepted.

Among other blue chips, AT&T gained 1/8 to 39 7/8, IBM added 1/8 to 104, Eastman Kodak gained 3/4 to 38 3/8, USX rose 3/8 to 36 1/8 and Merck was up 3/4 to 69 1/8.

Elsewhere, Bank of New England tumbled 3/8 to 4 1/2. Federal regulators slapped tough restrictions on the bank Thursday and ordered the financial giant, rattled by real estate problems, to comply with banking laws and review loan policies.

And ICN Pharmaceuticals plummeted 1 1/8 to 3 5/8 after reporting a large fourth-quarter loss.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 185,305,260 shares, compared with 218,549,310 shares traded in the previous session.

Prices closed higher in active trading on the American Stock Exchange. The

Amex Market Value index added 1.14 to close at 354.04. The price of an average share was up four cents. Advances led declines 282-254 among the 787 issues traded. Composite volume totaled 20,627,100 shares, compared with 19,870,600 traded Wednesday. Bolar Pharmaceutical led the Amex issues sinking 1 1/4 to 4 1/8.

The National Association of Securities Dealers composite index rose 1.39 to 427.22.

#90060u2304 03/01/1990 ~United Press International

STANDISH, ME (MARCH 1) UPI - A single-engine airplane landed safely on frozen Sebago Lake Thursday after the pilot reported mechanical problems, state police said.

The pilot and sole passenger were not injured.

State police and game wardens began a search after the control tower at the Portland International Jetport reported receiving a distress call from the pilot of a single-engine Cessna airplane.

The pilot reported the craft was experiencing mechanical trouble and said he was going to attempt a landing on the ice at Sebago Lake, officials said.

''The pilot radioed that he was in trouble and that he was going to attempt a landing at the Standish end of the lake,'' said state police spokesman Steven McCausland.

A plane from the state Department of Inland Fisheries and Wildlife spotted the craft on the ice near Indian Island, McCausland said. He said the pilot had radioed the airport tower to say that he had landed safely.

#90060u2316 03/01/1990 ~United Press International

MOSCOW (MARCH 1) UPI - The mastermind of the mutiny at sea on which author Tom Clancy based ''The Hunt for Red October'' was a romantic revolutionary who advocated perestroika reforms a decade before Mikhail Gorbachev assumed power, a newspaper said Thursday.

Although the 1975 insurrection in the Baltic Sea was converted into a bestseller by Clancy in the West and has now been made into a film, Soviet citizens only learned of the aborted mutiny Tuesday in an article in the Izvestia newspaper published 15 years after the event.

Despite Izvestia's caution that chief mutineer Valeri Sablin, who was shot

as a traitor, must not be depicted as a prophet of perestroika, the newspaper Komsomolskaya Pravda told its 26 million readers outright that Sablin was 10 years ahead of his time.

''The fatherland is being undermined by embezzlement, demagoguery, make-believe successes and lies,'' Sablin wrote in his journal. ''We must return to Leninist principles, to democracy, to social justice. We must respect, honor, life, and the dignity of the individual.''

Gorbachev has framed his ''perestroika'' reform drive as a return to basis Leninist principles distorted by despot Josef Stalin, Leonid Brezhnev and other subsequent leaders.

Sablin was the scion of a professional Russian naval family, whose father and grandfather served honorably as officers. He joined the Communist Party as soon as he could and worked as a youth activist, Komsomolskaya Pravda said.

The newspaper, quoting a writer and former Baltic naval officer who has researched the case, said Sablin was such a superb officer that his dossier was filled with letters of praise, a very unusual testament in the Soviet fleet.

But after his first missions at sea, Sablin shocked his superiors by asking to be sent to military political school with the only black mark on his record that he once sent a letter to Nikita Khrushchev asking for changes in the Soviet Union.

Sablin emerged as a political naval officer from the school and immersed himself in the works of communist giants Karl Marx, Vladimir Lenin and Georgi Plekhanov to find out what had gone wrong in Brezhnev's Russia.

It was in that period, the newspaper said, that Sablin conceived of a ship as the ideal ''free territory for propaganda'' that could be sailed anywhere to deliver a political message.

Accidents in the fleet abounded then, but a total media blackout kept them a closely guarded secret, Komsomolskaya Pravda said. ''Submarines were sinking, ships were catching fire and crashing into each other,'' the newspaper said.

Unable to stand it any longer, Sablin seized the submarine destroyer Storozhevoi at midnight Nov. 8 in the Latvian harbor of Riga while it was at anchor as part of a naval parade marking both the 58th anniversary of the 1917 Russian Revolution.

Sablin then took the ship to Leningrad, where he planned to demand to be allowed to speak on television with a ''warning to all citizens that the

fatherland was in danger,'' the newspaper said.

His plans were foiled by a warrant officer who leaped from the ship and swam toward a submarine, whose crew refused to believe his story but reported it to Moscow anyway, it said.

''Bombers soon were flying over the mutinous vessel,'' the newspaper said.

By the morning of Nov. 9, the ship was back in its place in Riga.

''None of the Riga citizens noticed that anything untoward had happened,'' and not a word was breathed about the mutiny for 15 years, Komsomolskaya Pravda said.

But word leaked out in the United States and Clancy used a newspaper account of the mutiny as the basis for his book, which was published in 1984.

In the newspaper's account, Sablin tricked the destroyer's captain by reporting a mutiny, leading him to its purported site in the ship's bow, then locking him up. He gave the captain a manifesto explaining his bold action and a neat pile of books to read ''so he would not be bored.''

''Today (under democratization) Sablin would have a legal opportunity to address millions of television viewers,'' Komsomolskaya Pravda said. ''He would have the opportunity to enter a free territory for propaganda at any meeting without having to seize a ship.''

WASHINGTON (MARCH 1) UPI - Secretary of State James Baker threatened Thursday to oppose a plan to help provide housing for Soviet emigres in Israel unless Israel vows to halt expansion of settlements in the occupied territories.

His warning marked the first time the U.S. government has threatened direct action to back up its often-stated objections to the Israeli settlement activity on lands seized in the 1967 Middle East war.

Baker, speaking on a number of foreign aid issues before the House Foreign Operations subcommittee, was asked about a bill proposed in the Senate to make available up to $400 million in loan guarantees to build housing for the large number of Jews expected to move to Israel under liberalized Soviet immigration policies.

The Israeli government has said that only a small percentage of the emigres - less than 1 percent - are being settled in the occupied territories, and that no U.S. funds would be used to finance their housing.

But Baker said, ''We are worried about the fungibility question'' - the fact that once money goes into a treasury, even if it is not spent directly on a certain project, it liberates other money for that purpose.

''There is no assurance that the housing money wouldn't supplant other money that would be used for the settlements,'' Baker said.

And he added, ''We see the settlements in the occupied territories as an obstacle to peace.''

Therefore, he said, the administration would support the housing guarantee only ''if there were an assurance that there wouldn't be any new

settlement activity.''

Ruth Yaron, a spokeswoman for the Israeli Embassy, said, ''Israel has reiterated only yesterday to Mr. Baker that Israel does not have a policy of directing newcomers to areas outside the Green Line (the West Bank and Gaza Strip).''

She said, ''On the issue of the existence of the settlements themselves, it is no secret we have a disagreement with the administration.''

The Ammerican-Israel Public Affairs Committee, the main lobbying arm for Israel, said that a letter was sent to Baker Thursday with the signatures of 73 senators opposing the cut of any aid to Israel.

During his appearance, Baker came under frequent criticism for failing to adjust the next year's budget to the dramatic changes taking place in Eastern Europe, Latin America and even South Africa.

As Rep. Mickey Edwards, R-Okla., said, ''We are all anti-communists. The problem is that it is getting difficult to find a communist to be against.''

Baker responded with a plea for greater flexibility for the administration specifically doing away with the so-called congressional earmarks that require spending a certain amount for favored foreign aid recipients even if there is not enough money to fill all the administration's foreign policy objectives.

Assessing the situation in Nicaragua after the defeat of the Sandinistas in Sunday's election, Baker said, ''The war is over,'' and the Contra rebels should be repatriated peacefully, with U.S. financial help as required.

He also said the administration takes the position that President-elect Violeta Chamorro will be the commander in chief of the armed forces and will have the right to appoint the next minister of defense and minister of interior.

Baker added that he expects Nicaragua's armed forces would be cut by around 50 percent.

CAMDEN, N.J. (MARCH 2) UPI - Some 800 workers spent their last day on the job Thursday at Campbell Soup Co.'s historic manufacturing plant, which the canned soup king is shutting down because of its obsolescence and inefficiency.

''It's a very frustrating situation,'' said Alvin Still, president of Local 80 of the United Food and Commercial Workers International Union, which represents about 640 of the displaced workers, many of whom have worked at the Camden plant for 20 to 40 years.

Campbell Soup will keep its worldwide headquarters in Camden.

''It's being closed because it's a very old plant,'' said Campbell spokesman James Moran. ''It is well beyond its years. The design is obsolete compared to what our competitors have these days and to what we have in our other plants.''

The plant's production will be moved to other Campbell Soup canned food plants in Paris, Texas, and Maxton, N.C.

The phaseout of production at the Camden plant, announced in August, affected a total of 940 employees. Since then, some have qualified for retirement benefits and left, Moran said.

The company is working with federal, state and county government officials as well as the two unions that represent the idled Campbell workers to provide new job training and placement assistance for the displaced workers.

Each employee was given one week's pay for every year he or she had worked at the plant in severance pay, Moran said.

The Camden plant was one of four domestic plants the company announced in August that it would close as part of a major restructuring. Others were in Pocomoke City and Crisfield, Md., and Smyrna, Tenn. A total of 2,800 jobs were eliminated in the plant closings.

Campbell Soup said the restructuring would result in savings of $15 million in fiscal 1990 and a total of $150 million over the next four years.

NEW YORK (MARCH 1) UPI - Assets of the nation's 499 money market mutual funds decreased $1.9 billion to $388.79 billion for the week ended Wednesday, the Investment Company Institute at Washington reported Thursday.

The institute said broker-dealer fund assets decreased $598.6 million to $164.86 billion, assets of general purpose funds decreased $151.5 million to $132.4 billion and institutional fund assets decreased $1.15 billion to

$91.54 billion.

"Last week's drop in bond yields and this week's rebound in the stock market induced investors to use their money market fund balances to purchase stock and bond products which caused a decline in money market fund assets," said Jacob Dreyer, vice president and chief economist at the institute.

"With yields on money market funds, direct money market instruments and bank deposits all remaining remarkably stable since mid-January, asset flows into and out of money market funds have become increasingly influence by movements in prices of long-term financial assets."

The Investment Company Institute, a national association of the American investment company industry, reports the assets of money market funds to the Federal Reserve Board each week.

The Donoghue Organization of Holliston, Mass., said average seven-day simple yields on money market funds were unchanged at 7.65 percent, while 30-day simple yields fell to 7.65 percent from 7.67. The average maturity of fund portfolios was unchanged at 43 days.

The Bank Rate Monitor of North Palm Beach, Fla., reported that rates at competing banks and savings and loan institutions mostly declined in the latest week.

The Monitor's index of average rates: money market deposit accounts 6.09 percent, down from 6.10; Super-Now accounts 5.01 percent, unchanged; six month certificates of deposit, 7.66 percent, off from 7.67; one-year CDs 7.71 percent, up from 7.70; 2 1/2-year CDs 7.71 percent, unchanged; and five-year CDs 7.75 percent, unchanged.

The average rate for a one-year adjustable rate mortgage was 8.48 percent, up from 8.47.

The average rate on a 15-year fixed-rate mortgage rose to 9.86 percent from 9.80 and the average rate on a 30-year fixed-rate mortgage rose to 10.07 from 10.02 percent.

The average rate for a four-year automobile loan rose to 12.17 percent from 12.14 percent.

#90060u2369 03/01/1990 ~United Press International

WASHINGTON (MARCH 1) UPI - Last year was a banner year for drug arrests and seizures, but it was an even better year for illicit narcotics producers around the world, the State Department reported Thursday.

In its annual International Narcotics Control Strategy Report, the State Department concluded that ''results in international narcotics control efforts were mixed during 1989.''

''Worldwide narcotics production reached new levels, corruption undermined enforcement efforts and a number of governments still failed to exhibit a serious commitment to reducing drug production,'' the report said.

The report singled out Bolivia, Thailand, Laos and Syria as countries that fell short of full cooperation in the war on drugs.

Although exact information is difficult to get, the report said, ''It also seems clear that worldwide abuse of illegal drugs is rising.''

On the positive side, the report noted there were large cocaine seizures in the United States, Latin America and the Caribbean, and major cocaine traffickers were captured, jailed and occasionally extradited to the United States for trial. There was also increased international cooperation to stem drug money laundering.

''This report does not surprise me,'' said Rep. Charles Rangel, D-N.Y., chairman of the House Select Committee on Narcotics Abuse and Control. ''I have consistently said that the longer we waited to address the drug crisis as a national security matter interwoven with our foreign policy, the worse the situation would get.''

Rangel said that with the collapse of communist regimes around the world, ''we can turn our attention from fighting communists to fighting the drug lords. They are the new dictators we have to worry about.''

Highlights of the 1989 narcotics control report, by country, include:

-Afghanistan, second only to Burma in opium production, is increasing its production steadily and there is no sign that the Kabul government has taken any action against the problem.

-Described as ''a major transit country for cocaine and marijuana destined for the United States,'' the Bahamas is now cooperating with U.S. drug enforcement agencies. But, the report added, ''U.S. officials have received credible reports that drug traffickers are able to buy cooperation from some Bahamian officials.''

-Bolivia, second to Peru in coca production, showed a 9 percent increase in acreage over last year's levels. ''Widespread corruption continues to be a major impediment to the government's efforts.''

-As the world's major opium producer, Burma produced 2,600 metric tons of opium in the last year. ''Production was not hampered by any discernable control efforts on the part of the ruling military regime.''

-There was a dramatic increase in drug smuggling during the first half of 1989 in Cuba, but that appeared to drop sharply after a major show-trial of leading government officials convicted of being involved in drug trafficking.

-Haiti was described as a significant transshipment point for the movement of illegal drugs, especially cocaine, into the United States. Haiti has a police force that is described as ill-equipped, poorly trained and understaffed. ''Corruption remains a problem and the judicial system is weak.''

-In Jamaica, the government of Prime Minister Michael Manley is cooperating with U.S. law enforcement officials, but corruption connected with the drug trade is common among security force personnel.

-The Laotian government has begun to cooperate with U.S. officials on narcotics control, but ''no enforcement or eradication efforts were

undertaken by the Lao government.''

-War-torn Lebanon continues to be a major supplier for the world hashish market. Lebanon traffickers are also turning to opium production and heroin processing.

-Despite increased cooperation by the Mexican government, the report said that both the opium poppy and marijuana crops are larger than reported in recent years.

-In Thailand, even though the government has increased its cooperation with U.S. officials, ''Corruption still poses a significant problem in Thai enforcement efforts.''

-Despite increased cooperation by Turkish authorities with anti-narcotics efforts, the report said, ''We generally believe that the trafficking problem is growing more serious.''

#90060u2377 03/01/1990 ~United Press International

WASHINGTON (MARCH 1) UPI - Vice President Dan Quayle will travel to Latin America and the Caribbean March 9-16 to discuss relations ruffled by the invasion of Panama and altered by the defeat of the Sandinista government in Nicaragua, his office said Thursday.

Press secretary Dave Beckwith announced the vice president will make stops in Venezuela, Barbados, Chile, Paraguay, Argentina and Brazil as part of the fence-mending mission President Bush assigned in January.

At that time, several of the governments indicated that Quayle would not be welcome in view of the American military intervention in Panama, which was assailed throughout Latin America.

In Chile and Brazil, Quayle will attend inaugural ceremonies and will also confer with other Latin American and European leaders in attendance.

Quayle is to meet with Venezuelan President Carlos Andres Perez at La Guaira, Venezuela, on March 9, the first stop on the hemispheric swing.

Beckwith said the Venezuelan meeting was arranged ''to discuss reigonal issues and recent developments in Latin America.'' Andres was one of the first Latin American leaders Bush telephoned after the victory of U.S.-backed presidential candidate Violeta Chamorro in Sunday's election in Nicaragua.

From Venezuela, Quayle will travel to Barbados March 9-10 where he will consult with Prime Minister Erskine Sandiford and other Eastern Caribbean

leaders.

The vice president will attend the inauguration of President Patricio Aylwin in Chile, March 10-12.

On March 12-13, Quayle is to visit Paraguay for meetings with President Andres Rodriguez and other government officials. On March 13-14, he will hold talks with President Carlos Menem in Argentina.

On March 14-15, the vice president will attend the inauguration of Brazilian President-elect Fernando Collor de Mello and will hold bilateral meetings with other leaders attending the celebration.

#90060u2393 03/01/1990 ~United Press International

BURLINGTON, VT (MARCH 1) UPI - Two Vermont Air National Guard fighter jets intercepted a pair of Soviet reconnaissance planes off the coast of Newfoundland Thursday and escorted them away from American and Canadian airspace, officials said.

The F-16s were scrambled from their base in Burlington at about 4 a.m. and met up with the Soviet TU-95 D ''Bear'' aircraft at 6:40 a.m. about 250 nautical miles southeast of St. John's, Newfoundland, Vermont Air National Guard Lt. Lloyd Goodrow said.

The Soviets were heading northeast, and were escorted by the Vermont fighters for about one hour until they cleared the Canadian Air Defense Identification Zone, a buffer area outside Canadian airspace.

Under international law, planes entering air defense identification zones are supposed to identify themselves and declare their intent, Goodrow said.

''The Soviets just don't identify themselves so we have to go out there and determine who they are,'' Goodrow said.

Goodrow said the Soviet planes were allowed no closer than 220 nautical miles east-southeast of St. John's and never entered U.S. or Canadian airspace.

During the same operation, two Canadian Air Force CF-18 fighters from the 425th Tactical Fighter Squadron detachment were sent from their alert facility in Gander, Newfoundland, to intercept two Soviet TU-95 F ''Bear'' antisubmarine aircraft that were trailing about 100 nautical miles behind the reconnaisance planes.

The Soviet aircraft were detected by the 776th Radar Squadron in Bangor, Maine, and the mission was directed by a U.S. Air Force Airborne Warning

and Control System aircraft from Tinker Air Force Base in Oklahoma.

The fighter jets were refeuled three times during the mission by a KC-135 from the 42nd Bombardment wing of Loring Air Force Base in Maine.

The intercepts were completed without incident and the American F-16s returned to Burlington at 9:55 a.m.

Thursday's was the Vermont Air National Guard's first intercept since February 1989, and the 31st since the unit was assigned interceptor duty in 1987.

The Vermont jets are assigned to the 158th Fighter-Interceptor Group and are controlled by the North American Aeorspace Defense Command.

#90060u2408 03/01/1990 ~United Press International

(MARCH 1) UPI - Rain doused the Gulf Coast and other parts of the South Thursday, while unseasonable warmth spread into the northern Plains and bitter cold stung New England.

A cold front galloped through Texas and Louisiana, triggering heavy rain and thundershowers along the coast and into the gulf. In the western part of the Lone Star State, residents of Valentine mopped up from a tornado that touched down Wednesday.

The National Weather Service issued a winter weather advisory for northern Arkansas, where some areas received as much as 2 inches of snow. Brisk northerly winds brought more cold air into Oklahoma and Arkansas.

Clouds covered much of the South, and light rain fell in portions of Alabama, Louisiana, Kentucky, Mississippi, Tennessee and Georgia. Temperatures were mild for late winter, ranging from 43 in Knoxville, Tenn., to 50 in Charleston, S.C., 51 in Atlanta and 68 in Miami.

Record high temperatures were broken or tied in at least four cities, including Duluth, Minn., 48; Fargo, N.D., 58; Marquette, Mich., 48; and St. Cloud, Minn., 56.

A cold spell gripped New England. The early Thursday mercury dropped to 3 below zero in northern Maine. In New Hampshire and Vermont, temperatures hovered in the single digits and teens.

Cold air prevailed along the mid-Atlantic Coast.

Sunshine and above-normal temperatures prevailed Thursday on the West Coast, except for some fog and cloudiness along the Pacific Ocean shore.

Drought-stricken California held hope for some showers Friday.

A winter storm warning was posted over Valdez, Alaska. A foot of snow fell at Valdez Thursday morning, and the weather service said another foot would fall by Friday morning.

Valdez had more than 100 inches of snow on the ground at 10 a.m. Thursday, with a total snowfall this season of 473 inches, the NWS said.

#90060u2433 03/01/1990 ~United Press International

MIAMI (MARCH 1) UPI - The master and two crew members of a freighter that ran aground in October in the Key Largo National Marine Sanctuary have been found guilty of wrongdoing in two separate federal hearings, officials said Thursday.

Eluid D. Godwin, master of the Alec Owen Maitland, was found guilty Wednesday by a federal administrative law judge of nine misconduct charges in connection with the grounding.

Brothers Michael Bishop, 43, the ship's first mate, and Jerry Bishop, 40, the ship's engineer, pleaded guilty Wednesday to criminal charges of operating a vessel while intoxicated.

The three were on board the 155-foot freighter carrying 8,000 gallons of diesel fuel when it struck a coral reef off the environmentally sensitive Florida Keys in what officials called the second-most destructive grounding ever in the sanctuary.

It took more than 24 hours to free the freighter, the first of three to run aground off the Florida Keys in a three-week period.

Judge Michael E. Hanrahan suspended Godwin's Coast Guard licenses for one year. Godwin, who pleaded no contest to two charges and denied the others, also was sentenced to one year's probation after his suspension.

Hanrahan ruled that Coast Guard Lt. Keith D. Ward proved nine infractions against Godwin, including sailing beyond the scope of his license, permitting unlicensed crew member Michael Bishop to operate the ship and not having the required crew aboard.

The judge also found that Godwin failed to report an earlier engine failure to the Coast Guard, stored oil improperly on the ship and allowed oil waste to be pumped into the ocean after the grounding. Godwin may appeal the suspension within 30 days.

The Bishops pleaded guilty before U.S. Magistrate Linnea Johnson, who

sentenced them each to one year's probation. Johnson also ordered each of the Bishops to serve five months at the Pensacola Community Correctional Center to receive alcohol abuse counseling.

The Bishops admitted they were drunk as they operated the Maitland when the mishap occurred, said Diane Cossin, spokeswoman for the U.S. Attorney's office in Miami.

The National Oceanic and Atmospheric Administration last year assessed $104,000 in civil penalties for reef damage to the owners of the freighter Maitland Brothers Co. of Littlestown, Pa.

In announcing the assessments, Joseph Uravitch, director of NOAA's National Marine Sanctuary Program in Washington, said the grounding was ''the second most destructive grounding in the history of the sanctuary. Only the castrophic 1984 Wellwood incident supersedes it.''

The 400-foot grain freighter Wellwood ran aground in August 1984 on Molasses Reef, about 3 miles south of where the Maitland struck the reef. It took nearly two weeks to refloat that ship.

#90060u2438 03/01/1990 ~United Press International

WASHINGTON (MARCH 1) UPI - Borden Inc. and the Southland Corp. will pay $11.5 million in fines to settle criminal bid-rigging charges involving milk sales to schools and the military, the Justice Department said Thursday.

The companies were accused of a bid-rigging conspiracy involving bids for contracts to supply dairy products for school milk programs and the military, the Justice Department said.

Borden is based in Columbus, Ohio, and The Southland Corp., parent of 7-Eleven convenience stores, operates from Dallas.

Borden and The Southland Corp. agreed to plead guilty to multi-count felonies and pay a total of $11.5 million in fines and civil settlements. Under the agreement, Southland will pay $6 million and Borden will pay $5.5 million.

The legal documents in the case were filed in U.S. District Court in Tampa Fla.

Borden engaged in a conspiracy to rig school milk bids in Florida from ''at least the early 1970s through at least July 1988,'' the Justice Department said.

Other counts against Borden involved conspiracy to rig bids at military installations in Florida, Georgia and Puerto Rico ''from at least the early 1970s through at least January 1988,'' the Justice Department said.

Southland engaged in bid-rigging conspiracies in Florida and the same military installations involved in the case against Borden, the government said.

The Justice Department noted it is continuing an antitrust investigation of collusion among dairy products suppliers in Florida.

The government noted that its investigation of the Florida dairy industry previously had resulted in the convictions of nine people and three corporations.

#90060u2446 03/01/1990 ~United Press International

LOS ANGELES (MARCH 2) UPI - Occidental Petroleum Corp. has denied it attempted to hide the construction costs for a museum being built to house the art collection of Chairman Armand Hammer, a report said Thursday.

In an affidavit filed in Wilmington, Del., Occidental Vice President Ronald Asquith, who is in charge of construction of the Armand Hammer Museum of Art and Cultural Center, said that allegations the company engaged in a scheme to artificially lower the apparent cost of the museum ''are false,'' he told the Los Angeles Times.

''There has never been any plan,'' Asquith said in the affidavit, ''to transfer museum construction costs from the museum account to elsewhere on Occidental's books to conceal the true cost of the construction.''

Occidental filed the court papers after attorneys for dissident shareholders accused the company of engaging in a ''fraudulent scheme'' to falsify the true amount required to build the museum. The shareholders filed their documents after The Times reported last week that Occidental had apparently decided to move millions of dollars in museum costs to other corporate accounting categories.

Three pending shareholder lawsuits challenge Occidental's decision to build and endow the museum. A proposed settlement in one of the cases would require Occidental to limit construction costs to $60 million.

Documents obtained by The Times indicated that the company had considered and decided to move some museum costs to accouting categories apparently related to renovation of Occidental's Westwood office building, the bottom four floors of which are being gutted and reconstructed as part of the museum.

In the court filing Tuesday, Asquith said an internal memorandum shows that he authorized a key separation of costs for the museum from costs to be attributed to a building maintenance account. But he said he discovered later ''a mistake in the preparation of the minutes'' of the meeting at which the decision was made.

''I immediately recognized the error,'' Asquith said in his affidavit.

The court filing consists of an affidavit by Asquith and a copy of minutes of a meeting at which Asquith contends he rectified his original mistake.

The new court documents also confirm that Occidental and its contractors discussed whether to change accounting allocation for $2.2 million in museum costs but that a proposal to actually switch the money was never carried out.

The litigation is being handled by a Delaware court because Occidental is incorporated there.

#90060u2465 03/01/1990 ~United Press International

LONDON (MARCH 1) UPI - Pan American World Airways eliminated a key safety check nine months before one of its jumbo jets was blown up over Lockerbie Scotland, killing 270 people, a newspaper said Thursday.

''Investigators now believe that such a relaxation of security gave terrorists an opportunity to smuggle a bomb onto the plane in an unaccompanied suitcase, without fear of detection,'' The Independent said.

The Boeing 747 en route from Frankfurt, West Germany, to New York after a stop and aircraft change in London was destroyed over the Scottish village of Lockerbie on Dec. 21, 1988, killing all 259 people aboard plus 11 people on the ground.

Investigators believe the bomb likely was put aboard at Frankfurt.

The Independent said airline officials did not check to be sure that all the baggage on Flight 103 belonged to passengers. Therefore, the owner of the bag containing the bomb might not have boarded.

The Federal Aviation Administration requires all baggage loaded aboard U.S. aircraft to be accompanied by a passenger.

To avoid the time-consuming process of matching up transit passengers with their baggage and removing the bags of passengers who did not board, Pan Am decided that unaccompanied baggage from feeder flights could be loaded

onto aircraft if it was first checked by X-ray, The Independent said, quoting a Pan Am internal company memo.

The memo said the FAA's chief of security, Raymond Salazar, approved the new procedure, The Independent said.

The FAA denied any knowledge of the Pan Am memo. ''We haven't been able to find any indication in the files of such a notice,'' FAA spokesman Fred Farrar said in Washington.

In order for Pan Am to issue such an order to security staff, the FAA would have had to grant permission, he said. ''No bag gets on a plane without a passenger,'' Farrar said.

Daniel Sonesen, who was then Pan Am's assistant director of security, said in a memo dated March 28, 1988, ''We fixed the problem by purchasing X-rays and X-ray interline bags,'' The Independent reported.

The memo to Pan Am's security staff in London and Frankfurt said, ''In the event of a no-show interline pax (transit passenger) and his bag is load(ed) in the belly (and) we go!!!!!''

The memo meant that all transit baggage should be X-rayed or searched before being loaded, but that it could go aboard an aircraft whether or not it was accompanied by the owner, The Independent said.

The newspaper said a Pan Am spokesman confirmed the memo's authenticity.

X-ray machines are not capable of detecting Semtex, the explosive used in the Lockerbie bomb.

The FAA fined Pan Am $630,000 in September for violating security rules in London and Frankfurt while boarding Flight 103.

In the aftermath of the disaster, the FAA tightened regulations, requiring all luggage from a Middle East or European airport to be X-rayed or physically checked before being loaded on an American airliner in addition to being matched to a passenger, Farrar said.

#90060u2468 03/01/1990 ~United Press International

WASHINGTON (MARCH 1) UPI - Despite the threat of major earthquakes faced by much of the nation, the federal government spends far too little on quake preparedness with too little direction, a panel of safety experts told Congress Thursday.

The Bush administration has proposed spending $73.7 million in its 1991

budget for the 13-year-old National Earthquake Hazards Reduction Program, about $9 million above current levels.

However, at least $200 million is needed for the program ''if we expect significant progress to be made toward improved seismic safety nationwide '' said Lloyd Cluff, chairman of the California Seismic Safety Commission.

''We urgently need to change from a crisis-reaction mode of operation to a program that anticipates and is well prepared for earthquake disasters,'' Cluff testified.

Unless spending is at least tripled, ''we will give no more than lip service to the goals of earthquake hazards reduction,'' said George Bernstein, who chaired a committee of experts that reviewed the earthquake program in 1987.

A third expert, Ian Buckle, deputy director of the National Center for Earthquake Engineering Reseach in Buffalo, N.Y., said $15 million in new money should be added to the budget each year for earthquake engineering projects alone.

Bernstein and Cluff also criticized the way the Federal Emergency Management Agency coordinates research, engineering and other activites of four agencies that take part in the earthquake program.

''At present, (the program) is fragmented, frustrating attempts to ... implement the goal of a coordinated hazard reduction effort,'' Cluff said.

Both men suggested an independent commission, patterned after California's system, assume leadership of the program.

All three witnesses appeared before the House subcommittee on science, research and technology, which is considering the administration's fiscal 1991 request for the earthquake program.

The hearing came one day after the Los Angeles area was rattled by an earthquake measuring 5.5 on the Richter scale, the strongest temblor to strike California since the deadly 7.1 magnitude Loma Prieta quake in October.

The remarks of the independent experts constrasted sharply with testimony earlier in the day from officials representing the four agencies contributing to the quake program.

The agency officials supported the leading role played by FEMA, and while acknowledging recent budget constraints, said they generally got the spending requests they sought from the administration this year.

''Our program on earthquakes is a little like a guy that has been bucked off the horse - we're trying to get back on the horse following a decade of budget difficulties,'' sasid John Lyons, director of the National Institute of Standards and Technology.

Although California is the state most vulnerable to catastrophic earthquakes, the witnesses all agreed seismic disruptions pose a major threat to numerous areas of the country, including the Pacific Northwest, Utah, Tennessee and Missouri, South Carolina and the New York-Boston corridor.

In all, 17 states ''are currently identified as being at high risk with high populations,'' said Grant Peterson, associate FEMA director.

California also is considered the state best prepared for earthquakes, but it was only by mere coincidence that the Bay Area escaped more serious damage and loss of life from the Loma Prieta temblor of Oct. 17 that killed 67, Buckle said.

#90060u2487 03/01/1990 ~United Press International

WASHINGTON (MARCH 2) UPI - The Federal Trade Commission said Thursday it denied Flowers Industries Inc.'s request to purchase Smith's Bakery Inc. because Flowers failed to show a takeover would not harm competition in the Southeast.

The FTC noted that a 1983 consent order settled a complaint that Thomasville, Ga.-based Flowers' seven acquisitions of bakeries in the Southeast between 1973 and 1980 were anti-competitive.

Under the order, Flowers must obtain the commission's approval before acquiring any interests in bakeries or bakery routes in the region.

Flowers sought to acquire Smith's and its plants in Mobile, Ala., Meridian Miss., and Pensacola, Fla. Smith's, based in Mobile, serves parts of Alabama, Mississippi, Florida and Louisiana.

Flowers is one of the three largest bakeries in the nation, said the FTC's Steven A. Newborn. The price the company proposed for Smith's was ''very large'' but cannot be disclosed, he added.

Spokesmen for the two companies were not immediately available for comment on the FTC decision.

(MARCH 1) UPI - Officials say the death toll has climbed to 19 in a fire that swept a luxury hotel in Cairo, Egypt. Rescuers say 70 people were hurt when fire raced through the six-story Heliopolis Sheraton, near Cairo's airport. Police and the Interior Ministry say the victims included one British tourist, eight from France and two from Finland, with the remaining dead NOT yet been identified.

The southern California area hit by an earthquake yesterday had at least 30 after-shocks, including two early today. Damage estimates are still being compiled, but officials say the losses could hit the multi-Million-dollar range. Three people were hurt in yesterday's quake, measuring five-point-five on the Richter Scale. The quake was centered about 35 miles northeast of downtown Los Angeles. The shaker tossed boulders onto mountain roads and was felt over thousands of square miles.

Analysts say a government report released today is another indication that the nation probably is NOT heading toward a recession. The Commerce Department says U-S workers earned eight-tenths of one percent more last month, increasing their savings and spending by six-tenths of one percent. One economist describes the personal income report as looking ''pretty strong.''

A federal court jury in Dallas convicted five members of a white supremacist group of conspiring to violate the civil rights of Jews and minorities in a series of assaults. The all-white jury deliberated about four hours over two days before finding the members of ''The Confederate Hammerskins'' guilty on two counts each of conspiracy. The men could get up to 10 years in prison on each of the two counts. Two of three defendants accused of using a firearm to shoot up a Dallas synagogue also were found guilty.

CINCINNATI (MARCH 1) UPI - Author Josephine Johnson Cannon, who won a Pulitizer Prize for her first novel written at the age of 24, has died at the age of 79.

Cannon, who lived in suburban Mount Carmel, died Tuesday. She won the Pulitizer Prize in 1934 for the novel, ''Now in November.''

Writing under the name Josephine W. Johnson, she wrote six other novels, two collections of short stories and three non-fiction books on natural history.

Among her most popular books was a 1969 work entitled ''Inland Island,'' written in diary format about a year spent on her 37-acre property. Critics acclaimed the work as a modern version of Henry David Thoreau's

''On Walden Pond.''

Friends are planning a memorial service in the spring.

#90060u2539 03/01/1990 ~United Press International

LOS ANGELES (MARCH 2) UPI - Fred Carr, chairman of troubled First Executive Corp., has been subpoenaed by a state legislative committee to testify on the company's junk bond holdings, a spokesman for the panel said Thursday.

Carr was subpoenaed to appear April 3 at the California State Assembly Finance and Insurance Committee's hearing in Sacramento.

Douglas F. Marcian, senior vice president, investments at Executive Life Insurance Co., the principal unit of First Executive, was subpoenaed to appear along with Carr.

First Executive, which had invested about $8 billion in junk bonds, took a $515 million write-off against fourth-quarter earnings to reflect the lowered value of its portfolio. The company also has said the value of its junk bond holdings had declined by $1 billion since Sept. 30.

Ross Sargent, senior consultant to the committee, said the panel will be exploring whether California should require an insurance industry guaranty fund for life insurers.

Sargent said the committee, which has been conducting oversight investigations into the insurance business for the past year, routinely subpoenas witnesses.

The panel has also set a March 20 hearing, also in Sacramento, on the same issue. That hearing will focus on the problems of Pacific Standard Life, which was declared insolvent last December, partly as a result of holding about $50 million of worthless bonds in American Continental Corp., parent of Lincoln Savings and Loan.

#90060u2563 03/01/1990 ~United Press International

WASHINGTON (MARCH 1) UPI - Senate leaders and the Bush administration culminated 22 days of private talks Thursday by announcing a compromise on clean air legislation, but environmentalists charged the ''back room dealing'' was a backward step.

The bipartisan agreement on reducing acid rain, toxic emissions and urban smog was hailed by Senate Democratic leader George Mitchell of Maine as ''far more stringent'' than the current Clean Air Act.

''The compromise bill is sound and comprehensive legislation that dramatically expands and strengthens the clean air law and does it in the most cost-efficient manner possible,'' Mitchell told reporters.

''As in any negotiation, compromises were made,'' acknowledged Mitchell, who has been criticized by environmentalists for bowing to White House pressure to weaken the clean air bill now in the Senate.

But Mitchell maintained that, even with the compromises, ''There will be significant improvement in the quality of American air. The requirements are far more comprehensive and stringent than under current law.''

Asked about the compromise by reporters while on a trip to Los Angeles, President Bush called it ''a big forward step'' and ''the best in bipartisanship.''

''I would encourage the Senate to move forward promptly and then let's get it over to the House and do something to clean up the air in this country '' Bush added.

Roger Porter, head of the White House Domestic Policy Council and chief negotiator for the administration, said Bush was ''extraordinarily pleased'' with the compromise.

''It is a milestone,'' Porter said. ''We are pleased almost beyond expression by the product'' of the negotiations.

William Reilly, the first professional environmentalist to lead the Environmental Protection Agency, said, ''This is a truly historic moment

for the environment. I consider it an excellent piece of legislation.''

Porter said the administration would back the compromise bill through Senate deliberations, but that the commitment did not extend to the expected House-Senate negotiations from which the final bill will emerge.

Still, Porter said the administration would not seek to ''undo'' the compromises reached with the Senate by lobbying the House, where clean air legislation is mired in committee.

Several lawmakers aligned with environmentalists criticized the Senate compromise, notably Sen. Frank Lautenberg, D-N.J., who charged that Bush's efforts to weaken the Senate clean air bill betrayed his campaign promises to protect the environment.

''The president said he wanted to be the environmental president, but what I saw in these recent days of negotiations was 'just say no' to the environmental measures needed to clean up our air,'' he said.

''We are still compromising America's health,'' said Lautenberg, who along with other senators vowed to try to toughen auto emission limits and controls on toxic air pollution.

Environmentalists pronounced the compromise unacceptable, saying it would allow smog to persist in dozens of cities well into the next century and leave Americans living in heavily industrialized areas exposed to high cancer risks from toxic air emissions.

''The back room dealing has generated bad deals for the American people,'' said Richard Ayres, chairman of the National Clean Air Coalition, an umbrella organization for 30 environmental and public health groups.

Industry officials termed the compromise a move in the right direction, but said it still was too costly.

''There are a number of key issues that have not been adequately addressed and until they are, the compromise proposal will remain far from what business and industry would consider acceptable,'' said William Fay, administrator of the Clean Air Working Group, which speaks for some 2,000 businesses and trade associations.

The compromise appeared to clear the way for Senate action on clean air legislation, which has been held up since late January by opposition from Bush and senators unhappy with the impact of acid rain and toxic pollution provisions on their states.

Mitchell said he would introduce the compromise Monday on the Senate floor and that he expects extensive debate and many amendments but no deliberate

efforts to block the bill. Senate Republican leader Robert Dole of Kansas agreed, saying, ''We are all on board. No one is going to hang back.''

Sen. Robert Byrd, D-W.Va., a leader of Midwest and Appalachian senators opposing the acid rain controls, said the compromise went far enough to meet his concerns that he would not try to block the bill. However, Byrd said he would seek ''improvements'' to minimize job losses in his state's coal mines.

The compromise includes some concessions to Byrd and Midwest senators who fear the acid rain controls will devastate the high-sulfur coal industry. The lawmakers also say their constituents face huge electricity rate increases because most of the 107 power plants targeted for acid rain cuts under the bill are in the Midwest and South.

Another breakthrough concerns limits on tailpipe emissions from automobiles, the major contributor to urban ozone smog, which now exceeds federal health standards in 101 cities. Car industry officials had said the emission limits in the original Senate bill were too costly.

#90060u2724 03/01/1990 ~United Press International

ANCHORAGE, AK (MARCH 1) UPI - A federal court issued summonses Thursday for an April arraignment date to the two Exxon companies charged in a five-count indictment this week arising out of last year's disastrous Alaska oil spill.

Separate back-to-back arraignments have been set for April 9 by Magistrate John Roberts, who accepted the grand jury indictment Tuesday.

No bail has been set, and summonses were issued to notify the companies of the arraignment, according to documents in the Exxon criminal file opened in U.S. District Court in Anchorage.

Exxon Corp. and its subsidiary, Exxon Shipping Co., were charged with three misdemeanor violations of the Clean Water Act, the Refuse Act and the Migratory Bird Treaty Act, and two felony violations of the Ports and Waterways Safety Act and the Dangerous Cargo Act.

If convicted of all counts, the companies could face a fine that could exceed $700 million, or double the actual damage caused by the spill, and an unspecified amount of restitution.

The fact that the two Exxon defendants have separate arraignments could signal that the companies plan independent defenses.

Exxon Shipping Co. of Houston owned the Exxon Valdez, which ran aground on Bligh Reef last March 24 and spilled nearly 11 million gallons of oil owned by its parent company, the Exxon Corp. of New York.

Houston lawyer Charles Mathews is representing Exxon Corp., and Nashville, Tenn., attorney James Neal, represents Exxon Shipping, according to the court clerk's office. Neither lawyer has yet filed anything with the court.

''We're going to put on a defense for a good corporate citizen that has been much maligned,'' said Neal, who successfully defended Ford Motor Co. on reckless homicide charges in the explosion of a 1973 Pinto that killed the car's driver.

He also won acquittal for movie director John Landis on charges of voluntary manslaughter in the deaths of three actors on the set of the movie ''Twilight Zone.''

Besides charging Exxon with spilling oil in the pristine Alaska environment, polluting national parks and wildlife refuges and killing tens of thousands of animals, the indictment alleges that Exxon knowingly employed incompetent people as tanker crewmen.

The indictment was filed Tuesday after plea bargain negotiations between the Justice Department and Exxon broke down amidst an angry storm of protest by Alaska's highest officials, politicians in Washington, and lawyers representing thousands of plaintiffs in 150 civil suits filed against Exxon.

The only individual charged with a crime in the nation's worst oil spill is Joseph Hazelwood, the 43-year-old Huntington, N.Y. mariner who was skipper of the tanker when it ran aground.

Hazelwood is on trial in state Superior Court, and the prosecution is completing its fourth week of presenting evidence against Hazelwood on charges of reckless endangerment, operating the tanker while intoxicated, negligent discharge of oil and criminal mischief.

Hazelwood's lawyers have criticized the Exxon indictment for being ill-timed and possibly prejudicing their case. They said the government should have waited to file charges until the end of the Hazelwood trial.

#90060u2760 03/01/1990 ~United Press International

LAKE BUENA VISTA, Fla. (MARCH 1) UPI - The government fined the Walt Disney Co. $1,000 for failing to provide adequate protection to actors recreating the stunts of movie character ''Indiana Jones'' at its Disney-MGM Theme Park.

Two performers have fallen and suffered injuries and a third was hurt by trap door at the show. Performers climb as high as 28 feet onto buildings

that simulate those in Cairo, Egypt, while recreating scenes from the movies starring Harrison Ford.

The Occupational Safetyand Health Administration instructed Disney to install padding and other safety equipment to protect workers who might fall.

Disney spokesman John Dreyer said Thursday that there would be no appeal and the company is developing plans to add safety equipment.

After the injuries, Disney modified the stunts.

Dreyer said the changes ordered were in a part of the show where there have been no injuries.

Disney must tell OSHA by March 24 what it will do to bring the show into compliance with federal safety standards and has until April 24 to implement those plans.

Dreyer said he believes the park can install the equipment without detracting from the show.

''It is a stunt show, so there is an element of risk involved, just as there is an element of risk involved in playing a variety of sports,'' he said.

#90060u2780 03/01/1990 ~United Press International

SAN ANTONIO (MARCH 1) UPI - Intelogic Trace Inc. Thursday reported a fiscal second quarter loss of $1.9 million compared to a loss of $542,000 in the same period of last year.

Revenues totaled $39.6 million, up from $34.4 million in the second quarter of last year.

For the six months ended Jan. 27, the company reported a loss of $8.5 million, compared to earnings of $5.8 million in the same period of last year.

Revenues for the six-month period were $78.5 million compared to $68.8 million last year.

Intelogic, which provides maintenance for computer and telecommunications equipment, said favorable operating results were offset by interest expense and investment losses.

Operating earnings in the seocnd quarter increased to $3.1 million from

$2.3 millon last year.

The increased revenues were credited to a 51 percent increase in computer sales and leasing revenue.

#90060u2795 03/01/1990 ~United Press International

SAN DIEGO (MARCH 1) UPI - A U.S. Marine who apparently won $3.24 million in the California lottery has not yet claimed his prize because he is going through a divorce and wants to talk to his lawyer first, the seller of the winning ticket said Thursday.

Lottery officials confirmed that one of two winning Lotto 6/49 tickets eligible to split a jackpot worth nearly $6.5 million was sold at Fiesta Liquor-Deli in Carlsbad, Calif.

Store owner Kamil Arabo said the holder of one of the winning tickets is a regular customer who knew shortly after Saturday night's drawing that he had correctly picked all six winning numbers.

''He's played the same numbers for two years,'' Arabo said. ''He came in after the drawing and showed me a ticket from the week before with the same numbers. He told me the winning ticket was at his house.''

Arabo would not disclose the winner's name but said he is a 45-year-old Marine stationed at Camp Pendleton.

After the two men compared the numbers, Arabo said, he congratulated the winner and gave him a claim form. The man said he was in the process of divorcing his wife and would consult an attorney before picking up the prize.

''He looked nervous,'' Arabo said. ''He wasn't very happy.''

Lottery spokesman John Schade said the winning ticket sold through Arabo's store has not yet been turned in.

''It's not that unusual for someone not to redeem the ticket right away. Maybe he's getting his financial situation together,'' Schade said.

After taxes, the prize is worth $129,600 a year for the next 20 years. If it is not claimed within 180 days, the money will be turned over to the state for education funding, Schade said.

Bob Nieto, a Lottery official in San Diego, said a man claiming to hold the winning ticket called the San Diego lottery office Monday but did not give his name or say when he would redeem his ticket.

California's newest millionaire did not tell Arabo when he would claim the prize or what he might do with the money.

''But he's not going to let $3 million sit there, even if he has to share it with his wife,'' Arabo said. ''Her attorney will make sure of that.''

#90060u2810 03/01/1990 ~United Press International

(MARCH 1) UPI - A report from Bulgaria says ousted President Todor Zhivkov has been given a clean bill of health by a team of doctors led by an American neurologist. The examination apparently clears the way for Zhivkov's trial on corruption charges. The 79-year-old former leader was hospitalized a month ago with age-related ailments.

A daring daylight robbery netted as many as seven men five-and-a-half-Million dollars in France today. Police say the armed robbers blocked two armored security vans on an eastern highway in the Upper Rhine region, forcing the drivers and guards to open the vehicles before escaping with the loot.

Canadian fire officials say a massive blaze involving 12-Million tires in Hagersville, Ontario, is nearly out. The flames spewed toxic gases and oily sludge for more than two weeks, forcing more than 500 people from their homes. Arson is supected in the blaze at a recycling plant south of Toronto.

-30- 1098

#90060u2819 03/01/1990 ~United Press International

WASHINGTON (MARCH 1) UPI - The Senate approved a scaled-down $125 million program to promote voluntary community service Thursday after rejecting an

attempt backed by the administration to terminate it after two years.

The bill, passed 78-19 and sent to the House, would provide volunteers with some pay and help with living expenses, and would award vouchers which could be used for education, to pay of college loans or to buy a first home.

Sen. Edward Kennedy, D-Mass., said the legislation would be ''one of the most important'' passed in the session and said it presented a ''challenge to young people and old people alike to give something back to America.''

One of the last fights centered on an amendment by Sen. John McCain, R-Ariz., which would have ended the program Sept. 30, 1992, forcing Congress to pass a new authorization. The amendment was killed 58-40.

''This amendment would give us two years to review the impact on a number of (issues) including military recruitment,'' McCain said. ''And this will not kill the legislation. The administration and the Department of Defense support this amendment.''

But Kennedy asked, ''If there is a termination date, what kind of message will that send to the governors ... who want to get started.''

''No governor is going to get into it, no non-profit organization is going to get into it,'' Sen. Barbara Mikulski, D-Md., said. ''They'll say, I'll wait until they extend it.''

The proposed National and Community Service Act would authorize up to $35 million for a youth service corps for people aged 16 to 26 and $35 million for states to set up a national service program for people over 17. Both would be open to full-time and part-time participants, who would get poverty-level stipends while serving as volunteers.

The bill also provides $25 million for students to participate in community service and for programs under which older people could volunteer in schools. It includes $4 million for a Commission on National Service and $1 million for state work on programs that develop innovative responses to local needs.

The bill also includes $25 million for President Bush's ''Points of Lights'' volunteerism program.

Under the bill, two-year volunteers would get a $5,000 voucher to pay for college or buy a home while the service veteran would get $3,200 under the GI Bill strictly for education.

Before the bill reached the floor, the measure was whittled down from about $300 million a year to $125 million, which would service about

750,000 volunteers instead of 2 million.

#90060u2858 03/01/1990 ~United Press International

WASHINGTON (MARCH 1) UPI - The Senate urged professional baseball Thursday to ''promptly'' end the dispute between owners and players, saying it was just a fight between ''billionaires and millionaires'' with the fans the losers.

The Senate approved a resolution 82-15 telling the owners and players to settle ''their differences promptly and begin a complete spring training and regular season as soon as possible.''

But Sen. Warren Rudman, R-N.H., questioned the resolution, saying ''as if anyone cares'' what the Senate thinks about the baseball impasse, adding ''we look like fools.''

Sen. Steve Symms, R-Idaho, said baseball was ignoring ''those of us who buy tickets and make billionaires out of owners and millionaires of out players.''

Symms said it was ''really outrageous'' the players and owners cannot come to an agreement and warned that if fans start a boycott ''then the owners will find out how the cow eats the cabbage.''

Two primary resolution sponsors were Sens. John McCain, R-Ariz., and Bob Graham, D-Fla. Their states stand to suffer economic losses if spring training is curtailed longer or cancelled.

McCain said spring training and a baseball season are of ''utmost critical importance'' to Americans and he added it was ''completely unnaceptable'' to go without spring training and the season.

(MARCH 1) UPI - SPORTS DIGEST

AUTO

Heavy rains Thursday forced cancellation of the opening day of qualifying for this weekend's third annual National Hot Rod Association Fram Supernationals in Baytown, Texas. Two sessions will be held Friday and Saturday with final eliminations Sunday.

BASEBALL

The Chicago White Sox hired former big-league shortstop Chico Carrasquel as color commentator for their Spanish-language broadcasts. Carrasquel, a native of Venezuela, played for the White Sox from 1950-56. ... The Chicago Cubs signed eight players to 1-year contracts and pitcher Les Lancaster to a 2-year deal. The eight included: first baseman Mark Grace, pitchers Steve Wilson and Jose Nunez, outfielders Dwight Smith, Dave Clark and Gary Varsho and catchers Joe Girardi and Rick Wrona. ... The Chicago White Sox signed pitchers Scott Radinsky and Roberto Hernandez to 1-year contracts. ... The New York Yankees signed catcher Brian Dorsett to a 1-year contract.

BASKETBALL

Magic Johnson of the Los Angeles Lakers, who averaged 23.5 points per game while leading the team to a 10-2 record last month, was named the Edge NBA Player of the Month for February. ... Josh Rosenfeld, former director of public relations for the Los Angeles Lakers, has been named to the newly created position of NBA Director of International Public Relations.

DRUGS

Mark Rowe, a 400-meter specialist from Torrance, Calif., has been suspended from track and field by The Athletic Congress for two years after testing positive for a substance banned under International Amateur Athletic Federation rules. Rowe, the 1984 and 1985 U.S. 400-meter champion was declared ineligible Dec. 12 following a hearing, and he failed to appeal by the Feb. 9 deadline. ... Welsh weightlifters Ricky Chaplin and Gareth Hives, who both tested positive for drugs at the Commonwealth Games in January, were banned for life from their sport by the British Amateur Weight Lifters Association.

FOOTBALL

Pittsburgh promoted David Brazil from linebacker coach to defensive coordinator, replacing Rod Rust who became head coach of New England.

GOLF

Canadian Danny Mijovic shot a 6-under-par 66 to take the first round lead in the $150,000 Thailand Open in Bangkok. Californian Michael Blewett was in second at 67. ... Mark James of England shot a 5-under-par 67 to take a one-stroke lead over Ian Woosnam (68) after the first round of the American Express Mediterranean Open at Marbella, Spain.

GYMNASTICS

Former Romanian gymnast Nadia Comaneci, 28, returned to the scene of her 1976 Montreal Olympic triumph amid speculation she may be offered a job

with the organization that runs the site.

HARNESS RACING

Totally Ruthless, winner of more than $1 million and voted the 2-year-old pacing colt of the year in 1988, will make his first start of the year Saturday at Freehold Raceway in New Jersey. Totally Ruthless was sidelined eight months in 1989 with a hairline fracture of the cannon bone in his left hind leg.

HOCKEY

Paul Coffey of Pittsburgh was named the NHL Dodge Performer of the Month after registering 28 points in 14 games. ... Bobby Holik, Hartford's 1989 first-round draft pick from Czechoslovakia, will join the Whalers in July after the final year of his two-year military commitment was dropped. The 19-year-old center is regarded as one of the best junior-age players in the world.

LEGAL

An undercover racehorse was used last year to crack a race-fixing scheme at Finger Lakes Race Track in Canandaigua, N.Y. The FBI said it had a horse train and race at Finger Lakes for several months last year while agents looked into allegations of questionable activities by some trainers and jockeys. A federal grand jury has indicted four people on charges they tried to fix a race last September. ... Former Philadelphia Eagles lineman Kevin Allen will be paroled from prison this month after serving nearly three years on a rape conviction. Allen's attorney, Walter Lesnevich, told the Philadelphia Inquirer that Allen plans to return to his home in Cincinnati and hopes to sign with an NFL team.

OLYMPICS

Salt Lake City was among six cities submitting bids to host the 1998 Winter Games. The International Olympic Committee, in Lausanne, Switzerland, said bids by the March 1 deadline also came from Aosta (Italy), Jaca (Spain), Nagano (Japan), Ostersund (Sweden) and Sochi (USSR).

SOCCER

League-leading scorer Tatu of Dallas was named MISL Offensive Player of the Month and Baltimore goalkeeper Scott Manning was named Defensive Player of the Month. ... The Belgian Interior Ministry would not allow KV Mechelen of Belgium to sell tickets beyond March 2 for its European Champions Cup quarterfinal match against AC Milan of the Netherlands. Security problems are believed to be the reason for the decision. In 1985, 39 people were crushed to death at Heysel Stadium in a European Cup final

between Liverpool of England and Juventus of Italy.

TENNIS

Magnus Gustafsson and Jonas B. Svensson of Sweden advanced with Jakob Hlasek of Switzerland to the quarterfinals of the $500,000 World Tournament in Rotterdam, Netherlands. Swede Thomas Hogstedt is the fourth quarterfinalist.

#90060u2961 03/01/1990 ~United Press International

NEW YORK (MARCH 1) UPI - The New York Times has won three prestigious George Polk Awards for journalistic excellence in education, foreign and international reporting, it was announced Thursday.

The awards, established by Long Island University in 1949 and named after a CBS correspondent killed during the Greek civil war, are among the nation's most respected and coveted journalism prizes.

Other news organizations that received Polk awards included The Washington Post, for national reporting; The Chicago Tribune, for medical reporting; and CBS news for network television reporting.

Fred Hechinger, of the New York Times, received the Career Award for his ''pionieering'' and dedicated journalism about education.

Nicholas Kristof and Sheryl WuDunn, a husband-and-wife team also employed by the Times, won the Foreign Reporting category for their analytical stories about the upheaval in China, conducted at ''great personal risk and with uncommon intelligence,'' awards officials said.

The International Reporting award went to Stephen Engelberg and Michael Gordon, both Times reporters, for their probe into the transfer of weapons-producing technology to Lybia, Iran, Egypt and other countries by European and American businesses. Their reports led to a slowdown in the manufacture of chemical weapons and a tightening of export laws and controls.

Rick Atkinson, of the Washington Post, won the National Reporting award for his three-part series about the making of the Stealth bomber, which was shrouded in secrecy.

Andrew Melnykovych, of the Casper Star-Tribune, of Wyoming, won the Political Reporting award for uncovering a secret deal between the Interior Department and 12 major oil companies.

Melnykovych's work forced led to the creation of new formal rules for

federal auditing and the defeat of the nomination of James Cason for the top post in the Agriculture Department.

The Regional Reporting award went to Miranda Ewell and David Schrieberg, of the San Jose Mercury News, for a three-part series titled, ''Lost in Transition.'' The series covered an eight-month investigation into the inadequacies and corruption of court interpreters, two-thirds of whom had failed competency tests or were untested.

The Hartford Courant won the award for local reporting for its series of articles that revealed illegal taping by police of a conversation between a lawyer and his client. The stories, which revealed similiar practices in New Jersey, Florida, West Virginia and Rhode Island, led to several demotions and resignations in Connecticut, a grand jury investigation and congressional hearings.

The Medical Reporting award went to John Crewdson, of the Chicago Tribune, for ''The Great AIDS Quest,'' a 50,000-word article on the search for the causes of the disease and the controversies it engendered in the scientific community.

There were four awards in the fields of television and radio reporting. CBS News won the Network Television Reporting Award for its coverage of the student uprising in China. It cited a new team headed by stalwarts like Dan Rather, Charles Kuralt and Bruce Morton for ''markedly more intelligent and professional'' reporting.

WCSC TV, of Charleston, South Carolina, won the Local Television Reporting Award for its outstanding coverage of the Hurricane Hugo disaster, despite sustaining $2.8 million in damage to its equipment and facilities.

Jonathan Kwitny, of ''The Kwitny Report,'' received the Television Investigative Reporting Award. The report was dropped by WNYC-TV due to funding but represented an ''exemplary'' series that offered an important new dimension to the PBS news and public affairs offerings.

The Radio Reporting award went to Robert Knight, senior producer of Undercurrents, a nationally syndicated investigative news program originating at WBAI-FM in New York.

BUDAPEST, HUNGARY (MARCH 1) UPI - ''Major differences'' appeared Thursday between Hungarian and Soviet negotiators seeking to set a date for withdrawing Soviet troops from Hungary, the official news agency MTI said.

The talks opened Wednesday and were conducted by Deputy Foreign Minister,

Ferenc Somogyi and his Soviet counterpart, Ivan Aboimov.

''No agreement has been reached because of major differences in the Hungarian and Soviet positions as to the final deadline and schedule of troop withdrawal,'' MTI said.

Somogyi did not disclose Hungary's deadline for the pullout of 65,000 Soviet troops, who have been stationed in Hungary since 1956, when a Kremlin invasion force crushed an anti-government uprising.

Hungary and the Soviet Union earlier agreed that all Soviet troops would be withdrawn, and the Hungarian Parliament has called for their removal by the end of 1990 or early 1991.

Somogyi said Hungary insisted ''on the shortest possible time required for a settled removal.''

The Soviet negotiator proposed a longer timetable than that suggested by Somogyi, saying a quick pullout would be hampered by railroad bottlenecks in the Soviet Union, MTI said.

''Failure to reach agreement in Budapest now does not exclude the possibility of an eventual compromise,'' Somogyi said. ''Nor does this failure completely rule out the signing of the accord on the withdrawal scheduled to take place on March 10.''

#90060u3083 03/01/1990 ~United Press International

BELFAST, NORTHERN IRELAND (MARCH 1) UPI - A passenger train plowed into two cars at an open crossing gate in a driving snowstorm Thursday night outside Belfast, killing at least three people and injuring 27, officials said.

Three train cars derailed in the 9:43 p.m. crash as two of the carriages plunged down a 25-foot embankment and landed upside down, trapping passengers.

Rescue crews were hampered by poor visibility and icy conditions as they fought to reach those in the mangled rail cars in Ballymena about 20 miles north of Belfast.

Police could not confirm witnesses' report of a fourth death. The three confirmed dead, including one child, had been in one of the cars, officials said. Six of the injured were hurt seriously, police said.

The Northern Ireland Railways train had been traveling from Belfast to Londonderry, police said. The cause of the crash was under investigation.

''When I got there it was sheer panic,'' said Stephen Templeton, a motorist who arrived seconds after the crash. ''People were screaming in pain and crying out for help. Nobody seemed to know what had happened.

''It was pitch black, but I could make out one of the carriages lying at the bottom of an embankment about 50 yards from the crossing,'' Templeton said.

Emergency crews from Newbytown took the dead and injured to Waveney Hospital in Ballymena where off-duty doctors and nurses returned to work.

Enid McCartney drove to the scene after hearing rescue vehicles.

''I have never seen anything like it,'' she said. ''The weather was terrible, but everyone helped the best they could.''

Distressed and confused relatives were comforted by hospital staff and clergy.

In Londonderry, a railway official broke the news of the crash to relatives and friends waiting for the trains to arrive.

#90060u3139 03/01/1990 ~United Press International

PANAMA CITY, PANAMA (MARCH 1) UPI - President Guillermo Endara used Thursday's inauguration of the National Legislative Assembly to lash out at conditions left by ousted dictator Manuel Noriega and to laud President Bush's decision to send in troops.

Endara also announced proposals to reform the constitution.

''Very soon the executive will present this legislature with a project for reforms to the Political Constitution of the Republic to be considered and discussed by the honorable members,'' Endara told the assembly.

He said the project, if approved by the legislature, would be put to a public referendum ''to allow the Panamanian people make the final decision.''

Fifty-eight members of the 67-seat assembly attended the inauguration at the Justo Arosemena legislative palace, 51 of them members of Endara's Democratic Alliance who won last year's elections.

Noriega annulled the election results May 8. Endara was installed as president during the U.S. invasion Dec. 20.

Endara said the Noriega government was incapable of doing what Nicaraguan President Daniel Ortega did last Sunday: ''Admit that he had lost the elections.''

He said said the public welcomed the U.S. invasion force, saying, ''No one except for the military usurpers and the civilians who served them'' wanted a war on Panamanian soil.

''The reception the people gave those soldiers was one of friends not invaders. President George Bush had a hard choice to make, but he helped in our fight for freedom and we Panamanians will always remember that,'' he said.

Endara spoke out against the ''exaggerated militarism'' of past governments, saying the state ''spent more money on arms than on books, more on guns than on vaccines.''

Endara criticized the poor management of public funds under Noriega.

''Any housewife who has to keep a home could teach those financial experts who ran the country without budgets, without God and without the law,'' he said.

He said Noriega left the country behind in its debt payments, its coffers empty. ''That budgetary and fiscal anarchy is over,'' he said.

Endara drew attention to Panama's 200,000-home social housing deficit and the ''absolute disrepect'' for human rights that he said had violated ''not only the Constitution, but also Panamanian law and international agreements signed by Panama.''

#90060u3264 03/01/1990 ~United Press International

(MARCH 1) UPI - A tragic hotel fire in Egypt's capital... India's army kills 60 protesters... And jittery Californians look at damage from yesterday's strong earthquake... U-P-I has these top stories and more, next.

A fire that swept through a five-star hotel near Cairo, Egypt, today killed 19 tourists, and fire officials say the hotel's management is to blame.

Witnesses say the blaze was started by sparks from an oven in an Arabic-style display tent in the lobby of the Heliopolis Sheraton. Fire officials say they repeatedly demanded that the highly flammable tent be removed, but hotel officials ignored the demands.

Hotel officials declined to comment on the accusation.

Witnesses also say the hotel did NOT appear to have a sprinkler system or audible alarms.

Rescue officials say 70 people were injured in the early morning blaze in the six-story hotel near Cairo's international airport. Some of the injured were Americans.

The fire was put out about four hours after it started. Officials say they are still searching the rubble for more bodies, but believe they have recovered most of them.

A source says chaos reigned today at a hospital in Srinagar , India, with doctors operating on so many people that they lost count.

Scores of dead and injured were taken to a hospital in Kashmir, with thousands of Moslems flooding the facility to look for relatives.

The scene came after troops today opened fire on Moslem protesters demanding independence for the region... killing at least 60 people.

Police say a Moslem separatist also shot to death a senior government information officer.

The violence came amid the largest outpouring of pro-independence fervor since massive protests began last week. More than 800-thousand Moslems gathered in the city 400 miles north of New Delhi, riding vehicles or marching to the headquarters of a U-N observer building.

More than 160 people have died in the region since January 20th, most of them demonstrators shot by police.

-30- 2198

#90060u3287 03/01/1990 ~United Press International

(MARCH 1) UPI - The earthquake that shook southern California yesterday is still sending reminders of itself. Officials say at least 30 after-shocks struck in the hours after the quake, including two today.

Seismologists say there's a slight chance of an even larger quake in the next few days. They also say the after-shocks can go on for weeks or months.

Despite the after-shocks, officials today began assessing the damage. Much of the inspection is going on in two cities near the epicenter- Pomona and La Verne. Pomona's City Hall is among the buildings closed for repairs.

Damage estimates are expected to climb to at least 10-Million dollars.

Yesterday's temblor measured five-point-five on the Richter scale and was centered three miles northwest of Upland, or 35 miles northeast of downtown Los Angeles.

At least four people were injured, but the region's major buildings survived intact.

President Bush says there are NO secret talks going on between the United States and Iran to try to arrange release of the U-S hostages in Lebanon.

Bush made the comment today in California, where he's in the second day of a political trip. He was responding to reports out of Beirut saying one of the eight U-S hostages might be released this month as a result of secret talks between U-S and Iranian officials.

Bush said that if he thought secret talks would lead to release of the hostages, he would engage in them. But he repeated that there are NO talks under way that he knows of.

He also repeated the long-standing U-S policy against negotiating for release of hostages. Said Bush- ''This is NOT a negotiating process.''

The president is in Los Angeles and is to attend the dedication today of a maximum-security jail, the North Los Angeles County Correctional Facility. The visit is designed to dramatize his call for tougher sentences for criminals.

-30- 2062

#90060u3308 03/01/1990 ~United Press International

(MARCH 1) UPI - NASA says it will bring the shuttle Atlantis home on Sunday, adding the ship and crew are doing well during a second day in orbit.

But the space agency is NOT saying much else about the hush-hush military mission, which reportedly involves the launch of a spy satellite.

The 500-Million dollars photo-reconnaissance spy station presumably was launched as planned this morning. However, the Air Force's refusal to provide a three-hour shuttle landing period as promised raises questions about the mission.

A spokesman says based on the mission's progress, the Air Force hopes to make a more detailed announcement 24 hours before landing.

Earlier, NASA released a statement saying the ''crew is doing well and the

orbiter Atlantis continues to perform satisfactorily.''

It was the space agency's first comment on the flight since one hour and 50 minutes after yesterday's takeoff when NASA stopped any public comment.

The 34th shuttle flight is the second of nine flights scheduled this year.

At least 80 people have been killed in a howling storm that has battered Europe since Monday... but it's now dying down.

Meteorologists in England say the storm is weakening as it drifts over Finland and the Soviet Union. They say ''it's lost most of its sting.''

Now civil defense and rescue crews are scrambling to repair the damage from heavy flooding in Denmark, Britain, Holland and Norway. There also were mudslides and avalanches in Alpine areas.

England's Prince Charles cut short a ski vacation to visit some of the two-thousand people in Wales who were forced from their homes because of flooding. The floods covered hundreds of thousands of acres, and some homes are under five feet of water.

Residents in the Netherlands are cleaning up after the highest seas in 35 years swept away chunks of Holland's coastline. Entire neighborhoods in Rotterdam were knee-deep in water.

-30- 2105

#90060u3500 03/01/1990 ~United Press International

(MARCH 1) UPI - Crime is emerging as a big issue in California's governor race, and President Bush did what he could today for the G-O-P candidate. Bush is pushing a law-and-order theme while stumping for gubernatorial hopeful Steve Wilson.

The cost of a first-class stamp apparently is going up. Postmaster General Anthony Frank told Congress today that he plans to announce the proposed increase next Tuesday. Reports say the new rate would boost the cost of a first-class stamp to 30 cents.

The chairman of a House sub-commitee wants the House Intelligence Committee to probe alleged links between the C-I-A and several failed savings-and-loans. One allegation says the C-I-A engaged in fraud to fund its covert activities.

An Israeli couple faces charges of defrauding two Connecticut banks of more than six-Million dollars. Prosecuters say the two are the first people charged in Israel in connection with crimes committed in the United States.

About 50 activists gathered for a moment of silence today at the Seabrook nuclear power plant in New Hampshire after the N-R-C granted the reactor a full-power license. Nearby, guards unfurled a banner proclaiming ''License Approved!''

More on the war against smoking. Officials say at least 12 states have plans to restrict or outlaw smoking in public places, and to mount anti-smoking campaigns. The list appears in a survey by the federal Centers for Disease Control in Atlanta.

In Washington, the chairman of a House panel criticized tobacco companies for- ''zeroing in on women, blacks, youths and Hispanics.'' Thomas Luken says other advertisers are barred from false advertising, but- in his words- ''We have immunized the tobacco industry.''

A Washington judge says he will NOT withhold a passport from a doctor who wants to travel to New Zealand for a bitter international custody battle over her daughter. Elizabeth Morgan claims her ex-husband sexually abused their daughter.

Bagpipes, french horns and motorcycles were heard in New York today as thousand of business and political leaders, employees and friends celebrated the life of Malcolm Forbes. The publishing magnate died last Saturday at age 70.

-30- 2377

#90060u3675 03/01/1990 ~United Press International

(MARCH 1) UPI - President Bush visited a new state-of-the-art prison in California today and used the occasion to push his plea for more prisons and tougher laws. He also praised local initiative for coming up with tax money to pay for the jail. His comments came at the dedication of the North Los Angeles County Correctional Facility.

An Idaho lawmaker says a new anti-abortion bill that he's sponsoring could become the most restrictive of its type in the nation if it's approved. The bill sponsored by State Representative Ed Brown would prohibit all abortions performed as a means of birth control. It would make all abortions illegal except in cases such as rape or incest, or when the health of the mother is threatened. The Idaho State House is to take up the bill on Monday.

The nation's mayors today joined in the campaign to reverse a series of Supreme Court decisions that chip away at civil rights laws. Indianapolis Mayor William Hudnut told a Senate panel that the rulings last year ''departed radically'' from a consensus on civil rights built up in the past 20 years. Several of the targeted rulings make it more difficult to

prove discrimination. Hudnut spoke on behalf of the U-S Conference of Mayors.

Nelson Mandela urged visiting U-S congressmen in Zambia today to maintain punitive sanctions against South Africa's white-minority government. Mandela and leaders of the African National Congress also voiced concern over unconfirmed reports that Vice President Quayle may visit South Africa later this month. The A-N-C says that such a visit would be ''ill-timed and premature.''

A House hearing over cable deregulation split largely along party lines today. Consumers and Democrats say the cable T-V industry needs regulation saying subscribers are the victims of high rates and poor service. But Republicans and industry representatives say only free competition can solve the industry's problems.

President Bush moved today to help the U-S-backed government in Panama in its economic recovery. Bush... trying to restore trade relations... restored lowest-possible tariff treatment for imports from Panama.

-30- 2320

#90060u3966 03/01/1990 ~United Press International

(MARCH 1) UPI - Bush administration officials and leaders in the Senate today announced their compromise on clean air legislation. The two sides negotiated for 22 days behind the scenes before coming up with the plan that Senate Democratic leader George Mitchell calls ''sound and comprehensive.'' But environmentalists attacked it as being too lax and said they'll lobby for stronger amendments. The plan calls for reductions in acid rain, toxic emissions and urban smog.

19 people are dead from a fire that swept through a posh hotel in Cairo, Egypt. 70 people were injured in the early morning blaze at the six-story, 650-room hotel, located near the city's international airport. The fire reportedly was started by an oven in an Arabic-style display tent in the hotel lobby. Most of those killed were European tourists.

In Southern California, residents are assessing the damage from yesterday's earthquake, which has produced at least 30 after-shocks. Fire and safety officials began inspecting homes and buildings in Pomona and La Verne, two cities near the epicenter. The quake measured five-point-five on the Richter scale and was centered 35 miles northeast of downtown Los Angeles. At least four people were hurt. Damage estimates are expected to climb to at least 10-Million dollars.

Defense Secretary Cheney appeared before the House Foreign Affairs Committee today and pleaded for a chance to avoid troop cuts. Cheney wants to shift 850-Million dollars from other defense accounts into payroll, to

avoid across-the-board military cuts this year that could total more than 68-thousand people. The plea met with little sympathy. Chairman Les Aspin says the Bush administration agreed to the cuts in a budget deal last year with Congress, and now wants to avoid the ''pain.''

-30- 1962

#90060u3989 03/01/1990 ~United Press International

(MARCH 1) UPI - Federal prosecutors filed four new indictments today in Baltimore in cases stemming from the government probe of corruption in the generic-drug industry. A former government worker, two generic-drug officials and a New York firm were charged in an alleged bribery scheme. The U-S investigation already has produced several convictions.

The State Department reports that the war on drugs had little effect on drug producers around the world last year. In its annual narcotics-control survey, the State Department says that while last year was a banner year for drug busts in the United States, elsewhere drug producers florished. The report singled out Bolivia, Thailand, Laos and Syria as countries that did NOT fully co-operate with the war on drugs.

A poll tax is threatening the conservative government of British Prime Minister Thatcher. She's insisting on a plan to tax each person a set fee- in spite of criticism within her own party that the tax is regressive and unfair to the poor. Thatcher is opposed to property taxes because she says they're inefficient and expensive to collect.

Testimony for the prosecution continued today in the trial of Joseph Hazelwood, the fired skipper of the Exxon Valdez tanker that caused the Alaska oil spill. A salvage expert testified in Anchorage that the ship hit Alaska's Bligh Reef so hard last March that pieces of its steel superstructure twisted 90 degrees. William Milwee said Hazelwood then tried to get the ship off the reef, risking ''loss of the vessel, loss of the crew'' and ''additional pollution.''

-30- 1756

#90060u4189 03/01/1990 ~United Press International

(MARCH 1) UPI - President Bush says there are NO secret talks under way to free the hostages held in Lebanon. Reports out of Beirut suggest that U-S and Iranian officials are meeting in Geneva to discuss a deal. The president says he's willing to do ''whatever it takes'' to free the hostages- as long as it does NOT involve a trade. Says Bush... ''This is NOT a negotiating process.''

70 people were killed in Beirut today in renewed fighting between rival Christian factions. Forces loyal to General Michel Aoun went on the offensive against Samir Geagea's Christian militia, shattering an uneasy

10-day-old truce. 780 people have died since the Christian infighting broke out January 31st.

Nicaraguan workers belonging to a pro-Sandinista labor union are telling President-elect Chamorro to make good on promises to improve the nation's economic conditions. They're threatening to demand an immediate wage increase. Chamorro representatives met with Sandinista officials today to organize the first peaceful transfer of political power in Nicaragua in this century.

New Hampshire's controversial Seabrook nuclear reactor got permission from the Nuclear Regulatory Commission today to go on-line for full operating power. A Seabrook utility official responded... ''If you wait long enough, you have justice.'' But anti-nuclear activists who've fought the power plant for 18 years are NOT giving in yet. They plan to file an appeal in federal court.

-30- 1627

#90060u4234 03/01/1990 ~United Press International

(MARCH 1) UPI - Officials in Ethiopia say the famine of 1984-85 could be repeated unless money is found for emergency transport of food into areas cut off by civil war. Ethiopia wants donor governments and international agencies to provide 14-Million dollars a month to fund airlifts and trucking to feed people in northern Ethiopia. Normal land and sea routes to the north have been cut off by rebels. The famine of 1984-85 killed up to one-Million people.

A judge in Washington, D-C, ruled that he won't withhold Dr. Elizabeth Morgan's passport, but said she must ask the D-C Court of Appeals to return it. She gave up the passport in 1986 when she was jailed for refusing to give her ex-husband rights to visit their daughter. Morgan wants to go to New Zealand, where her daughter is living with her maternal grandparents. Morgan says her ex-husband sexually abused the child, but he denies it.

The Virginia Military Institute does NOT accept women, but that may change now that the Justice Department has filed suit against the state-supported school. The civil rights suit seeks to force V-M-I to admit a young woman from northern Virginia who has applied for admission. The suit says the all-male policy of the 150-year-old school in Lexington, Virginia, violates the 1964 Civil Rights Act and the equal protection clause of the U-S Constitution.

A new twist in the Zsa Zsa Gabor case. The Beverly Hills police officer who arrested Gabor last June 14th has filed a 10-Million-dollar slander suit against the glamour queen. In his suit, Officer Paul Kramer says Gabor has ''engaged in a malicious and vindictive campaign to defame'' him

through her numerous radio and T-V appearances. Gabor was convicted in October of slapping Kramer when he arrested her on a routine traffic stop. But she claims he assaulted her.

-30- 2003

#90060u4448 03/01/1990 ~United Press International

(MARCH 1) UPI - The latest news details and developments from around the world and across the nation... from the wires of United Press International.

The compromise on clean air legislation reached by Senate leaders and the Bush administration is being praised by some on Capitol Hill, but it's NOT popular with everybody.

Senate Democratic leader George Mitchell calls the agreement on cutting acid rain, toxic emissions and urban smog- quote- ''sound and comprehensive.'' He says it's ''far more stringent'' than the current Clean Air Act, and he plans to introduce the bipartisan plan on the Senate floor Monday.

President Bush also praised the plan. He says it's ''a big forward step'' that represents ''the best in bipartisanship.''

But environmentalists attacked it, saying it's too weak to be effective in reducing smog in America's cities. They say they'll lobby to get tougher amendments, particularly in auto emission limits.

Some senators feel the same way. Democratic Senator Frank Lautenberg of New Jersey says he'll try to toughen auto emission limits and controls on toxic air pollution.

Fire officials and building inspectors in southern California are busy checking up on the effects of yesterday's earthquake.

The quake measured five-point-five on the Richter scale and was felt across thousands of square miles. But it concentrated its effect along the foothills of the San Gabriel Mountains, on the dividing line between Los Angeles and San Bernardino counties.

30 aftershocks have hit the region since yesterday's temblor.

The four cities that sustained the most damage were Upland, Pomona, Claremont and La Verne. They've declared local states of emergency to help release relief funds.

NO deaths were reported, but at least four people were injured. Safety officials are looking to earmark necessary repairs and make sure buildings

meet structural standards. Damage is tentatively estimated in the neighborhood of 10-Million dollars.

-30- 2168

#90060u4477 03/01/1990 ~United Press International

(MARCH 1) UPI - An uneasy 10-day truce came to an abrupt end today in Beirut, where fighting erupted anew between rival Christian factions.

Forces loyal to General Michel Aoun went on the offensive, attacking strongholds of the militia commanded by Samir Geagea. 70 people were killed- most of them soldiers- and another 150 were wounded.

The battle began at dawn and raged throughout the day. Heavy rocket fire kept rescue workers from the retrieving the dead and wounded, while firefighters were unable to get to burning buildings.

The conflict has been prompted by a Syrian peace plan. Aoun rejects the proposal, Geagea seeks to accept it.

Since the Christian infighting broke out almost one month ago, 780 people have been killed.

A witness for the prosecution in the Joseph Hazelwood trial says the fired Exxon Valdez skipper risked losing his ship and crew when the tanker ran aground last March.

Marine salvage expert William Milwee testified in Anchorage today that Hazelwood ran the tanker back and forth across Alaska's Bligh Reef after the ship hit the reef, trying to get it off the rocks.

Milwee says Hazelwood risked sinking the ship, and risked worsening the spill of oil from the tanker. The Exxon Valdez ran aground last March 24th in Alaska's Prince William Sound, causing the nation's worst-ever oil spill- nearly 11-Million gallons.

Milwee also testified that the tanker hit the reef so hard that steel structural supports running the length of the ship were bent at right angles.

Hazelwood is charged with reckless endangerment, operating the tanker while intoxicated, negligent discharge of oil and criminal mischief.

-30- 1846

#90060u4498 03/01/1990 ~United Press International

(MARCH 1) UPI - A major waterway has been re-opened between New York's Staten Island and New Jersey following yesterday's oil spill, but cleanup

of the mess is continuing.

The Kill Van Kull waterway that serves as the main entrance to New Jersey's chief port area was closed yesterday when 30-thousand gallons of heavy oil leaked from a barge at an Exxon dock.

The Coast Guard says little oil is left in the water today, but tar balls have collected along the Staten Island shoreline and along some beaches on the New Jersey side of the waterway.

Officials say skimmer boats and vacuum trucks are sucking up the gooey mess.

The Coast Guard says the owner of the barge has agreed to pay for the cleanup. But New York officials have launched a criminal investigation to determine responsibility for the leak.

The State Department reports that while U-S law-enforcement agencies won several battles in the war on drugs last year, drug producers overseas found havens in a number of countries.

The report concludes that the worldwide anti-drug offensive produced ''mixed results.''

The statement came in the Department's annual international drug survey. The report said that while the United States was recording a banner year in drug busts, worldwide drug production- quoting here- ''reached new levels.''

The report blamed corruption and government apathy abroad for the rising tide of drugs. Bolivia, Thailand, Laos and Syria were fingered as countries failing- quote- ''to exhibit a serious commitment to reducing drug production.''

The report didn't blame just the producers. It went on to say that worldwide drug abuse is increasing.

-30- 1847

#90060u4631 03/01/1990 ~United Press International

(MARCH 1) UPI - Senate Democratic leader George Mitchell of Maine says despite containing compromises, the new clean air bill will provide ''significant improvement in the quality of American air.'' President Bush says the bill is ''a big forward step'' and ''the best in bipartisanship.''

Greyhound is negotiating with union representatives tonight, trying to avoid a walkout which could shut down the nation's largest inter-city bus line. A Greyhound spokesman says- ''We're engaged in good-faith, very

hard bargaining.''

Egyptian fire officials in Cairo say they still are combing the rubble of today's hotel fire, searching for more victims. At least 19 people died in the early morning blaze that sent frantic guests jumping out of windows.

A fragile 10-day-old truce was broken in Beirut today. Sources say troops loyal to Christian General Michel Aoun launched a powerful attack on positions held by Aoun's rival, Samir Geagea. At least 70 people died in the fighting.

In Srinagar, India, troops fired on Moslem protesters today, killing at least 60 and wounding scores of others. Official sources report the incident as the worst bloodshed in Kashmir since the beginning of a secessionist movement two years ago.

Nelson Mandela met with the architects of U-S sanctions against South Africa in Lusaka, Zambia, today. Mandela said they must force the white minority government to negotiate by maintaining punitive measures.

-30- 1612

#90060u4639 03/01/1990 ~United Press International

(MARCH 1) UPI - Colombian police say six bombs exploded in Medellin today knocking out electrical and telephone service. There were NO casualties in the blasts, which officials think were planted by leftist rebels protesting upcoming elections.

The Idaho House will consider an anti-abortion measure tomorrow that supporters say may give the Gem State the nation's most restrictive abortion law. The bill would prohibit abortion as a means of birth control.

Vice President Quayle will travel to Latin American and the Caribbean the week of March 9th to discuss relations ruffled by the U-S invasion of Panama. Quayle's office says the vice president also will discuss the defeat of the Sandinista government in Nicaragua.

Thousands of business and political leaders gathered at Manhattan's St. Bartholomew's Church to celebrate the colorful life of publisher Malcolm Forbes. The funeral service was highlighted by the skirl of bagpipes, the blare of French horns and the roar of motorcycles.

In Seattle, government biologists are trying to drive away gluttonous trout-eating sea lions away from the Ballard fish ladder with rubber-tipped arrows. Next week a trap will be set so the sea lions can be trucked to California.

''Baby Boomers'' are getting older. The Census Bureau reports the median

U-S age has risen to 32-point-three. Aging ''baby boomers'' have made the 25-34 age group the largest segment of the population.

-30- 1607

#90060u4760 03/01/1990 ~United Press International

(MARCH 1) UPI - President Bush took up a familiar theme- law and order- when he helped dedicate a new jail today in California. He toured the North Los Angeles County Correctional Facility and used the occasion to push his plea for more prisons and tougher criminal laws. He said he wants to put an end to criminals' being released- quote- ''because there isn't enough cell space to hold them.'' The law-and-order issue was a central theme in Bush's 1988 presidential campaign.

The U-S Postal Service is preparing to fight a two-front war in favor of a rate increase. The post office is asking its unions to restrain their demands this year in an attempt to get costs under control. The postal system then intends to seek the largest rate increase in its history- from 25 cents to 30 cents a stamp for first-class postage. The rate increase is to be announced next Tuesday. The approval process could take 10 months.

The nations of eastern Europe are trying to play catch-up in fighting the disease AIDS. Eight eastern European countries sent representatives to a conference with the World Health Organization in Denmark this week. They established a program that includes AIDS education. Albania did NOT attend saying it has NO AIDS cases and that it does NOT want to be aligned with the East bloc in any way.

About 50 people were killed today in a fiery plane crash involving an Indian Air Force MiG jet. The plane crashed on a busy highway 45 miles northwest of New Delhi, ramming a pair of tankers carrying inflammable material. The tankers exploded, engulfing the highway in flames. One witness said that after the crash the road ''looked as if it was bombed.'' There is NO word on the cause of the crash, although the the pilot reportedly ejected before impact.

-30- 1957

#90060u4784 03/01/1990 ~United Press International

(MARCH 1) UPI - More trouble for Communist Party bosses in the Ukraine. Coal miners in Donetsk staged a warning strike at 21 mines to demand the resignation of the entire regional party leadership. Today's strikes were for one shift only, but leaders say tomorrow's strikes will last all day. A strike leader says the protest was ignited by a T-V expose showing imported boots for party and government leaders.

A new study says Vietnam vets were NOT predisposed to develop

post-traumatic stress disorder. In examining more than two-thousand sets of identical male twins- some who served in Vietnam, some who did NOT- the study shows a direct relation between intensity of combat and the severity of later disorders. One researcher says the study- in his words- ''blows apart the predisposition argument.''

March came in like a lamb today in parts of the northern Plains, where unseasonable warmth pushed temperatures to record highs in at least four cities. Fargo, North Dakota, reported a balmy 58 degrees. It was a different story in New England, where the temperature fell to three degrees below zero in northern Maine. Elsewhere, rain fell in the Gulf Goast region and other parts of the South.

Authorities in Philadelphia say they've recovered rare books worth about one-point-five-Million dollars that were stolen from a University of Pennsylvania library. Police say Kathleen Wilkerson, a part-time employee at the university's Van Pelt Library, has been charged with stealing at least 19 rare books, including an edition of Shakespeare's ''Hamlet'' printed in 1611 and worth one-Million dollars. The books were found at a downtown book store.

#90061b0011 03/02/1990 ~Business Wire

DENVER (MARCH 2) BUSINESS WIRE - Richard D. Heiserman, chairman of the board and president, First Capital Financial Corp., announced that the company has been advised by the Office of Thrift Supervision (OTS) of the final results of the non-binding arbitration that was initiated last December.

With minor exceptions, the arbitration panel has upheld the original findings of the OTS examiners, and the OTS is in agreement with the arbiters' findings.

In dispute was $53.4 million of the total $86.9 million of specified asset write-downs and additional loss provisions that the company recorded for regulatory purposes in December, pursuant to OTS directive.

The company will now proceed to adjust its Generally Accepted Accounting Principles (GAAP) financial statements accordingly to reflect a Dec. 31, 1989, negative net worth position of $48.5 million.

"We are extremely disappointed with the decision of the arbitration panel," said Heiserman. "We truly thought that the arbiters would, to a much greater extent, agree with our asset valuations and those of the many local market experts who supported us in our position.

"The prolonged weakness of the Colorado real estate economy has had a

devastating effect upon our industry and has been an impediment to Capital's attempted recovery," Heiserman added.

"I'd like to emphasize once again that our customers' FDIC-insured deposits are completely safe and secure and will remain so at Capital Federal," assured Heiserman. "We're continuing to provide the same great level of customer commitment and service at each of our many locations."

First Capital Financial Corp. is a Colorado-based holding company. Its principal subsidiary, Capital Federal Savings and Loan Association of Denver, employing 475, operates 18 branches along the Front Range serving more than 100,000 customers and has been in business for 64 years. Deposits are insured up to $100,000 per account ownership by the FDIC.

#90061b0014 03/02/1990 ~Business Wire

APPLETON, WI (MARCH 2) BUSINESS WIRE - Air Wis Services Inc., parent company of Air Wisconsin Inc., Friday reported operating revenues of $171.1 million for 1989, down slightly from $177.3 million in 1988.

Net income was $648,000, or 7 cents per share, in 1989, compared to $11.3 million, or $1.14 per fully diluted share from operations. After a $6.5 million non-recurring credit arising from a change in accounting for deferred income taxes, 1988 net income amounted to $17.8 million, or $1.70 per share on a fully diluted basis. All per share data have been adjusted to refect the 10 percent stock dividend paid in June 1989.

For the fourth quarter of 1989, operating revenues totaled $42.7 million, a 6 percent increase over the like period in 1988. A net loss of $634,000, or 7 cents per share, was reported for the fourth quarter in the current year.

Revenue was down for the year as a result of a 7 percent decline in yield (revenue per passenger mile) to 38.4 cents, reflecting increased competition on many of the company's routes and greater numbers of Mileage Plus and ''Kids Fly Free'' passengers. While capacity rose moderately during 1989, load factors declined 2.1 points to 46.7 percent. This decline is partially attributable to the overall reduction in passenger traffic at Chicago O'Hare, the company's primary hub, in 1989. Due to traffic delays at this major airport, an increased number of passengers apparently elected to bypass O'Hare in favor of less congested midwestern hubs.

Unusual charges totaling $3.1 million before taxes, or 21 cents per share,

directly impacted 1989 earnings. The largest of these, a charge of $1.9 million as an estimate for indemnity payments associated with the planned 1990 disposition of three Shorts 360 aircraft, was booked in the fourth quarter, reducing that period's earnings by 13 cents per share.

Air Wis Services Inc. is traded on the OTC National Market System under the symbol ARWS.

TACOMA, WA (MARCH 2) BUSINESS WIRE - W.W. Philip, chairman and chief executive officer of Puget Sound National Bank, and Richard G. Martindale, president of the First National Bank of Enumclaw, Friday announced that the parties have reached preliminary agreement to merge Puget Sound National Bank and the First National Bank of Enumclaw.

The terms of the proposed agreement provide that stockholders of First Enumclaw Bancorporation (the parent of First National Bank of Enumclaw) will receive cash in the amount of $40 per share for their shares of common stock. The total transaction value is approximately $15,325,000.

In announcing the preliminary agreement, Martindale stated that First National customers will benefit from expanded financial and other resources available through Puget Sound Bank.

At Dec. 31, 1989, Puget Sound Bancorp, the parent company of Puget Sound National Bank, had total assets of approximately $4.3 billion. Through its financial subsidiaries, Puget Sound provides a wide variety of services in the commercial, thrift and mortgage banking businesses. Bancorp's lead commercial banking subsidiary, Puget Sound National Bank, operates a retail network with over 85 locations and provides both commercial and consumer lending. Through its Puget Sound Savings Bank and Washington Mortgage Corp., Bancorp also specializes in real estate lending.

In addition, Bancorp has two other commercial banking subsidiaries, Bellingham National Bank and San Juan County Bank, as well as a mortgage servicing company, a recently acquired broker/dealer, and a credit life insurance company.

The proposed transaction is subject to completion of a definitive agreement, approvals by the boards of directors of the respective institutions, the shareholders of the First Enumclaw Bancorporation, and appropriate regulatory authorities. The merger is expected to be completed in the fall of 1990.

SALT LAKE CITY (MARCH 2) BUSINESS WIRE - Dayna Communications Inc., Wednesday (Feb. 28) announced shipment of DaynaFILE for the NeXT, an external disk drive that lets a NeXT computer read and write to MS-DOS and NeXT-formatted floppy disks.

DaynaFILE attaches to the Small Computer Systems Interface (SCSI) port of the NeXT cube and can be daisy-chained to other SCSI devices such as scanners. Available as a single or dual-drive unit, DaynaFILE supports 3.5-inch disks (720KB and 1.44MB) and 5.25-inch disks (360KB and 1.2 MB).

Two DaynaFILE applications allow the NeXT Computer to access files and directories on the disks: DaynaUnix and DaynaDOS. DaynaUnix mounts NeXT-formatted disks into the NeXT file system, where they appear as standard directories in the Directory Browser. DaynaDOS is a file transfer application that copies files from an MS-DOS formatted disk to any volume in the NeXT file system.

Macintosh owners can use two existing Dayna products, DaynaFILE for the Macintosh and the DOS Mounter utility, to transfer data to an MS-DOS formatted disk. For Macintosh computers with an 800KB drive, DaynaFILE for the Macintosh allows file transfer to 5.25-inch or 3.5-inch MS-DOS disks.

For the newer Macintosh computers equipped with a SuperDrive, which has the built-in ability to read and write 3.5 inch MS-DOS disks, DOS Mounter makes it extremely easy to copy Macintosh files to MS-DOS formatted disks. From there, files can be transferred to the NeXT Computer using DaynaFILE for the NeXT.

Dayna Communications Inc., is a privately held company that designs and manufactures a range of products to meet the connectivity and productivity needs of personal computer users.

VANCOUVER, British Columbia (MARCH 2) BUSINESS WIRE - Naxos Resources Ltd. has purchased one hundred percent interest in the Yen 81, 82, 83 claims comprising 58 units located approximately 60 miles from Dease Lake, British Columbia.

As well, the company has acquired one hundred percent interest in the IR 41, 42, 43, 44 and IR 83, 84 claims comprising 44 units located near Dease Lake, British Columbia. The total acquisition cost was $16,000.

The Yen Claims are located near the Homestake/American Reserve Mining Corp. joint venture property. Homestake has previously reported that its Kutcho Creek hosts a copper-zinc deposit containing an open-pit mineable reserve of 13.9 million tonnes grading 1.75 percent copper, 2.47 percent zinc, 28 grams per ton silver and 0.34 grams per ton gold.

Sumitomo Metal Mining Canada Ltd. with claims located in the same area hosts a similar base metals deposit of approximately 22 million tons.

Naxos Resources Ltd.'s wholly owned subsidiary NXR Trading Ltd. will unveil the NXR 1,000 and 2,000 camera series March 30, 1990, in Las Vegas, Nev. at a promotional seminar for market makers, brokers and distributors from across the United States.

A complete line of NXR brand sports footwear, super color film, cameras, silk materials and goods are scheduled for Canadian introduction in early June.

The company has granted Incentive Stock Options totalling 290,000 shares exercisable at a price of $1.60 for a term of two years to three employees of the company.

TOLUCA LAKE, CA (MARCH 2) BUSINESS WIRE - Staar Surgical Co.'s founder and principal shareholder Thomas R. Waggoner, citing his opposition to two transactions proposed by the management of the Monrovia-based medical products firm, Friday announced that he will not seek re-election to the board of directors at the shareholders' meeting scheduled for March 15. He becomes the third Staar director to resign his board seat since last August.

Waggoner said he believes that the proposed transactions with Chiron Opthalmics Inc. and Cooper Cos. Inc. result in "the effective liquidation of Staar at the expense of current shareholders."

He also expressed concern because company management has not obtained valuations or fairness opinions on the deals from investment bankers, accountants, and lawyers, and has not allowed the audit of Staar records

by the outside board members. "It is clear by their actions that this management believes that it needs to answer to no one," Waggoner said.

Despite vacating his position on the board, Waggoner said that he will support any qualified slate of independent directors proposed at Staar's upcoming shareholders meeting. In the interim, however, he said he would abstain from board votes on any matters related to the Chiron or Cooper transactions because he feels that insufficient information has been furnished to the outside directors.

Because he believes that the proposed Cooper and Chiron deals would result in the liquidation of Staar, Waggoner said that he feels the transactions need to be ratified by all shareholders.

Among Waggoner's other frustations with the current management is its failure to pay Staar's outside auditors, which has resulted in an absence of company financial statements for shareholders. He also expressed disappointment with the company's neglect in filing its 10-K report with the Securities and Exchange Commission, and in making past-due tax payments.

Waggoner said he will continue to pursue all available legal remedies to protect the interests of Staar shareholders, and will proceed with the appeal of a Delaware Chancery Court's decision regarding the voting rights of his preferred shares of company stock.

Separately, a ruling is expected shortly from the Chancery Court on the status of two million common shares of Staar issued to Waggoner in 1987 in consideration for giving his personal pledges and guarantees on company debt.

#90061b0056 03/02/1990 ~Business Wire
HOUSTON (MARCH 2) BUSINESS WIRE - Transco Energy Co. Friday announced a 1990 capital budget of $475 million, which compares to $466 million spent in 1989.

Approximately 70 percent of the 1990 expenditures and investments are planned for natural gas pipelines and gas-related businesses.

Capital expenditures and investments in 1990 for Transco's natural gas pipeline systems are expected to total $266 million, including $188 million for Transcontinental Gas Pipe Line Corp. (TGPL) and $76 million for Texas Gas Transmission Corp.

Emphasis on expanding access to gas supplies and increasing storage and delivery capabilities to TGPL's and Texas Gas' market areas will account for much of the spending. Hydrocarbon marketing and services is budgeted at $65 million, including $57 million for non-jurisdictional gas gathering facilities.

According to Transco Energy Co. President and Chief Executive Officer George S. Slocum, ''This commitment to our natural gas-related businesses, coupled with the integration of the TGPL and Texas Gas systems, will strengthen Transco's position as a significant supplier of natural gas services in the Eastern half of the United States.

''We are pleased with the results to date of our restructuring efforts, which began in 1988 and were largely completed last year. We are now turning our attention to increased supply access and continued emphasis on customer-driven services. Meanwhile, we are also allocating sufficient capital to take advantage of opportunities available in our other energy-related operations.''

Slocum noted that Transco expects to spend $117 million on oil and gas exploration and production, including $40 million for Transco Exploration and Production Co. and $72 million for coalbed methane development; $20 million for Transco Coal Co.; and $7 million in additional power generation projects through Transco Energy Ventures Co.

''During 1990-1992, our capital spending should exceed $1.25 billion,'' said Slocum. ''With the vast majority of that invested directly in the transportation, gathering and marketing of natural gas, there's no doubt where Transco's strategic focus lies as we head into the 1990s.''

SOLANA BEACH, CA. (MARCH 1) BUSINESS WIRE - Thursday Kaypro Corp. (OTC:KPRO) filed for creditor protection under Chapter 11 of the federal bankruptcy code.

President and Chief Executive Officer Roy Salisbury said from Kaypro's corporate headquarters: ''My team and I have been on the job for 10 days. During this time we've implemented a number of cost-cutting measures and have made every effort to satisfy Kaypro's patient creditors.

''We have devised a comprehensive strategic plan designed to put Kaypro back on track. We simply need more time to implement our course of

action. We have chosen to exercise this option because it is a good business decision ... one that will ultimately prove to be in the best interest of Kaypro and its creditors.''

Salisbury went on to outline a few of the basic steps included in his strategic plan:

1. Amplify and diversify Kaypro's sales efforts through the addition of master distributors and enhancement of the dealer's competitive edge.

2. A thorough restructuring of the corporation so as to identify and nurture income/profit centers.

3. A careful analysis of Kaypro's current market position with an eye toward future opportunities for growth.

Chairman of the board, Andrew F. Kay, said: ''I have reviewed Roy's plans and have found them to be sound. I'm also quite encouraged with some recent progress in Kaypro's sales efforts, including a number of large-volume orders.

''I've been chairman of this company for the past 38 years and this decision was not an easy one. However, this move will provide the environment necessary for Kaypro to flourish again,'' Kay said.

Kay went on to recall the series of events that led up to Thursday's decision. Several years ago, large inventory purchases were made in anticipation of continuing stellar growth in sales. The microcomputer market then softened and the price of necessary random access memory (RAM) chips increased dramatically. These items made it difficult for Kaypro to compete in an increasingly price-sensitive market.

Later, an unfavorable financing arrangement left Kaypro with insufficient working capital. In addition, this situation generated a great deal of adverse publicity in the media, further depressing overall sales.

Last summer, Kaypro Corp. received a large shipment of peripheral controller chips manufactured in Malaysia. This chips exhibited an intermittent defect when used in a special environment. Kaypro repaired or replaced all of the defective machines; however, word of this problem among end-users and dealers further eroded sales.

These and other negative turns culminated in Kaypro's decision to seek federal shelter, allowing time for corporate restructuring and organization.

Kaypro Corp. manufactures and distributes a full line of microcomputers for businesses and individuals. Kaypro currently enjoys a customer base

of nearly half a million users.

ST. LOUIS (MARCH 2) BUSINESS WIRE - Charles M. Stout has joined Roosevelt Financial Group Inc. in the new position of senior vice president and manager of the Real Estate and Retail Banking Group, the company announced Friday. Roosevelt Financial Group (NASDAQ:RFED) is the holding company for $2.7 billion Roosevelt Bank, a Federal Savings Bank.

Stout comes to Roosevelt from St. Louis-based Heartland Savings Bank, where he served as chief operating officer since 1988. He had been with an affiliated company, Love Real Estate Co., as senior vice president since 1984. From 1977 to 1984, he served as a vice president with Centerre Bank, a regional commercial bank that's since been merged.

Raymond T. Gusnard, Roosevelt's chairman of the board, said, "Stout's experience in lending and retail banking, and his in-depth knowledge of our local markets, will help us continue to strengthen our retail presence."

Roosevelt Bank has 18 branch offices in Missouri, including 16 locations in metropolitan St. Louis.

BEAVERTON, OR. (MARCH 2) BUSINESS WIRE - Demonstrating the company's commitment to an open electronic design automation (EDA) environment, Mentor Graphics Corp. announced Friday that Synopsys Inc., a supplier of logic synthesis tools, has become an OpenDoor partner.

The OpenDoor Program enables and supports the integration of commercial and in-house applications into the Mentor Graphics Concurrent Design Environment.

Under the terms of the agreement the two companies will jointly qualify existing interfaces between the Synopsys products and the Mentor Graphics EDA environment. In addition, they will work closely on future interfaces including those to Mentor Graphics' Release 8.0 Falcon Framework for Concurrent Design.

''We are particulary pleased to have Synopsys as an early participant in our OpenDoor Program,'' stated Gerard Langeler, president and chief operating officer of Mentor Graphics. ''They are the leading supplier of logic synthesis tools and their participation reaffirms our intent that this program be open to all commercial software developers worldwide.''

Synopsys provides logic synthesis tools for the design of full custom and application-specific integrated circuits (ASICs). The agreement initially covers interfaces to Synopsys' Design Compiler for translating circuit designs into logic gates, and its HDL Compiler which translates a circuit specification written in a hardware description language (VHDL or Verilog) into gate level logic. The Synopsys tools and interfaces will be supplied and supported by Synopsys.

''A cornerstone of Synopsys' high-level synthesis strategy is to complement mainstream CAE tools and ASIC technologies,'' stated Harvey Jones, president and chief executive officer of Synopsys. ''A high-quality interface to the Mentor design system has always been a priority for Synopsys, and a part of our product offering since the day we released our first commercial synthesis tools.

''The OpenDoor program serves our industry well by opening the world's most prominent CAE system to value-added third party design tools. Joining the OpenDoor program absolutely makes sense for Synopsys, as it formalizes our relationship with Mentor Graphics and assures us of continuous support directly from Mentor. In turn, our mutual customers' investments in our respective tools are leveraged through the highest possible level of tool integration,'' Jones concluded.

Synopsys will work with Mentor Graphics in the OpenDoor Integration Lab on joint qualification of the interfaces. Mentor Graphics will provide Synopsys with technical training and support, as well as early releases of software so that the interfaces will remain current with the most recent Mentor Graphics software release.

''Our commitment is based on our customers' desire to be free to use whatever tools are needed to get the job done. Our customers can now choose logic synthesis tools from Synopsys and Mentor Graphics. This gives customers more logic synthesis alternatives in a single environment than anywhere else in the industry,'' Langeler concluded.

The Mentor Graphics OpenDoor Catalog, available in the second quarter of this year, will include information on the Synopsys interfaces as well as those from other OpenDoor participants.

Synopsys Inc. develops and markets high-level logic synthesis tools for designing ASICs and electronic systems. The Synopsys tools support both

VHDL and Verilog for HDL-based design. Synopsys is the market leader in logic synthesis tools, one of the fastest-growing segments of the electronic design automation market, with installations in over 90 companies worldwide. The company's headquarters are located at 1098 Alta Avenue, Mountain View, Calif., 94043.

Mentor Graphics Corp. (NASDAQ:MENT), Beaverton, was established in 1981 to design, manufacture, market and service electronic design automation systems. The company is the leader in worldwide EDA sales, reporting revenues of $380 million in 1989. The company currently employs more than 2,100 people. In addition to its corporate offices in Beaverton, Mentor Graphics has sales and support offices in 51 locations worldwide. The company's headquarters are located at 8500 SW Creekside Place, Beaverton, Ore., 97005.

LOS ANGELES (MARCH 2) BUSINESS WIRE - LIVE Entertainment Inc. (NASDAQ:LIVE) has completed its acquisition of the Waxie Maxie Quality Music Co. for $11.75 million, it was announced today by Melvin A. Wilmore, president and chief executive officer of the LIVE Specialty Retail Group.

Waxie Maxie, with headquarters in Washington, D.C., operates 33 company-owned stores in Maryland and Virginia that sell compact discs (CDs), records, audiocassettes, videotapes and related accessories. Sales for the fiscal year ended July 31, 1989, were $23.9 million.

Under the terms of the acquisition, LIVE paid $20.90 per share net, in cash, for all outstanding common shares of Waxie Maxie.

The company is now an operation unit within the LIVE Specialty Retail Group, which also includes Strawberries Inc., with headquarters in Milford Mass., a 90-store retail music and video chain in New England and the Northeast.

Mark D. Silverman, president of Waxie Maxie, has agreed to provide continuing service to the company under a five-year consulting agreement with LIVE. It is expected that the management team of Waxie Maxie will remain with the company following the merger.

Waxie Maxie was represented in this transaction by Landenburg, Thalmann &

Co. Inc., a New York-based investment bank.

LIVE Entertainment, with headquarters in Los Angeles, is the parent of three primary operating subsidiaries: International Video Entertainment Inc. (IVE), Lieberman Enterprises Inc. and the LIVE Specialty Retail Group.

IVE, a leading producer/distributor of feature films and other material on videocassette, is based in Los Angeles. IVE's catalog contains more than 1,300 titles, including as extensive library of children's programming under the Family Home Entertainment (FHE) label.

Lieberman, a Minneapolis-based rackjobber of pre-recorded music, videocassettes and personal computer software (PCS), provides specialized merchandising services to more than 3,200 mass merchant locations throughout the United States. In addition, the company services numerous record and computer specialty stores through the recently acquired Navarre Corp., a music and PCS distributor and rackjobber.

The LIVE Specialty Retail Group, with headquarters in Milford, Mass., includes the above described Strawberries and Waxie Maxie.

Carolco Pictures Inc. (NYSE:CRC) owns a 49 percent voting interest in LIVE.

TAFT, CA (MARCH 2) BUSINESS WIRE - Berry Petroleum Co. (NYSE:BRY) announced that its wholly owned subsidiary, Bush Oil Co., has entered into an agreement to acquire the West Montalvo Field, located in Ventura County from Chevron for an undisclosed purchase price.

The six leases to be acquired include lands owned by private individuals as well as two California state leases which extend offshore. These leases, consisting of 66 wells, are currently producing approximately 530 barrels of oil per day from 21 active wells. The company estimates current proved reserves to be 1.1 million equivalent barrels of oil.

Berry plans to increase production of the West Montalvo Field by well servicing and workover operations in addition to actively developing the property by redrilling existing wells. The company ultimately anticipates exploring and developing the offshore leases through directional drilling from onshore locations.

Berry expects this development to result in additional reserves and increased production. The company believes that this property can be effectively integrated with its existing Ventura County operations.

The company expects this transaction to close within 60-90 days subject to among other things, completion of title and environmental review on the acreage.

Berry Petroleum Co. is publicly traded on the New York Stock Exchange and is an oil and gas production and exploration company with headquarters in Taft.

PALO ALTO, CA (MARCH 2) BUSINESS WIRE - CF Motor Freight, the long-haul trucking subsidiary of Consolidated Freightways Inc., has been honored with Ford Motor Co.'s first Transportation Excellence Award for "exemplary performance" as one of Ford's top freight carriers.

"This award recognizes CF Motor Freight for its long-standing commitment to quality performance in serving Ford's transportation needs," said Richard Haupt, director of transportation and traffic for Ford Motor Co. "CF Motor Freight has excelled in all areas: on-time transit performance, damage-free delivery and overall service."

Ford established the Transportation Excellence Award (TEA) in 1989 to recognize carriers who meet or exceed the company's rigorous standards for delivering goods efficiently, economically, on time and undamaged. CF Motor Freight was the only less-than-truckload (LTL) carrier among the five transportation firms chosen to receive the award in its inaugural year. The five carriers were selected from a field of more than 200 companies. Ford will present the TEA periodically to its top shippers.

"We are honored to receive such a prestigious award from a company like Ford that is committed to the highest quality service and customer satisfaction," said Robert J. Morrey, vice president of sales for CF Motor Freight. "CF Motor Freight shares with Ford many of the same goals in providing our customers with the best service in the freight transportation business."

Through its freight-flow system of 667 terminals and consolidation centers, Palo Alto-based CF Motor Freight serves 99 percent of the communities in the United States and Canada, including Alaska and Puerto Rico.

CF Motor Freight is the largest subsidiary of Consolidated Freightways Inc. of Menlo Park, Calif., a $4 billion transportation company which, in addition to intermediate and long-haul trucking, has businesses in

regional next-day trucking, worldwide air freight, intermodal rail truckload, international ocean container freight and customs brokerage services.

SUNNYVALE, CA (MARCH 2) BUSINESS WIRE - DAVID Systems Friday announced the move of Phil McDermott to the position of vice president and chief financial officer.

McDermott had held the position of vice president and general manager of the LAN division for DAVID Systems since October 1988.

McDermott joined DAVID from Prentice Corp. where he was president.

Prior to this McDermott spent a number of years at Northern Telecom in both line management and senior financial positions, including controller functions at both the division and group level within the business communications area, as well as serving as vice president and general manager of the company's Data Systems Group and Integrated Office Systems Group.

McDermott holds a bachelor of science degree in business administration from Sir George Williams College, Canada, and is a Certified Management Accountant (CMA).

Formed to enhance the role of integrated digital communications, DAVID Systems supplied its first Ethernet LAN products in 1985. As a technical leader in its field, DAVID holds six communications patents and is an active participant in the IEEE 802.3 10BASE-T twisted-pair Ethernet standard and Hub Management committees and is a founder of the 10BASE-T Consortium at the University of New Hampshire.

DAVID Systems products emphasize integrated solution for LANs, voice and data which are easy to expand and adapt to changing customer needs.

EMERYVILLE, CA (MARCH 2) BUSINESS WIRE - Michael J. Cook, president of CopyMat Corp., announced Friday that it recently signed a 10-year Trademark Licensing Agreement with CPI Copy Services (NYSE:CPY) of St.

Louis.

CPI originally loaned the company $2,750,000 in 1988 and purchased 22 existing CopyMat Centers from franchise owners and operated under a franchise agreement.

Cook stated that the signing of the new agreement was a logical step reflecting the maturing relationship between the two companies. CPI Corp. owns and operates 980 Sears Portrait Studios and is the largest company-owned operator of one hour photo centers in the United States with 290 locations.

The previous franchise agreement limited CPI's expansion to 19 additional stores, primarily in the greater Los Angeles area. Under the new agreement, CPI may open as many stores as they want in their existing territories by paying a flat fee per store.

In exchange for the royalty fee Trademark Licensing Agreement, CPI has agreed to forgive the current loan balance of $2,294,326 owed by CopyMat.

CopyMat became a public company in January of 1989 and is traded over the counter in the ''pink sheets.''

CopyMat currently has 63 stores in operation in California. Of that total 41 are franchise operations and 22 are operated under the new license agreement by CPI. The stores provide desktop publishing, copying, binding and facsimile transmission services in a professional retail environment.

SEATTLE (MARCH 2) BUSINESS WIRE - A preliminary agreement Thursday between Soviet and American government officials to expand air service between the two nations brings Alaska Airlines a step closer to providing the first scheduled jet service to the Soviet Union from the U.S. West Coast, the company's chairman said today.

''We're pleased with what the two governments have crafted,'' said Bruce Kennedy, Alaska chairman and chief executive officer. ''We still have hurdles to clear, but this agreement will do much to facilitate our efforts to begin service to the Soviet Far East.''

U.S. and Soviet government officials in London yesterday agreed in principle to the creation of new bilateral routes between Anchorage and the Soviet Far East cities of Magadan and Khabarovsk. Negotiators will return to the table in April to discuss remaining outstanding issues, including commercial and financial arrangements.

Alaska Airlines, which dispatched senior officials to London to monitor the bilateral talks, has been seeking authority to fly between Anchorage and the two Soviet Far East commercial centers since August. Alaska is proposing two or three flights a week during the summer beginning in 1991. Tourist and business travel is envisioned.

''Yesterday's agreement confirms that our efforts have made a substantial contribution to linking the two countries by air,'' Kennedy said. Flights to the Soviet Union would not be new to the Seattle-based airline. The carrier operated charter flights between Anchorage and Khabarovsk and Leningrad in the early 1970s, and operated two goodwill flights between Alaska and the Soviet Far East in the last two years.

The airline has been seeking authority to fly between the two countries since January 1988. Just two weeks ago company officials returned from a second round of negotiations in Moscow with Aeroflot Soviet Airlines. They earlier met in October 1989.

LOS ANGELES (MARCH 2) BUSINESS WIRE - Carolco Pictures Inc. (NYSE:CRC) Friday announced that it has extended its Consent Solicitation of the holders of its 14 percent Senior Notes due 1993.

Carolco will now accept all properly completed and executed consents

received on or before 5:00 p.m., Eastern Standard Time, on March 22, 1990, unless the expiration date is further extended. Carolco is seeking the consent of its Senior Noteholders to certain amendments to the Indenture pursuant to which its 14 percent Senior Notes due 1993 were issued.

Carolco also announced Friday that it has extended its Exchange Offer for all of the outstanding depositary receipts representing limited partnership interests (Partnership Units) in The Vista Organization Partnership, L.P., a Delaware limited partnership (the Vista Partnership) in order to permit the prior closing of the extended Consent Solicitation.

The Exchange Offer, originally set to expire on March 9, 1990, will now expire at Midnight, Eastern Standard Time, on March 28, 1990 unless further extended.

The Exchange Offer provides that Carolco will offer to exchange $2.45 (or $2.55 in the event that certain lawsuits against The Vista Partnership and its affiliates are settled) in Carolco Units for each validly tendered Partnership Unit.

Each Carolco Unit consists of a$1,000 principal amount 14 percent Senior Note due 1993 of Carolco and a certain number of Carolco Warrants, in most circumstances, to be determined on (and not later than) the seventh business day prior to the expiration date of the Exchange Offer.

In connection with the extension of the Consent Solicitation and the Exchange Offer and certain related matters, Carolco is mailing to Carolco Senior Noteholders and holders of Partnership Units supplements to the Consent Solicitation Statement and the Exchange Offer Prospectus, respectively.

Senior Noteholders and holders of Partnership Units need take no further action if they have previously consented or tendered and do not wish to revoke their consent or withdraw their tender. As of February 28, 1990, approximately 650,000 Partnership Units had been tendered pursuant to the Exchange Offer.

Carolco is a diversified entertainment company engaged in the financing, production and leasing of motion picture properties worldwide. The Vista Partnership was formed to engage in the production and exploitation of feature-length theatrical motion pictures.

SAN FRANCISCO (MARCH 2) BUSINESS WIRE - First Republic Bancorp Inc. (ASE/PSE:FRC) Friday announced that its wholly owned FDIC insured subsidiary, First Republic Thrift & Loan, will probably incur losses as the result of collateralized overnight advances which were apparently undercollateralized by Drexel Burnham Lambert MRP Inc. (''MRP'').

MRP, which is not in bankruptcy proceedings at this time, is a mortgage products subsidiary of Drexel Burnham Lambert Group Inc. An MRP creditors meeting has recently been held and, as a result, the company is proceeding to recover its funds.

The company estimates that its potential exposure to loss is approximately $600,000, before the benefit of taxes. Subsequent events may effect the ultimate loss, which will be recorded during the quarter ended March 31, 1990.

SIOUX CITY, IA (MARCH 2) BUSINESS WIRE - More than 2,000 union workers at IBP Inc.'s flagship plant in Dakota City, Neb., will be able to keep the unemployment insurance benefits they received during their 1987 strike, according to a decision of the Nebraska Supreme Court.

''The members of UFCW Local 222 are relieved and pleased by the Supreme

Court's decision,'' said Frank Casaday, president of Local 222.
''We are also grateful that the court rejected the company's attempt to force the workers to repay two months of benefits.''

Casaday expressed appreciation to the parent union for its assistance in the case. ''Without the UFCW's help, IBP workers would have been at a serious disadvantage in presenting our case. The UFCW helped even the odds in terms of legal resources.''

Casaday called ''ironic'' the fact that the court ruling hinges on a ''management decision'' to keep a major department closed for the duration of the strike.

UFCW Packinghouse Director Phil Immesote said the decision ''vindicates'' the union's position that IBP was able to restore production to near normal levels, but expressed disappointment that the court failed to extend jobless benefits back to the beginning of the lockout in December 1986.

The lockout was transformed into a strike when IBP reopened the plant in mid-March and hired strikebreakers to resume operations.

SAN JOSE, CA. (MARCH 2) BUSINESS WIRE - TeleVideo Systems Inc. (OTC:TELV)

Friday announced a reduction in its workforce, effective immediately.

The reduction affects 60 employees, or 15 percent of the company's total employment. In addition, the senior management of the company will take reductions in salary.

In the announcement, TeleVideo indicated that the reduction in force was made necessary by business conditions in the computer industry and consolidation of effort to bring company expenditures in line with current and projected revenues. Reductions were made in virtually all functional areas and levels of the organization.

Televideo Systems Inc. is a leading supplier of industry-standard, high-performance LAN file servers and workstation products, low-cost video display terminals, computer enhancement products and applications specific integrated circuits (ASICs).

Corporate offices are located at 550 East Brokaw Rd., P.O. Box 49048, San Jose, Calif. 95161-9048. Telephone: 408/954-8333.

AUSTIN, TX (MARCH 2) BUSINESS WIRE - Communications Transmission Inc. (NASDAQ/NMS:CTIA) announced that its senior lenders have waived until April 2, 1990, CTI's compliance with certain financial and other covenants under CTI's $156.7 million credit agreement with such lenders.

The holder of CTI's $103.5 million of subordinated debt also has agreed to similar waivers. CTI has waived until April 2, 1990, the Feb. 26, 1990, payment of interest owed to CTI under a $20 million bridge loan made by CTI to its 55 percent owned subsidiary, ALC Communications Corp. (ALC).

Not later than March 30, 1990, CTI is to have submitted to its senior and subordinated lenders a business plan that is to provide for the restructuring of CTI, which will include its investment in ALC, on terms acceptable to such lenders. No assurance can be given that CTI will be able to present a plan or complete a restructuring of CTI on terms acceptable to the various constituencies of CTI.

CTI, has headquarters in Austin.

LOS ANGELES (MARCH 2) BUSINESS WIRE - Dana E. Marlin, chief executive financial officer of CM Communications Inc. (OTC:CMCM), Friday announced that the company anticipated reporting a loss of as much as $550,000 for the fourth quarter and a loss of up to $50,000 for the full year ended Dec. 31, 1989.

Approximately $350,000 of the anticipated fourth-quarter loss is attributable to the cessation of operations of PCI, a subsidiary engaged in the assembly and sale of cellular phone accessories, primarily transportable kits.

Approximately $100,000 is attributable to an operating loss in the fourth quarter, due primarily to the company's inability to obtain adequate supplies of inventory by reason of insufficient capital prior to the conclusion of the public offering in January 1990, and due to product shortages from certain vendors.

In addition, the company's administrative and financial overhead increased in the fourth quarter in preparation for the expansion of the company's business into the direct importation of private labeled cellular phones to be sold under the company's ''CM Telcom'' label. The company is not expected to realize revenues from the ''CM Telcom'' project until March 1990.

Approximately $80,000 of the fourth-quarter loss is attributed to a settlement of certain litigation, in February 1990, in which the company was plaintiff against Mission Bell Telecommunications Inc.

During February 1990, the company received its first shipment of ''CM Telcom'' product which is currently being tested. The company anticipates commencing shipping product to customers beginning the first week of March 1990.

To date, the company has received orders and/or commitments to order approximately 2,500 pieces per month through December 1990 and anticipates substantial firm orders in March, once initial shipments begin.

The company recently negotiated with its main brand name manufacturers, OKI and Panasonic, to increase its credit lines by $850,000, thus giving it the buying power needed to increase its sales of brand name cellular products.

The board also approved the expansion of retail operations through one additional store in the Sacramento market.

CM Communications Inc. is in the business of importing, distributing and retailing branded and private labeled cellular telephones throughout North America.

LOS ANGELES (MARCH 2) BUSINESS WIRE - UnionFed Financial Corp. (NYSE:UFF) announced that a quarterly dividend of 11 cents per common share will be payable on March 30 to shareholders of record on March 16.

It was also announced by William S. Martin Jr., chairman of the board, that Dale A. Welke, Esq., was appointed to the UnionFed board of directors to fill the unexpired term of their late director, Jack W. Pullen.

Welke is currently the chairman of the executive committee for the law firm, Adams, Duque & Hazeltine. He has been associated with the law firm since 1970 and graduated with honors from Columbia University School of Law in 1963.

UnionFed Financial is the holding company for Union Federal Savings Bank, a federally chartered savings bank with $2.4 billion in assets and common equity as of Dec. 31, 1989, equal to $164.7 million.

In calendar-year 1989, the bank earned $19.3 million, or $2.75 cents per share fully diluted. The bank's net-worth-to-assets ratio at Dec. 31, 1989, was 6.82 percent and the return on average assets for the calendar year was 83 basis points.

#90061b0232 03/02/1990 ~Business Wire

RENO, NE. (MARCH 2) BUSINESS WIRE - A Seattle stockbroker has found a better way to make money than picking stocks on Wall Street -- playing the slots at Harrah's in Reno.

Dixie Califano's gambling vacation in the ''Biggest Little City in the World'' has been better than any bull market.

Over the span of six days, Califano hit dozens of jackpots -- including

two $25,000 ones -- all on the same slot machine. Her winnings came to a grand total of $87,000.

Califano's winning streak began after putting two $5 coins in the slot machine on Saturday night, Feb. 24. ''I hit a $1,000 jackpot right off the bat,'' she said.

Califano kept right on winning and hit a $25,000 jackpot the next day.

What did she do with her winnings? Buy casino stock.

''I can't think of a better investment than buying stock in the company that owns this casino,'' she said.

Califano went home to Seattle, bought 500 shares of Promus Companies Inc., the parent company of Harrah's then returned to Reno three days later to try her luck again.

She was still on a roll. ''I hit it again!'' she said. ''And that was after I'd won $20,000 in small jackpots. Can you believe it?''

What are the chances of someone hitting a $25,000 jackpot twice on the same machine -- in the same week?

''Let's put it this way, she was very, very lucky,'' said Chuck Hickey, director of slot operations for Harrah's Reno. ''It couldn't have happened to a nicer player. Dixie comes to Harrah's frequently and she plays in our tournaments,'' he added.

What will Califano do with these new winnings?

''Buy more stock!'' she said while still pulling the slot machine handle.

FEDERAL WAY, WA (MARCH 2) BUSINESS WIRE - Pacific Nuclear Systems Inc., Federal Way, has announced earnings for the fourth quarter of 1989 and audited results for the year ended Dec. 31, 1989.

Pacific Nuclear Systems reported a net loss of $1.1 million, or 22 cents per share, on revenue of $11.5 million for the fourth quarter ended Dec. 31, 1989. For the same period in fiscal 1988, the company recorded a net profit of $1.0 million, or 21 cents per share, on revenues of $17.3 million. Results for the year ended Dec. 31, 1989, showed a loss of $.8

million, or 16 cents per share, on sales of $49.2 million. For the same period in 1988, the company recorded a net profit of $2.1 million, or 44 cents per share, on revenues of $34.2 million.

The company acquired Alaron Inc. as of Oct. 31, 1989, and the results of operations for Alaron Inc. for the two-month period after acquisition are included in the 1989 figures.

In comparison with the same period in fiscal 1988, the decrease in gross revenues for the fourth quarter was primarily the result of substantially lower revenues from the lease and sale of spent fuel transportation casks as well as lower gross revenues from Nutech operations in 1989. Increased revenues for fiscal 1989 reflect the inclusion of revenues from Nutech operations for a full year whereas the 1988 results reflect Nutech revenues only for the fourth quarter following its acquisition by the company.

The loss for the fourth quarter in 1989 reflects a number of factors. On an overall basis the loss reflects a comparative decrease in contribution from several areas of profitable operation. The loss also results from increased costs in the development and manufacture of the CH-TRU (TRUPACT) casks, including a substantial additional reserve added for the repair of the weld area thickness variations on the casks noted at the review meeting with the Nuclear Regulatory Commission on Feb. 22, 1990. In addition, Nutech operations were unprofitable for the quarter due largely to losses on contracts in progress and write-offs taken as a result of restructuring.

Pacific Nuclear Systems Inc. and its subsidiary companies (Nutech Inc.: NuPac Services Inc.; Nuclear Packaging Inc.; Alaron Inc.; and PN Services Inc.) provide a wide range of specialty products, engineering and waste handling services to the nuclear industry. The company, founded in 1983 and headquartered in Federal Way, is traded in the NASDAQ - National Market System under the symbol PACN.

PHOENIX (MARCH 2) BUSINESS WIRE - Thomas D. Hansen Pension Management Inc., a privately held Arizona corporation, Friday announced that it has signed an agreement and plan of reorganization to be acquired by Bora Capital Inc., a publicly held ''blind pool'' California corporation.

Thomas D. Hansen Pension Management (TDH-PMI) is a pension management company which consults corporations in the setup and administration of

pension plans.

TDH-PMI has focused services in four areas: 1) management of pension, actuarial and administration firms; 2) plan design and administrative services provided directly to corporate clients; 3) development of client-assisted administrative software to reduce administration costs and increase service response time; and 4) monitoring of guaranteed investment rates of return for investment of pension plan assets.

The acquisition has been approved by the board of directors of both companies. The parties desire to consummate the acquisition within 30 days. Following the acquisition, the existing management of TDH-PMI is expected to remain in place.

Bora Capital Inc. conducted a public offering of 400,000 units in February 1989 and realized proceeds of $100,000. There are presently outstanding a total of 800,000 Class A warrants exercisable at $2 each, and 800,000 Class B warrants exercisable at $3 each. Bora Capital Inc. must make certain filings with the Securities and Exchange Commission before these warrants may be exercised.

At this time the company does not believe a warrant exercise program is feasible, and therefore does not intend to pursue the exercise of its outstanding warrants.

#90061b0292 03/02/1990 ~Business Wire

VANCOUVER, BRITISH COLUMBIA (MARCH 3) BUSINESS WIRE - Galactic Resources Ltd. (ASE:GLC)(ToSE/MoSE/VcSE:GLC) reports a net income for the 1989 fiscal year of US $2.54 million (US 7 cents per share) compared to a net loss during 1988 of US $45.5 million (US $1.42 per share).

Net income during the 1989 fourth quarter amounted to US $0.7 million (US 2 cents per share) compared to 1988 fourth quarter loss of US $0.14 million (US $0.004 per share).

The performance of the Ridgeway Mine, a 48 percent - 52 percent joint venture with The RTZ Corp. PLC, during 1989 was consistently in excess of expectations, producing 172,505 ounces of gold compared to budgeted production of 160,064 ounces of gold.

Average production costs during the year amounted to US $140 per ounce, significantly lower than expected costs of US $167 per ounce due to high

mill throughput, enhanced recoveries and low reagent consumption. The positive performance of the Ridgeway Mine during its first year of production augurs well for the next ten years of expected production.

Production at the Summitville Mine of 5,665 ounces of gold during the fourth quarter of 1989 met management's expectations. Total 1989 production at Summitville amounted to 32,569 ounces of gold.

Sales during 1989 were at a realized price of $416 per ounce of gold. Mining at Summitville during 1989 was limited to minimal tonnage. However full-scale mining is expected to resume during the second quarter of 1990.

The company's cash flow from producing properties reached US $18.7 million during 1989, primarily due to a contribution of US $19.5 million from the Ridgeway mine. Actual cash distributions received to date from the Ridgeway mine amount to US $6.8 million.

In compliance with accounting principles for the interest free debt and hedging transactions, the company recorded imputed interest charges of US $531,000 and deferring realized gains from hedging transactions amounting to US $347,000 during 1989. These gains will be included in income during the first and second quarters of 1990.

The 1988 results of operations have been restated to retroactively record the proceeds to the company of a lawsuit settlement of US $495,000 (US $321,000 during the 1988 fourth quarter) and to record imputed interest charges of US $843,000 (US $543,000 during the 1988 fourth quarter).

COSTA MESA, CA. (MARCH 3) BUSINESS WIRE - Archive Corp. (NASDAQ:ACHV), a leading manufacturer of computer data products, Friday announced in a letter sent to the board of directors of Cipher Data Products Inc. that Archive was prepared to have its wholly owned subsidiary, CAC Corp., increase its offer price for all Cipher shares to $8.25 per share, conditioned on the negotiation of a mutually acceptable merger agreement and the full support of Cipher's board of directors.

Archive's letter to Cipher's board of directors states:

''As you are aware, we have repeatedly advised Cipher of Archive's willingness to negotiate any and all terms of its tender offer. On February 13, we again requested a meeting with the Board of Directors or management of Cipher to negotiate an increase in our offer price,

conditioned on such transaction receiving the full support of Cipher's Board. More than two weeks have passed since this request and Cipher still has not met with us or responded to our request.

''We again request such a meeting. Moreover we are now prepared to increase our offer significantly in a negotiated transaction. Specifically Archive is prepared to have its wholly-owned subsidiary, CAC Corp., increase its offer price for all Cipher shares to $8.25 per share, conditioned on the negotiation of a mutually acceptable merger agreement and the full support of Cipher's Board of Directors.

''The waiting period under Hart-Scott-Rodino has expired. We expect to execute a definitive credit agreement in the near future. We confirm that no major impediments remain in this process.

''We continue to believe that it is important to complete this transaction expeditiously to ensure that the maximum consideration be received by Cipher's shareholders, rather than absorbed by transaction costs. Moreover, we remain willing to negotiate the terms of our offer provided that Cipher seriously negotiate with us in good faith. Our advisers will contact you to arrange this meeting.''

Founded in 1980, Archive Corp. today is a leading manufacturer and supplier of computer data backup products to original equipment manufacturers and resellers. Archive and Maynard Electronics, an Archive company, offer a complete selection of tape drives and subsystems for economical computer data backup for fixed-disk drives in workstations, multiuser systems and personal computers.

COSTA MESA, CA. (MARCH 3) BUSINESS WIRE - Archive Corp. (NASDAQ:ACHV), a leading manufacturer of computer data products, Friday announced that the trial date for the patent litigation between Archive and Cipher Data Products Inc. had been postponed until Oct. 2.

The postponement of the patent litigation was decided by Judge Stotler of the U.S. Federal District Court of the Central District of California, Santa Ana, for reasons related to the court's congested docket and the priority of other trials.

Founded in 1980, Archive today is a leading manufacturer and supplier of computer data products to original equipment manufacturers and resellers.

Archive and Maynard Electronics, an Archive company, offer a complete selection of 1/4-inch cartridge, cassette and 4MM/8MM helical scan tape drives, subsystems and software for DOS and Apple computer systems.

Archive and Maynard products provide economical computer data backup for fixed-disk drives and perform additional functions such as program loading software distribution, data exchange and archival storage.

#90061b0616 03/02/1990 ~Business Wire

ST. PETERSBURG, FL (MARCH 1) BUSINESS WIRE - The Atlanta District Office of Thrift Supervision (OTS) this week notified Florida Federal Savings Bank that its capital plan does not fulfill the requirements for regulatory approval.

According to John W. Sapanski, Florida Federal's chief executive officer, a significant impediment to acceptance of the plan by OTS regulators is their concern over Florida Federal's inability to attract capital from investors while the student loan issue remains unresolved.

''We have had preliminary discussions with several interested investors,'' Sapanski said. ''However, they are--understandably--unwilling to commit themselves until this legal and financial issue is resolved.''

Sapanski said that thrift regulators informed Florida Federal verbally and in writing of their concern that the company would not be able to attract sufficient capital to meet FIRREA requirements by the July 1 target date in the capital plan.

In addition, regulators stipulated that Florida Federal is now subject to greater restrictions as a result of its plan not being approved.

These restrictions consist of a prohibition against asset growth beyond that attained at Feb. 28 and specific assurance to regulators that any new loans and investments (which might be made to maintain the current portfolio level in the event of repayments) are ''reasonable in the context of the Company's operations and do not significantly increase the Company's risk profile.''

Sapanski emphasized that Florida Federal's depositors would not be affected by the increased restrictions and that the company will focus on previously stated objectives of expense reduction, nonperforming asset

disposition, conversion to an integrated computer system, control of interest rate spread and resolution of the student loan matter.

''Settlement talks with the civil and criminal divisions of the U.S. Justice Department and the U.S. Department of Education are continuing,'' he said. The student loan trial is now scheduled to begin on April 2.

COLORADO SPRINGS, CO (MARCH 1) BUSINESS WIRE - Brown Disc Products Company Inc. Friday signed a two-year exclusive contract with Management International Corp. to distribute BDP products outside the United States, Canada, Australia, New Zealand and Sweden.

BDP is a publicly held company traded over the counter.

Founded in 1981, BDP manufactures high quality, flexible diskettes for computer users. Since 1987, the Colorado Springs-based company has realized an average 22 percent annual growth rate, with sales expected to approximate $5 million this fiscal year.

To date, BDP's primary market has been in the United States, but chief executive officer Gene Rider believes there is a strong market for BDP's products in Europe and the Far East. Rider expects Management International's distribution efforts to add substantially to BDP's sales revenue.

In anticipation of the opportunities to be created by the European Economic Community in 1992, Management International will initially concentrate its marketing program for BDP products in Western Europe.

Management International will focus on identifying distributors with solid reputations for reliability. ''Brown Disc's success is attributable to its ability to manufacture a truly quality product. We will match BDP's product with a distribution system of equal quality,'' explained Hill.

Management International's success in marketing high-tech products is in part due to the expertise of one of the firm's four active shareholders, Arun Pande, founder of MicroAge International and Sigma International.

Management International Corp. is incorporated in Colorado and in Freeport Bahamas, and operates offices in Colorado Springs, Colo., and London.

Brown Disc-packaged products include the full line of 3.5 inch, 5.25 inch

and 8.0 inch floppy disks. BDP also manufactures the Scholar Brand, developed exclusively for the institutional market, and a broad spectrum of specialized packaging and private label product mixes.

Braille-labelled diskettes and a specially designed diskette that can be inserted and removed without hands were created by Brown Disc for the physically challenged computer user.

Brown Disc's commitment to quality is demonstrated by its unique ''Two-for-One Lifetime Warranty.''

SAN FRANCISCO (MARCH 1) BUSINESS WIRE - AIFS Inc. (ASE/PSE:AIF), an international education services company, Friday announced that a stockholder class-action lawsuit has been filed in Delaware, naming the company and certain of its officers and directors as defendants.

The lawsuit, filed Feb. 21, 1990, and entitled Shields vs. AIFS, Inc., et al., challenges the recently announced agreement under which a management group led by Roger O. Walther, president and chief executive officer, would acquire all of the publicly held shares of the company for $6.50 per share cash.

The plaintiffs in the lawsuit allege, among other things, that the defendants breached their common law fiduciary duties in an attempt to eliminate the public stockholder at an unfair and inadequate price.

An earlier class-action lawsuit, Kennard vs. AIFS, Inc., et al., filed Dec. 21, 1989, in Delaware, contained similar allegations. A representative of the company stated that the company believes the lawsuit is without merit and that the company intends to defend the lawsuit vigorously.

AIFS Inc. designs, markets and operates educational and cultural programs world-wide. The company, through its operating subsidiaries, provides opportunities for American college and high school students to study and travel abroad and brings foreign youths to the United States on a variety of cultural exchanges.

The company also operates 20 language centers throughout the United States and 20 abroad for intensive English language training for foreign students.

#90061b0636 03/02/1990 ~Business Wire

FORT WASHINGTON, PA (MARCH 1) BUSINESS WIRE - Greenwich Pharmaceuticals Inc. reported in its 1989 Annual Report to Stockholders the following year-end financial results:

	Year ended Dec. 31 (Audited)	
	1989	1988
Revenues:		
Development and License Agreement with Syntex Corp.	$ 2,500,000	--
Interest and dividends	326,191	$ 389,291
Total revenues	$ 2,826,191	$ 389,291
Operating expenses	11,512,185	13,416,192
Net loss	(8,685,994)	(13,026,901)
Net loss per share	$(.42)	$(.69)

Greenwich's revenues increased significantly in 1989 compared to 1988 due to the recognition of $2.5 million as revenue in 1989 under the Development and License Agreement with Syntex Corp. Approximately 65 percent and 77 percent of Greenwich's operating expenses during 1989 and 1988, respectively, were directed toward research and development activities.

In 1989, research and development expenses decreased due to a decrease in the number of patients enrolled in the rheumatoid arthritis clinical program. In 1989, Greenwich reported that it had relocated the company's medicinal chemistry laboratory from Chicago to Horsham, Pa.

Greenwich Pharmaceuticals is a development stage company in business to identify and develop carbohydrate drugs that respond to significant patient and market needs.

WINSTON-SALEM, NC (MARCH 1) BUSINESS WIRE - Trans-Aero Industries, a unit of the Jepson Burns Corp. (NYSE: JEP) of Winston-Salem, has contracted to integrate the new Seatfone system into the seatbacks of commercial aircraft equipped with the Airfone service by GTE.

Gary McKelvey of Trans-Aero, which is headquartered in Inglewood, Calif., said that Trans-Aero has already begun installing the Seatfone system for the 17 jetliners in the Trump Shuttle fleet.

''Our job is to make the alterations required to put the phones into the seatback above the food tray,'' McKelvey said. ''We also are approved by the Federal Aviation Administration to retest and recertify seats after the phones are placed in the seat.

''We have guaranteed GTE Airfone Inc. that we can handle as many as 2,000 units per month, so that as many as 70 phones in one aircraft can be installed at three different sites each night.''

The Seatfone system enables passengers to use the telephone service without leaving their seats. The Airfone service operates in-flight when aircraft are over the United States, southern regions of Canada or within 200 miles of the U.S. coastline.

Trans-Aero is an industry leader in providing new and refurbished seats, spare parts for aircraft seats, crew bunks, closets and other products for aircraft interiors. GTE Airfone provides public telephone service for travelers on airplanes and trains serving more than 1,200 domestic aircraft and two major AMTRAK routes on the East and West coasts.

To date, airline passengers have placed more than 6.4 million calls from commercial aircraft using the Airfone service. The company, based in Oak Brook, Ill., is part of GTE Mobile Communications Group, which includes GTE Cellular Communications Corp. and GTE Mobilenet Inc., all based in Houston.

WAYNE, PA (MARCH 1) BUSINESS WIRE - At the annual shareholders meeting of American Film Technologies Inc., Chairman and Chief Executive Officer George R. Jensen Jr. announced that the amendment to amend the certificate of incorporation of the company to provide for a one-for-two reverse stock split was overwhelmingly approved by the shareholders.

The reverse split will be effective at the close of business on March 16, 1990.

Jensen also announced that the reception of the animation produced by the company's paperless animation process has been very well received by the industry. The potential demand for the product could equal or exceed the company's film coloring revenues within a few years. In light of this favorable development the company has made the decision to accelerate its development phase of this new technology.

In a related development, Jensen announced that the company has formed a Mexican subsidiary and will build an animation and film coloring studio in Tijuana, Mexico. He anticipates that the new facility will be opened in July 1990.

''The cost of operations in our Mexico facility, located only 30 minutes from our San Diego studios, will enable us to significantly lower our cost. This will place us in a position to compete in the international markets both for film coloring and animation,'' Jensen told the shareholders.

Jensen said, ''The immediate financial effect of these developments will be felt in the third and fourth quarters of the fiscal year ending June 30 1990. He anticipates that the year end earnings will be in the $3 million range, on revenues in the range of $18 million.

Jensen anticipates continued growth for fiscal 1991. He expects the first two quarters to be a transitional period, in which the company will lay down a foundation for long term growth. Starting in January 1991, the company's revenue and earnings should begin to soar, Jensen said.

AFT is the nation's leader in creating color versions of black-and-white motion pictures and television programs for others on a fee basis and for its own film library. Recently AFT introduced a computer-based paperless animation system. For further information contact: Patrick J. Brennan, Sr. Vice President, American Film Technologies, 215/688-1322 or James B. DALLAS (MARCH 1) BUSINESS WIRE - Abatix Environmental Corp. 1/8NASDAQ:ABIX (Common), ABIXW (Warrants)3/8 Friday announced it is calling for redemption its Redeemable Common Stock Purchase Warrants on April 16, 1990 at 25 cents per Warrant.

Warrant holders retain the right to purchase one share of Abatix Environmental Corp. Common Stock at the exercise price of $3.00 per share until 5:00 New York Time on April 16, 1990. A Warrant that remains unexercised as of April 17, 1990 shall be deemed cancelled upon surrender of the certificate and payment by the company of 25 cents per Warrant.

Abatix completed its initial public offering of 300,000 Units, each Unit consisting of two shares of Common Stock and one Warrant, on March 14, 1989.

Any proceeds from the redemption of warrants will be used to expand inventories, open new distribution centers, increase advertising and marketing expenditures and for general working capital purposes.

Abatix Environmental Corp. distributes personal safety and protection products and durable and non-durable equipment and supplies to the asbestos abatement, industrial safety and hazardous materials industries.

The company has distribution centers in Dallas, Beaumont and Houston, Texas and in Hayward, California from which it services customers throughout the Southwest, Midwest and Pacific Coast including asbestos abatement contractors, and toxic waste remediation, chemical, petrochemical and general industrial companies.

FORT LAUDERDALE, FL (MARCH 1) BUSINESS WIRE - Ronald A. Cass, chairman of Hospital Staffing Services Inc. (NASDAQ/NMS:HSSI) Friday announced the appointment of Charles P. Weiss to the position of Vice President of Marketing.

Commenting on the appointment, Cass said, ''We're glad to welcome Chuck to

our management team and expect his strong background in the healthcare staffing industry, as well as the healthcare industry in general, to aid the overall growth of our recruiting and placement programs. As importantly, the breadth of Chuck's background is consistent with our expansion and acquisition strategies.''

From April 1986 until February 1990, Weiss was National Director Marketing/Sales for Olsten Health Care Services, an $80 million division of Olsten Corp., which acts as a provider of supplemental staffing and home care personnel.

In that position, Weiss directed all corporate marketing and recruitment activity and had overall responsibility for market research, product development, temporary personnel recruitment, and the administration of six marketing, recruitment, sales and product managers.

From 1982 until 1986, Weiss was Marketing Vice President for Patients Digest Inc., a consumer's hospital magazine with a distribution of over 2 million readers. He was responsible for magazine positioning, editorial policy, advertising sales, hospital recruitment, creation of marketing materials, and finance and administration.

Earalier in his career, Weiss was Executive Vice President-Marketing for Temco Healthcare Industries, a manufacturer of durable medical equipment; Vice President of Marketing for American Medical Electronics Corp., a manufacturer of digital, electronic thermometers; Regional Manager for New Dimensions in Medicine, a manufacturer of caradiac monitoring equipment; and Regional Manager for C.R. Bard Corp., a disposable medical equipment manufacturer.

Weiss holds a Bachelor of Science/Marketing degree from Farleigh Dickenson University and is a member of the American Marketing Association and the Academy of Health Care Marketers.

Hospital Staffing Services Inc. is a leading professional recruitment organization specializing in the placement of medical personnel, on both an interim and permanent basis, in hospitals and other health care facilities located throughout the United States and in the United Kingdom.

MENLO PARK, CA (MARCH 2) BUSINESS WIRE - The board of directors of Landsing Pacific Fund (ASE: LPF), has announced approval of a plan by which the fund will become a self-administered company subject only to approval of final documentation by the board.

Under the plan, which is effective as of March 1, the Fund will purchase from The Landsing Corp. those assets required for the Fund's self-administration on a daily basis. The Fund will also purchase 100 percent of the outstanding preferred series A stock of Pacific Coast Capital.

These assets will be acquired by the Fund in exchange for $1 million in cash, 100,000 shares of the Fund's common stock and warrants to purchase 200,000 shares of the Fund's common stock. The price paid by the Fund may be increased by up to an additional $2 million depending upon operational results of the Fund over the next five years.

In a connected transaction, the Fund also acquired a 90 percent economic interest in the remaining assets and business of the advisor which had been transferred to PCC. Pacific Coast Capital is a West Coast real estate investment banking firm which provides transaction services (acquisition, disposition, debt and equity placements) to the Fund and third parties.

The firm also provides asset management services to third parties. The fund acquired 49 percent of the outstanding PCC series B stock and an option to purchase the remaining 51 percent of PCC series B stock by issuance of a contingent obligation to individual stockholders of The Landsing Corp. of up to $1.9 million.

Gary Barr, president of the Fund, said this transaction will produce increased earnings, lower effective transaction costs, and provide more congruent goals for the Fund's management and the Fund. Barr believes that this transaction should also accelerate the Fund's ability to increase its share value.

The board of directors believes that the Fund has acquired a management team with the experience and ability to maximize portfolio operations and to provide shareholders with consistent growth in earnings over time.

Landsing Pacific Fund is a publicly held real estate investment company with approximately $142 million in assets that are located primarily on the Pacific West Coast. It is one of the largest equity REITs in the nation with over 17,500 individual and institutional investors.

#90061b0668 03/02/1990 ~Business Wire
BURLINGTON, NJ (MARCH 1) BUSINESS WIRE - FMS Financial Corp. (NASDAQ: FMCO) Thursday reported net income of $459,000 for the three months ended Dec. 31, 1989, as compared to $455,000 the previous year. For the year ended Dec. 31, 1989, net income amounted to $1.7 million as compared to $2.2 million the previous year. Net interest income was $1.7 million for the fourth quarter of 1989, compared to $1.8 million for the fourth quarter of 1988. For the year ended Dec. 31, 1989, net interest income was $7.9 million, unchanged from the previous year.

Net income in the three month periods ended Dec. 31, 1989, and 1988 was relatively unchanged. The net income for the 12 months ended Dec. 31, 1989, declined as compared with the previous year, primarily because of increased operating expenses, notably salaries, employee benefits, advertising, purchased services, and occupancy expenses. During the fourth quarter of 1989, Land Financial Services Inc. (a wholly owned subsidiary) completed two sales of land held for resale resulting in a profit, before taxes, of $1.6 million, which is included in the $1.8 million profit on sale of assets. At the same time, the corporation provided an additional provision of $332,000 for possible loan losses. Loans delinquent 60 days are at a favorable ratio of .82 percent of total loans.

The corporation has a $1 million investment in bonds issued by the Bank of New England. While the bonds are not in default, the corporation has established a provision of $248,000 for possible losses.

Assets of the corporation at Dec. 31, 1989, were $357.3 million, an increase of 4.26 percent from the $342.7 million at Dec. 31, 1988. Deposits at Dec. 31, 1989, were $322.1 million, an increase of 1.44 percent from the $317.5 million at Dec. 31, 1988.

#90061b0675 03/02/1990 ~Business Wire
LONDON (MARCH 2) BUSINESS WIRE - Rio Algom Limited (ASE:ROM), 51.5 percent owned by The RTZ Corp. (O-T-C), has announced consolidated net earnings for the year ended December 31, 1989 of C$104.6 million or C$2.30 per common share before extraordinary items. This compares with C$114.8 million or C$2.57 per common share in 1988.

Consolidated net earnings after extraordinary items in 1989 were C$73.1 million or C$1.58 per common share, down from C$134.4 million or C$3.02 per common share a year earlier.

The extraordinary items in 1989 included a special one-time provision of C$57 million after tax in respect of mine closure costs, which was announced in January this year. This was partially offset by a credit of C$25.5 million resulting from the utilization of prior years' tax losses. In 1988, the extraordinary credit of C$19.7 million resulted from prior years' tax loss utilization.

Consolidated net revenues were C$1.71 billion, a decrease of 13.6 percent from C$1.98 billion in 1988. This was mainly a reflection of the sale of the steel manufacturing businesses in August 1989 and the production lost during the labor dispute at Highland Valley Copper.

Rio Algom Limited also announced that it will call for the redemption on April 20, 1990 of all Second Performance Shares, Series A issued and outstanding on that date. There is an aggregate of C$21.4 million of such shares currently outstanding.

In accordance with the terms of issue of the shares, the redemption price will be C$5.00 per share plus accrued and unpaid dividends. All dividends on the shares called for redemption shall cease from and after April 20, 1990.

It is intended that a notice of redemption in accordance with the terms of issue will be given to holders of the shares on or before March 20, 1990.

The Rio Algom Second Preference Shares, Series A are listed and traded on the Toronto and Montreal stock exchanges.

The RTZ Corp. is one of Britain's largest companies with a market capitalization of almost $9 billion. Over 50 percent of its assets are located in North America. RTZ is the largest and most diversified mining company in the world.

RTZ's shares are traded on the London Stock Exchange and Over-The-Counter in the U.S. in the form of sponsored American Depositary Receipts (ADRs). Four ordinary shares comprise one ADR.

SAN DIEGO, CA (MARCH 2) BUSINESS WIRE - Tel Plus Communications Inc., a Siemens Co., has relocated to a new facility at 5725 Kearny Villa Road,

Suite S, in San Diego. The new facility will house the sales and operations functions, as well as warehouse facilities.

District Sales Manager Karen Mattis said, "Our new facility demonstrates the Siemens Tel Plus commitment to meet the changing requirements of our San Diego customers."

She emphasized that the new site will enhance customer service, saying "The centralized location will more effectively serve our growing customer base in this area and will allow for immediate support in critical service situations."

Tel Plus sells and maintains a full line of telecommunications equipment including Siemens Kay Systems, Siemens HCM 200 hybrid communication systems, Siemens SATURN PBXs and value-added peripherals including automated attendants, voice mail and call management systems. The San Diego office can be reached by telephone at (619) 576-1000.

Tel Plus Communications Inc., a Siemens Co. is one of the nation's largest distributors of communications equipment and is part of the Siemens USA group of companies which had 1989 sales of $3.5 billion, employing 31,000 people in more than 400 sales and service locations and 63 manufacturing facilities throughout the United States.

Worldwide, Siemens AG had 1989 sales of $33 billion with 365,000 employees in some 122 countries. Siemens, the world's 14th largest industrial corporation according to Fortune magazine, is the world's leading provider of private communications systems. SATURN is a registered trademark.

#90061b0684 03/02/1990 ~Business Wire

BOSTON (MARCH 2) BUSINESS WIRE - Genzyme Corp. (NASDAQ: GENZ) Friday reported financial results for the fourth quarter and full year ended Dec. 31, 1989.

Revenues for the quarter were $11,162,000, up 30 percent over the revenues reported for the same period last year. The net loss for the quarter was $5,834,000, or 48 cents per share, compared with net income of $451,000, or five cents per share, for the fourth quarter 1988.

Operating costs and expenses for the fourth quarter 1989 included a one-time charge of $3,659,000 representing the consideration paid for Genzyme's exclusive right to repurchase the interests of the surgical aids research and development limited partnership. Genzyme Development Partners L.P. ("GDP"), formed during the quarter.

This partnership will fund the development and commercialization of hyaluronic acid-based surgical aids to decrease the incidence and severity of postoperative adhesions.

Included in revenues for the fourth quarter were the initial sales of Ceredase for the treatment of Gaucher's disease under the Treatment Protocol program. The Treatment Protocol, established by the Food and Drug Administration to allow seriously ill patients to receive promising new therapies for life threatening conditions prior to full marketing approval was granted in November 1989.

Sales of Ceredase partially offset the absence of revenue paid to Genzyme by Genzyme Clinical Partners, the limited partnership formed in 1987 to fund the development of Ceredase. This funding was completed early in the fourth quarter 1989. In February 1990, Genzyme announced that it had reacquired the interests of this partnership.

Revenues for the full year 1989 increased 33 percent to $34,285,000, compared with revenues of $25,837,000 in 1988. The net loss for 1989 was $13,016,000, or $1.32 per share, compared with net income of $671,000, or

eight cents per share.

One-time charges related to the Integrated Genetics merger ($3,653,000) and the surgical aids partnership repurchase option ($3,659,000) accounted for a substantial portion of the loss for the year.

Losses from operations reflect higher operating costs associated with the combined company and the increasingly competitive nature of the market for clindamycin phosphate. Despite an increase in the volume of clindamycin shipped throughout the year, an overall decrease in the price of the product impacted operating margins.

CONTACT: Genzyme Corp., Boston, Nan DuCharme, (617) 451-1923.

BELLEVILLE, IL (MARCH 2) BUSINESS WIRE - WIlliam S. Badgley, chairman of the board of Magna Group Inc. announced that Magna Bank of Belleville has been combined with Magna Bank N.A. effective March 1, 1990.

Both banks were affiliates of Magna Group Inc. The boards of directors of both banks had unanimously approved the merger. The combined bank will be named Magna Bank N.A.

Badgley stated, "Within the last three years, Magna has merged banks on a regional basis. These consolidations have resulted in our ability to reduce operating costs and enhance customer service."

G. Thomas Andes, president and chief executive officer of Magna Bank N.A. commented, "The combined organization will have approximatley $900 million in total assets and will serve the St. Clair County customer base from a total of 23 locations, including all current bank and automated teller machine (ATM) locations enabling cusotmers of both institutions to conduct their business at any of our full-service locations."

In connection with the merger, the board of directors of the combined banks will consist of 14 of the 17 directors of Magna Bank N.A. and four of the 12 directors of Magna Bank of Belleville.

Magna Group Inc., a multi-bank holding company headquartered in Belleville now owns eight banks with 46 locations throughout Central and Southern Illinois, a trust company and a data processing company.

CLEVELAND (MARCH 2) BUSINESS WIRE - After a four-month search process involving over 20 candidates, The Jayme Organization Inc. has named James K. DeVoe as its president and elected him to its board of directors. He becomes the fifth president in the 44-year history of the Cleveland-based advertising, marketing and public relations firm.

DeVoe comes to Jayme from The Goodyear Tire & Rubber Co., Akron where he has been corporate vice president-advertising worldwide. In this position he has been responsible for maintaining Goodyear as the No. 1 brand of tires and one of America's most enduring brands. He directed all advertising for consumer, commercial and performance tires to worldwide markets.

With this move, Jayme signals its determination to become a major regional agency with national accounts. DeVoe is well-known nationally in advertising circles and was recently featured prominently in David Martin's book on "Romancing the Brand."

He is a director of the Association of National Advertisers and the National Advertising Review Board, speaks frequently before national marketing and advertising audiences, and writes on key advertising issues.

Commenting on the choice, George N. Havens, Jayme chairman, noted: "We had a group of strong contenders, some from major agencies, but Jim was our top candidate. His leadership strengths, his achievement record and his fit with our team were exceptional. It seems that his entire career has been aimed at preparing him for this assignment, this challenge, this opportunity."

DeVoe has diversified experience on both the agency and corporate sides that has involved him in retail, consumer, commercial and high-tech products and markets. Prior to Goodyear, he was vice president-consumer communication at RCA Sales Corporation, Indianapolis.

He served as senior vice president at both NW Ayer, New York, and Cargill, Wilson & Acree, Richmond, and as president of Dusenberry Advertising, New York. He started his career at BBDO, New York, in research and quickly rose to vice president.

The Jayme Organization is one of the top 200 agencies in the nation and projects 1990 billings exceeding $50 million. Affiliate firms associated with Jayme include Proconsul Public Relations, Strategic Research Center, The BoardRoom Design Group and Market-zing Promotions.

--Investco 50 percent controlled by Fitzwilton and 50 percent by Morgan Stanley Leveraged Equity Fund 11, L.P.

--Terms of Rights Issue: one New Stock Unit at 27.5 IR p for each existing five Stock Units and/or Separate Ordinary Shares

--Proposed simplification of trading in group securities

--Preliminary results: loss after tax and interest of 29 million IR pounds (1988: 5.2 million IR pounds)

--Sales rise from 301 million IR pounds (1988) to 349 million IR pounds

The board of Waterford Wedgwood announces that it has reached agreement with Shuttleway (''Investco''), an investment holding company controlled by Fitzwilton Public Limited Company (''Fitzwilton'') and The Morgan

Stanley Leveraged Equity Fund II, L.P. (''MSLEF II'') on a proposal for Investco to invest 79.5 million IR pounds in Waterford Wedgwood (''the Subscription''). In addition to the funds to be received from Investco, the company proposes to raise approximately 22.8 million IR pounds through a Rights Issue underwritten by The Investment Bank of Ireland Limited and S.G. Warburg & Co. Ltd. The Subscription and the Rights Issue will raise a total of 96.3 million pounds net of expenses.

The Subscription and the Rights Issue are conditional on the approval of Waterford Wedgwood shareholders at Extraordinary General Meetings of Waterford Wedgwood and Waterford Wedgwood UK plc which will be held on 28th March, 1990. The Subscription Agreement is conditional, inter alia, on the approval of Fitzwilton shareholders at an Extraordinary General Meeting to be held on the same day. The Provisional Allotment Letters will not be posted until the Subscription agreement has become unconditional and the Rights Issue is also conditional on payment being made under the Subscription Agreement, which is expected to take place on 19th April, 1990.

The preliminary announcement of the group's results for the year ended 31st December, 1989 is set out in the Appendix. These results show a loss before taxation of IR 20.6 million pounds (1988: profit of IR 2.7 million pounds) after net interest costs of IR 19.5 million pounds (1988: IR 11.0 million pounds). The charge to taxation was IR 8.4 million pounds (1988: IR 7.9 million pounds), resulting in a loss after taxation of IR 29.0 million pounds (1988: IR 5.2 million pounds).

PROVIDENCE, RI (MARCH 2) BUSINESS WIRE - Narragansett Capital Inc. and

three Dryvit Systems Inc. executives Friday announced the purchase of Dryvit Systems Inc., headquartered in West Warwick, R.I.

''Dryvit Systems is the leading domestic producer of exterior insulated finish systems, also known as EIFS,'' said Paul H. Hill, president and chief operating officer of Dryvit Systems. ''The product is designed for the exterior of buildings and has the visual effect of masonry or stone, but costs less and is a better insulator than conventional materials.''

Dryvit Systems manufactures and supplies the integral components of the system from seven factories in the United States, Canada and Korea. More than 85,000 new construction and retrofit projects have been completed with Dryvit products.

Roger Vandenberg, a managing director of Narragansett Capital Inc. will serve as chief executive officer and vice chairman of Dryvit Systems Inc.

In addition to Hill, the operating management team is comprised of Dr. Vincent Tamburrini, executive vice president of corporate development and Dennis Dallman, chief financial officer.

Frank Morsilli, founder and previous owner of Dryvit Systems will also serve as chairman of Dryvit Systems for one year.

Debt financing for the Dryvit Systems purchase was provided by G.E. Capital Corp.

Narragansett Capital is a private investment firm headquartered in Providence, which specializes in acquiring businesses in partnership with operating management.

Narragansett manages approximately $300 million in assets.

MONROVIA, CA (MARCH 1) BUSINESS WIRE - Vision Sciences Inc. (NASDAQ:LENZ) Friday announced total revenue of $6,773,000 for the year ended December 1989, as compared to $2,800,000 in 1988, a 142 percent increase.

The substantial increase in revenues is the direct result of the increase in installations of the company's Formalens spectacle lens casting systems. The company installed over 150 systems during the year resulting in a current installed base of approximately 200 systems.

This increased activity also increased the net loss to $3,346,000 (50 cents per common share) over a loss of $2,029,000 (46 cents per share) in 1988, a 65 percent increase.

Gerry Keahl, Vision Science's recently appointed president, stated that management decisions were made to establish reserves which reduced invoiced sales by $1,700,000 in the fourth quarter to among other things, reflect learning curve problems and product returns on a current basis and $250,000 to recognize inventory obsolescence resulting from the rapid product evolution of this new technology.

Vision Sciences is the leading supplier of office based lens casting equipment, the latest technology available in the production of quality yet inexpensive prescription spectacle lenses.

NEW YORK (MARCH 2) BUSINESS WIRE - Home Dish Satellite Networks Inc. whose common stock is quoted in the pink sheets of the over-the-counter market,

said that as of 7:00 p.m., Monday, Feb. 26, its satellite television uplink provider, U.S. Satellite, had ceased transmitting the company's American Exxxtasy signal to the company's subscribers from receiving such programming.

The company also said that on Feb. 28 it engaged a new service to transmit its signal to the communications satellite. Accordingly, the company expects American Exxxtasy broadcasting to recommence on or about the evening of March 2 in all states except Alabama (where the company was named in a misdemeanor obscenity indictment), and Utah (where the company believes authorities are reviewing its American Exxxtasy programming).

The company has no willful intention of violating any local, state or federal statute on obscenity.

HORSHAM, PA (MARCH 2) BUSINESS WIRE - There was plenty of fanfare and comraderie as Decision Data Computer Corp. dedicated its new, 188,844-square-foot headquarters in the Horsham Corporate Center Friday.

In addition to the 250 employees who will occupy the building, the ceremony was attended by state and local government officials, area business leaders and employees from the company's nearby corporate and sister division headquarters building.

Presiding over the dedication was Decision Data Computer Corp. President Donald E. Lemon, who introduced the speakers that would follow -- Decision Data Inc.'s President and Chief Executive Officer Joseph Kroger, State Rep. George E. Saurman (R-151), Montgomery County Commissioners Chairman Paul B. Bartle and Horsham Township Treasurer James R. Doherty Sr.

''As today's theme indicates, we're building on success,'' Lemon said. ''Since we were founded in 1969, Decision Data Computer Corp. has shipped more than 300,000 terminals, workstations, printers and other IBM midrange computer peripherals to more than 24,000 customers around the world and has grown to become the largest independent supplier to the IBM midrange computer marketplace.''

Commissioner Bartle and Horsham Township Treasurer Doherty discussed the significance of technology businesses in Montgomery County and Horsham Township, where Decision Data is one of the largest employers.

Following their remarks, the speakers cut a symbolic computer printout in

place of a ribbon.

Decision Data Inc., through its two operating subsidiaries, Decision Data Computer Corp. and Decision Data Service Inc., is the largest independent supplier worldwide of IBM Systems/34,/36,/38 and AS/400 compatible products and services.

Decision Data Computer Corp. markets a broad line of products including IBM System/3X and AS/400 systems; personal computers; intelligent personal workstations; standard System/3X and AS/400 terminals; matrix, serial and laser printers; communications controllers; state-of-the-art tape backup systems; main memory expansion; uninterruptible power systems; computer supplies and a broad range of financing alternatives.

Decision Data Service Inc. services more than 1,000 models of computer equipment, including IBM, Wang, Texas Instruments, Qantel and Decision Data Computer Corp. peripherals.

MOBILE, AL. (MARCH 2) BUSINESS WIRE - Altus Bank, a Federal Savings Bank (NASDAQ:ALTS), reported net losses of $19.3 million, or $3.95 per share, for the year ended Dec. 31, 1989, according to Chris DeLaney, chairman of the board, compared to net losses of $22.9 million, or $4.69 per share, for the year ended Dec. 31, 1988.

For the quarter ended Dec. 31, 1989, the company reported net losses of $9.2 million, or $1.88 per share, compared to net losses of $1.3 million, or 27 cents per share, for the like period of 1988.

DeLaney explained the decrease in losses for 1989 compared to 1988 was a result of decreases in the provision for losses on loans and real estate, and non-interest expenses of $9.8 million and $3.4 million, respectively, being partially offset by a $10.2 million decrease in net interest income.

Altus Bank, a Federal Savings Bank, is headquartered in Mobile and has 49 branches statewide. As of Dec. 31, 1989, Altus reported total assets of $2.26 billion. Deposits are insured to $100,000 by the Federal Deposit Insurance Corp. and backed by the full faith and credit of the U.S. government.

SOUTHFIELD, MI (MARCH 1) BUSINESS WIRE - Leeco Diagnostics Inc. (OTC:LECO) announces the departures of Dr. Jin Po Lee, former president and director of research and development, and the appointment of Dr. Alberto Galbiati as chief operating officer and Dr. Franco Tomasini as chief financial officer.

A spokesperson for Leeco's board of directors explained the new appointments:

''Leeco has undergone many changes in recent months: The move to newly constructed facilities, the start-up of state-of-the art automation and the merger with Technogenetics.

''Developing strong management and focusing on new products is the key to future growth and profitability. These appointments will assist in achieving these objectives and also demonstrate Recordati's continued commitment of resources in support of Leeco.''

Dr. Alberto Galbiati will assume responsiblity for the company's research and development programs and will also be responsible for manufacturing and quality assurance. Dr. Galbiati is a member of Leeco's board of directors, Managing Director of Technogenetics S.R.L., Leeco's wholly onwed subsidiary in Italy, and general manager of the Diagnostic Division of Recordati S.p.A.

Dr. Franco Tomasini will assume responsibility for the company's financial activities. Dr. Tomasini has been the financial manager of Recordati S.p.A. since 1987 and served as the assistant to the chief executive officer of Recordati S.p.A. from 1984 to 1987. Since November 1988, Dr. Tomasini has served as a financial advisor to Leeco.

NEW YORK (MARCH 2) BUSINESS WIRE - Republic New York Corp. announced Friday that the New York State Banking Board and the Superintendent of Banks of the State of New York have approved the previously announced conversion of the Manhattan Savings Bank and its merger with Republic's wholly owned subsidiary, The Williamsburgh Savings Bank.

At Dec. 31, 1989 Manhattan had total deposits of $2.8 billion and capital of $271 million and Williamsburgh had total deposits of $2.6 billion and capital of $336 million. Subsequent to the merger, the combined banks will operate as The Manhattan Savings Bank.

The transaction, which was announced Dec. 18, 1989, still requires the approval of Manhattan's depositors, as well as that of other regulators. Subject to such approvals and other closing requirements, it is expected that the transaction will be consummated some time in the second quarter of 1990.

At Dec. 31, 1989, the corporation's principal subsidiary, Republic National Bank of New York, had deposits of $14.3 billion and capital of $1.5 billion.

HARTFORD, CT (MARCH 2) BUSINESS WIRE - United Technologies Corp. (UTC) expects to expand its international business, which now accounts for half of total revenues, and improve the profitability of its defense business, despite overall reductions in government businesses, Chairman and Chief Executive Officer Robert F. Daniell told shareowners in the company's 1989 annual report released Friday.

Daniell said surging economic growth in the Pacific Rim and pending integration of Western European markets offer the corporation new opportunities in regions where it is already successful. He also said the political and economic progress being made in Eastern Europe provides additional opportunities.

The company's international strength is "particularly advantageous during the economic sluggishness now beginning to occur in certain North American markets," according to Daniell. The corporation's international revenues grew 18 percent in 1989 to $9.8 billion, representing half of total revenues.

Daniell said the corporation is continuing its "long and proud role" as a defense contractor, while increasing its commercial and industrial businesses. Military and space-related work, he said, represented less than 25 percent of total revenues in 1989.

"We have developed a much more stringent assessment of the risk factors involved in defense-related projects, especially as it relates to

fixed-price development projects," Daniell said. "We are sensitive to the importance of earning an adequate return on defense business in general."

He said the quality of the corporation's 1989 earnings reflects the "disciplined approach we have taken to lowering the cost structure and improving the operating performances of our businesses." In 1989, the company had record earnings of $702.1 million, or $5.20 a fully diluted share, on revenues of $19.8 billion.

Daniell said the company sees additional opportunities to reduce costs and maximize resources in the next several years which are an essential part of "our overall efforts to offer shareowners a superior return on their investment."

United Technologies Corp. provides a broad range of high-technology products and support services to the aerospace, building systems and automotive industries.

#90061b0751 03/02/1990 ~Business Wire

MOUNTAIN LAKES, NJ (MARCH 2) BUSINESS WIRE - Computer Horizons Corp. (NASDAQ:CHRZ) announced Friday that for the year ended Dec. 31, 1989, revenues increased 7 percent to $84,650,000 from $79,150,000 in 1988.

The company sustained a net loss of $291,000, or 12 cents per share compared to last year's net income of $1,312,000, or 49 cents per share.

1989's loss is attributable to $3.3 million of restructuring costs resulting from the program announced last October of operational consolidation and streamlining, accompanied by certain asset write-offs.

Restructuring costs included: $500,000 for the closing and consolidation of certain offices, $1.8 million for severances and compensation-related expenses, and $1 million for certain asset write-offs.

The comapny also recorded a $1 million after-tax gain in 1989 reflecting the adoption of required new accounting principles for deferred income taxes according to FASB 96.

For the fourth quarter ended Dec. 31, 1989, revenues were $22,516,000, a nine percent improvement over the $20,664,000 for the similar period in 1988. The 1989 quarter had a net loss of $2,158,000 or 90 cents per share compared to net income of $567,000 or $.23 per share in the fourth quarter of 1988.

The loss reflects the $3.3 million of restructuring costs, coupled with aditional non-recurring charges of $600,000 for bad debt coverage and ceratin other reserves.

John Cassese, president of Computer Horizons Corp., said, ''Our restructuring program combined with a sharply focused strategy with strict cost controls. We believe it was well planned and is being well executed. As a result, Computer Horizons is solidly positioned for growth in 1990 as we continue to invest our energies in our partnering and systems integration programs.''

Computer Horizons is one of the nation's largest independent providers of custom software development, systems integration, management consulting and training and education serving a clientele of Fortune 500 companies nationwide through a network of 25 offices.

HOUSTON (MARCH 2) BUSINESS WIRE - Service Corporation International Friday reported results for the year ended Dec. 31, 1989.

Revenues from continuing operations in 1989 were $520.7 million, up from $471.2 million in 1988. Income from operations in 1989 totalled $49.7 million or $1.03 per share, which includes $3.0 million or $.06 per share from discontinued businesses.

This compared to $27.1 million or $.56 per share in 1988, which included a loss of $15.6 million or $.33 per share from discontinued businesses. The 1988 loss from discontinued operations included the effect of a $19.2 million ($.40 per share) reserve for closing certain manufacturing plants.

In November of 1989, SCI's board of directors approved management's decision to discontinue involvement in the funeral supply and insurance funded prearranged funeral service businesses.

Accordingly, the 1989 results include an expected loss on the disposal of these discontinued operations of $98.0 million or $2.03 per share, resulting in a 1989 net loss of $48.2 million or $1.00 per share.

SCI is the largest funeral service/cemetery company in North America. SCI's common stock is traded on the New York Stock Exchange. The

company's ticker symbol is SRV.

NORTH MIAMI BEACH, FL (MARCH 1) BUSINESS WIRE - Home Intensive Care Inc. 1/8NASDAQ/NMS:KDNY (common stock) and KDNYW (warrants)3/8 Friday announced that it has received an order from the U.S. Court of Appeals stating that on Feb. 1, 1990, the Omnibus Budget Reconciliation Act (''OBRA'') of 1989 went into effect containing a provision to limit the amount of payment for hemodialysis equipment and supplies under Method II to the composite Method I rate received by hospital-based facilities.

This provision permits the Department of Health and Human Services to calculate home-dialysis reimbursements in precisely the manner prohibited by the district court in its preliminary injunction. Accordingly, it appears that the preliminary injunction in this case has been mooted by OBRA.

The court stated, ''The only question presented to this Court on this Appeal is whether the preliminary injunction was properly granted. Given that OBRA seems to have mooted the preliminary injunction, the precise issue for appeal may no longer be susceptible to judicial resolution. ''For this reason, we (''the Court'') order the parties to show cause why this appeal should not be dismissed as moot. Counsel for both parties are ordered to submit written memorandum...on this issue within ten days of the issuance of this Order.''

Home Intensive Care Inc. provides high-tech home health care infusion therapy products and services including nutritional therapy, home dialysis and intravenous antibiotic therapy. The company also operates two kidney

dialysis centers and 24-hour acute kidney dialysis services in many metropolitan areas.

Its Lifeline Water Systems subsidiary markets water purification systems for commercial, industrial and residential use, while Medi-Sure Testing Inc. provides testing services for the insurance industry and pre-employment screening services.

CUPERTINO, CA (MARCH 2) BUSINESS WIRE - Apple Computer Inc. (NASDAQ: AAPL) Friday announced that Jean-Louis Gassee, 45, president of Apple Products, intends to leave the company after an orderly transition of his responsibilities.

"In light of recent organizational changes at Apple, Jean-Louis and I have discussed at great length how his personal career goals fit in with opportunities for him at the company," said John Sculley, Apple's chairman and chief executive officer.

"And Jean-Louis has decided that this is an appropriate time for him to move on. While we will miss his leadership, integrity and spirit, we understand his decision: He has our very best wishes in his new pursuits.

"As we go forward, we know that Apple's product organization is the strongest and most technically-proficient in the industry. As a result, Gassee's departure will not slow down current product development plans," said Sculley.

The company's engineering, networking and communication, and advanced technology efforts will now report directly to Sculley. The company's worldwide product marketing and manufacturing functions began reporting to Michael H. Spindler, chief operating officer, in January of 1990. Reporting to Sculley are:

Edward Birss, 37, senior vice president, Product Engineering. Birss is a ten-year Apple veteran and has held a number of key engineering and product development posts at the company, including director of software engineering and manager of advanced technology and manager of education research.

Donald P. Casey, 43, vice president, Networking and Communications. Casey joined Apple in 1988 in his present role after a prominent 21-year career at the IBM Corp.

Larry G. Tesler, 44, vice president, Advanced Technology. Tesler is a

ten-year Apple veteran and has held a number of senior technology positions at the company. Prior to Apple, Tesler was a member of the research staff at Xerox Palo Alto Research Center.

"We are very confident we have the senior technical talent to take Apple to the next stage of its growth as a technical innovator in the industry in the 1990's," said Sculley.

STAMFORD, CT. (MARCH 2) BUSINESS WIRE - Petroleum Heat and Power Co. Inc. (AMEX:PHP) has announced 1989 Cash Flow of $25.4 million ($1.70 per Class B Common share) and home heating oil unit volume of 450 million gallons, an eight percent increase over the 414 million gallons delivered in 1988.

The company continued to grow in 1989 primarily through the acquisition of 16 home heating oil distributorships. Home heating oil volume increased approximatley 50 million gallons due to these acquisitions and to the 20 distributorships acquired during 1988 whose annual volume was fully realized for the first time in 1989.

This growth was offset by a reduction of approximately 16 million gallons due to effectively warmer weather and normal account attrition.

As expected, 1989 Cash Flow was lower than that realized in 1988 due to the effectively warmer weather and a decline to more normal gross profit margins compared to the above average levels of 1988.

Also as expected, the company incurred a net loss for the year compared to a profit in 1988 due to acquisition related increases in interest expense and in depreciation and amortization, which as non cash expenses however, increased Cash Flow.

Based on this Cash Flow, the company has declared a quarterly dividend of $.425 per Class B Common share, payable April 1. The company intends to maintain this dividend rate for each of the following three quarters in 1990.

Petroleum Heat and Power Co. Inc. is the largest distributor of home heating oil in the United States and currently serves approximately 360,000 customers in 23 marketing areas from Portsmouth, N.H. to Washington D.C.

CHARLOTTE, NC (MARCH 2) BUSINESS WIRE - The Resolution Trust Corp. (RTC) Friday was appointed receiver for North Carolina Federal Savings and Loan Association, Charlotte, by the Office of Thrift Supervision (OTS). A new federal mutual association was then created to assume all deposits and certain assets and liabilities of North Carolina Federal. The OTS has appointed the RTC as conservator of this new institution, North Carolina

Savings and Loans Association F.A.

North Carolina Savings will maintain normal business hours and operations under an RTC-appointed managing agent while the RTC negotiates a permanent resolution for the troubled thrift.

North Carolina Federal had approximately $653.5 million in assets and $467.4 million in 65,409 deposit accounts. Deposits continue to be federally insured.

At RTC conservatorships, managing agents are responsible for minimizing operating losses, limiting growth, and ensuring that operations are conducted in a safe and sound manner. They work to conserve assets and preserve banking services to deposit and loan customers at the thrifts.

The RTC was established under the Financial Institutions Reform, Recovery and Enforcement Act of 1989.

CINCINNATI (MARCH 2) BUSINESS WIRE - First Savings Bancorp announced Friday that the corporation is extending its stock repurchase program for another six month period.

Present regulations governing savings and loan holding companies allow the corporation to purchase up to 5 percent, or 33,000 shares, of its outstanding common stock during any six month period. Actual repurchases, if any, will be dependent upon market conditions and cash requirements of the corporation and there is no guaranty as to the exact number of shares, if any, to be repurchased.

Joseph D. Hughes, president of the corporation, stated that the board of directors has authorized the six month extension of the plan which commenced in July 1989 as a possible alternative to other investment strategies. In addition, any repurchases of stock will limit the future

dilution incurred in connection with the corporation's stock option plan. Based on the current market price of the stock, the repurchase of any shares will effectively increase both the earnings and book value per share of the remaining outstanding shares.

First Savings Bancorp was organized in July 1988 and is the holding company of First Financial Savings Association, F.A., a federally chartered savings and loan association with its principal office in Cincinnati and total assets of approximately $175 million at Dec. 31, 1989.

INWOOD, NY (MARCH 2) BUSINESS WIRE - Choice Drug Systems, Inc. (NASDAQ: DOSE, Boston Stock Exchange: CD) Friday announced that it has reached an agreement in principle with its lead bank, United Jersey Bank to extend its credit facility to May 31, 1990.

The terms and conditions of the loan will remain substantially unchanged except for modifications to existing financial ratio covenants. Additionally, UJB has raised the limit of the loan facility to $3.5 million from $2.8 million.

As a condition of the foregoing, a major supplier has agreed in principle to buy Choice Drug's inventory at 75 percent of Choice Drug's cost, at the request, if made, of UJB and upon terms mutually acceptable to UJB, the Supplier and Choice Drug.

Choice Drug Systems, Inc. and its wholly-owned subsidiaries provide pharmaceuticals, durable medical equipment, and disposables to health care facilities, home health care providers, and physician groups in the greater New York/New Jersey Metropolitan area and in Massachusetts and Connecticut.

#90061b0791 03/02/1990 ~Business Wire

PHOENIX (MARCH 2) BUSINESS WIRE - Phoenix-based producer of non-prescription oral health care products, Friday reported a net income of $126,907 for the first 6 months (ended January 31) of fiscal year 1990, surpassing net income from all of fiscal year 1989.

Net sales for the six month period were $1,861,265, a 42 percent increase

over net sales of $1,312,408 for the first six months of fiscal 1989.

Second quarter fiscal year 1990 net sales (ending Jan. 31, 1990) were $952,493, with net income of $46,318. This compares to fiscal year 1989 second quarter sales of $803,101 and net income of $40,058 when adjusted by $128,824 of marketing expense that was paid by the company's marketing partner, the Daleco Zila Partnership.

Zila has no long term debt and a strong cash position.

On Feb. 6, after the close of the second quarter, Zila announced that it had granted to Bausch & Lomb Incorporated exclusive international (non-U.S.) rights to manufacture and market Zila's oral health care products.

Bausch & Lomb will begin marketing Zilactin in Canada as quickly as packaged inventory is ready for distribution; marketing approval has already been granted by Canadian regulatory authorities.

With its extensive international organization, Bausch & Lomb is expected to move rapidly toward commencement of marketing in other major world markets. No income from the Baucsh & Lomb agreement is reflected in Zila's second quarter figures.

Zila President Joseph Hines said second quarter record sales were generated in large part by the company's original product, Zilactin, a patented non-prescription medicated gel for canker sores, fever blisters and cold sores in and around the mouth.

''ZilaBrace and ZilaDent, introduced in July of 1989, are moving very well in markets where they are in distribution. Waiting for positions to open in the planograms of major retailers, however, has put the company slightly behind schedule in its plan to have these two new products available on every retail shelf.

''ZilaBrace and ZilaDent are now available through all major wholesalers as well as Revco, Walgreens, Eckards and several other major retailers. We anticipate shelf positioning in other major retail chains as planograms are revised in preparation for spring merchandising,'' said Hines.

Hines added, ''Steadily increasing market penetration for all of our products and continued strong support from medical professionals suggest that Zila's steady income and profit growth trends will continue.''

The basis for Zila's products is the company's patented bio-adhesive compound, proven in independent clinical studies to form a tenacious and occlusive flexible film over wounds and lesion, even on moist tissue. The Zila compound provides pain relief up to six hours.

The company has announced it will soon begin sales of a fourth product, Zilactol, a liquid formulation of the patented compound. Laboratory tests of this formulation show it kills, on contact, the virus that causes fever blisters and cold sores, even when diluted 1:10.

Independent research using the Zila compound is currently being readied to qualify its value in the treatment of herpes zoster (shingles), genital herpes (HSV-II) and genital warts (condyloma).

Zila has offices at 777 East Thomas Road, Phoenix, Ariz. 85014, 602/957-7887.

DALLAS (MARCH 2) BUSINESS WIRE - Greiner Engineering Inc. (AMEX/PSE:GII) GII) Friday announced its 1989 fourth quarter and year-end financial results.

Greiner's 1989 fourth quarter net income was $908,000 equal to 27 cents per share. This compares to fourth quarter net income in 1988 of $906,000 also equal to 27 cents per share. Revenue for the fourth quarter of 1989 was $24,858,000 compared to $23,743,000 in 1988.

For the year, the company's 1989 net income was $3,380,000 equal to $1.01 per share on 3,343,983 average shares outstanding. This is a 16 percent increase over 1988 earnings per share of 87 cents on net income of $2,900,000 and 3,326,538 average shares outstanding.

Revenue for the year was $100,808,000 compared to $91,018,000 in 1988. Greiner's Dec. 31, 1989, backlog stood at $117 million compared to $106 million at Dec. 31, 1988.

For the quarterly and year-end results reported above, earnings per share and average shares outstanding have been adjusted to reflect the 25 percent common stock splits effected in the form of stock dividends paid in 1988 and 1989, and the four-for-three common stock split effected in the form of a 33-1/3 percent stock dividend paid in February 1990.

In the fourth quarter, management of the company implemented an internal reorganization which is intended to place greater emphasis on the company's ability to develop additional business and on the company's project performance activities.

In the first quarter of 1990, management expects its financial results to be impacted with certain one time costs associated with the reorganization. Such costs are due to the reorientation of certain managers' job duties and are due to the communication efforts which management is undertaking with the company's staff.

Management does not expect these costs to extend beyond the first quarter and it does expect that the activities associated with the reorganization will have a beneficial effect on the company's long term operations.

Greiner is a professional services firm operating in the engineering and architectural design services industry. The company, through its operating subsidiaries, provides a broad range of engineering, planning, architectural, environmental analysis and design, surveying, program management and other services to public and private sector clients throughout the United States.

NATICK, MA. (MARCH 2) BUSINESS WIRE)--DR Holdings Inc. of Delaware, whose sole operating subsidiary is Prime Computer Inc., Friday reported total revenue for the fourth quarter of $391.1 million, which represented a 9 percent increase over the third quarter reported by Prime on a stand-alone basis.

James F. McDonald, Prime's vice chairman and chief executive officer, said ''During the quarter we implemented the majority of our strategic plan which includes restructuring the company into four business units to achieve a much sharper focus on the Computervision (CAD/CAM), the minicomputer and service businesses on a worldwide basis, and reducing the overall cost structure of the company.

''Our management team devoted much of the fourth quarter to meeting with our customers, listening to their concerns and assuring them of our strategies for customer support and long-term growth,'' McDonald added.

''We believe that the increase in revenue during the fourth quarter indicates that customers agree with our plans.''

Revenue for each of the company's business units increased in the fourth quarter compared to the third quarter with continued growth in the CAD/CAM and service units, strong growth in international markets and an increase in minicomputer orders representing business that had been deferred during Prime's defense against an unsolicited takeover attempt by MAI Basic Four Inc. of Tustin, Calif.

The majority of the company's planned restructuring was implemented by year end. Since these actions occurred at the end of the year, however, the impact on fourth quarter operating expenses was diminished. The fourth quarter actions, plus other previously announced restructuring activities and cost containment programs scheduled during 1990, when completed, are anticipated to yield more than $200 million in cost savings on an annualized basis.

DR Holdings' fourth quarter operating income, excluding the effects of amortization of purchase accounting adjustments including goodwill, financing costs and interest expense on acquisition financing, would have been $9.8 million and net income would have been $4.8 million.

These figures compare with Prime's third quarter operating loss of $7.6 million and net loss of $10.6 million, also excluding non-recurring charges and the amortization of existing goodwill. Including the effects of such adjustments, DR Holdings reported an operating loss of $45.5

million and a net loss of $101.3 million for the fourth quarter of 1989.

''The solid progress we have achieved since DR Holdings' acquisition of Prime positions the company for improved operating results in 1990 and beyond,'' McDonald said. ''Prime has an experienced management team in place and is once again a highly focused company with the resources, products and market presence required to meet our customers' needs.''

Total 1989 revenues for Prime including the period prior to acquisition were $1.52 billion vs. revenues of $1.59 billion for 1988. The decline in 1989 revenue was largely due to the negative impact on orders of MAI's unsuccessful takeover attempt.

The company does not believe profitability comparisons on a year- to-year basis to be meaningful due to restructuring charges incurred prior to DR Holdings' acquisition of Prime and purchase accounting adjustments and interest and financing costs on the acquisition indebtedness.

Prime Computer Inc. is the second largest worldwide supplier of CAD/CAM (computer-aided design/computer-aided manufacturing) solutions, having leadership positions in the automotive, industrial equipment and aerospace markets. In addition, the company has a significant position in general-purpose minicomputers incorporating state-of-the-art technology and competitive price/performance. The company has a global software and hardware field service maintenance organization providing service to the company's installed base.

SYDNEY, AUSTRALIA (MARCH 2) BUSINESS WIRE - Lower interest rates have led to an improvement in consumer expectations about the Australian economy, according to the Westpac-Melbourne Institute Index of Consumer Sentiment, which is now provided to the public by Westpac Banking Corp. (NYSE:WBK).

The February Index marks the start of a new arrangement between Westpac Banking Corp. and Australia's Institute of Applied Economic and Social Research which has been supplying the Index over the past 17 years.

Bob Graham, Westpac's chief economist, said that without Westpac's help, the Institute would not have been able to continue providing the Index of Consumer Sentiment, which has been a valuable series giving information about Australian consumers' attitudes and expectations and thereby insights into their future spending patterns.

The February Index was eight points higher than its last reading in December, and stands at 88 points, compared with 73 points in July 1989, and 94.6 points a year ago.

The regular monthly survey was conducted on the weekend of February 17-18 just after the announcement of the forthcoming Australian Federal Election.

Commenting on the February survey, Westpac's Economist, Financial Markets, Dr. Dennis Mahoney, notes that ''Almost certainly, consumers' reactions have been influenced by the much heralded lowering of interest rates in the past two months.''

But Mahoney was quick to point out that ''Consumer opinion regarding their own personal situations has remained comparatively static.''

''The February survey shows that viewing their position now compared with a year ago, there are almost two pessimists for every optimist, '' Mahoney said. ''All in all, the improving trend in consumer sentiment augurs well for the prospect of a 'soft,' rather than a 'hard' economic landing,'' Mahoney added.

Although the last reading represents a genuine break upwards from the plateau level of the past five surveys, consumer confidence is still at quite ''low levels.'' Consumers appear to be more optimistic about their personal future. Twenty seven percent they will be better off in a year's time, compared to 19 percent who feel they will be worse off.

Westpac Banking Corp. is an international financial services group headquartered in Australia, ranking among the top 100 banks worldwide in terms of assets and the top 50 banks in profitability. In its home markets of Australia, New Zealand, Papua New Guinea, and the South West Pacific, Westpac offers a full range of banking and financial services. Specialized services are provided through Westpac Group's offices in Asia, the United States, and Europe. Westpac's operations now extend offshore to 29 countries.

#90061b0818 03/02/1990 ~Business Wire

GREENWICH, CT. (MARCH 2) BUSINESS WIRE - Walsh, Greenwood & Co. and FS Champ Associates announced Friday that they and WG Parters L.P. (an investment limited partnership of which Walsh Greenwood is the general partner) had filed a lawsuit in Federal court in Boston challenging the constitutionality of the Massachusetts Anti-Takeover Act (Chapter 110F of the Massachusetts General Laws) and seeking a declaratory judgment that the Act does not apply to their ownership of stock of The Stride Rite Crop. or a possible business combination between them and Stride Rite.

Walsh Greenwood, FS Champ and WG Partners together own an aggregate of 4.9 percent of Stride Rite's outstanding common stock. The Massachusetts Anti-Takeover Act prohibits persons who acquire 5 percent or more of a company's voting stock from engaging in a business combination transaction for three years, unless the acquisision was made with the prior approval of the comapny's board of directors.

Stride Rite has indicated an intention to attempt to apply the definition of ''ownership'' in the Act in such a way that shares owned by entities unrelated to Walsh Greenwood and FS Champ would be treated as owned by them, placing them above the five percent threshold and making them ''interested stockholders'' covered by the Act.

The plaintiffs' complaint asks the court to declare the Act

unconstitutional because the Act's five percent limitation interferes with interstate commerce and the federal securities laws' disclosure process.

The plaintiffs are also seeking a declaration that they are not and have never been ''interested stockholders'' or that if they were, they were covered by the law's ''grandfather'' provisions.

Commenting on the litigation, a spokesman said, ''We believe that the Massachusetts law is a protectionist attempt to shield incumbent management of Massachusetts corporations from their stockholders. Although similar laws in New York, Delaware and Wisconsin have been upheld, none of those statutes combined a threshold as low as five percent with exceptions that are impossible to satisfy as a practical matter. The actions of Stride Rite's incumbent directors in trying to use the Massachusetts law to prevent us from proposing a business combination to Stride Rite's stockholders demonstrate once again their lack of concern for stockholder interests and their refusal to give stockholders a choice in possibly realizing a premium on their shares.''

On Dec. 20, 1989, Walsh, Greenwood, and FS Champ, as representatives of certain Minda Bronfman de Gunzburg family trusts, proposed to enter into a negotiated transaction with the board of directors of Stride Rite pursuant to which all stockholders would receive $32 per share in cash for each of their shares.

Stride Rite responded on Jan. 30 by rejecting the proposal and amending its by-laws to limit stockholders' rights to call special meetings, propose matters at annual meetings or nominate directors.

On Jan. 30, FS Champ and Walsh Greenwood withdrew their proposal and told STride Rite that FS Champ and Walsh Greenwood would consider all of their options.

#90061b0822 03/02/1990 ~Business Wire

QUINCY, MA (MARCH 2) BUSINESS WIRE - The Hibernia Savings Bank (NASDAQ:HSBK) announced Friday that net income for the fiscal year ended Dec. 1, 1989 was revised from $615,611 or 77 cents per share to $335,111 or 42 cents per share.

Also, net income for the fourth quarter which ended Dec. 1, 1989 was

revised from $415. or $0.00 per share to a net loss of ($280,085) or ($0.35) per share.

The management of the bank determined that an additional loan loss provision was necissitated by a change in circumstances, subsequent to Feb. 2, 1990 on which date net earnings were previously released, concerning two extensions of credit.

Specifically, a loan in which the bank participates with another institution had become subject to an adverse classification at the servicing institution. However, it should be noted that the referenced loan is currently being paid as agreed. In addition, the planned sale of a group of loans, which included a number of non performing loans to another institution, as a settlement of pending litigation against that institution, was terminated.

The bank's external auditors, Ernst and Young, determined that the additional loan loss provision should be properly accounted for during the fiscal year which ended Dec. 31, 1989. The bank's loan loss provision for 1989 as restated now totals $1,281,306 as compared to $781,306 prior to restatement. The bank's allowance for loan losses as restated now totals $1,342,958 as compared to $842,958 prior to restatement.

Mark A. Osborne, president and chairman of the board stated ''It is unfortunate that this change became necessary. However it is our policy to recognize and loan quality problems immediately. This action will have no effect on our dividend policy and the dividend which was recently voted by our board of directors of $0.09 per share payable on April 20, 1990 to shareholder of record on March 20, 1990 is intact. Further, we expect to be profitable in the first quarter of 1990.''

The Hibernia Savings Bank, founded in 1912, is a state chartered, FDIC insured stock institution which offers a wide range of deposit and loan products. The Hibernia Savings Bank also features money market deposit accounts, commercial and residential mortgages, and consumer loans. The main office of the bank is located at 731 Hancock Street, Quincy. The bank also has retail banking facilities located at 101 Federal St., Boston and at 51 Commercial St., Braintree.

WASHINGTON (MARCH 2) COMTEX - The 8-K report filed at the SEC shows Quartz Mountain Gold Inc. reports that on Feb. 27 ,1990, the independent accounting firm of Deloitte Haskins & Sells resigned from their engagement with the company.

For the previous two years, audits performed by those former auditors contained no adverse opinion or disclaimer of opinion nor were they modified as to uncertainty, audit scope, or accounting principles.

For the previous two years, there were no disagreements between those former auditors and the company.

Deloitte resigned in order to allow Quartz Mountain to comply with the recommendations of management to hire new independent auditors. That new hiring, of the firm of Peat Marwick Thorne, of Vancouver, British Colombia will be submitted to shareholders for approval at their next meeting. Quartz Mountain had not in the prior two years engaged in any dealings with Peat Marwick Thorne.

Deloitte Haskins & Sells, since Feb. 1, 1990, has operated in Canada under the name Deloitte & Touche.

WASHINGTON (MARCH 2) COMTEX - The 8-K report filed at the SEC shows on Feb. 28, 1990, Heritage Financial Corp. reported that it had terminated discussions with McCown DeLeeuw & Co., a New York venture banking firm. Those discussions were over capital investments in Heritage Financial's Heritage Savings Bank, FSB, a savings and loan subsidiary.

Those investments, to be made by McCown and other parties to be identified by McCown, were to have been a principal part of a capital plan that Heritage Financial was required to submit to the Office of Thrift Supervision, as required by the Financial Institution Reform, Recovery and Enformcement Act.

According to the 8-K, Heritage expected to file a revised plan for its subsidiary with the OTS shortly.

#90061c0020 03/02/1990 ~Comtex
WASHINGTON (MARCH 2) COMTEX - The 8-K report filed at the SEC shows in a press release dated Feb. 19, 1990, Rhone-Poulenc reported that it would receive 35% of the capital of Roussel-Uclaf. This venture was recently permitted in an agreement between the French Government and Hoechst, the majority shareholder of Roussel-Uclaf.

According to the 8-K filing, both Rhone-Poulenc and Hoechst are convinced that the new privileged relations arrangement, as developed under the venture, will allow them to reinforce their position in the European and world chemical markets.

Also stated in the 8-K, the two companies expect to begin their joint ventures with "the development of new technologies in environmental matters, the development of better safety systems and the best use of their production capacities in various areas of intermediate chemicals, of fine chemicals and of specialities, in the form of contracts for supplies or common exploitation."

Hoechst and Rhone-Poulenc have agreed not to increase their participaion in Roussel-Uclaf without the consent of a third party involved.

WASHINGTON (MARCH 2) COMTEX - The 8-K report filed at the SEC shows on Jan. 30, 1990, National Data dismissed the services of Price Waterhouse because Price Waterhouse was asked to sign a contract with a third party with whom National Data was involved. Price Waterhouse informed National Data that it could not sign such a contract while engaged by National Data without violating SEC rules regarding independence of public accountants.

For the previous two years, audits performed by those former auditors contained no adverse opinion or disclaimer of opinion nor were they modified as to uncertainty, audit scope, or accounting principles.

For the previous two years, there were no disagreements between those former auditors and the company.

During the National Data's fiscal year ended May 30, 1988, however, Price Waterhouse informed National Data that there were internal weaknesses in the revenue recognition procedures of a wholly owned subsidiary. According to the 8-K, National Data has since addressed and resolved this difficulty. National Data has authorized Price Waterhouse to discuss this matter with future auditors of the company.

SEC - AMENDMENT NUMBER: 2

JEFFREY A LAMM OWNS 913,524 SHARES (37.50%) OF DATAFLEX CORP (TICKER: DFLX) OF EDISON, NJ.

ANNOUNCEMENT:

On Feb. 23, 1990, Dataflex filed a registration statement that covers the sale of 1,403,000 common shares, of which Lamm will offer 320,000.

Concurrently, an agreement was signed whereby Richard C. Rose will become CEO of Dataflex, as well as remaining president; Gordon J. McLenithan will become a director, executive VP and COO; and Lamm will remain as chairman of the board but will resign as CEO.

The agreement also accounts for the purchase of $1 million in common stock at the offering price to be determined in the registration statement, from Lamm by Rose and McLenithan.

Dataflex will also grant an option for 320,000 shares to Rose and McLenithan due to their increased responsibilities.

The above agreements will terminate unless consummated by May 31, 1990.

WASHINGTON (MARCH 2) COMTEX - Videspection Inc. filed a Form 10-Q with the NASD stating during the quarter ended Dec. 31, 1989, Kenneth D. Etulain was appointed as a director of Videospection. Also, on Jan. 31, 1990, Richard T. Beard resigned as secretary and director of the company.

On Feb. 8, 1990, RAM Dynamics agreed in principal to reorganization of the RAM Dynamics Ltd. joint venture. With the reorganization, a subsidiary of Videospection, RAM Products Corp., would serve as designated owner of the joint venture. RAM Dynamics Inc. would own 20% of the venture and Videospection the remaining 80%.

The reorganization of the joint venture was spurred by worsening financial prospects of the venture. Following the agreement in principal, the joint venuture will be sustained with minimal operations as provided by limited additional funding.

SCHEDULE 14D1

SEC - AMENDMENT NUMBER: 27

ANNOUNCEMENT:

On Feb. 26, 1990, the definitive credit agreement and $14 million bridge loan note with Citibank were executed.

On Feb. 27, 1990, after the merger was consummated, IBC (TICKER: IBKP) sold the Ramapo, N.Y., facility of its American Bank Note Co. subsidiary to a subsidiary of Francois-Charles Oberthur Fiduciare.

On Feb. 26, 1990, the parent entered into a definitive agreement to sell Monetary Management Corp. to MMC Holding pursuant to the terms in the supplement dated Feb. 12, 1990.

SYDNEY (MARCH 2) - Australia and South Korea will open their first direct air link next month after three years of on-and-off negotiations, airline officials here said Friday.

Korean Air's inaugural weekly flight will arrive in Sydney on April 3, with Australia's national carrier Qantas Airways Ltd. joining the route in October, the officials said.

Roger Robertson, Qantas' general manager for planning, said Australia hoped to capture a significant slice of a tourist market that has taken off since the Seoul authorities lifted restrictions on Koreans travelling abroad.

South Korea is Australia's fifth largest trading partner, but tourist traffic between the two countries is little more than a trickle.

Transport Minister Ralph Willis said the direct link would ease business contacts and further boost Australia's trade with one of the fastest growing economies in the world.

Wiesbaden (MARCH 2) - West Germany's rate of inflation apparently slowed down in February to an annual rate of 2.6 percent, the Federal Office of Statistics said here Friday.

Presenting preliminary figures, the office said that from January to February, the price index climbed 0.3 percent.

In January, prices were 2.7 percent higher than a year earlier, while in December they were 3.0 percent higher.

Final February price figures were to be released around mid-March.

BRUSSELS (MARCH 2) - Belgium and Luxembourg have decided to abolish the double exchange rate which has been used for external payments by the Belgian-Luxembourg economic union for more than 45 years, it was announced here Friday.

The move would take effect immediately, Belgian Finance Minister Philippe Maystadt said.

Since 1944, when the Luxembourg franc was fixed at par with the Belgian franc, the currency has been subject to two exchange rates, one reserved for trade deals and the other for the financial market, involving cash for financial and speculative operations.

The Belgian National Bank intervenes only on the trade rate.

The system was designed to safeguard trade transactions from fluctuations due to speculation on the foreign exchange market.

Because of the double exchange rate system, Belgians wanting to buy or sell currency had to explain to the Belgian-Luxembourg foreign exchange office what they were changing currency for.

The monetary authorities here have been acknowledging for years that the double system no longer had any reason to exist.

In June 1988, the finance ministers of the two countries said it could be scrapped by July 1, 1990.

On Thursday, the difference between the two rates was negligible: the U.S. dollar stood at 35.59 BelgianLuxembourg francs at the trade rate and at 35.58 at the financial rate.

SEOUL (MARCH 2) - The South Korean government on Friday announced a series of measures to boost the sluggish stock market, boosting investor confidence and lifting share prices.

The market rose more than 2.5 percent Friday, with the barometer Composite Price Index rising 22 points to 884 amid heavy trading which saw 21 million shares change hands.

Last week, daily turnover averaged between five million and six million shares.

The new measures included setting up a fund for foreign investors, which dealers said was welcomed as a move to bring new money into a market which is still largely closed to foreigners.

The Finance Ministry said it would allow local investment companies to set up three "matching funds" for foreign investors to invest indirectly in the local market.

Each of the funds, expected to be launched later this month or early in April, would be initially capitalized at 100 million dollars, raised by selling beneficiary certificates in equal lots to domestic and foreign investors.

The creation of matching funds is also in line with a government plan to create more instruments for indirect investment for foreign investors ahead of the opening of the market to direct foreign investment in 1992.

The government will also allow securities firms to offer clients credits to buy their own shares, which had previously been prohibited for fear that the firms would manipulate the price of their own shares.

Shares of securities firms and other financial institutions have suffered most in the bearish market since April.

The measures also called for institutional investors to take over four billion dollars worth of stocks which trust funds had to buy under a government measure to boost the market in December.

Institutional investors would have to hold the stocks and would not be able to trade them until the market recovered, dealers said.

A fourth measure set up 31 additional investment funds in a bid to increase the role of institutional investors.

TOKYO (MARCH 2) - Foreign sales of Japanese shares reached 2.78 billion dollars in January, the biggest sell-off by foreign investors since the global stockmarket crash of 1987, the Finance Ministry said Friday.

The heavy sales coincided with a five per cent slump in Japanese share prices in January and followed net purchases of 6.96 billion dollars in December when prices soared to a series of all-time highs.

The figure is the highest since November 1987 when foreign sales of Japanese shares came to 7.12 billion dollars.

Foreign investors remained, however, net buyers of Japanese bonds during the month. Foreign purchases in the domestic market grew from 1.88 billion dollars in December to 2.92 billion dollars in January although purchases of Japanese bonds issued abroad fell from 7.27 billion dollars to 1.06 billion dollars.

Japanese purchases of foreign stocks meanwhile continued in January but fell from 2.95 billion dollars in December to 2.73 billion dollars. But purchases of foreign bonds by Japanese investors were meanwhile reversed.

Sales of foreign bonds issued abroad came to 1.08 billion dollars compared with purchases of 5.53 billion dollars in December. Sales of foreign bonds issued in Japan came to 245 million dollars, compared with purchases of 536 million dollars the previous month.

Overall movements in long-term capital swung from a surplus of 3.39 billion dollars in December to a deficit of 2.87 billion dollars in January comprising 4.09 billion dollars in inflows and 6.96 billion dollars in outflows.

Japanese direct investment abroad slowed from 5.37 billion dollars in December to 4.43 billion dollars in January while overseas lending declined from 3.62 billion dollars to 899 million dollars, the ministry said.

LONDON (MARCH 2) - Australian brewer Elders IXL has sold its 23.6 per cent stake in Scottish and Newcastle on the stock market, the chairman of the British company, Alick Rankin, said Friday.

The shares were sold at 290 pence, 20 pence below Thursday's closing price.

Scottish and Newcastle shares fell three pence to 307 Friday morning following news of the operation.

Mr. Rankin said he was glad Elders had sold, but "I think it is inexcusable that it has taken this time to place the stake."

He said he believed that Elders had lost 90 million pounds (150 million

dollars) on the sale against what they had paid for the shares.

Elders held a 9.65 percent stake in Scottish and Newcastle when it launched a 1.6 billion pound (2.6 billion dollars) hostile takeover bid in October 1988.

It had raised its stake to 23.6 percent in March last year when the monopolies and mergers commission blocked the takeover and recommended that Elders reduce its holding to less than 10 percent within a year.

Elders re-examined its entire European development strategy following its failure to acquire Scottish and decided to pull out of the British brewer altogether.

#90061d1940 03/02/1990 ~French/German News Agency

SINGAPORE (MARCH 2) - The Singapore government Friday announced a painless budget for 1990 with reduced income tax for individuals and companies.

In his Financial Year 1990 budget statement in parliament, Finance Minister Richard Hu said the republic's economy was sound and business prospects for the first six months of the year were good.

He said the government's revenue position had strengthened as the economy continued to expand in 1989.

He said total revenue for the last financial year was estimated at 15.3 billion dollars (7.6 billion U.S.), an increase of 12.4 percent over the 1988.

Mr. Hu said estimated revenue for 1990 was 15.6 billion dollars (6.6 billion U.S.) with a total expenditure of 14.1 billion dollars (7.6 billion U.S.), producing a surplus of 1.5 billion dollars (0.8 billion U.S.).

In the light of the good recent performance, Mr. Hu said the government was further reducing the corporate tax from 32 percent to 31 percent for this year. Last year the rate was reduced from 33 percent to 32 percent.

"This further reduction of the tax rate reaffirms government's objective in taxing productive sectors as lightly as possible, so long as economic conditions permit. This move ensures that our tax rates remain competitive worldwide," Mr. Hu said.

The widely anticipated additional taxes on liquor, cigarettes, petrol and vehicles road tax were not introduced.

LONDON (MARCH 2) - Britain's exchange reserves (currency, gold and special drawing rights), rose 114 million U.S. dollars in February, according to seasonally-adjusted figures announced Friday.

The increase followed an 80 million dollar rise in January and was in line with market expectations of a rise of between zero and 300 million dollars.

The figures for the past two months confirm that the Bank of England has not intervened significantly on the exchange markets, given the relative firmness of the pound.

Exchange reserves fell sharply in October, when they fell 2.89 billion dollars and in November (down 931 million dollars) due to intervention to prop up the pound following the October 26 resignation of chancellor of the exchequer Nigel Lawson.

#90061d2420 03/02/1990 ~French/German News Agency
LONDON, March 2 (AFP) - Workers at two British Aerospace plants voted Friday to return to work, ending an 18-week strike which also had major repercussions for aircraft makers in France, union sources said.

The 5,000 workers at the plants in Preston and Chester in England had agreed to a proposal to reduce their working week from 39 hours to 37 and would return to work on Monday, the sources said.

The Chester plant makes wings for the European consortium Airbus Industrie, and the strike has disrupted production and delivery of Airbus planes.

The French firm Aerospatiale which operates the main Airbus assembly plants in Toulouse, says the strike has cost the consortium at least 300 million dollars.

Aerospatiale wants BAe to make up some 40 per cent of the consortium's losses but BAe has so far refused to do so. A meeting of the Airbus Industrie supervisory board was taking place Friday in Toulouse to assess the impact of the strike.

Aircraft industry specialists said it would take several months to make up the production delays accumulated over the past four and a half months.

Meanwhile news that the BAe strike had ended sent BAe shares up four pence to 503 pence on the London Stock Exchange.

#90061d2730 03/02/1990 ~French/German News Agency

STAVANGER, Norway (MARCH 2) - State-owned Norwegian oil and gas company Statoil said Friday that its pre-tax profit doubled in 1989 to 8.2 billion kroner (1.26 million dollars).

Higher oil prices and increased production pushed operating revenues up 26 per cent to 59.6 billion kroner (9.2 billion dollars), compared to 47.3 billion in 1988.

Gross revenues, which include gasoline taxes charged to consumers, were 68.5 billion, up from 56.3 billion the year before.

Statoil will pay the state a dividend of 600 million kroner, the first such payment since 1986.

Cost reductions raised Statoil's net profits, after taxes and allocations,

to 5 billion kroner, a vast improvement over the meager 340 million of 1988,

when the company took a huge write-off on its oil refinery at Mongstad.

Statoil paid 2.9 billion in taxes to the Norwegian treasury last year, against 383 million in 1988.

Oil production increased by 16 per cent last year, and cost-cutting saved the company an estimated 1.1 billion kroner. Long term debt was reduced by

7.5 billion kroner.

Refining and retail were minus factors, mainly caused by the cost over-run at the Mongstad refinery, and a mild winter last year.

#90061d2950 03/02/1990 ~French/German News Agency

BANGKOK (MARCH 2) - Thai Prime Minister Chatichai Choonhavan has postponed a plan to privatise key state enterprises, government spokesman Suwit Yodmani said Friday.

The postponement followed protests by workers and a series of crises in the Chatichai government.

The privatisation plan, which has led to strikes by longshoremen fearful of losing their jobs, would be reviewed by a committee set up to coordinate with the workers.

The decision ended the threat of large-scale rallies by state enterprise workers and could affect investment projects being considered by the government, Mr. Suwit said.

He said the current problems were because workers and the general public did not understand that the government sought to develop state enterprises rather than get rid of them by making them private.

"It is a terminological (semantic) problem. The government has no plan to privatise the state enterprises," Mr. Suwit said.

He said the government would leave state firms as they were and allow private firms to become active in fields where the government does not have enough capital to invest.

The government would offer labor unions and state enterprise employees the opportunity to hold 51 percent of the shares in these companies, he added.

The labor campaign against the privatisation plan followed rallies by workers of the Port Authority of Thailand (PAT) to call for the scrapping of the government's plan to allow private firms to run Laem Chabang's deep-sea port some 80 kilometers (50 kilometers) east of here.

A four-day strike, which caused losses of up to two billion baht (80 million U.S. dollars), ended after the Chief of the Armed Forces Chawalit Yongchaiyuth, upon the request of the workers, mediated in the dispute.

Negotiations between PAT union leaders and government representatives are pending.

The unionists were angered Wednesday over the government's decision to replace the term "state enterprise privatisation" with "state enterprise development plan," saying that the government was playing with words.

#90061d3250 03/02/1990 ~French/German News Agency

LONDON (MARCH 2) - Worsening unrest in Ivory Coast, the world's largest cocoa producer, boosted cocoa and coffee prices in London Friday.

Cocoa for May delivery rose 25 pounds a ton over Thursday's close to 706, its highest level in almost four months, while coffee gained 28 pounds a ton to 678, its highest in three months.

Police used tear gas and water jets to break up unprecedented demonstrations by thousands of people in Abidjan Friday, as protesters called for the resignation of 84-year-old President Felix Houphouet-Boigny.

The protests came after the government said it planned wage cuts of 15 to 40 percent for 110,000 civil servants, and an increase from one to 11 percent in a national "solidarity" levy on private sector wages.

News of the unrest led to market fears that Ivory Coast exports of cocoa and coffee. Ivory Coast is one of the principal producers of robusta coffee.

If the troubles continued, prices would continue to firm, said William Plummer, an analyst with Prudential Bache.

Coffee and cocoa prices had been down to their lowest levels in 14 years in early February, in oversupplied markets, but they have shown a tendency to firm in recent weeks.

Cocoa has been supported by tightening of supply due to a slowdown in sales by producer countries coupled with good demand, while coffee has benefited from fears of a shortage of higher-quality arabicas following poor weather and crop disease in Latin American producing countries including Brazil and Mexico.

Both markets are without a support system after the International Cocoa Organisation (ICCO) stopped support buying in February 1988 and the

International Coffee Organisation (ICO) export quota system was suspended in July last year.

#90061d3700 03/02/1990 ~French/German News Agency

PARIS (MARCH 2) - French chemicals group Atochem and Montedison of Italy announced here Friday that they were to exchange some of their interests.

Ausimont NV, a subsidiary of Montedison, is to acquire a polymer plant at Thorofare in New Jersey currently owned by Atochem North America.

In return, Atochem will acquire Ausimont's organic peroxides activities in Spinetta in Italy.

The New Jersey plant formerly belonged to U.S. company Penwalt, bought by French group Elf Aquitaine last year. Atochem is part of the Elf group.

The U.S. authorities had given the green light for Elf's acquisition of Penwalt on condition that it sold the Thorofare plant.

The U.S. authorities will also have to rule on the new deal with Montedison.

BUDAPEST (MARCH 2) - Conservative communists planned a coup attempt against the new liberal-minded Hungarian leadership four or five months ago, Hungarian Prime Minister Miklos Nemeth said Friday.

Mr. Nemeth told parliament that the plotters belong to a regional party organization of the Hungarian communist party, the Hungarian Socialist Workers' Party which became the Hungarian Socialist Party on October 7.

The coup attempt was prepared in October or November, Mr. Nemeth said, but did not give further details.

The prime minister said that he had received death threats before the June 16 re-burial of Imre Nagy, Hungary's prime minister during the anti-Stalinist 1956 Hungarian uprising, who was rehabilitated last year.

He added that he received round-the-clock messages from an anonymous person on the telephone line reserved for the party apparatus and government members. The message said: "We shall kill you if you take part in the ceremony", he said.

Mr. Nemeth made the revelations during a parliamentary debate on clandestine eavesdropping.

Revelations two months ago that the secret services continued to monitor telephone conversations led to the resignation of Interior Minister Istvan Horvath and the restructuring of the secret services which was under discussion in parliament on Friday.

FUKUOKA (MARCH 2) KYODO - SAIBU GAS CO. ON FRIDAY ANNOUNCED THE DEVELOPMENT OF TECHNOLOGY THAT COULD SERVE TO DETER GLOBAL WARMING THROUGH LARGE-SCALE CULTIVATION OF HYDROGEN BACTERIA WHICH ABSORB CARBON DIOXIDE (CO_2) TO PRODUCE POLYHYDROXYBUTYRATE (PHB) AND PROTEIN.

PHB IS USABLE AS RAW MATERIAL FOR DEGRADABLE PLASTICS. OFFICIALS SAID A COMPANY RESEARCH TEAM HAS CONDUCTED EXPERIMENTS, USING A TWO-LITER CULTURE TANK. THEY SAID EXPERIMENTS HAD CONFIRMED THAT HYDROGEN BACTERIA INSIDE THE TANK HAVE TAKEN IN CO_2 DISSOLVED INTO CULTURE SOLUTION IN PRODUCING PHB AND PROTEIN.

THE OFFICIALS SAID THE NEW TECHNOLOGY COULD BE UTILIZED TO DETER THE RELEASE OF CO2 FROM PLANTS AND OTHER SOURCES INTO THE ATMOSPHERE.

THEY SAID HYDROGEN BACTERIA USE THE PHB PRODUCED AS THEIR ENERGY. THE OFFICIALS SAID PROSPECTS APPEAR TO BE BRIGHT FOR THE COMMERCIAL APPLICATION OF THE NEW TECHNOLOGY.

A PRESSURE CULTURE TANK WITH A 20-LITER CAPACITY WILL SOON BE BUILT FOR LARGER-SCALE EXPERIMENTS, THEY SAID.

A PILOT PLANT, FITTED WITH A 1-CUBIC METER CAPACITY CULTURE TANK, WILL BE BUILT BY 1994 FOR COMMERCIALIZATION OF THE NEW TECHNOLOGY, THE OFFICIALS SAID.

AUBURN, NY (MARCH 2) PR NEWSWIRE - The transition of Cayuga Savings Bank (NASDAQ: IROQ) to holding company status has been completed as of March 1, 1990, the bank announced today.

Previously, the bank's common stock traded on the NASDAQ National Market System under the CAYB. The common stock of the new holding company, Iroquois Bancorp, Inc., identified by the symbol IROQ, has now been substituted for the bank's common stock.

Robert J. Steigerwald, president and CEO of Iroquois, the parent holding company, as well as president and CEO of Cayuga Savings Bank, stated, "All existing Cayuga stock certificates now automatically represent Iroqouis Bancorp, Inc. In the interest of economy, we elected not to exchange certificates held by our existing shareholders. However, certificates issued in the future will of course carry our new Iroquois logo."

Cayuga Savings Bank is the sole subsidiary of the new holding company and has previously announced that Homestead Savings, F.A. of Utica, N.Y., has signed a letter of intent to join Iroquois in the near future.

SHELBYVILLE, TN (MARCH 2) PR NEWSWIRE - Alcan Recycling, a division of Alcan Aluminum Corporation (NYSE: AL) of Cleveland, Ohio, announced today that it has acquired the assets of Summit Alloys.

A purchase price was not revealed.

"We are extremely pleased to be re-entering the secondary aluminum smelter business in the United States," said Edward A. Pchola, vice president, Alcan Recycling. "The aluminum recycling facility in Shelbyville helps to broaden Alcan's recycling activities, providing us with direct involvement in two new important segments, die-casting and automotive casting businesses in the United States."

As a part of the acquisition, Alcan Recycling plans to make improvements to the facility over the next three to four months. Some of the planned renovations include modifications to the melting furnaces to improve their efficiency, and the installation of additional equipment. Also, external improvements to the site and building are planned.

"We are pleased to be acquiring this new facility. We would like to thank Shelbyville's city government, the Chamber of Commerce, the Industrial Development Corporation and specifically Mayor Henry Feldhaus and Chamber Executive Director Robert Green for their cooperation and guidance," Pchola said.

The former Summit Alloy facility was closed in September 1989. At that time approximately 60 workers were employed there.

"We understand that the community may not be familiar with Alcan Recycling at this time, but when our renovations are complete, we look forward to introducing Alcan to this very friendly community," Pchola concluded.

The Shelbyville, Tenn. location will recycle a wide variety of aluminum recovered from the waste stream, melting it down into secondary alloys, which are generally used in casting of automotive parts and other die-casting applications.

Alcan Recycling is a division of Alcan Aluminum Corporation, the U.S. subsidiary of Alcan Aluminum Limited, the world's largest producer of primary aluminum.

In the United States, Alcan Recycling operates two other recycling facilities, located in Greensboro, Ga. and Berea, Ky. These two facilites are dedicated to recycling aluminum beverage cans.

#90061p0018 03/02/1990 ~PR Newswire

BOSTON (MARCH 2) PR NEWSWIRE - Caere Corp. will introduce on Monday a page recognition system that dramatically changes the way people can scan

text and graphic information in desktop and networked environments. Announced here at the Seybold Conference, Caere's new Parallel Reader provides much greater performance than currently available high-volume optical character recognition systems, at a price point affordable to many computer users. It lets users optimize the effectiveness of Caere's OmniPage(TM) page recognition technology on a stable, standard hardware platform - a customized 386SX-based box - that is compatible with most local area networks. And unlike its more expensive competitors, the Parallel Reader is available directly from computer dealers and is easily installed by the user.

Caere's Parallel Reader offers 2,500-word-per-minute throughput and a character recognition speed of 220 to 700 characters per second that lets it keep pace with today's desktop scanners. This fast performance makes the Parallel Reader ideal for the high-volume optical character recognition applications undertaken by large organizations such as insurance, manufacturing, banking and publishing companies and government agencies.

Making the new reader's performance possible is a parallel processing architecture that scans and recognizes four pages simultaneously. In contrast, current high-end readers scan the page first, then perform the recognition. Caere's Parallel Reader provides up to 12 MIPS of processing power using four coprocessor interface boards, each of which performs the complete recognition function. Each interface board contains a 16-megahertz 68020 central processor and 2 megabytes of memory. The coprocessor interface boards are controlled by a 386SX-based host system running at 16 megahertz. Low Cost

In addition to high performance, the Parallel Reader's parallel structure keeps the cost of the unit low: $10,995. This low price makes the device attractive for environments with extremely high-volume needs where more than one scanner is in operation and the use of dedicated character recognition servers increases throughput. "We expect this new price point for high-volume OCR to help open new markets for which previous solutions were not cost-effective," said Caere's Miller. Standard Hardware Platform

Caere's Parallel Reader is designed for fast input of large volumes of text-intensive documents. Such documents are used frequently in insurance companies, publishing houses, banks, law firms, etc.

DOWNERS GROVE, IL (MARCH 2) PR NEWSWIRE - James C. Smith, president and chief executive officer of HealthCare COMPARE Corp., (NASDAQ: HCCC) announced today that he has been informed by Wisconsin Physician Service (WPS) that its recently awarded contract to provide managed care services to the Department of Defense has been reinstated as a result of the protest being withdrawn by the unsuccessful bidder in the procurement. Smith noted he was very pleased with this development and that the company has resumed work on the project under a contract with WPS pursuant to which COMPARE will provide managed care services to the Department of Defense in a 5-state region.

Additionally, Smith stated that in spite of the delay in the awarding of

this procurement he was very optimistic regarding the company's prospects for 1990.

HealthCare COMPARE Corp. is one of the nation's leading independent managed care/cost management companies. The company provides data analysis, extensive utilization management and provider negotiation services (PPO development and management). Its services are provided to indemnity health care payers as well as alternative delivery systems. The company manages costs and utilization without compromising the quality of care available to health care plan participants.

PHILADELPHIA (MARCH 2) PR NEWSWIRE - Ausimont NV, a subsidiary of Montedison (gruppo Ferruzzi) and Atochem North America (Elf Aquitaine Group) have reached an agreement that will be submitted for approval to the relevant administrative authorities including the U.S. Federal Trade Commission.

This agreement provides for the following:

- Ausimont will acquire the Thorofare, N.J., fluorochemical operation of Atochem North America. The Thorofare plant produces primarily PVDF fluoropolymers used for architectural coating purposes as well as in the electronics and chemical process industries.

- Atochem North America will acquire the organic peroxide business of Ausimont. Organic peroxides are produced in Spinetta (Italy) and are used for polymerizing high polymers, unsaturated polyesters and elastomers.

Atochem North America, a $1.5 billion dollar diversified chemicals manufacturer headquartered in Philadelphia was formed Jan. 1, 1990, as the result of the merger of ATOCHEM Inc., M&T Chemicals Inc., and Pennwalt Corp. Atochem North America is a wholly owned subsidiary of Atochem S.A., a $6.5 billion dollar chemicals manufacturer headquartered in Paris, France.

LA JOLLA, CA (MARCH 2) PR NEWSWIRE - Intermark Inc. (AMEX: IMI) and its 51.6 percent owned affiliate, Triton Group Ltd. (NYSE: TGL) today

announced that they have executed an agreement calling for the combination of the two companies. The transaction, which has been approved by the boards of directors of both companies, is structured as a tax-free reorganization in which Intermark would be the surviving entity and Triton would be a wholly owned, private subsidiary. The merger is subject to the approval of the holders of a majority of outstanding shares of Intermark, and holders of a majority of Triton Common Stock other than Intermark. Stockholders of Triton would receive 1.4 shares of Intermark Common Stock for each share held of Triton Common Stock, increasing Intermark's outstanding Common Stock to approximately 14.9 million shares, from the 6.4 million shares presently outstanding.

The agreement is the result of extensive negotiations between management of Intermark and a Special Committee of the Board of Directors of Triton composed of Frederick B. Chaney and Paul N. Schwartz, non- Intermark affiliates. The Special Committee was assisted in the negotiations by Kidder, Peabody Co., Incorporated, which is acting as the Special Committee's financial advisor. Consummation of the transaction is contingent upon delivery of fairness opinions to Triton by Kidder, Peabody and to Intermark by Chemical Bank Investment Banking, a unit of Chemical Bank, and other customary approvals and conditions.

Intermark expects to account for the combination with Triton Group as a "purchase." For the nine months ended Dec. 31, 1989, on a pro forma basis giving effect to the merger, Intermark and Triton had consolidated revenues of $698 million and sustained a net loss of $17 million, or $.95 per share.

The companies stated that a registration statement and preliminary joint proxy materials associated with the merger would be filed with the Securities and Exchange Commission as promptly as possible, and that respective special shareholder meetings would be held as soon as applicable regulatory requirements are met. The shares of Intermark Common Stock to be issued in the merger will be offered only pursuant to a definitive Joint Proxy Statement/Prospectus.

Intermark acquired its initial 18 percent ownership position in Triton in March, 1986. In September, 1986, Triton consolidated its corporate operations with those of Intermark in La Jolla, Calif. In November, 1986,

Intermark sold its group of printing companies to Triton in exchange for stock of Triton which increased its position to 39 percent. In February, 1990, Intermark exercised an option, originally obtained in the 1986 transaction, to acquire an additional interest in Triton.

Intermark and Triton are operating/holding companies whose business is to control and add value to well-established mid-sized American growth companies operating in broadly diverse industries. Combined, the

companies hold interests in 12 Partner Companies with total revenues of $2 billion and $1.5 billion in assets which employ 23,000 people.

NEW YORK (MARCH 2) PR NEWSWIRE - Forest Laboratories, Inc. (AMEX: FRX), today issued the following:

"There was an unusual amount of trading in Forest stock yesterday, perhaps based on some confusion regarding its Inwood Laboratories subsidiary's generic products. We have decided therefore to provide the following clarification.

"1. Wyeth-Ayerst has filed a petition with the FDA requesting that the approval of Inwood's generic version of Wyeth's Inderal LA brand of long acting propranolol be withdrawn. The petition is based on Wyeth's re-analysis of data previously submitted to the FDA by Inwood. It also claims that marketed batches of Inwood's product do not meet Inwood's specifications. We believe the petition is without merit. We believe the data analyses included in our ANDA are in conformity with prevailing and FDA standards. In addition, Inwood's assays confirm that the products sold by Inwood meet all specification requirements.

"2. In light of the pervasive industry review of generic products by the FDA, we have been asked about FDA inspections of Inwood's generic products. The FDA has in recent months conducted exhaustive inspections of two of Inwood's generic products -- theophylline and propranolol. The theophylline inspection and review have been completed and we have been advised that Inwood's responses to the FDA's observations have been accepted by the FDA.

"The propranolol inspection has been completed and is currently under review at the FDA. Questions concerning record keeping were raised which in our view, we have adequately addressed. We do not know when the FDA's review will be completed.

"Theophylline sales accounted for 15 percent of Forest sales in the current fiscal year. Propranolol sales, net of the royalty to PruBache, are currently running at the rate of 5.5 percent of Forest's total sales. Although we do not expect any unfavorable regulatory action with regard to propranolol, we believe that our overall corporate earnings growth would not be significantly affected by an unfavorable outcome of either of the above described matters.

"So far as we are aware, there are no other significant regulatory matters outstanding regarding Inwood's generic products. Theophylline sales continue to increase. Forest's promoted products continue to perform extremely well with peak prescriptions and sales, and Micturin and Cogmine continue to progress as we have previously reported."

TUSTIN, CA (MARCH 2) PR NEWSWIRE - Luther Medical Products Inc. (NASDAQ: LUTH) announced today that James R. Yarter has joined Luther's board of directors.

Yarter is responsible for the turnaround of Pancretec Inc., which was a small publicly held company in 1986 when Yarter assumed the position of president and chief executive officer. Within three years Yarter boosted earnings and successfully negotiated the sale of the company to Abbott Laboratories for $54 million.

"The situation at Luther medical is very reminiscent of Pancretec in 1986 " said Yarter. "Luther has a tremendous wealth of innovative products and a dynamic braintrust of professionals dedicated to growth and profitability."

Prior to his involvement with Pancretec, Yarter spent 17 years in various executive positions with C.R. Bard Inc., a leader is the catheter industry. Upon leaving Bard in 1982, Yarter embarked on an entrepreneurial venture, providing management consulting to companies ranging in size from $2 million to $1.3 billion.

Yarter received his bachelor of science degree from Castleton College in Castleton, Vt., and played professional baseball with the Pittsburgh Pirates from 1957 to 1961. Residing in San Diego, Calif., since 1986, Yarter is married and has three children.

Luther Medical Products Inc. designs and manufactures unique catheters (its president holds more current patents involving catheter technology than any other individual in the world) including the Stickless Catheter

marketed by Critikon Inc., a Johnson & Johnson company under the trade name PROTECTIV (tm). The PROTECTIV was created to minimize the risks of transmittable disease such as AIDS and hepatitis to health caregivers.

WEST PALM BEACH, FL (MARCH 2) PR NEWSWIRE - Pratt & Whitney has shipped two thrust vectoring/thrust reversing nozzles to Edwards Air Force Base, Calif., where they are being readied to resume flight testing on the F100-PW-220 powered McDonnell Douglas F-15 short takeoff and landing maneuverability technology demonstrator (S/MTD) aircraft.

The S/MTD aircraft successfully flew with the nozzles in the vectoring mode during 1989. Following that first series of test, the nozzles were returned to Pratt & Whitney's Government Engine Business near West Palm Beach where they were fitted with mechanisms that add the capability for full thrust reversing.

McDonnell Douglas is now conducting S/MTD ground testing and taxi runs with the reversers. Initial tests have demonstrated impressive deceleration rates without using the aircraft's brakes. The aircraft is next scheduled to resume flight testing with maneuvers that include inflight reversing and short-field landings.

In tests to date, Air Force and McDonnell Douglas pilots have expressed extreme satisfaction with the improved maneuverability and control they have with the vectoring nozzles. The addition of thrust reversing is expected to further improve the inflight maneuverabiity and landing capabilities of the S/MTD aircraft.

The F-15 S/MTD program is managed by the Air Force Flight Dynamics Laboratory of Wright Research and Development Center at Wright Patterson AFB, Ohio.

Pratt & Whitney's Government Engine Business, designs, develops and supports military jet fighter and airlift engines. Pratt & Whitney is a unit of United Technologies Corporation (NYSE: UTX) of Hartford, Conn.

HAIFA, ISRAEL (MARCH 2) PR NEWSWIRE - Elbit Computers Ltd. (NASDAQ: ELBTF), an Israel-based manufacturer of computer-based systems and products for military and commercial applications and a subsidiary of Elron Electronic Industries Ltd. (NASDAQ: ELRNF), today announced that the transactions to acquire a controlling interest in Elscint Ltd. (NYSE: ELT) as previously disclosed, have been completed.

As of today Elbit owns approximately 69 percent of Elscint's outstanding share capital and voting rights.

As previously announced, half of the payment to Elron, representing some $4.8 million, will be in the form of Elbit Ordinary Shares. These shares will be issued to Elron following receipt of approval of the Tel Aviv Stock Exchange.

The company's holdings in Elscint may be reduced to approximately 63 percent, should an offering of Ordinary Shares of Elscint to key employees of Elscint be completed as currently under consideration by the Elscint board of directors.

Elbit has also acquired from Elron 96,815 Elscint R&D debenture units at a price of $25 per unit.

Elbit Computers Ltd. designs, develops, manufactures, markets and services

a wide range of advanced, often combat-proven electronic products and systems for airborne, shipboard and ground military applications. Through subsidiaries, Elbit provides a variety of commercial computer products and services, and specialized infrared imaging equipment, including radiometers.

TROY, MI (MARCH 2) PR NEWSWIRE - K mart Corporation (NYSE: KM) and The Sports Authority Inc. today jointly announced that K mart Corporation has acquired The Sports Authority for an undisclosed amount of cash.

The Sports Authority, headquartered in Fort Lauderdale, Fla., will operate as a separate subsidiary of K mart. The Sports Authority currently operates a chain of eight 40,000- to 50,000-square-foot megastores featuring brand name apparel and sporting goods which are sold at everyday low prices. The stores emphasize all major sporting goods categories, including athletic and sport apparel and footwear; exercise equipment; bicycles; team sports equipment; golf and tennis equipment; snow ski apparel and equipment; water sports equipment; and hunting, fishing and camping gear.

K mart Corporation in 1989 opened two Sports Giant sporting goods super stores in the Detroit metropolitan area. These two stores will be converted into Sports Authority stores in 1990. In addition, The Sports Authority plans to open at least 10 additional stores in 1990.

K mart Chairman of the Board and Chief Executive Officer Joseph E. Antonini said, "The combination of K mart and The Sports Authority represents a partnership of two fine organizations. Large-size sporting goods stores represent an exciting growth opportunity for K mart, as these megastores are expected to capture an increasing share of a growing sports apparel and equipment market in the years ahead. K mart is proud to be working with The Sports Authority's existing management team to become the leader in this industry."

Jack Smith, president and chief executive officer of The Sports Authority, added, "The long-term prospects for The Sports Authority and its employees will be enhanced by the affiliation with K mart. The financial resources of K mart will support an aggressive expansion program for The Sports Authority."

K mart Corporation serves America with over 4,000 retail outlets in all 50 states in the United States and in Puerto Rico and Canada. K mart, currently operating 2,315 K mart stores, is also the parent company for

Pay Less Drug Stores, Builders Square, Waldenbooks and PACE Membership Warehouse Clubs.

K mart Corporation stock is listed on the New York, Pacific, Midwest and Tokyo stock exchanges. Its trading symbol is KM.

MINNEAPOLIS (MARCH 2) PR NEWSWIRE - Two Minneapolis-based companies, Northgate Computer Systems, Inc., and Tricord Systems, Inc., today signed an agreement by which Northgate will utilize Tricord technology to enter the multiprocessor server and workstation markets.

Northgate is a fast growing, three-year-old PC design and direct marketing company. Tricord is a recently established technology development company staffed by former IBM and Control Data engineers and systems developers.

Under terms of the agreement, Tricord will provide Northgate with the technology to build computers competitive with Compaq's Systempro and minicomputer systems such as the IBM AS/400 and DEC VAX 6000 series.

The first Northgate systems utilizing the Intel 80486-based processor and proprietary high-speed I/O are due for delivery in May.

The full-fledged multiprocessor models, including an i860 RISC co-processor and related high speed, high capacity components will be delivered in July.

To market these systems, Northgate will put into place direct sales staffs in 14 prime markets. Three markets have already been established - Minneapolis, Chicago/Milwaukee, and San Francisco.

Northgate has appointed James Wells as vice president of National Sales to head up the expanded marketing effort.

Northgate is privately held and does not disclose financials.

RIDGEFIELD, NJ (MARCH 2) PR NEWSWIRE - Sentex Sensing Technology, Inc (NASDAQ: SENS) announced the audited results of operation for the fiscal year ended Nov. 30, 1989.

Net income remained relatively stable at $178,153 for the 1989 fiscal year as compared to $211,682 for the prior fiscal year. Due to the timing of purchase orders received but not delivered at fiscal year end, total revenue declined to $1,589,878 as compared to $1,759,217 for the prior fiscal year. with approximately 74,000,000 shares outstanding, per share income is insignificant.

Dr. Linenberg, president of Sentex, confirmed that management- instituted cost cutting has been effective in maintaining net income despite sluggish sales. He noted, however, that the company has a backlog, at year end, of approximately $700,000, the highest in its ten year history.

Sentex Sensing Technology, Inc. develops, manufactures, and markets a line of vapor detection instrumentation used in the security, industrial hygiene, and safety area. Total company assets stand at $2,918,958 with approximately $2,500,000 in cash and short-term investments. Total current liabilities, as of Nov. 30, 1989, are $159,306 with no long term debt.

#90061p0061 03/02/1990 ~PR Newswire

DALLAS (MARCH 2) PR NEWSWIRE - National Gypsum Company today announced financial results for the three and 12 months ending Dec. 31, 1989.

Fourth quarter revenues from continuing operations were $347.1 million, compared with $343.8 million for the same period in 1988. Net cash used by continuing operations was $14.0 million, compared with net cash provided of $29.3 million in the fourth quarter of last year. The company incurred a loss from continuing operations, before extraordinary items, of $19.5 million, compared with a $7.3 million loss during the same period in 1988.

For the 12 months, revenues from continuing operations were $1.4 billion, compared with $1.2 billion for 1988. Net cash provided by continuing operations was $39.5 million, compared with $47.9 million in 1988. The company recorded a loss from continuing operations, before extraordinary items, of $58.4 million in 1989, compared with a loss of $55.8 million in 1988.

For the 1989 12 months, National Gypsum recorded a net loss of $40.7 million, including extraordinary gains totaling $17.7 million, compared with a net loss of $79.6 million in 1988, which included $39.2 million in extraordinary gains and a $62.9 million loss from discontinued operations. Also during the 1989 12 months, interest expense was approximately $22.7 million less than during 1988.

"The increases in net revenues for the fourth quarter and the year were due to record billings at The Austin Company," said John P. Hayes, chairman and chief executive officer. "The strong sales effort by Austin more than offset the declines in revenues due to lower wallboard sales volume and prices," Hayes added. He also said that the increased loss from continuing operations, before extraordinary items, during the fourth quarter and for the year was due primarily to the decline in wallboard sales realization. Hayes stated that the fourth quarter decrease in cash provided by continuing operations occurred because of a timing difference that resulted from a September 30 interest payment date falling on a weekend, which delayed the actual cash disbursement of $16.6 million to October 2, and the decline in wallboard sales realization. Regarding the decrease in net cash provided by continuing operations for the 12 months, Hayes said this resulted principally from the decline in wallboard volume and prices, which was offset partially by declines in interest paid. He also said that the reduction in net loss for 1989, compared with 1988, was due to decreased interest expense during 1989 and because of the large loss from discontinued operations in 1988. Hayes noted that despite lower wallboard volume and prices, the company reduced the face value of its outstanding debt by over $100 million during 1989.

HOLYOKE, MA (MARCH 2) PR NEWSWIRE - Richard B. Covell, chairman and chief executive officer of Heritage Bancorp, Inc. (NASDAQ: HNIS) today announced that the company and its subsidiary, Heritage Bank for Savings, will

embark upon a major effort to restructure and redirect operations.

In connection with the restructuring, the company announced today the resignation of Roy A. Scott as president, chief operating officer and director, as well as Robert C. Peck as senior executive vice president of the company and the bank. In addition, it is expected that 15 other employees, including seven officers, will leave their positions.

As a result of these changes, the company will reorganize into five divisions reporting directly to Covell. The commercial lending division will be headed by John W. Fridlington, executive vice president. As part of that division, John J. Patterson will direct the credit administration function and focus principally on the bank's non- performing commercial real estate loans. The finance and planning division will be headed by Fredric E. Schluter, III, as executive vice president and chief financial officer. The residential loan division will be headed by William T. Stapleton, senior vice president, the retail division will be headed by Lawrence D. Beane, senior vice president, and the administrative division will be headed by Gloria S. Hayes, senior vice president.

Covell explained: "These were hard decisions, but the changes represent a major effort on the part of Heritage to restructure management with emphasis on resolving asset quality issues and achieving cost containment objectives by cutting overhead, while repositioning the organization to improve financial performance in the future." Covell emphasized:

"Our restructuring is expected to enhance our ability to meet the needs of our customers, and services will not be adversely impacted in any way." Covell noted that preliminary indications during the first quarter of 1990 are that the company's financial performance will continue to be affected by the protracted deterioration in market conditions and resulting increases in delinquent and non-performing loans. However, Covell indicated that steps already taken and those announced today are expected to improve the organization's ability to respond to these circumstances.

Heritage Bancorp, Inc. is the holding company of Heritage Bank for Savings. The bank operates 29 offices in western and central Massachusetts. At year end 1989, the company had assets of $1.7 billion with deposits of $1.2 billion and its capital ratios were in compliance with all applicable regulatory requirements.

EAST HARTFORD, CT (MARCH 2) PR NEWSWIRE - Pratt & Whitney today announced

an executive promotion at the Group level.

Dorothy P. Dumczius was named vice president - Group human resources.

Dumczius replaces Leonard Black, who has been appointed corporate director - human resources development for United Technologies (NYSE: UTX), P&W's parent corporation. She reports to James O'Connor, executive vice president.

Dumczius, formerly vice president - human resources for the company's Government Engine Business (GEB), will be responsible for providing direction to the development, introduction and administration of personnel policies within Pratt & Whitney. Since joining the company in 1972, she has held increasingly important management roles in the areas of employee relations, EEO programs administration, compensation and labor relations.

In addition to her new responsibilities, she will continue in her capacity with the Florida-based GEB unit until that position is filled.

Pratt & Whitney's Group headquarters are located in East Hartford, Conn.

ROGERS, AR (MARCH 2) PR NEWSWIRE - Hudson Foods, Inc. (NYSE: HFI) announced today that it has completed its acquisition of Pierre Frozen Foods, Inc., of Cincinnati. In January, Hudson announced that it had reached an agreement in principle for the acquisition. Pierre is a frozen food processor and distributor, specializing in portion control beef, pork and poultry products.

Pierre sells primarily to institutional customers, including school and university cafeteria programs, sandwich assemblers for convenience stores

and vending outlets, in-plant employee feeders and national fast food chains. Sales to school and university programs, including the San Francisco, New York and Chicago school systems, account for approximately 58 percent of Pierre's revenues. Pierre reported sales of $35.2 million in 1989.

"We believe that the acquisition of Pierre is another important step in our process of diversifying products and markets," said James T. Hudson, founder and chairman of Hudson Foods. "It gives us a strong foothold in the growing institutional food markets. Pierre's record of growth is enviable and we intend to retain the current management team to continue to operate it as a wholly owned, but independent subsidiary."

"Pierre will continue to build its business by dedication to quality products and services," said Ira Dinerman, executive vice president of Pierre. "Hudson Foods will provide the additional resources needed to fuel Pierre's growth, and provide greater opportunities for all Pierre employees and its broker network."

Hudson Foods, Inc., issued 923,000 shares of Hudson's class A common stock plus approximately $500,000 for the outstanding stock of Pierre and the land occupied by the company. The agreement provides for a cash settlement on March 1, 1991, and the possible issuance of additional shares on Dec. 31, 1992, both based upon the performance of Hudson's class A common stock.

Hudson Foods, Inc., one of the nation's largest poultry producers, sells a variety of chicken and turkey products under the "Hudson" and "Flavor Fresh" brand names as well as poultry, beef and pork products under the "Ohse" and "Schweigert" brand names.

HOUSTON (MARCH 2) PR NEWSWIRE - Seagull Energy Corporation (NYSE: SGO) today promoted John N. Goodpasture to be president of its Seagull Pipeline Company division. At the parent corporation level, Goodpasture was named to the new position of vice president, pipelines.

In his new role, Goodpasture will directly supervise all Seagull entities involved in natural gas gathering, marketing and processing, and pipeline transportation of hydrocarbon products and petrochemicals. He succeeds James V. Walzel, who has resigned to pursue other business interests. Walzel also resigned as a Seagull director and as an executive vice president of the parent corporation.

In announcing these developments, Chairman Barry J. Galt said Walzel will continue to serve Seagull as a consultant. In addition, the company has purchased 100,000 shares of Seagull common stock from Walzel at a price of $19.00 per share, the closing price of the stock on the New York Stock Exchange on February 28, 1990.

Under the same terms, Seagull also repurchased 155,000 common shares from two other individuals who, like Walzel, were formerly shareholders of Liberty Natural Gas Company, which Seagull acquired in 1987. Galt explained that Seagull repurchased the shares consistent with the company's previously demonstrated willingness to reacquire attractively priced large blocks of stock in special circumstances.

"Jim has made many valuable contributions to Seagull and we will miss his daily involvement in the company's affairs," Galt said. "But we are very fortunate that John is ready and able to step into his shoes and pleased that Jim's experience and wise counsel will remain available to us on a consulting basis."

Goodpasture joined Seagull in 1980 as general manager of products and petrochemicals. He was named vice president of products and petrochemicals in 1981 and vice president and general manager of liquids operations in 1985, prior to assuming his most recent position, vice president, marketing and supply, in 1987. He holds a BS degree in mechanical engineering from Texas Tech University.

In addition to its pipeline operations, Houston-based Seagull is engaged in gas and oil exploration and production and gas distribution.

LAWRENCEVILLE, NJ (MARCH 2) PR NEWSWIRE - The directors of both American Reliance Group Inc. (NASDAQ: ARIG) and its parent, American Reliance Insurance Company, have voted to table for up to six months further consideration of a joint plan to restructure their insurance business.

Bruce Herrick, chairman and CEO of American Reliance Group, said the directors' decision primarily reflected uncertainty concerning possible adverse effects upon the plan as a result of pending automobile insurance legislation in New Jersey.

"The directors feel it is too early in the legislative process to evaluate the full impact that such legislation might have upon the restructuring plan," Herrick said.

The proposed New Jersey legislation seeks to reduce personal automobile insurance costs by 20 percent and eliminate the state's Joint Underwriting Association and its estimated $3 billion deficit. The legislation, which is vigorously opposed by the state's insurance industry, would fund half the JUA deficit by taxes and assessments on insurers.

The restructuring proposal is jointly sponsored by the boards of both American Reliance Group, a holding company, and American Reliance Insurance Company, a mutual company that owns 65.9 percent of the holding company. Under the plan, the insurance business of American Reliance Insurance Company would be transferred to a wholly owned subsidiary of American Reliance Group. American Reliance Insurance Company would then liquidate and its eligible policyholders would exchange their ownership interest in the mutual company for securities of American Reliance Group.

American Reliance Group is a regional property and casualty insurance holding company which specializes in providing coverage for small to medium-size businesses and individuals in rural and suburban locations.

DETROIT (MARCH 2) PR NEWSWIRE - Ford Motor Company (NYSE: F) audio systems engineers have developed methods to reduce variability in vehicle sound systems.

In a paper presented at the 1990 Society of Automotive Engineers

International Congress, the Ford engineers reported on a joint research study with Eastern Michigan University.

The researchers concluded that vehicle-to-vehicle consistency in the quality of audio systems is affected by several factors, including the variability in the actual speakers, variability in assembly-related areas and in the option content of the vehicle.

"We are using the latest measurement technology to isolate and reduce variability in sources too difficult to study in the past," said Gregory Wyeneth, Ford audio systems product design engineer. "For example, we discovered that options such as a plush interior or a moon roof can affect the sound system performance in that vehicle."

Ford audio systems are now being designed to allow for these variabilities and offer consumers even higher quality factory sound systems.

The ongoing Ford study is part of the company's commitment to continually improve the quality and cost efficiency of Ford audio systems.

Other OEM sound system manufacturers were encouraged to join Ford in their efforts to identify and reduce sources of variability.

NEW YORK (MARCH 1) PR NEWSWIRE) - Oak Hill Sportswear Corporation (NASDAQ: OHSC) announced today that it incurred a net loss of $1,669,000 or 81 cents per share in the fourth quarter ended Dec. 31, 1989 on sales of $25,675,000. These results compare to net income of $687,000 or 26 cents per share in the fourth quarter last year on sales of $31,117,000.

Net income for the full year ended Dec. 31, 1989 was $129,000 or 6 cents per share on sales of $117,808,000. In 1988, the company earned $2,654,000 or 86 cents per share on sales of $115,820,000.

Arthur L. Asch, chairman of the board of Oak Hill Sportswear Corporation, stated that "the fourth quarter loss was primarily attributable to the highly promotional retail environment. Our company sold a substantial amount of merchandise, especially imported sweaters, at discounted pries in a weak retail market that was further hindered by unseasonably warm weather. Bankruptcy filings by several of our customers, lower than anticipated inventory valuations and higher than expected returns and allowances all caused earnings to compare unfavorably to the preliminary estimates reported in early January.

"The financial condition of Oak Hill Sportswear Corporation continues to be strong. At Dec. 31, 1989 shareholders' equity was $16,956,000 and working capital was $13,157,000. At that date, long- term debt was $2,438,000 and short-term bank borrowing was $9,400,000."

Oak Hill Sportswear Corporation is a manufacturer of women's apparel.

#90061p0091 03/02/1990 ~PR Newswire

LAPEER, MI (MARCH 2) PR NEWSWIRE - As previously announced, Durakon Industries, Inc. (NASDAQ-NMS: DRKN) released today that it had made certain non-operating adjustments in the fourth quarter as a component of its corporate restructuring plan. These unusual and non- recurring charges primarily consist of the write-off of goodwill associated with the purchase of DFM Corporation in 1987 of $14,963,000 and of a patent held by Jerr-Dan Corporation, a wholly owned subsidiary, of $3,788,000.

"The write-offs were taken at this time to clean up our balance sheet as we continue our restructuring which has been ongoing through the year," Durakon President and Chief Executive Officer David Laro said.

Laro said as a result of these unusual and non-recurring charges coupled with profitable ongoing operations, the company incurred a net loss for the year ended Dec. 31, 1989, of $17,116,000 ($2.78 per share) compared to net income of $1,246,000 ($.20 per share) for 1988. These unusual

charges, net of taxes, amounted to $19,285,000 ($3.13 per share) during 1989.

Net sales for the year ended Dec. 31, 1989, were $136,135,000 compared to $138,913,000 for 1988. This decline in sales is attributed to a 13-percent reduction in volume within the vehicle transportation and towing segment.

Now completing his first year as president and CEO, Laro has made a number of dramatic changes in Durakon's operations. "The recent goodwill and patent write-off is just one of several clean-up and restructuring measures that are necessary to strengthen the company," Laro said. "Other necessary changes included appointing a new management team, streamlining operations, instituting cost cutting, eliminating unnecessary layers of management, installing a state-of-the- art computer assisted information system, and improving responsiveness to its customers and employees."

Durakon's net sales for the three-month period ended Dec. 31, 1989, were $30,379,000 compared to $35,617,000 for the same period in 1988. With the write-offs of intangibles, Durakon posted a fourth-quarter net loss of $19,275,000 ($3.18 per share) compared to a 1988 fourth-quarter loss of $614,000 ($.10 per share).

"The fourth-quarter operating results are encouraging even though the company experienced reduced sales volume. The bottom line operating performance, exclusive of write-offs, was improved over the same period in 1988," Laro said.

The company's operating results for the nine-month period ended Sept. 30, 1989, and the year ended Dec. 31, 1988, have been restated to reflect Jerr-Dan Corporation as a continuing operation. As announced in February Durakon plans on retaining Jerr-Dan, which comprises the company's vehicle transportation and towing business segment.

In the second and third quarters of 1989, Durakon posted increased earnings of $1,707,000 ($.28 per share) and $1,768,000 ($.29 per share), respectively, compared to $853,000 ($.14 per share) and $273,000 ($.04 per share) in the previous year.

"We are very optimistic about the 1990s and feel we are well positioned to move aggressively to take advantage of the growth potential in our product markets," Laro said.

Durakon is the nation's leading producer and distributor of pickup truckbed liners, bug and gravel deflector shields and rollback car carriers. In addition to its headquarters plant in Lapeer, it has manufacturing facilities in Clare, Mich.; Brentwood, Tenn.; Greencastle,

Penn.; Corydon, Iowa; and Longmont, Colo.

#90061p0092 03/02/1990 ~PR Newswire

PHILADELPHIA (MARCH 2) PR NEWSWIRE - Philadelphia Electric Company (NYSE: PE) (PE) has begun phase two of its water diversion from the Bradshaw Reservoir through the east branch of the Perkiomen Creek to the Limerick Generating Station.

After more than two months at its winter rate of 10 cubic feet per second (cfs), or 6.5 million gallons per day (mgd), the flow will gradually increase to 45 cfs, or 29 mgd, over this weekend. The new level will be sustained for 15 days to allow for stream surveys, then proceed to full capacity of 67 cfs, or 42 mgd.

Property owners along the east branch of the Perkiomen Creek, primarily those in Bucks County, may be able to observe some increase in water levels in the stream, although bank conditions should be unchanged. The change in water levels will vary depending on the width of the stream.

Phase two of the startup program has been approved by the state Department of Environmental Resources.

The increases in water flow will be controlled over a period of time to limit the rate of change in the stream, and the stream conditions will be monitored twice each week to ensure compliance with environmental permits.

The diversion from the Bradshaw Reservoir, located in Plumstead Township, Bucks County, reached full capacity once during phase one of the startup testing program, on Dec. 14. The flow was reduced in late- December to 10 cfs, and the operation will revert to that level from October until May each year.

Delaware River water is sent 42 miles through a series of pipelines and streams from the Point Pleasant pumping station to Limerick. With both units at Limerick operating at 100 percent, 42 mgd of cooling water is required.

The Point Pleasant pump supplies water during periods when the Schuylkill River cannot be fully utilized, due to temperature or flow requirements.

Construction continues on schedule for the Bedminster Township water processing facility, which will cool and sanitize the water before it reaches the East Branch of the Perkiomen Creek. The $17 million facility is being built to comply with a National Pollution Discharge Elimination

System (NPDES) permit that applies to the interbasin transfer.

VOORHEES, NJ (MARCH 2) PR NEWSWIRE - Plasma-Therm Inc. (NASDAQ: PTIS) announced today the formation of a new subsidiary which will design and manufacture plasma processing systems for the industrial portion of the plasma etching and coating industry.

Target markets include the surface treatment and surface coating of many different types of materials. One example of those materials is plastic. Another application is intended for use in the flat panel display market. This market is rapidly maturing in foreign countries and has shown some progress in the United States. The company said it plans to explore other products, which it chooses not to disclose at this time.

The new subsidiary will be located in the Tampa Bay, Fla., area. That area contains untapped resources of people and support facilities for the manufacturing of these products.

Plasma-Therm is a leading producer of plasma process systems used primarily by manufacturers of semiconductor devices.

TORONTO (MARCH 2) PR NEWSWIRE - ARC International Corporation (AMEX, TSE: ATV), today announced that Special Products Manufacturing, Inc. (SPMI) of Binghamton, N.Y., a wholly owned subsidiary of Canrad Inc., has sold the inventory and manufacturing equipment used in connection with its microwave component manufacturing business to Lawrence E. Ross, formerly the President of SPMI.

The transaction closed yesterday.

The base purchase price for the assets was approximately US$2 million, of which U.S. $1 million was paid in cash. An interest bearing note for US$1 million was taken back, secured by the assets sold. In addition, up to US$500,000 may be received in the form of royalties over the next five years, depending upon future sales. The business sold accounted for approximately US$3.0 million or about 18 percent of SPMI's U.S. $17.4 million 1989 net sales, and represented less than 4 per cent of ARC's consolidated 1989 sales. Cash proceeds obtained from the sale of these assets were applied to reduce bank debt.

In commenting on the transaction, Arnold S. Tenney, president and chief executive officer of ARC, said: "SPMI is incurring a loss for accounting purposes on the sale of these assets of approximately US$2.5 million which has been provided for on ARC's 1989 financial statements. The sale proceeds provide an immediate reduction in debt and will reduce future debt service costs. SPMI's name has been changed to Wilson Instruments Inc. and the subsidiary will focus its efforts for growth on its material testing equipment business." Marketed under the registered trademarks, "Rockwell," "Tukon," "Riehle," and "Wilson," the material testing equipment product line includes the "Rockwell Hardness Tester" which is accepted worldwide as the standard of the industry.

BALTIMORE (MARCH 2) PR NEWSWIRE - PharmaKinetics Laboratories, Inc. (NASDAQ-NMS: PKLB) today announced that Thomas J. Humphries M.D., F.A.C.P. F.A.C.G. has joined the company as vice president, chief medical officer.

Since 1984 Humphries has been director, worldwide clinical research, gastroenterology for Merck Sharp and Dohme Research Laboratories, Inc. and

prior to 1984 he was with Smith Kline and French Laboratories. His responsibilities with PharmaKinetics will include providing the corporate leadership and direction on medical affairs with particular emphasis on clinical research services, as well as interface with the Food and Drug Administration and key clients. Humphries has been in the pharmaceutical industry for 10 years with previous experience in clinical research and the practice of gastroenterology, in both academic and private practice settings.

Steven A. Woodman, president, chief executive officer, commenting, said: "Dr. Humphries is a very significant and important addition to senior management. He brings with him a demonstrated track record of accomplishment in the pharmaceutical industry. His outstanding reputation for commitment to the highest standards of clinical research in drug development can only add to the value of our services to our clients."

PharmaKinetics Laboratories, Inc. is a leading drug development company providing services to pharmaceutical and biotechnology firms seeking new drug approvals in the United States and Europe.

DUBLIN, IRELAND (MARCH 2) PR NEWSWIRE - Morgan Stanley & Co. Incorporated announced today that one of its affiliates will acquire in partnership with Fitzwilton PLC a 29.9 percent equity interest in Waterford Wedgwood, PLC, subject to the approval of Fitzwilton and Waterford shareholders.

Under the agreement with Fitzwilton and Waterford, Investco, a newly formed company owned equally by the Morgan Stanley affiliate and Fitzwilton, will acquire 212 million new Waterford stock units for IR Pound 37.5p per unit, or a total of approximately IR Pound 79 million in cash. Waterford will also raise approximately IR Pound 23 million through a one-for-five rights issue to Waterford shareholders at a price of IR Pound 27.5p. All told, Waterford will raise approximately IR Pound 102 million, which will be used principally to reduce its borrowings.

The agreement provides that the affiliate of Morgan Stanley, the Morgan Stanley Leveraged Equity Fund II, L.P., and Fitzwilton will each name two directors to Waterford's board. Charles Tate and Robert Niehaus, both managing directors of Morgan Stanley, will serve as directors of Waterford and Investco.

"This is an excellent opportunity to take a significant, long-term position in one of the world's preeminent luxury goods companies," said

Donald P. Brennan, managing director of Morgan Stanley and chairman of the Morgan Stanley Leveraged Equity Fund. "We believe current management has correctly identified the causes behind the production problems in the company's crystal business, and this investment provides the prudent capital structure that will give management time to solve them.

"We expect that our experience in working with the managements of major industrial enterprises to improve operating margins and our partner's well-known expertise in the marketing area also will be beneficial to the Waterford management team," Brennan said

Brennan added that the Fund sees many attractive opportunities in Europe to make significant investments and work with management to improve returns to shareholders. "In this regard, we are very pleased to have Fitzwilton and its chairman, Tony O'Reilly, as partners in our first European transaction," Brennan said.

CINCINNATI (MARCH 2) PR NEWSWIRE - This morning, Peter Burris, chairman of the Kenton County Airport Board, joined Jim Callison, Delta's senior vice president of legal and corporate affairs and secretary, Dorsey Jones, Delta's district director of marketing, and other dignitaries in officially inaugurating Delta's new nonstop service between Cincinnati and Grand Rapids, Mich.

Delta's service features three daily nonstop flights between Cincinnati and Grand Rapids with slightly modified weekend schedules. Flights to Grand Rapids depart Cincinnati at 10:35 a.m., 3:05 p.m. and 8:40 p.m., and arrive in Grand Rapids at 11:35 a.m., 4:05 p.m. and 9:40 p.m. Flights will depart Grand Rapids at 6:20 a.m., 12:50 p.m. and 5:00 p.m., arriving in Cincinnati at 7:20 a.m., 1:50 p.m. and 6:00 p.m.

Commenting on Delta's phenomenal growth in the Cincinnati area, Callison noted that with today's inauguration, Grand Rapids becomes Cincinnati's 54th destination. He further added, "Literally overnight, in December 1986, Delta moved from operating 48 flights to providing 104 flights daily and currently operates 144 flights offering more than 19,770 seats each day."

On July 1, Delta will further expand its service from Cincinnati by beginning international nonstop flights between Cincinnati and Paris.

Delta's system now extends to 175 cities in 13 countries worldwide. Today Delta also began service between Providence and Atlanta and Providence and Portland, Maine.

#90061p0112 03/02/1990 ~PR Newswire

PHILADELPHIA (MARCH 2) PR NEWSWIRE - Most of the nearly 2,200 environmental policy makers responding to a Ford survey on environmental issues and priorities say that the federal government, rather than the states, should take the lead in setting environmental standards.

In addition, nearly 78 percent of those surveyed said they believed the public would be willing to pay more for products with greater environmental safeguards.

The findings are part of a new survey of key leaders influential in shaping environmental policy, commissioned by Ford Motor Co. (NYSE: F) and conducted by HRN. Survey participants also ranked preservation of the

ozone layer as the highest environmental priority at the national and international levels, and protection of groundwater at the top of the list for state and local action.

HRN, a Philadelphia-based consulting firm specializing in strategic planning, surveys, and software systems for corporate external affairs management, conducted the written survey by mail last fall. About 6,800 key government, business, education, environmental, and news media officials were invited to participate in the survey, and nearly 2,200 individuals -- some 31.5 percent -- responded to the study.

"This Ford survey differs from other studies on environmental priorities because of its focus on leaders who are active or influential in defining environmental public policy," said Diana R. Shayon, HRN president. "Corporate America urgently needs to understand the issues that motivate activism in our society -- especially in the volatile area of environmental issues. The survey for Ford offers a meaningful roadmap for outreach and effective communications to the influential leaders of that activism."

Said Mark A. Nowlan, HRN senior vice president and director of HRN's Survey Division: "In the context of the present trend to move more policy-setting leadership away from Washington and into the statehouses, it is significant that 85 percent of our survey participants approved of the idea of the federal government taking the leadership role in setting environmental standards."

About 70 percent of the survey respondents say industry will not voluntarily take steps to protect the environment, although more than 60 percent of the participants agreed that industry has an accurate perception of the public's concern about environmental issues.

Although survey respondents disagreed over whether industry's capacity to pay costs associated with environmental cleanup should be a guiding factor in new legislation or regulation, nearly 90 percent of those surveyed said industry and environmentalists should work closely to devise practical standards that balance job preservation and environmental quality.

SEATTLE (MARCH 2) PR NEWSWIRE - Boeing Chairman and Chief Executive Officer Frank Shrontz has announced the retirement of two senior company officers and the promotion of five other executives.

Boeing Vice Chairman Malcolm T. Stamper and Executive Vice President and Chief Financial Officer Harold W. Haynes will retire in April, Shrontz said.

Effective immediately, Dean D. Thornton and B. Dan Pinick have been promoted to executive vice presidents of The Boeing Co. Both have been serving as corporate senior vice presidents. Thornton will continue as the president of the Boeing Commercial Airplane Group and Pinick as president of the Boeing Defense & Space Group.

Deane D. Cruze, Boyd E. Givan and A.D. (Bert) Welliver have been promoted to corporate senior vice presidents of operations, finance, and engineering and technology, respectively. With Haynes' retirement, Givan will become the company's senior financial executive.

Thornton, Pinick, Cruze and Welliver will continue reporting to Shrontz, with Givan scheduled to do so upon Haynes' retirement.

In announcing Stamper's retirement, Shrontz said, "Mal Stamper has made many significant contributions to The Boeing Company, including his leadership as company president from 1972 to 1985 and his management of the 747 program."

An engineering graduate of Georgia Tech, Stamper joined Boeing in 1962. He served as vice president-general manager of the 747 Division, and was senior vice president-operations for The Boeing Co. Stamper was elected president of Boeing and a member of the board of directors in 1972, and became vice chairman in 1985.

A Seattle-area native and a graduate of the University of Washington, Haynes has been with Boeing since 1954. He became controller in 1959, was named corporate vice president-finance in 1963, and was appointed executive vice president and chief financial officer in 1975. Haynes has been a member of the Boeing board of directors since 1966.

"Hal Haynes has provided outstanding financial leadership for nearly three decades," Shrontz said. "He has also represented Boeing to the financial community in an exceptional manner.

"The leadership and guidance Stamper and Haynes have provided Boeing and its board of directors will be missed," said Shrontz.

LYNCHBURG, VA (MARCH 2) PR NEWSWIRE - Frances Denney, Inc., a wholly

owned subsidiary of The Frances Denney Companies, Inc., (NASDAQ: DNNYE), announced that it had filed a complaint in the United States District Court, Southern District of New York, against I.S. Laboratories, Inc. and H. Allen Lightman, both of New York City. The complaint is a civil action for trademark infringement and unfair competition under Title 15 of the U.S. code and for unfair competition and deceptive trade practices under the law of the state of New York.

In its complaint, Frances Denney asserts that I.S. Laboratories and its controlling stockholder, H. Allen Lightman, have engaged in direct competition with Denney's "Irma Shorell" line of beauty products. The complaint further alleges that I.S. Laboratories has marketed its products under such trade names as "Irma," "Dr. I.S. Shorell," "Shorell," et. al., directly to Denney's customers and has used advertising copy and layouts deliberately designed to deceive and confuse customers.

Ron Rodgers, president of Frances Denney, commented that, "We intend to vigorously protect our rights with respect to the Irma Shorell trademark and trade name. Furthermore, we will pursue all legal remedies available to us to stop now and to prevent in the future any and all deceptive trade practices which might confuse or harm consumers, and which might damage the excellent reputation of our products."

Frances Denney acquired the Irma Shorell trademark and trade name from Alfin, Inc., which in turn had acquired Irma Shorell from the defendant, H. Allen Lightman, in 1985. Under the agreement of sale, the defendant agreed that "neither Lightman nor Shorell nor any other person, corporation, association, partnership, organization or business controlled by Shorell or Lightman shall take any action to interfere with the buyer's exclusive use of the name 'Irma Shorell' or any variation thereof in connection with the conduct and operation of the business or shall use the name 'Irma Shorell' or any variation thereof in connection with the conduct of a business which competes or may in the future compete with the business."

As a result of these alleged unfair trade practices, Frances Denney is seeking relief from the courts and is demanding that the defendants be enjoined preliminarily, and thereafter permanently, from making any use of the Irma Shorell trademark and trade name, and variations thereon, in any manner whatsoever. The complaint also requests the court to order the defendant to pay treble damages to Frances Denney.

CONTACT: Ronald W. Rodgers, president, or Willard R. Devlin, 804-845-7073, both of Frances Denney, Inc.; or Jay M. Green, 212-661-8030, or after 7 p.m.: 914-526-2402, or Kathy Waller, 312-266-7800, both of The Financial Relations Board, for Frances Denney, Inc.

AUSTIN, TX (MARCH 2) PR NEWSWIRE - The board of directors of Westmark Systems, Inc. has named James B. Skaggs president and chief executive officer, effective immediately, and elected him to a position on the Westmark board.

Skaggs replaces Elvis L. Mason, who served as interim chairman and CEO of Westmark since December 1989; Mason remains chairman of the Westmark board. Skaggs also will serve as chairman, Tracor Holdings Inc., a subsidiary of Westmark.

Westmark Systems, Inc. is an Austin, Texas-based holding company created in 1986 to acquire and operate electronics companies. In 1987, Westmark acquired Tracor, Inc., an international technological products and services company also based in Austin.

In August 1989, Westmark announced that Tracor was undertaking a financial restructuring designed to facilitate the sale of certain businesses. Revenue from such sales will be used to retire debt assumed as a result of the Tracor acquisition.

DEERFIELD BEACH, FL (MARCH 2) PR NEWSWIRE - CheckRobot Inc. (NASDAQ: CKRB) today announced financial results for its second quarter ended Nov. 30, 1989.

CheckRobot reported a net loss for the quarter ended Nov. 30, 1989 of $1,477,000 as compared to a net loss of $969,600 for the same period of the prior fiscal year. The adjusted net loss applicable to common stock, after preferred stock dividends, was $1,559,999 or $.21 per common share for the quarter ended Nov. 30, 1989, as compared to $1,062,200 or $.18 per common share for the same period of the prior fiscal year.

Results of the second quarter ended Nov. 30, 1989 were almost identical to the first quarter ended August 31, 1989. Expenses for the current fiscal year continue to be higher than last fiscal year because of intensified marketing and the buildup of a manufacturing and service organization. Also increased product development costs are associated with a program to significantly reduce costs of CheckRobot Inc. products.

Charles J. Beech, president and chief executive officer, said, "We continue to control the costs associated with our transition from a development stage to an operating stage company. We are continuing to

expand the number of retailers utilizing automated checkout. Results at all installed sites show a high level of consumer acceptance."

CheckRobot develops and markets ACM (R) automated checkout machines. The systems are designed to improve customer service and profitability for the supermarket industry. Using enhanced laser bar-code scanners and a propriety merchandise security system, the ACM allows shoppers to quickly scan and checkout merchandise before paying centrally located cashiers.

BERWYN, PA (MARCH 2) PR NEWSWIRE - Three senior-level executives from Meridian Investment Co. have left to start their own investment management firm, Turner Neill Investment Partners Inc., in association with two other principals.

Three of the principals in the new corporation are Robert E. Turner, formerly a senior investment manager and director of research at Meridian; K. Lawrence Neill, who was a Meridian vice president, responsible for

sales and marketing; and Stephen J. Kneeley, who was also a vice president of sales at Meridian.

The other principals are Mark D. Turner, former vice president, senior portfolio manager for First Maryland Asset Management; and Christopher K. McHugh, who had been supervisor of accounting and performance measurement functions at Provident Capital Management Inc.

While at Meridian, Bob Turner was responsible for the development and implementation of a unique process for achieving high returns that consistently outperformed standard market indices. Turner utilized this approach in managing Meridian's largest equity and balanced portfolios. According to Neill, this successful strategy will continue at Turner Neill but with an even stronger commitment to client service.

During the last five years while Bob Turner was responsible for Meridian's equity management, the firm's equity portfolios consistently outperformed the S&P 500 in compound annual growth. Their cumulative 1985-1989 rate of return was 182.7 percent, compared to 145.6 percent for the Standard & Poors Index, surpassing the industry indicator by 37.1 percent for the five-year period.

According to a report in the Nov. 27, 1989, issue of Pensions & Investments Age magazine, securities under Turner's management placed in the top decile of commingled equity funds for one-year and five-year performance. Meridian was seventh overall in one-year returns for equity funds over $100 million.

In addition to core equities, portfolios under Turner Neill's management include fixed income, convertible securities, and balanced accounts. The Turner Neill investment approach has proven itself over time, under varying market and economic conditions. It is based on three overriding strategies: exploiting market inefficiencies, controlling risks, and avoiding mistakes. The firm uses a combination of quantitative and qualitative techniques to achieve the specific objectives of its clients.

For more information, contact Neill or Kneeley, Turner Neill Investment Partners Inc., 300 Berwyn Park, Suite 120, Berwyn, Pa., 19312; 215-251-0268.

ALBUQUERQUE, NM (MARCH 2) PR NEWSWIRE - Summa Medical Corporation (NASDAQ: SUMA) said today it was continuing its negotiations with Hughes

Aircraft Corporation on licensing and interim funding for Summa's voice-compression technology.

The preliminary agreement with Hughes, announced last October, called for a final agreement to be signed by February 27. Summa and Hughes have now extended the period, and expect the negotiations to be completed shortly.

Summa said that its SummaCom subsidiary has progressed sufficiently in its development program so that its design goal of achieving a 25:1 compression ratio is likely. The company expects its voice-compression prototype to be completed during 1990.

"We expect potential markets to develop for this voice-compression technology before we reach our goal of 25:1," according to Francisco Urrea Jr., chairman of Summa, who made the announcement today.

The company also announced today that it had formed Quality Communications Products, Inc. of Orlando, Fla., as a technical excellence center where new products will be developed and where Summa's existing high technology products will be brought to the production prototype stage. Among Summa's products already under development in the center are its voice-compression and HDTV technologies.

Summa Medical Corporation, founded in 1978 is a development company that brings high technology from the research laboratory into the commercial marketplace.

#90061p0137 03/02/1990 ~PR Newswire

DARIEN, CT (MARCH 2) PR NEWSWIRE - The board of directors of Bowater Incorporated (NYSE: BOW) has given formal aproval to a project to construct a plant adjacent to its Calhoun, Tenn., newsprint mill to recycle old newspapers (ONP) for newsprint manufacture. Expected to cost approximately $75 million, the plant will supply 300 short tons per day of recycled fiber to the newsprint mill.

Construction is due to start in July of this year, with start-up planned for December 1991. The plant will use both the washing and flotation systems of de-inking to process ONP printed with letterpress, offset or flexographic inks. The plant also will recycle some coated magazine stock to deliver a pulp blend of approximately 70 percent ONP and 30 percent old magazines.

Bowater originally notified its customers in mid-1989 that it planned to install an ONP recycling facility at one of its mills by the end of 1991, and preliminary engineering was started in September. Subsequent studies confirmed the Tennessee mill as the best location to site a first recycling operation and further established that the best economies of scale lay in a single, non-expandable line to provide a daily output of 300 short tons. Additional lines can be added to the site later if needed.

"With formal approval now for the project," said David G. McMaster, president of Bowater's pulp and paper group in Greenville, S.C., "we will immediately start on detailed engineering and confirm our equipment reservations. With an annual newsprint capacity of 790,000 tons, 300 tons per day of recycled pulp will allow the Calhoun mill to market up to one-third of its productive capacity as newsprint which meets the federal government's definition of 40 percent recycled content. Greater volumes of recycled newsprint will be available if the blend percentage averages less than 40 percent."

Besides manufacturing newsprint, Bowater Incorporated is a major producer of coated groundwood publication papers, bleached kraft market pulp, and communications papers for use in computers and other business applications.

PAMPA, TX (MARCH 2) PR NEWSWIRE - Service Fracturing Company (NASDAQ: SERF) has completed the purchase of 325 oil and and gas stripper wells in the West Panhandle Field of Texas at a cost of $2 million. The wells were acquired from an independent producing firm.

Jerry H. Guinn, Serfco president, said the wells have been producing about 3,800 barrels of oil per month, but that he anticipated increases in production after the company performs needed remedial work on the wells.

Serfco is primarily in the oilfield service business and provides acidizing, hydraulic fracturing, pumping and chemical cleanup treatments for both new and existing oil and gas wells. Serfco uses excess capacity, idle equipment and personnel at its Pampa district to perform remedial work on wells it purchases.

"We will spend the next 60 days reviewing and analyzing the individual wells to determine the remedial work that can be performed," Guinn noted. "Serfco's board of directors has allocated $500,000 for upgrading the wells with remedial work to be completed by the end of September."

The new acquisition follows Serfco's purchase of 181 stripper oil wells, and the subsequent remedial work on 49 of the wells, in the Texas Panhandle Field on April 1, 1989. At the time of purchase these wells had been producing about 2,225 barrels of oil per month.

"Following fracturing of 19 wells and chemical cleanup of another 30 wells production from the wells since October 1989 has been averaging 6,000 barrels per month," Guinn said. Further remedial work will be performed on other wells in the group when evaluation of the first group is completed.

"At the present rate of production and at current oil prices, we expect that the purchase cost, plus all our remedial work expenses on the 181 wells will be recovered within 36 months," Guinn added.

The purchase money for the new acquisition of 325 wells was part of the $7 million the company received in December 1989, from a secondary offering of 1,200,000 shares of its common stock.

DENVER (MARCH 2) PR NEWSWIRE - MinVen Gold Corp. (AMEX: MVG) today announced financial results for the full year and quarter ended Dec. 31, 1989. (Dollar amounts are Canadian).

Minven's consolidated revenues for the fourth quarter, 1989, were $13,706,300 on sales of 26,340 ounces of gold, compared to revenues of $9,029,812 on sales of 20,819 ounces of gold in the corresponding quarter of 1988. Production for the quarter was 28,606 ounces of gold and 92,092 ounces of silver, compared to 20,243 ounces of gold and 32,332 ounces of silver in the last three months of 1988.

For the 12-month period ended Dec. 31, 1989, MinVen's consolidated revenues were $48,404,903 on sales of 98,085 ounces of gold. This compares to consolidated revenues of $34,204,512 for all of 1988 on sales of 68,131 ounces of gold. Production for 1989 was 98,859 ounces of gold and 201,603 ounces of silver, compared to production of 66,971 ounces of gold and 192,600 ounces of silver in 1988.

MinVen recorded a consolidated loss of $938,385, or $.03 per share, for the fourth quarter of 1989, compared to a consolidated loss of $16,295, or $.0 per share, for the fourth quarter of 1988.

For all of 1989, MinVen recorded a consolidated loss of $744,559, or $.03 per share, compared to earnings of $90,918, or $.01 per share, for all of 1988.

"Our 1989 earning were adversely affected by severely cold weather at some of our heap leach operations during the last two months of the year, resulting in significantly decreased production, and by start up difficulities at two of our mines," said James A. Anderson, MinVen president and chief executive officer. "On the positive side, we achieved several objectives in 1989 which positioned MinVen to become a major gold producer over the next few years."

Anderson said that in 1989 MinVen increased gold production by 47 percent and revenues by 41 percent, started up two gold mines and initated start-up of a third gold mine, acquired the outstanding 49 percent miniority interest of Blackdome Mining Corp., and listed its shares for trading on the American Stock Exchange.

"In addition, we expect further substantial improvements in our operations in 1990 as each of our five mines become fully operational," Anderson said.

MinVen Gold is a publicly held, Denver-based mining company with interests in five operating gold mines in the U.S. and Canada. It shares are traded on the American and Toronto stock excanges under the symbol MVG.

#90061p0144 03/02/1990 ~PR Newswire

NEW ORLEANS, (MARCH 2) PR NEWSWIRE - In 1986, the United States Internal Revenue Service claimed that about $450,000,000 was due for the year ended March 31, 1983 from McDermott International, Inc.'s (NYSE: MDR) subsidiary McDermott Incorporated. McDermott Incorporated has been contesting that claim in proceedings in the United States Tax Court.

The largest issue in those proceedings arose out of transactions in which the company became the parent of the McDermott group of companies and McDermott Incorporated (formerly the parent of the group) became a subsidiary of the company. The Internal Revenue Service maintained that about $327,000,000 was due from McDermott Incorporated because it realized $678,000,000 of taxable income from these restructuring transactions while McDermott Incorporated has maintained that it realized no taxable income from these transactions. The Internal Revenue Service has now conceded this issue.

Representatives of the Internal Revenue Service and McDermott Incorporated are discussing the question whether the Tax Court proceedings for 1983 can be disposed of by an overall agreement incorporating the Internal Revenue Service's concession of the restructuring issue and agreements with respect to the remaining issues in those proceedings. If an overall agreement is reached, it might be subject to review by the Joint Committee of Congress on Taxation. In view of recent decisions in test cases in the United States Tax Court and in the Courts of Appeals for two federal circuits that determined the effect of the restructuring transactions on former shareholders of McDermott Incorporated, the company believes that the Joint Committee would approve a concession of the restructuring issue if it is asked to review an overall settlement agreement including that concession.

In addition to the test cases mentioned, there are about nine hundred cases pending in the United States Tax Court, and in field offices, in which the Internal Revenue Service has claimed that taxes were due from former shareholders of McDermott Incorporated. The Internal Revenue Service contended that these shareholders should be treated as if they had received dividends in the restructuring transactions. The Internal Revenue Service has informally advised that it will now concede that no former shareholder of McDermott Incorporated is subject to a tax on

dividend income by reason of the restructuring transactions, and has informally advised that it will dispose of each one of the cases mentioned on whatever terms are appropriate to that specific case in the light of its concession on the restructuring transactions.

McDermott International, Inc., is a leading worldwide energy services company. The company and its subsidiaries manufacture steam- generating equipment, defense products, and tubular products. They also provide engineering and construction services for industrial and utility facilities onshore, and to the oil and gas industry offshore.

WASHINGTON (MARCH 2) PR NEWSWIRE - On behalf of the board of directors of Madison National Bank of Virginia, a banking subsidiary of the Washington-based bank holding company James Madison Limited (NASDAQ-NMS: JMLC), chairman of the board John G. Broumas recently announced the appointment of Barbara Lewis to the bank's advisory board.

A real estate agent with Prudential Preferred Properties, Lewis is recognized as a leader in Northern Virginia's residential real estate market. She works with builders of new million-dollar-plus homes, as well as with sellers of resale properties. She has achieved the status of Prudential's "No. 1 Agent" in Virginia, and its "No. 1 Agent" in the McLean/Great Falls area. Lewis has been inducted in to the "Inner Circle " a distinction awarded Prudential real estate agents who have generated total sales in the top 1 percent of all Prudential agents nationwide. In addition to assuming responsibilities on the Madison National Bank of Virginia advisory board, Lewis will serve as advisory director to the bank's McLean branches.

Broumas noted: "We are pleased to welcome Ms. Lewis to our organization and feel confident that her appointment to the advisory board will contribute greatly to the continued growth and strength of Madison National Bank of Virginia. Ms. Lewis' expertise in the Northern Virginia real estate market will help us to better understand and meet the changing needs of our customers."

STAMFORD, CT (MARCH 2) PR NEWSWIRE - General Host Corporation (NYSE: GH) announced today that a strong fourth quarter performance by its flagship subsidiary, Frank's Nursery & Crafts, paved the way for a significant earnings improvement in fiscal 1989.

For its fourth quarter ended Jan. 28, 1990, the nation's largest lawn and garden retailer reported earnings from continuing operations of $5.5 million, or $.29 per share, compared with a loss of $400,000, or $.02 per share, in 1988. Overall sales were up 6 percent and same-store sales rose 1 percent on top of a 15 percent increase in the prior-year quarter.

The company said pre-tax income from continuing operations in the fourth quarter rose by nearly $5 million over the year-earlier quarter due to the performance of its nursery and crafts business. The operating improvement resulted from a good sell-through of seasonal products such as Christmas trees and poinsettias, tight inventory control, higher maintained margins and improved sales. Income from continuing operations in the fourth quarter benefited from elimination of approximately $2.8 million of income tax reserves which are no longer required.

For its 1989 fiscal year also ended Jan. 28, General Host reported income from continuing operations of $900,000 or $.05 per share, compared with a loss of $4.6 million, or $.23 per share, in fiscal 1988. A second quarter

charge to discontinued operations stemming from settlement of a lawsuit resulted in a net loss for the fiscal year of $2.5 million, or $.13 per share, compared with a net loss of $21.3 million, or $1.07 per share, in 1988. Full year 1989 results were also affected by the elimination of income tax reserves in the second and fourth quarters.

Overall sales in 1989 rose 6.2 percent and weather-related shortfall of 8.4 percent in same-store sales in the first quarter was reduced to just 2 percent by year-end. Gross profit margins, before buying and occupancy costs, increased by more than a full percentage point due primarily to better inventory management and fewer markdowns. Inventories at the close of the fiscal year were approximately 9 percent below 1988 levels, and the company's balance sheet reflected $110 million of cash and marketable securities.

General Host operates the nation's largest chain of specialty retail stores devoted specifically to the sale of lawn and garden products, crafts, and Christmas merchandise. Its primary operating unit is Frank's Nursery & Crafts.

ARDMORE, OK (MARCH 2) PR NEWSWIRE - Noble Affiliates Inc. (NYSE: NBL) today announced the filing of a registration statement on Form S-3 with the Securities and Exchange Commission covering the offer and sale by The

Samuel Roberts Noble Foundation Inc. of up to 1 million shares of common stock of the company. The Foundation currently owns 14,863-140 shares of the company's common stock (approximately 33.9 percent of the outstanding common stock.)

The shares may be sold from time to time by the Foundation through PaineWebber Inc., as agent, or one or more other broker-dealers in one or more transactions on the New York Stock Exchange or otherwise at prices and at terms related to the then current market price, or in privately negotiated transactions. The company intends to keep the registration statement effective for a period of up to one year.

The company will receive none of the proceeds from the sale of the common stock by the Foundation, and the Foundation has agreed to pay all fees and expenses incident to the registration of the shares.

Noble Affiliates Inc. is an independent energy company with exploration and production operations throughout major basins in the United States, including the Gulf of Mexico and offshore California, as well as foreign operations primarily in Canada, Tunisia and Indonesia. Its common stock is listed on the NYSE under the symbol "NBL."

HOUSTON (MARCH 2) PR NEWSWIRE - Transco Energy Company (NYSE: E) today announced a 1990 capital budget of $475 million, which compares to $466 million spent in 1989. Approximately 70 percent of the 1990 expenditures and investments are planned for natural gas pipelines and gas-related businesses.

Capital expenditures and investments in 1990 for Transco's natural gas pipeline systems are expected to total $266 million, including $188 million for Transcontinental Gas Pipe Line Corporation (TGPL) and $76 million for Texas Gas Transmission Corporation. Emphasis on expanding access to gas supplies and increasing storage and delivery capabilities to TGPL's and Texas Gas' market areas will account for much of the spending. Hydrocarbon marketing and services is budgeted at $65 million, including $57 million for non-jurisdictional gas gathering facilities.

According to Transco Energy Company President and Chief Executive Officer George S. Slocum, "This commitment to our natural gas-related businesses, coupled with the integration of the TGPL and Texas Gas systems, will strengthen Transco's position as a significant supplier of natural gas services in the eastern half of the United States. We are pleased with the results to date of our restructuring efforts, which began in 1988 and

were largely completed last year. We are now turning our attention to increased supply access and continued emphasis on customer-driven services. Meanwhile, we are also allocating sufficient capital to take advantage of opportunities available in our other energy-related operations."

Slocum noted that Transco expects to spend $117 million on oil and gas exploration and production, including $40 million for Transco Exploration and Production Company and $72 million for coalbed methane development; $20 million for Transco Coal Company; and $7 million in additional power generation projects through Transco Energy Ventures Company.

"During 1990-1992, our capital spending should exceed $1.25 billion," said Slocum. "With the vast majority of that invested directly in the transportation, gathering and marketing of natural gas, there's no doubt where Transco's strategic focus lies as we head into the 1990s."

WILMINGTON, DE (MARCH 2) PR NEWSWIRE - Hercules Inc. (NYSE: HPC) today announced it is being sued by two stockholders of the company in a class action suit, under Section 10(b) of the Securities Exchange Act of 1934, filed in the U.S. District Court for the Eastern District of Pennsylvania on Feb. 21, 1990.

Also named in the complaint as defendants were David S. Hollingsworth, chairman and chief executive officer; Fred L. Buckner, president and chief operating officer; Arden B. Engebretsen, vice chairman and chief financial officer; George MacKenzie, vice president and controller; Edward J. Sheehy (retired and formerly president of Hercules Aerospace Co.), and three members of Hercules' board of directors who are members of its audit committee.

The complaint alleges a plan and course of conduct by the defendants that was designed to, and did, deceive the investing public regarding projected corporate financial results and financial prospects, particularly in reference to projected profits arising from Hercules Aerospace Co.'s Titan IV, Delta II and SRAM II missile systems programs.

Since the complaint was just received, the company said it is still studying the allegations and expects to file a response in the next several weeks.

S. Maynard Turk, general counsel for the company, in commenting on the allegations, stated, "All charges alleged by the plaintiffs in their

complaint against Hercules, its officers, directors and employees are baseless." He further stated, "Hercules will defend its corporate reputation and the reputations of its officers and directors against all allegations."

#90061p0175 03/02/1990 ~PR Newswire

NEW YORK (MARCH 2) PR NEWSWIRE - The Global Utility Fund, Inc. (NYSE: GL) today released the following March 1990 monthly update:

Distribution Information

Amount	Payable Date	Record Date	Declaration Date
$0.135	March 30, 1990	March 16, 1990	Feb. 14, 1990

Investment Adviser Commentary:

The investment performance of the net asset value of the fund from inception (Jan. 2, 1990) through Feb. 27 is -2 percent, which compares favorably with the performance of the following indices over the same investment period.

Standard & Poor's 500	-6 percent
Morgan Stanley World Index	-11 percent
DJ Utility Equity Index	-10 percent
DJ Telephone Index	-14 percent
DJ Electric Utility Index	-5 percent
DJ Gas Utility Index	-8 percent
DJ Water Utility Index	-6 percent

This is due to several factors: the fund's underweighting in telephone utilities and overweighting in electric utilities, the fund's investments in fixed income securities and the fund's cash position. The fund has no equity holdings in the Japanese stock market. The foreign utility component, which represents about 27 percent of the equity holdings, is

primarily in Spain, Britain and Canada.

Global Utility Fund, Inc. is a diversified closed-end management investment company whose investment objective is to provide total return, without incurring undue risk, by investing primarily in income- producing equity and debt securities of domestic and foreign companies in the utility industries. The fund's investment manager is Wellington Management Company. On Dec. 29, 1989, the fund issued 13.4 million shares of common stock in connection with its initial public offering. On Jan. 25 1990, the fund's underwriters exercised their option to purchase 2.01 million additional shares of the fund's common stock. For further information on the fund, call 212-214-3334.

SEATTLE (MARCH 2) PR NEWSWIRE - A 16-year market for 9,935 jetliners is predicted by Boeing Commercial Airplane Group (BCAG) in its annual current market outlook released today. The study sets the value of these jetliners, of all size ranges and from all manufacturers, at $626 billion (in 1990 dollars).

Last year's forecast for the same time period, 1990-2005, was for 7,838 jetliners with a value of about $490 billion (in 1989 dollars).

The new forecast was presented to the Seattle press corps today by John B. Hayhurst, vice president of marketing for BCAG.

The study says the rationale for this more optimistic outlook includes prolonged air travel expansion driven by continued growth in discretionary income and a decrease in the real cost of travel after allowing for inflation.

Boeing's 90-page report applies to the industry as a whole and is not limited to Boeing aircraft. It does not name specific manufacturers or aircraft designations. It separates the aircraft only by general size and range classification.

According to Jack Howard, BCAG director of market research, whose staff prepared the forecast, "We don't think the industry is reaching maturation at the same rate some do. We believe there is still room for growth."

Despite recent increases in the price of fuel, the report predicts relatively stable fuel prices over the long term, and no U.S. or world recession for the foreseeable future.

Other factors expected to stimulate growth, according to Hayhurst, include an expanding worldwide traffic base as ticket prices remain stable, less intrusive regulation plus the inclusion of Eastern Europe air traffic in the forecast.

"While the impact of that market will not be great, it has added $15 billion to the 16-year forecast, largely because of business travel," he said. He pointed out this forecast does not include the U.S.S.R., but that the opening of the U.S.S.R. is "definitely positive."

Overall air travel growth through the year 2005 is expected to average about five and one-half percent annually. This means the market will almost double by 2000 and expand by nearly 250 percent by 2005.

#90061p0189 03/02/1990 ~PR Newswire

SAN FRANCISCO (MARCH 2) PR NEWSWIRE - The U.S. Environmental Protection Agency (EPA) today announced that it has set criteria for the development of a clean air plan by the state of California and local agencies to control ozone air pollution in the Sacramento area.

These criteria, which will be published shortly in an Advance Notice of Proposed Rulemaking (ANPRM), specify a schedule of actions to be undertaken by state and local agencies over the next four years. During this period, EPA will evaluate the performance of these agencies to determine if they have made reasonable efforts to submit an adequate clean air plan.

Failure to make reasonable efforts may result in the imposition of sanctions, in the form of federal highway funding restrictions.

Today's action stems from EPA's disapproval of an air quality plan for the greater metropolitan area of Sacramento, announced on Dec. 1, 1988. This area, which includes Sacramento and Yolo Counties, and portions of Solano and Placer Counties, has exceeded national health levels for ozone and is unable to demonstrate attainment of these standards in the near future. The Agency's rejection of the Sacramento plan was in response to a lawsuit filed by the Environmental Council of Sacramento (ECOS) and the Sierra Club in March 1987.

Under the terms of a settlement of that lawsuit, EPA agreed to propose a federal clean air plan by June 26, 1991, should state and local agencies be unable to produce an adequate plan that demonstrates attainment of the national ozone standard.

Today's ANPRM also lists possible control measures that might be included in a federal plan to reduce ozone-causing emissions in the Sacramento area. EPA solicits comments on the appropriateness of these measures.

#90061p0193 03/02/1990 ~PR Newswire

INDIANAPOLIS, (MARCH 2) PR NEWSWIRE - Bindley Western Industries, Inc. (NASDAQ: BIND) announced today that it achieved substantial increases in

sales and earnings for 1989, excluding a special fourth- quarter provision of $2.98 million to write down the Revco account receivable and the previously disclosed extraordinary charge of $523,000 relating to a settlement with government.

Sales for the year of $1.561 billion were 22 percent higher than the $1.275 billion achieved in 1988. Earnings before the extraordinary charge of $523,000 amounted to $3.14 million or 49 cents per share, compared to 1988 earnings of $3.56 million and 58 cents per share, and included the special charge of $2.98 million to provide for the writedown of the Revco account receivable. Sales increased to record levels for the 21st consecutive year since the firm was founded in 1968 by Chairman and CEO William E. Bindley.

For the fourth quarter, sales increased by 24 percent to a quarterly record of $448 million. Pre-tax earnings of $3.4 million were offset by the above-mentioned Revco charge, resulting in an approximate breakeven for the quarter. Absent the special charge, fourth-quarter earnings were the best ever recorded for any quarter in the company's history.

In commenting on the results, Bindley stated that management was very pleased with the 1989 results. Excluding the extraordinary charge and the Revco provision, 1989 pre-tax earnings increased by 53 percent over 1988. Especially encouraging was the strong performance in the fourth quarter, where 1989 pre-tax earnings before the Revco provision increased 277 percent over the 1988 quarter.

Bindley further indicated that the restructuring to a full-line, full-service drug wholesaler contributed to the positive results in 1989 and is expected to continue to do so in 1990. As an example, sales to accounts other than chain warehouses of $272 million, which carry higher margins, represented 17 percent of total sales in 1989 compared to $194 million and 15 percent in 1988, an increase of 40 percent. Also, the Noreast Food Distribution operation made substantial progress during the year and made a positive contribution to earnings.

Bindley Western is one of the largest drug wholesalers in the United States and specializes in the distribution of ethical pharmaceuticals and related products. The firm serves customers in 37 states through distribution centers in Atlanta; Brockton, Mass.; Charlotte, N.C.; Dallas and Houston; Indianapolis; North Hollywood, Calif.; Orlando, Fla.; Phoenix Ariz., and Stamford, Conn.

WHITE PLAINS, NY (MARCH 2) PR NEWSWIRE - The Conroy Development Company of White Plains has formed a new joint venture partnership with the Pyramid Companies of Boston to build and manage Providence Place, a $300 million proposedd mixed-use project that will be the largest development in the history of Rhode Island and its capital city of Providence.

The announcement was made today at a press conference at the office of Rhode Island Governor Edward D. DiPrete with Providence Mayor Joseph R. Paolino Jr.; Alexius C. Conroy, president of the Conroy Development Company, and officials from the Pyramid Companies.

Providence Plaza features a major regional fashion retail center with a total of 1.4 million square feet of space, including a 900,000-square-foot enclosed mall of specialty stores and restaurants, a 325- room luxury hotel, a 275,000-square-foot office tower, and a parking garage for more than 4,000 cars.

The project would be built on 14 acres of land adjacent to Interstate 95 and Francis Street in the Capital District of Providence. It will be the

major element in the city's extensive re-development program, which involves 60 acres of the downtown.

One of the largest development projects ever undertaken in New England, Providence Place was originally conceived and proposed three years ago by Conroy, a national real estate development firm headquartered in White Plains.

Pyramid Companies has a network of 16 regional shopping centers in the Northeast, with a total of more than 17 million square feet of retail space developed, owned and managed. Providence Place, which is the company's first Rhode Island effort, is one of at least seven new regional projects planned for opening in 1990-93.

#90061p0214 03/02/1990 ~PR Newswire

NEW YORK (MARCH 2) PR NEWSWIRE - Nasta International, Inc. (AMEX: NAS) today announced net sales of $51,758,000 for the year ended Dec. 31, 1989, compared to net sales of $44,512,000 for the comparable period in 1988. Net income from continuing operations for the year 1989 was $1,754,000, or $.34 per share, compared to net income from continuing operations of $4,357,000, or $.85 per share, for the same period in 1988.

Net income for 1989 was $1,230,000, or $.24 per share, and includes a provision of $1,720,000 relating to the sale of the company's 49 percent interest in Olympic Mills Corporation and Estampados Deportivos, Inc. (Olympic). This compares to 1988 earnings of $5,679,000, or $1.11 per share. Because the company is engaged in negotiations concerning the sale of its investment in Olympic, for approximately $3.5 million, the company has reclassified its investment in, and earnings from, Olympic as discontinued operations. The potential purchaser is the present 51 percent owner of Olympic. Nasta acquired its interest in Olympic for $2.5 million in April 1988. Due to the company's recording of earnings from Olympic since the acquisition, the fourth quarter results include the

charge of $1,720,000 relating to the pending sale.

A spokesman indicated that the sale would provide Nasta with additional working capital to develop its toy business and would result in a tax gain when compared to Nasta's $2.5 million original investment.

Net sales were $4,830,000 for the fourth quarter ended Dec. 31, 1989, compared to $7,682,000 for the 1988 fourth quarter. The net loss from continuing operations for the fourth quarter of 1989 was $2,930,000 compared to net income from continuing operations of $36,000 for the same period in 1988. The net loss for the fourth quarter of 1989 inclusive of the charges noted above was $4,596,000, or $.90 per share, compared to net income of $1,237,000, or $.24 per share, in 1988.

The 1989 results reflect less-than-anticipated fourth quarter sales. A gross profit increase in 1989 was more than offset by higher 1989 advertising, marketing and staff expenses.

Nasta International, Inc. is engaged primarily in the design, development and distribution of a broad range of popularly price toy products.

NEW HAVEN, CT (MARCH 2) PR NEWSWIRE - A regular quarterly dividend of 11.25 cents a common share was declared by the board of directors of First Constitution Financial Corporation (NASDAQ: FCON). The dividend is payable March 23 to shareholders of record at the close of business March 12.

First Constitution also issued financial statements to supplement its earlier release of 1989 fourth-quarter and full-year business results.

On Feb. 5, the company reported losses of $2.06 a share for the fourth quarter and $2.18 a share for the full year after allowing for the addition of $33.5 million to the provision for losses, following completion of an assessment of unexpected loan issues that arose during January.

At Dec. 31, shareholders' equity was $216.6 million and total assets were $2.4 billion. The ratio of shareholder's equity to total assets was 9.07 percent. Book value per share, based on 10,950,333 shares outstanding, was $19.78.

In the statement of operations, there is a $29 million provision for loan losses and a $4.5 million provision for losses on real estate investments,

totaling $33.5 million. The company charged off $6.2 million of loans and real estate investments, reducing its previously reported reserves for losses from $58 million to $51.8 million, and non-performing assets from $148 million to $141.8 million. On the balance sheet, the reserve has been divided into a $48.8 million reserve for loans and a $3 million reserve for real estate investments.

The company is the parent of First Constitution Bank, an FDIC-insured, state-chartered savings bank.

SOUTHFIELD, MI (MARCH 2) PR NEWSWIRE - The H.W. Kaufman Financial Group (NASDAQ: HWKF) announced today that it expects 1989 full-year results to include record levels of premium volume, commission and fee revenue and investment income, but that net income and earnings per share will be down due to the effects of an estimated shortfall of $790,000 in profit-sharing commissions from one of the company's major carriers.

In discussing the preliminary results, Herbert W. Kaufman, president and chief executive officer, said, "Total commission and fee revenues should be a record $19.4 million for 1989, up about 25 percent over the $15.5 million record reported in 1988, on the strength of record levels of premium volume. Record interest and dividend income of over $710,000 was also experienced.

"However, the income gains in commissions, fees, and investments will be offset by the unanticipated adjustment of profit-sharing revenue," Mr. Kaufman said.

"Net income for the year will be about $1.0 million or $.54 per share, vs. $1.2 million, or $.66 in 1988, a decrease of about 18 percent," he said. He went on to say that profit-sharing revenues fell short of expectations and were attributable to the effects of adverse claims experienced by the insurance industry as a whole, causing adjustments in claim reserves by one of the company's major carriers.

"In looking at the impact of the profit-sharing revenue shortfall, commission and fee revenue would have been about $20.2 million instead of the $19.4 million reported. The per-share impact from this reduction, net of taxes, will be approximately $.23, meaning that earnings per share would have been about $.77, or about 16 percent better than the $.66 reported in 1988," he said.

The company had previously stated that it expected full-year earnings per share to approach $.80.

"While we are disappointed in the developments associated with these unanticipated claims, we think the records achieved in 1989, including production, commissions, fees and other parameters, reflect the underlying strength of the company," Mr. Kaufman said.

Member companies of the H.W. Kaufman Financial Group include Burns & Wilcox, Ltd., Service General and Royal Premium Budget. Through these wholly owned subsidiaries, the company is a national insurance broker and underwriting manager with premium financing services. It operates 22 branch offices which service 46 states.

WASHINGTON (MARCH 2) PR NEWSWIRE - GTE (NYSE: GTE) today said that telephone-company competition with cable TV is more in the public's interest than direct cable regulation to address rates, services and market power in the cable-television business. GTE submitted its comments on cable-television service in response to a Notice of Inquiry (NOI) from the Federal Communications Commission (FCC).

In its comments, GTE strongly supported allowing telephone companies to compete with cable TV. GTE said that as a potential competitor precluded for 20 years from competing with cable TV, it resoundingly favors increased competition to cable-service providers. The company also said that, with appropriate safeguards, the telephone companies'

broadband-communications network could become a model for video programming.

GTE also advocated that a proper application of the "video dial tone" concept is another way that telephone companies could be permitted entry into cable TV. An earlier White House study suggested that a provider of video dial tone could also be a programmer within certain limits. GTE said this concept might provide telephone companies the incentives necessary to build broadband-communications networks.

Give Telephone Companies Chance to Provide Video Services GTE discussed the types of services it could provide to supplement existing cable TV: "Although cable has greatly expanded its video news and entertainment offerings, it has failed to explore aggressively new two-way interactive services. Innovative, interactive educational, medical, financial and other informational services using video have not come forth from the cable industry, despite the high hopes of the 1970s. It is time to give telephone companies a chance to provide them."

GTE then described the need to develop a network with greater capacity and selections than the present cable-TV network: "Another technical limitation relates to the way cable today transmits video signals to the home." GTE said that cable's current technological approach is an excellent way to provide many channels to the customer with a video picture using today's standards; however, this technology will not be sufficient for the advanced services and capacity required in the next century. High-definition television (HDTV) was cited as an example of evolving technology requiring greater capacity in the future.

GTE also discussed the limitations of other potential competitors to cable TV: "Existing media do not provide close substitutes for today's cable service. There are a number of viewing alternatives to cable that partially compete (such as VCR tape rentals, broadcast television and home dish satellite service). However, these services constitute a relatively small portion of today's cable service. Integrated, switched, digital-telephone broadband networks are the best potential competition for coaxial cable TV because they are a superior, rather than a partial, substitute."

#90061p0220 03/02/1990 ~PR Newswire

NEW YORK (MARCH 2) PR NEWSWIRE - Piedmont Management Company Inc. (NASDAQ: PMAN) today reported 1989 annual earnings of $1.57 per share and $0.16 per share for the fourth quarter. This compares with earnings of

$2.04 per share and $1.20 per share for the 1988 year and fourth quarter, respectively.

Consolidated net income for the year was $8.5 million, a decline of 22 percent from $10.8 million a year ago. For the fourth quarter, net income was $874,000, compared to net income of $6.4 million in the 1988 period.

Reinsurance pre-tax operating income in 1989 was $10.5 million, compared to $14.6 million for 1988. The 1989 results include pre-tax realized investment gains of $6.3 million. During the fourth quarter of 1989, reinsurance pre-tax operating income was $1.5 million, and included pre-tax realized investment gains of $1.2 million. This compares with pre-tax operating income of $7.6 million for the 1988 period including realized investment gains of $1 million. Also during December 1989, a $1 million foreign translation loss was realized on the sale of RECO's London reinsurance subsidiary.

The combined effects of an unusual number of catastrophe losses, several other large fire and weather related losses and substantial strengthening of loss reserves on prior years' casualty business, resulted in a significant decline in underwriting results for RECO. The combined ratio, computed on a generally accepted accounting principles basis, was 119.3 percent in 1989 compared to 106.4 percent for 1988.

Earned premiums, excluding the effects of a $7.5 million increase for retrospective premiums, fell 11 percent in comparison to 1988, reflecting both competitive market conditions and a decision to reduce the level of casualty business. Major catastrophe losses, notably Hurricane Hugo and the Phillips Petroleum chemical plant explosion, amounted to $3.0 million and $1.2 million, respectively, on a pre-tax basis. During the year, pre-tax loss adjustment expenses of $1.9 million were incurred relating to the settlement of litigation connected with the 1986 fire loss at the Dupont Plaza Hotel in Puerto Rico.

Based upon a reevaluation of the loss trends for RECO's long-tail casualty business, the related loss and loss adjustment expense reserves relating to prior years were strengthened approximately $21 million for the year, of which $15 million was recorded during the fourth quarter of 1989. This adverse loss development was mitigated, to some extent, by favorable experience from surety business and profitable results for RECO's London reinsurance subsidiary in the fourth quarter, the period which preceded the sale of that company.

RECO's pre-tax investment income growth remains consistent with recent years and rose to $25.4 million for 1989, a 17 percent increase over the prior year. For the fourth quarter of 1989 pre-tax net investment income was $6.8 million, a 10 percent increase over the prior year period. Statutory policyholders' surplus declined moderately, to $86.7 million at

Dec. 31, 1989 from $87.9 million at the end of 1988.

Investment advisory pre-tax operating income increased to $1.4 million for 1989, up 48 percent over 1988. In the fourth quarter of 1989, investment advisory pre-tax income was $556,000, a 16 percent increase over the prior year period. Lexington Management Corporation, the company's principal investment advisory subsidiary, recorded an improvement in pre-tax results for the year, earning $2.7 million in 1989, in comparison to $2.5 million for 1988. In 1988, results for Lexington Capital Management and Lexington Plan Administrators were recorded on a equity accounting basis for part of the year, whereas for the full year in 1989 they are consolidated and included in investment advisory results. Although these companies continued to operate at a loss, efforts to change the direction of their business and contain costs throughout 1989 resulted in a reduction of operating losses in comparison with prior periods.

Piedmont's consolidated assets were $429.9 million and stockholders' equity was $111.4 million on Dec. 31, 1989. Book value per share increased to $21.00 as of Dec. 31, 1989 from $19.24 at the end of 1988.

Piedmont Management Company Inc. is a financial services company whose principal subsidiaries include The Reinsurance Corporation of New York (RECO), a property and casualty reinsurer, and Lexington Management Corporation, an investment advisory and mutual fund distribution company.

NEW YORK (MARCH 2) PR NEWSWIRE - Pan American World Airways has announced the resumption of nonstop service between New York's John F. Kennedy International Airport and West Berlin's Tegel Airport.

Beginning June 21, Pan Am will operate four weekly nonstop flights between the two cities, using widebody Airbus A310-300 aircraft with three classes of service.

Flight 70 will depart New York at 5:59 p.m. on Monday, Thursday, Friday and Sunday, and arrive in Berlin at 8:10 the following morning. Westbound, Flight 71 will begin operating on June 22, departing Berlin on Monday, Tuesday, Friday and Saturday at 10 a.m., with arrival scheduled in New York at 1:05 p.m.

Pan Am also plans to increase frequencies on its nonstop flights between New York and Moscow, Budapest and Warsaw this summer in order to accommodate the recent surge in travel to Eastern Europe and the Soviet Union.

In addition to the nonstop flights, Pan Am will continue to offer service to Berlin via Frankfurt, Munich and Hamburg.

The airline last offered nonstop U.S./Berlin service in 1988.

SAN DIEGO (MARCH 2) PR NEWSWIRE - Sun Harbor Financial Resources Inc. (OTC "Pink Sheets") announced preliminary unaudited financial results for fiscal 1989. The company reported revenues of $1,441,910 with after-tax profits of $92,648.

The $1,441,910 represented an increase of more than 133 percent from 1988's revenues of $618,121. Profits after tax also increased by a stellar 1,052 percent from the 1988 level of $8,042. The increased sales and profits reflects Sun Harbor's continuing growth and expansion into new markets with innovative financial products.

According to the company's president and CEO, Gary G. DeGano, "The Company expects continued growth and expansion due to the high demand for Sun Harbor's mortgage banking and brokerage services." Sun Harbor's business is concentrated in five areas: 1.) equity lending, 2.) loan servicing, 3.) residential mortgage banking services, 4.) commercial loan brokering services, and 5.) reconveyance and trustee services.

While Sun Harbor's wholly-owned subsidiaries, Sun Harbor Mortgage Inc. and Peninsula Funding Corp. maintain their headquarters in San Diego, the company maintains branch offices in Santa Rosa, and Newport Beach, Calif., and is currently opening offices in the Riverside, Calif., metropolitan area.

ATLANTA (MARCH 2) PR NEWSWIRE - Delta Air Lines (NYSE: DAL) today began its first nonstop service from Atlanta to Providence, R.I., giving the

airline its first service to the nation's smallest state.

The new service -- helps push the total of daily Delta flights from Atlanta to 429. The total is the largest for any single airline hub in the world, and offers Atlanta travelers more than 66,000 seats each day with nonstop service to 94 cities. Direct or one-stop connections are available to practically all of Delta's 175 cities worldwide.

In ceremonies today at Hartsfield Atlanta International Airport, dignitaries including Commissioner of Aviation Cal Carter joined with Delta Senior Vice President - Stations C. A. Thompson to cut the ceremonial ribbon officially inaugurating the new service.

"As we begin these flights to Providence, we at Delta face our most important challenge -- to continue to provide the same levels of service and the same high level of passenger satisfaction while at the same time adding flights and new destinations," Thompson said.

"Today, we operate in a highly competitive industry and Delta must work exceptionally hard to earn the business of travelers who have a wide choice of airlines and connecting hubs," he added. "We're selling Delta and our Atlanta hub every day in competition with other airlines and hubs in cities such as Nashville, Charlotte, Memphis, and Raleigh-Durham."

Delta will offer two daily flights to and from Providence with convenient morning and afternoon departures. Delta, one of the world's major airlines, operates more than 2,400 flights daily across its international route system. In conjunction with its Delta Connection partners, such as Atlantic Southeast Airlines here in Atlanta, Delta provides service to over 260 cities around the world.

JOHNSTOWN, PA (MARCH 2) PR NEWSWIRE - Johnstown Savings Bank, F.S.B. (NASDAQ: JSBK), an FDIC-insured institution, announced today that it had accepted the resignation of Richard B. Edwards, chairman of the board, president and chief executive officer of the bank.

Edwards has elected to retire from his positions as president and chief executive officer and also his membership on the bank's board of directors effective today. Edwards will remain available to the bank for consultation when necessary. The board of directors acknowledged Edwards' 31 years of dedicated service to the bank and stated that its members all wished Edwards well.

Subject to regulatory approval, the board of directors has appointed Patrick J. Coyne, executive vice president and chief lending officer, to the position of president and chief executive officer, effective today. Coyne will continue to fulfill his current responsibilities while assuming the additional position of president. The board of directors expressed its full support and confidence in Coyne and stated that the management transition being initiated today can be achieved smoothly and without any disruption of customer service.

John B. Gunter, a member of the bank's board of directors, will, subject to regulatory approval, assume the position of chairman of the board.

Johnstown Savings Bank is a federally chartered, FDIC-insured savings bank which conducts its business from five offices in the Greater Johnstown area and through its mortgage banking subsidiary, Standard Mortgage Corporation of Georgia, located in Atlanta.

NEW YORK (MARCH 2) PR NEWSWIRE - After negotiating through the night past the midnight contract deadline, the negotiating committee of the Writers Guild of America, East and West reached agreement at 12:30 p.m. today with CBS for a new three-year contract covering CBS network and local television and radio newswriters (some of whom also serve as producers), editors, desk assistants, researchers, promotion writers and graphic artists.

The 325 employees covered include Writers Guild, East news staffers at CBS network TV and radio in New York and Washington (including Guild members at "CBS Evening News with Dan Rather," "CBS Morning News," and other CBS network TV and radio shows); at WCBS-TV and WCBS Radio, New York; and at WBBM-TV and WBBM Radio, Chicago; and Writers Guild, West news staffers at KCBS-TV and KNX Radio in Los Angeles.

The agreement, which provides for wage increases, increases in special fees, improvements in employee safety, and other benefits, is subject to the approval of the membership at meetings to be held in New York, Washington, Chicago and Los Angeles on Monday evening.

A bitter seven-week strike by the Guild news staffers against CBS in 1987 led to the three-year contract that ended yesterday. If the agreement for the new pact unanimously recommended by the negotiating committee is approved by the WGAE Council, the WGAw board of directors, and the members the new contract will take effect retroactive to March 2, 1990.

Mona Mangan, executive director of the Writers Guild of America, East, who was chief negotiator in the talks, said, "The agreement that has been reached is equitable and makes progress in key areas. As in our recent settlement with ABC, we were able to fight off major attempts by management to dilute the jurisdiction of the Guild. If our members approve the settlement, we will have avoided the unfortunate situation of three years ago when management attempts to gut our contract forced us to strike."

PHILADELPHIA (MARCH 2) PR NEWSWIRE - Midway Airlines (NYSE: MDW) today began service of three daily round-trip flights to Providence Theodore Francis Green State Airport, R.I., from the carrier's hub at Philadelphia International Airport.

"We view Providence as one of the top business centers in the Northeast, and we would have been here sooner but facilities were not yet available," said Ted Phillips, vice president of planning. "Our advance bookings are strong, and we appreciate the support the citizens of Providence have given us."

Using McDonnell Douglas DC9-30 aircraft, Midway's new service to Providence operates as scheduled:

Philadelphia to Providence		Providence to Philadelphia	
Leave	Arrive	Leave	Arrive
10:22 a.m.	11:32 a.m.	7:00 a.m.	8:10 a.m.
3:45 p.m.	4.55 p.m.	12:22 p.m.	1:32 p.m.
8:57 p.m.	10:07 p.m.	5:50 p.m.	7:00 p.m.

Introductory fares between Providence and Philadelphia range from $59 to $99 one way and are valid March 2 through April 2. Fares between Providence and the eight Florida destinations Midway serves from Philadelphia range from $99 to $169 one way.

Post-introductory fares between Providence and Philadelphia and between Providence and the Florida destinations will be as much as $20 lower than those fares which presently exist in those markets.

Midway Airlines offers coast-to-coast service from its hubs at Chicago's Midway Airport and Philadelphia International Airport. Midway Airlines

and its wholly owned subsidiary, the Midway Commuter, serve 60 destinations in the United States, Canada, U.S. Virgin Islands and the Bahamas.

VANCOUVER, BRITISH COLUMBIA, (MARCH 2) PR NEWSWIRE - Castello Resources Limited (Vancouver: CZH) announced today that they have entered into a letter of intent to acquire a 20 percent interest in Gabe, Tomlian & Giles Advertising Inc., a South Florida-based agency for $200,000 U.S. and 500,000 common shares of Castello Resources. A formal agreement is to be executed within 30 days and will be subject to regulatory acceptance.

Gabe, Tomlian & Giles is the national merchandising and production agency for Blockbuster video(R), the largest and fastest-growing chain of video

superstores in America.

The agency also handles the advertising and marketing for Value Rent-A-Car (R) and variety of other major accounts. In 1989 Gabe, Tomlian & Giles was appointed jointly by Robes of the Realm North America Inc., a subsidiary of Castello Resources and Abbey Corporate Events of London, England, to be the agency of record for the ''Robes of the Realm'' North American tour.

''Robes of the Realm'' is a touring museum exhibit, featuring over 300 years of British coronation and ceremonial robes and other royal regalia with proceeds going to The Prince's Trust, a non-profit foundation benefiting disadvantaged youths established by HRH Prince Charles.

''We're pleased to be associated with Castello Resources because of our mutual interest in the five year ''Robes of the Realm Tour'', said John Giles, senior partner of Gabe, Tomliam & Giles.

Gary Brown, president of Castello Resources Inc., was equally pleased with the affiliation. ''Our association with Gabe, Tomlian & Giles, one of the fastest growing agencies in the southeastern United States, is the beginning of a new and exciting direction for Castello,'' he said. ''This association couldn't have come at a better time considering our management contract with the ''Robes of the Realm'' and other areas in which we'll be working with The Prince's Trust in North America.

The company has negotiated a private placement of 300,000 units at a price of $0.75 per unit for a total purchase price of $225,000. Each unit will contain one common share and one non-transferable share purchase warrant exercisable for two years at a price of $0.75 per share in the first year and $0.87 per share in the second year.

The proceeds from this placement will be used to fund Castello's participation in the agreement with Gabe, Tomlian & Giles Advertising Inc. The placement is subject to regulatory acceptance.

Castello Resources Limited files timely information with the S.E.C. under exemption rule 12g3-2(b) File No. 82-1918.

SALT LAKE CITY, (MARCH 2) PR NEWSWIRE - First Security Corp. (NASDAQ: FSCO), Salt Lake City, today completed the acquisition of United Savings Bank, Salem, Ore., which has assets of $202 million.

The bank, with nine full-service offices and a loan production office located in Oregon's Willamette Valley, opened for business today as part of the First Security system.

Spencer F. Eccles, First Security's chairman and chief executive officer, said, "We are extremely pleased that United Savings has joined us as an important member of the First Security team. It is a strong, profitable, well-capitalized and well-managed bank. Its tangible stockholders' equity ratio (stockholders' equity to total assets) is 9.69 percent."

"The bank has a proud history of responding quickly and creatively to customers' varied and changing financial needs. Its management is 'customer-driven,' the cornerstone of First Security's own business philosophy."

Under the terms of the merger agreement, United Savings shareholders will receive 0.7083 shares of First Security common stock for each outstanding share held of United Savings Bank stock. On March 1, First Security common stock closed at $32 bid, $32.25 asked; United Savings' common stock closed at $21.75 bid, $23 asked.

The acquisition brings to 182 the number of full-service banking offices operated by First Security in Idaho, Oregon, Utah and Wyoming. These

offices serve 110 communities.

Eccles said, "This merger marks our initial expansion into an adjoining state, and is our third acquisition since August 1989. We have a fourth acquisition pending in Utah. Part of our strategic plan is to make selective acquisitions to broaden our coverage of existing markets and to penetrate profitable new markets."

First Security Bank (of Oregon) will continue to operate as a savings bank. In addition to serving Marion, Deschutes and Washington Counties in northwestern Oregon, the bank will continue its activities along the I-5 corridor, which contains all the state's major population centers and extends the length of the state, from Portland in the north to Medford in the south.

With assets of $6 billion, First Security is the largest financial services organization headquartered in the Intermountain West. It is the oldest continuously operating multistate bank holding company in the United States. Other subsidiaries include an equipment leasing company, an investment management firm, two insurance companies and a discount brokerage firm.

BOSTON, (MARCH 2) PR NEWSWIRE - Houghton Mifflin Company (NYSE: HTN) announced today that it has signed an agreement in principle to sell its business education publication list for high schools to the Macmillan/McGraw-Hill School Publishing Company. The agreement in principle is contingent upon execution of a mutually satisfactory definitive agreement. The terms of the sale, which is expected to be completed by the end of March, were not disclosed.

In making the announcement, Harold T. Miller, Houghton Mifflin chairman and chief executive officer, said, "We continually review the markets in which Houghton Mifflin participates to ensure that our publishing plans are in concert with our corporate strategies. In this process, the company decided to cease publishing for the business education market in order to enhance our publishing activities for the academic segments of the secondary school market.

"The sale of our business education publications to Macmillan/McGraw-Hill provides a natural fit with its well-established Gregg line of business publications, which are part of the Glencoe/McGraw-Hill Educational Division."

CHICAGO, (MARCH 2) PR NEWSWIRE - Chicago Milwaukee Corp. (NYSE: CHG), a closed-end, non-diversified, management investment company, today reported results for the year ended Dec. 31, 1989. These results are reported on a "value" basis as required by the Investment Company Act of 1940, as amended.

Net investment income and realized and unrealized gain or loss on investments totaled $24,583,184 for 1989, compared to $19,289,700 for 1988. Net investment income for 1989 was $18,750,048, compared to $20,847,766 for 1988. Net realized and unrealized gain or loss on investments resulted in a gain of $5,833,136 in 1989, compared to a loss of $1,558,066 in 1988.

Net assets at Dec. 31, 1989, after year-end distributions, totaled $393,246,674, compared to $426,413,064 at Dec. 31, 1988. Net asset value per common share at Dec. 31, 1989, was $168.73 based on 2,142,438 shares outstanding, compared to net asset value per common share of $160.97 based on 2,451,708 shares outstanding at Dec. 31, 1988. The decrease in shares outstanding reflects the repurchase of 309,270 shares of common stock at a cost of $43.3 million, pursuant to the company's modified "Dutch Auction" tender offer in 1989.

In 1989, dividends of $5 per share were paid on the company's $5 prior preferred stock and $6 per share were paid on the company's common stock.

KALAMAZOO, MI (MARCH 2) PR NEWSWIRE - Prab Robots, Inc. (NASDAQ: PRAB) reported first-quarter sales of $3,874,000 and a net loss of $872,000 for the period ended Jan. 31, 1990. This compares with sales of $6,250,000 and net loss of $864,000 in the same period a year ago.

The company's low sales volume, down 38 percent from a year ago, accounts for a significant portion of the loss. Cost reduction programs throughout 1989 kept this quarter's loss of $872,000 comparable to last year's loss of $864,000 despite reduced sales. Savings associated with the consolidation of manufacturing facilities and the re-direction of the core business, as announced in November by Michael A. Gaskin, the company's new chief executive officer, were not yet realized in this past quarter.

The current backlog of $4,786,000 compares with $5,377,000 at the end of the last quarter and $4,137,000 a year ago.

BEVERLY, MA. (MARCH 2) PR NEWSWIRE - Parker Brothers, a division of the Tonka Corporation (NYSE: TKA), announced today that it has completed the agency review and selected New York-based Grey Advertising, Inc. (NASDAQ: GREY) to handle its $20 million account. Grey is one of the world's leading independent advertising and communications companies. It is among the top ten agencies both in the United States and the world with annual billings of over $3 billion.

"Grey has a reputation for creative excellence, a solid background of toy and game experience, sensitivity to our marketplace and the resources to support our aggressive plans for the nineties," said Lawrence I. Bernstein executive vice president of marketing, Parker Brothers. "We are eager to begin developing a partnership with the Grey team of advertising professionals," said Bernstein.

Edward H. Meyer, chairman and president of Grey, commented, "I'm thrilled to begin this partnership with the most venerable board-game maker in America. I'm particularly gratified to know that our creative was chosen over some of the best ad agencies in New York. Parker Brothers' games are the most innovative and fun games out there, and we're really going to let our creative cannons fly."

Parker Brothers is best known for the world-famous Monopoly(R) game, Clue(R) and Trivial Pursuit(R) games and Nerf(R) brand products.

Grey Advertising, Inc. also handles advertising for Kenner Products, Tonka Products and Tonka International, all of which are divisions of the Minnetonka-based Tonka Corporation.

PRINCETON, NJ (MARCH 2) PR NEWSWIRE - Rhone-Poulenc Inc. has completed its acquisition of the Marschall Dairy Products business from Miles Inc.

Marschall Dairy Products, an international developer, manufacturer and marketer of dairy ingredients, has U.S. production facilities in Madison, Wis., as well as facilities in France and Latin America. Marschall manufactures coagulants, starter cultures and starter media which are used primarily to transform milk into cheese.

"We are very pleased that Marschall, a company widely recognized for its innovation and quality, has become a part of Rhone-Poulenc," said Richard V. Kennedy, head of Rhone-Poulenc's recently formed worldwide Food Ingredients business. "We look forward to working with the Marschall people to integrate their business into the Rhone-Poulenc organization."

Rhone-Poulenc Inc., the American subsidiary of Rhone-Poulenc S.A., is headquartered in Princeton and has 70 manufacturing locations and more than 8,000 employees nationwide. Sales in 1989 were $1.6 billion.

Rhone-Poulenc S.A., headquartered in Paris, concentrates its activities in three areas: life sciences, advanced materials and specialty chemicals, and major organic and inorganic intermediates. The company operates in 140 countries and has 83,000 employees. Worldwide sales in 1989 were $12.8 billion.

Miles Inc. is the healthcare subsidiary of Bayer USA Inc., the U.S. management holding company of Bayer AG, West Germany. Miles, which is headquartered in Elkhart, Ind., employed more than 16,000 people in 1989 and had net sales of $2.13 billion.

FORT WORTH TX (MARCH 2) PR NEWSWIRE - Southland Royalty Co. ("Southland") advised the San Juan Basin Royalty Trust (the "Trust") today that litigation pending in New Mexico and Texas between Southland and others, and Gas Co. of New Mexico, a division of Public Service Co. of New Mexico ("PNM"), and Sunterra Gas Gathering Co. ("Sunterra"), a subsidiary of PNM, has been settled.

The litigation concerned three intrastate gas purchase agreements between Southland, as seller, and PNM and Sunterra, as purchasers, of gas produced in the San Juan Basin of New Mexico.

Because of the difficulty in determining the exact value of consideration received under the renegotiated contracts referred to above, Southland informed the Trust that it will not attribute value to quantity claims under the renegotiated contracts and the Trust shall receive 75 percent (the amount of its net overriding royalty interest) of any value that inures to those contracts.

The initial payment of $18,166,000 less $2,233,000 attributable to quantity claims and less applicable severance taxes, if any, is anticipated to be included in gross proceeds in calculating Royalty income to be distributed to Unit holders of record on June 30, 1990.

#90061p0296 03/02/1990 ~PR Newswire

LEBEC, CA (MARCH 2) PR NEWSWIRE - Tejon Ranch Company (AMEX: TRC) today reported 1989 net income from continuing operations of $2,445,000, or $0.19 per share, compared to $1,391,000 in 1988, or $0.11 per share. Net income, including continuing and discontinued operations, for 1989 was $2,580,000, or $0.20 per share, compared to $11,496,000, or $0.91 per share for 1988.

The principal reason for the reduction in net income in 1989, including continuing and discontinued operations, compared to 1988 was the sale of the company's Seed Division in June 1988. This sale accounted for approximately $9,200,000 ($.73 per share) of total 1988 earnings, after taxes of approximately $6,100,000.

Net income from continuing operations improved in 1989, due primarily to increased farming revenues, the receipt of a cash payment associated with the settlement of a gas line right-of-way issue, and increased interest income. These increases were partially offset by cattle feed and land planning expenses which were higher in 1989 as compared to 1988. Revenues for 1989 from continuing operations were $17,326,000 compared to $14,097,000 for the same period in 1988.

Tejon reported fourth quarter net income from continuing operations of $845,000 compared to $360,000 for the same period in 1988. Revenues were $7,200,000 for the fourth quarter of 1989 compared to $5,829,000 for the same period in 1988. The improvement in fourth quarter earnings is attributable to increased farming revenues and interest income.

The company's agricultural operations are seasonal, and earnings can vary substantially from quarter to quarter.

The board of directors today declared a cash dividend to shareholders of two and one-half cents ($0.025) per share. The dividend will be payable to shareholders of record as of the close of business on May 22, 1990, with payment to be made on June 8, 1990.

Tejon Ranch Company owns approximately 270,000 acres some 60 miles north of Los Angeles and 15 miles southeast of Bakersfield, Calif. Its divisions engage in a variety of agricultural and land management activities,

including cattle production, farming, oil and minerals and commercial land use.

VALLEY FORGE, PA (MARCH 2) PR NEWSWIRE - UGI Corp. (NYSE: UGI) reported that its Gas Utility Division today filed a revised proposal with the Pennsylvania Public Utility Commission to recover $35.7 million in pipeline take-or-pay charges over the next five years.

James A. Sutton, chairman and chief executive officer of UGI, said the utility's current and expected take or-pay liabilities are approximately $39.7 million. Sutton said the utility proposes to absorb approximately $4 million and recover the remaining $35.7 million from all of its customers over a five-year period beginning April 16, 1990.

The Gas Utility Division serves 219,000 customers in 14 central and eastern Pennsylvania counties.

Today's filing amends a September 1989 request which was rejected by the Pennsylvania regulators. The Commission permits recovery of take- or-pay charges through a surcharge if a utility agrees to absorb a reasonable portion of them.

The take-or-pay charges result from payments by pipeline suppliers to producers to settle past gas purchase contracts. Federal regulators have approved the pass-through of these costs by the pipelines to local utilities.

As reported, UGI, a gas and electric utility and national distributor of propane, recorded a charge of $3.9 million in the fourth quarter of 1989, reflecting its estimate of unrecoverable take-or-pay costs.

ARLINGTON, VA (MARCH 2) PR NEWSWIRE - Gannett Co., Inc. (NYSE: GCI) has reached an agreement with Cowles Media Co. to purchase the Great Falls Tribune, in Great Falls, Mont., for $41 million.

The Great Falls Tribune traces its roots to the Sun River Sun, first published in 1884. In 1885, the newspaper began publishing as the Great Falls Tribune.

The Monday-Saturday circulation of the Tribune is 34,100. Sunday circulation is 41,000.

The acquisition of Montana's second-largest newspaper will bring Gannett's number of daily newspapers to 83, including USA Today. Montana represents the 41st state in which Gannett will have operations.

Gannett is a nationwide news and information company that publishes, in addition to its daily newspapers, 52 non-daily publications, including USA Weekend, a newspaper magazine. It operates 10 television stations, 16 radio stations, Gannett News Services and the largest outdoor advertising company in North America.

Gannett also has marketing, television news and program production, research satellite information systems and a national group of commercial printing facilities. Gannett currently has operations in 40 states, the District of Columbia, Guam, the Virgin Islands, Canada, Great Britain , Hong Kong, Singapore and Switzerland.

WICHITA, KS (MARCH 2) PR NEWSWIRE - Brite Voice Systems Inc. (NASDAQ: BVSI) announced plans today to move into new corporate headquarters in Wichita in July of 1990.

On March 1, 1990, the company entered into a lease with the City of Wichita to occupy a 40,000 square foot office facility located at 7309 East 21st on the city's northeast side.

"We presently lease approximately 18,000 square feet of office space which is no longer adequate to satisfy the needs of our expanding company," stated Stan Brannan, Brite's president and CEO. "This facility provides us with the space necessary to expand our operations. We will also have the ability to add on to the existing structure as our needs dictate." Brite currently employs over 116 persons compared to 50 at the beginning of 1989.

The facility was constructed in 1984 utilizing the proceeds of Industrial Revenue Bonds maturing in November 1997. After paying the outstanding priciple balance of $1,770,000, the company will have the option to purchase the facility for $100.

Brite Voice Systems manufactures and sells audiotex and interactive voice

response computer systems in the United States and abroad. These systems are sold to various industries such as "800" and "900" service bureaus, telephone companies, newspapers, television stations, real estate companies, hospitals and cellular telephone providers. The company recently reported a revenue growth of 157.6 percent for 1989 compared to 1988 and has reported profits for the last 14 consecutive quarters.

NEW YORK (MARCH 2) PR NEWSWIRE - Colgate-Palmolive Company (NYSE: CL) announced today that the merger of VPI Acquisition Corp. and Vipont Pharmaceutical, Inc. (NASDAQ: VLAB) became effective this morning with the filing of a "short form" merger certificate under Delaware law. As a result of the merger, Vipont is now a wholly owned subsidiary of Colgate-Palmolive Company.

The merger follows the conclusion of Colgate's $14 per share cash tender offer for Vipont shares. In the offer, which expired at 5 p.m. on Feb. 22 Colgate received valid tenders of approximately 96 percent of the outstanding Vipont shares, according to a final count completed by the depositary yesterday.

Vipont stockholders who did not tender their shares but who surrender their shares in the merger will receive $14 per share in cash. Delivery instructions and related merger information will be mailed to all remaining Vipont stockholders as soon as practicable.

Colgate is the leader in the global oral care market with the world's number one selling toothpaste and a full line of toothbrushes, mouthrinses and dental professional products. In addition, it is one of the world's leading consumer products companies, marketing its quality products in more than 160 countries. The company's internationally recognized brand names include Colgate, Palmolive, Ajax, Fab, Irish Spring, Hill's Science Diet and Hill's Prescription Diet.

NEW HAVEN, CT (MARCH 2) PR NEWSWIRE - Cognitive Systems, Inc. (NASDAQ: CSAI) announced financial results for the company's fiscal year ended Nov. 30, 1989. During that period, operating revenue was $3,412,000 versus $2,299,000 for the fiscal year ended Nov. 30, 1988, and the company's operating loss in fiscal year 1989 was $320,000 as compared to an operating loss of $1,663,000 for the prior fiscal year.

Cognitive Systems, Inc. reported net earnings of $82,000, or $.02 per

share, for the fiscal year ended Nov. 30, 1989. This was primarily the result of the settlement of litigation during the year. Reimbursable expenses to subcontractors related to the company's contract with Defense Advanced Research Projects Agency in the amount of $945,000 had the effect of increasing both revenues and expenses during fiscal year 1989 by the same amount.

"On an operating basis, we achieved a breakeven rate by the end of the year. We are pleased by this improvement in our operations and are hopeful these improvements will continue," said Steve Mott, president and chief executive officer. "Working capital increased from $203,000 at the end of fiscal year 1988 to $278,000 at the end of fiscal year 1989 due to the settlement of certain litigation. While our working capital did increase, we are continuing our efforts to obtain additional funding."

Cognitive Systems, Inc. specializes in building software applications that translate text keyboard input rendered in normal, unstructured prose into computer commands and inquiries.

DENVER (MARCH 2) PR NEWSWIRE - Ideal Basic Industries Inc. (NYSE: IDL) today reported that a class action suit on behalf of all minority stockholders of Ideal had been filed in the Court of Chancery of the State of Delaware, alleging a "coercive, manipulative, unfair and overreaching plan to acquire, through a merger, the minority stockholders' interest in Ideal for inadequate consideration."

The suit was brought by two individuals purporting to be shareholders of Ideal.

Holderbank Financiere Glaris Ltd., Holnam's ultimate parent, as well as seven individuals, Peter Byland, Robert A. Bicks, Max D. Amstutz, Erwin

Maechler, Anton E. Schrafl and Marc R. von Wyss, each of whom is or was an Ideal director, and Thomas Schmidheiny, who is the largest

Holderbank Financiere Glaris, a publicly held Swiss corporation. Ideal was not named as a defendant.

Each of the defendants believes the complaint to be without merit and intends to defend against these and any other claims or actions that may be brought based on similar allegations and seeking similar relief.

Shareholders of Ideal will be voting at a special meeting on March 7, 1990 on the merger of the company with and into Holnam Inc. Ideal had been advised by Holnam that it intends to vote in favor of the merger on March 7, 1990 and to effect the merger promptly thereafter.

KANSAS CITY, MO (MARCH 2) PR NEWSWIRE - Torotel, Inc. (AMEX: TTL), the manufacturer of magnetic electronic components, announced reduced revenues and a loss for its three and nine months ended Jan. 31, 1990.

For the three months, net sales were $1.2 million compared with $2.5 million for the same period last year, a 51.4 percent decrease. The third quarter net loss was $574,000, equal to 22 cents per share, versus a gain of $87,000, or 3 cents per share, in fiscal 1989.

Net sales for the nine months ended Jan. 31, 1990, were 12.8 percent lower $6.0 million compared with $6.9 million for the year to-date in fiscal 1989. The net loss for the most recent nine months was $463,000, equal to 18 cents, contrasting with a gain of $259,000, or 10 cents per share, for the same period last year.

Torotel, Inc. specializes in the design and high-volume manufacture of a broad line of precision magnetic components used in military and industrial electronic systems. These components, which include transformers, chokes and toroidal coils, are sold to original equipment manufacturers for use in such products as avionic equipment, marine communication and navigation, telecommunications, and weapons fire control systems. Torotel has a customer base of more than 400 companies and over 85 percent of its sales are for defense applications.

HAUPPAUGE, NY (MARCH 2) PR NEWSWIRE - FBX Corporation (NASDAQ: FBXC) announced its results of operations for the year ended Nov. 30, 1989.

The company sustained a net loss of $3,248,625 (74 cents per sharee) as compared to a net loss of $505,894 (11 cents per share) for the prior year. Net sales for fiscal 1989 were $16,437,013 as compared to $12,316,318 for fiscal 1988. Gross profit as a percentage of sales decreased to 14.6 percent in fiscal 1989 from 40.6 percent for the prior year.

The company's auditors' report for the year ended Nov. 30, 1989, stated that as a result of the company's recurring losses from operations and net deficit working capital, substantial doubt has been raised about the company's ability to continue as a going concern. The company has previously announced a proposed merger with Pittway Corporation. The merger, which is subject to stockholder approval, provides for the payment of 75 cents per share to all stockholders.

FBX Corporation through its wholly owned subsidiary Fire Burglary Instruments, Inc. is a leading manufacturer of electronic security and automated fire and burglary alarm signal processing products, which are used to monitor and report fires, intrusions and other critical events detected in commercial facilities and residences. The company's headquarters and manufacturing facilities are in Hauppauge.

BEVERLY HILLS, CA (MARCH 2) PR NEWSWIRE - George Rathman, chairman of The Prudential California Realty, and Rick Merrill, president of the firm's California Central Region, recently announced that they have established an exclusive marketing arrangement with Sterling Trust Real Estate, Taiwan's No. 1 ranked real estate company.

The agreement, the first of its kind between an American and a Taiwanese real estate company, will include widespread distribution of The Collection, the firm's state-wide luxury home magazine. Various sections of the magazine, which premieres in California this spring, will be translated into Chinese and targeted to affluent investors in Taiwan.

The agreement between the two firms, the latest of The Prudential California Realty's international marketing efforts, includes a detailed referral arrangement, with exclusive exposure throughout Taiwan and state-wide exposure in California.

According to Merrill, "The Taiwanese have historically been aggressive purchasers of residential real estate in California. We recognize that trend and welcome the chance to foster this relationship."

Sterling Trust Real Estate has enjoyed tremendous growth during the few years and will have over 50 offices in Taiwan by the end of 1990.

"Our relationship with Sterling Trust will enhance our state-wide sales capabilities because of Taiwan's tremendous capital to invest," notes Rathman. Taiwan, one of the world's leading surplus nations, currently exceeds $60 billion.

With over 4,000 sales associates and 75 offices ranging from San Diego to San Francisco, The Prudential California Realty provides a comprehensive marketing and distribution system involving Hong Kong, Korea, Japan and now Taiwan.

BLOOMINGTON, IL (MARCH 2) PR NEWSWIRE - State Farm Mutual Automobile Insurance Co. today reported 1989 earned premiums and membership fees of $16.4 billion, an increase of 11.8 percent over 1988. With an after-dividend underwriting loss of $1.6 billion and income from investments of $1.9 billion, net income from all sources after federal taxes was $419.4 million.

Comparable 1988 figures: Earned premiums and membership fees, $14.6 billion; after-dividend underwriting loss, $1.0 billion; income from investments, $1.7 billion; net income after federal income tax, $720.6 million.

Assets increased from $30.9 billion in 1988 to $35.5 billion in 1989. The company reported 1989 claim losses and loss expenses of $15.2 billion, up 17.1 percent from the 1988 figure of $12.9 billion.

State Farm Mutual's policyholder protection fund totaled $9.4 billion at the end of 1989 and the investment fluctuation reserve came to $3.4 billion.

The State Farm group insures 32 million cars and 11.4 million homes in the United States and Canada.

Included in the financial results of State Farm Mutual is an underwriting loss $90.3 million on earned premiums of $810.5 million from its health insurance operation.

State Farm Mutual's property insurance affiliates, State Farm Fire and Casualty Co., State Farm General Insurance Co. and State Farm Lloyds, reported an after-dividend underwriting loss of $1.1 billion on earned

premiums of $5.2 billion. Most of the loss is attributable to record claim payments for natural catastrophes during 1989, including Hurricane Hugo and the northern California earthquake.

This loss, combined with income from investments of $718.0 million, resulted in net loss (after federal income tax) of $141.6 million, compared with a $717.3 million net gain in 1988. Assets increased from $9.4 billion in 1988 to $10.5 billion in 1989.

NEW YORK (MARCH 2) PR NEWSWIRE - Russ Togs, Inc. (NYSE: RTS) has acquired the exclusive United States and Mexican rights to Diesel, of Italy, one of Europe's largest manufacturers of men's and women's designer jeans and casual sportswear, as well as accessories. The announcement was made jointly today by Kenneth Sitomer, president of Russ Togs, and Renzo Rosso, owner and founder of Diesel SPA.

Diesel is a major influence in the fashion-forward European market, where its volume exceeds $135 million annually. In the U.S., the products are presently carried by fine specialty stores.

Recently, the trend setting Italian company signed a similar agreement for its Japanese rights with the Mitsubishi company.

The Diesel Company in the United States will function as a completely autonomous operation with its own sales force and marketing team. It will maintain its own separate headquarters at 1411 Broadway, New York. The management consistency of image, Diesel SPA's advertising and marketing divisions will work closely with Buckley/DeCerchio to advertise and promote the line throughout the U.S.

The company's initial product launch, planned for Spring 1991, will be targeted to better department and specialty stores. Current plans call for the introduction to focus on both men's and women's jeans and coordinated accessories. According to Sitomer, the 1992-93 marketing plans for Diesel include a major product line for both girls and boys.

ATLANTA (MARCH 2) PR NEWSWIRE - Uptons, Inc., a leading Southeastern fashion retail chain, continues expansion in the Atlanta area with two store openings on Friday, Mar. 9.

A 55,000 square foot facility will open in Marietta's Providence Square, located across from Merchants' Walk on Roswell Road (Highway 120), just west of Johnson Ferry Road. Renovated Conyers Crossing Shopping Center in Rockdale County will feature a 50,000 square foot Uptons store, located at the intersection of Highway 138 and Highway 20. Both stores will support the two-day grand opening celebration Mar. 9 and 10, with live music and entertainment for store visitors, free T-shirts for the first 250 shoppers a grand opening sweepstakes, balloons and other prizes.

Uptons features branded and private label fashions for women, men and children, as well as intimate apparel, accessories, fragrances, jewelry and shoes.

Uptons offers a dominant assortment of fashion-forward merchandise at competitive prices, according to David Layne, president of Norcross-based Uptons. "We see the Marietta and Conyers locations as a natural means of intensifying our presence in the Atlanta market and are looking forward to serving our new customers."

With the opening of two stores in metro Atlanta, along with a new location in Chesapeake, Va., Uptons has grown to 26 stores since opening its first three stores in Atlanta during the fall of 1985. Uptons now has 11 locations in Atlanta as well as stores throughout Tennessee, North Carolina, South Carolina and Virginia.

Uptons further demonstrates expansion with three store openings planned for late summer of this year. Locations include Peachtree Corners Shopping Center in Norcross, Perimeter Square in Athens and a second store in Gastonia, N.C.

The chain has recently hired an estimated 200 employees to service the two new Atlanta locations.

Uptons at Providence Square and Conyers Crossing open at 9 a.m. on Friday, Mar. 9.

WICHITA, KS (MARCH 2) PR NEWSWIRE - Air Midwest Inc. (NASDAQ: AMWI) reported an operating profit for the year ended Dec. 31, 1989 of $1,199,000 as compared with an operating profit of $3,347,000 for 1988.

The net loss at Dec. 31, 1989 was $2,393,000 (61 cents per share) as compared with a net loss of $1,383,000 (36 cents per share) at year-end 1988.

For the fourth quarter of 1989, the company's operating results reflect an operating loss of $1,476,000 compared to an operating profit of $1,398,000 registered by the company in the like period of 1988. The net loss for the fourth quarter of 1989 was $2,318,000 while in 1988 for the like period, the company had a net profit of $303,000.

Both the quarterly and annual results for Air Midwest reflect the effect of the Braniff Inc. bankruptcy in September 1989.

Operating revenues for 1989 increased to $81,100,000 (9.4 percent) from $74,099,000 in 1988. Operating expenses increased by $9,149,000 (12.9 percent) from $70,752,000 in 1988 to $79,901,000 in 1989. Robert L. Priddy president and chief executive officer, attributed the fourth quarter loss to a significant reduction in traffic and excess capacity resulting from the downsizing of the company's Kansas City hub after the bankruptcy filing by Braniff.

KIRKLAND, WA (MARCH 2) PR NEWSWIRE - McCaw Cellular Communications, Inc. (NASDAQ: MCAWA) today announced that it has executed a $3.0 billion Bank Credit Facility with a 43-bank syndicate led by Morgan Guaranty Trust Co., The Toronto-Dominion Bank, Provident National Bank (an affiliate of PNC Financial Corporation) and Kansallis- Osake-Pankki of Finland.

In conjunction with approximately $1.3 billion it received on Feb. 27 from the sale of its south-central cellular properties to Contel Cellular Inc., McCaw Cellular expects to use proceeds of the Credit Facility to complete its tender offer for 21.9 million shares of LIN Broadcasting. That offer is presently scheduled to expire at midnight tonight (New York City time), Friday, Mar. 2. Under its present timetable, the company plans to accept for payment on Monday, Mar. 5, 21,900,000 validly tendered shares of LIN subject to the conditions to the offer being satisfied at that time. As of the close of business on Thursday, Mar. 1, approximately 30.4 million LIN shares had been tendered in the offer McCaw Cellular said.

CONTACT: Donald Guthrie of McCaw Cellular Communications, 206-827- 4550, or J. Garrett Blowers or John McInerney of the Abernathy/MacGregor Group, 212-371-5999, for McCaw Cellular
